a manga artist survival guide: The Essential Guide to World Comics Tim Pilcher, 2005-10-24 Most people's perception of comicbooks is one of superheroes like Spider-Man and Batman. But it belies an art form that is not unique to the UK and USA. Practically every country in the world has its own thriving comicbook industry. In some countries like France, they are a highly regarded form of expression – The Ninth Art. While in Japan, comics are so integral to its culture and society that it would be impossible to imagine the country without them. The cultural impact of comics cannot be underestimated. Or that comicbooks are often used to convey a very serious message (only recently a comic featuring Superman was distributed to 500,000 children in Kosovo to teach them how to spot and avoid land mines)? Arranged geographically, this book assesses the medium in every major area of the world, discussing the history of the genre, the comics and characters, the publishers, creators and artists. Regions covered include the UK and United States, central Europe (France, Belgium, Germany, Spain, Italy), Eastern Europe, Scandinavia, Japan and Asia, Africa, India, Central and South America, and Australasia. Including key feature spreads and a wealth of colour images – many of them unseen – this book is the first of its kind to provide a global picture of an often-underrated art form.

a manga artist survival guide: The Daily Zoo Chris Ayers, 2008 In the spring of 2005 Chris

Ayers was busy working as a concept artist in the Hollywood film industry. That came to a crashing halt when he was diagnosed with leukemia on April first. After a year-long period of treatment and recovery he started a sketchbook called *The Daily Zoo* on the anniversary of his diagnosis. Over the next 365 days he would draw one animal each day, challenging both his self-discipline and imagination. Most importantly it would allow him the focused opportunity to celebrate the gift of each healthy day. The pages of *The Daily Zoo: Volume One* are chock-filled with 365 distinct critters, ranging from curious pandas to sinister hyenas, athletic aardvarks to zealous zebras, and his choice of artistic styles are as diverse as his subject matter. Alongside the images Ayers, whose big screen credits include *Men in Black II*, *X-Men 3*, and the *Alien vs. Predator* films, ties in commentary about his cancer experience, the sources of his artistic inspiration and his creative methods. Whether you're a beginning artist or a seasoned pro, this book will leave you inspired to grab the nearest pencil, pen, brush or crayon and start drawing!
