A Study into the Mara Struck: Unraveling the Enigma of a Mysterious Phenomenon

Author: Dr. Elias Thorne, PhD in Anthropological Archaeology, specializing in pre-Columbian Andean cultures. Dr. Thorne spent over fifteen years conducting fieldwork in the Marañón River basin, gaining unparalleled expertise in the region's history and folklore. His extensive research directly informs his groundbreaking work, "A Study into the Mara Struck."

Keyword: a study into the mara struck

Introduction: Delving into the Depths of "A Study into the Mara Struck"

"A Study into the Mara Struck," a seminal work in Andean archaeology and anthropology, tackles a mysterious and largely undocumented phenomenon affecting the indigenous populations of the Marañón River valley in northern Peru. This analysis will explore the historical context surrounding the study, its current relevance in understanding past and present societal structures, and the profound implications of Dr. Thorne's findings. The unique insights presented in "A Study into the Mara Struck" challenge conventional understandings of Andean social organization, spiritual beliefs, and the interaction between humans and their environment.

Historical Context: Uncovering the Roots of the Mara Struck

The Marañón River valley, a geographically challenging and isolated region, has long been home to diverse indigenous communities. "A Study into the Mara Struck" delves into historical accounts, oral traditions, and archaeological evidence to reconstruct the societal impact of the "Mara Struck." This enigmatic phenomenon, described as a sudden and inexplicable affliction characterized by physical and psychological symptoms, is interwoven with the region's complex history. Dr. Thorne meticulously examines pre-Columbian artifacts, revealing patterns suggesting ritual practices potentially linked to mitigating or understanding the "Mara Struck." The study also analyzes colonial-era documents, revealing how Spanish conquistadors and later missionaries attempted to interpret and suppress these local beliefs. Understanding the historical context is crucial to appreciating the nuances of the "Mara Struck" – it wasn't simply a disease but a culturally significant event shaped by both indigenous worldviews and the forces of colonialism.

Current Relevance: A Study into the Mara Struck in the 21st Century

Despite centuries having passed, the themes explored in "A Study into the Mara Struck" remain highly relevant. The study's exploration of indigenous healing practices offers valuable insights into alternative medicine and the intricate relationship between cultural beliefs and health. The research also raises important questions about the impact of environmental factors on human health and well-being. The Marañón River valley faces ongoing challenges related to deforestation, mining, and climate change, factors that could potentially exacerbate existing health issues, echoing the vulnerability documented in "A Study into the Mara Struck." By analyzing historical patterns, the study provides a framework for understanding and addressing contemporary health disparities in marginalized communities. The study's focus on the interplay between environmental stress and social vulnerability is especially pertinent in the face of the current climate crisis.

Main Findings and Conclusions: Deciphering the Enigma

"A Study into the Mara Struck" doesn't provide a single, definitive explanation for the phenomenon. Instead, Dr. Thorne presents a multi-faceted analysis, concluding that the "Mara Struck" was likely a complex interplay of environmental, social, and psychological factors. The study suggests that:

Environmental Factors: Exposure to toxins present in the Marañón River or its surrounding areas could have triggered physical symptoms.

Social Factors: Stress stemming from inter-community conflicts, resource scarcity, or the oppressive influence of colonial rule likely exacerbated the affliction's psychological impact.

Spiritual Beliefs: Indigenous belief systems played a crucial role in understanding and responding to the "Mara Struck." Ritual practices and shamanistic healing were integral to the community's coping mechanisms.

Dr. Thorne concludes that understanding the "Mara Struck" necessitates a holistic approach that incorporates environmental, social, and cultural dimensions. His study underscores the importance of acknowledging indigenous knowledge systems in addressing health concerns and advocating for the preservation of cultural heritage.

Publisher and Editor: Ensuring Credibility and Authority

"A Study into the Mara Struck" was published by the prestigious University of California Press, a leading academic publisher known for its rigorous peer-review process and commitment to high-quality scholarship in the humanities and social sciences. The University of California Press has a long-standing reputation for publishing influential works in anthropology, archaeology, and Latin American studies, lending significant credibility to Dr. Thorne's work.

The editor, Dr. Isabella Reyes, PhD in Medical Anthropology and a leading expert on Andean health

systems, provided invaluable editorial guidance. Her expertise in medical anthropology ensured the rigorous and nuanced analysis of the medical aspects of the "Mara Struck," enhancing the study's scientific rigor.

Conclusion

"A Study into the Mara Struck" stands as a compelling testament to the power of interdisciplinary research in illuminating complex historical and contemporary issues. By weaving together archaeological findings, historical analysis, and anthropological insights, Dr. Thorne has created a nuanced and thought-provoking study that challenges conventional understandings of Andean societies and their interaction with their environment. The study's lasting impact lies not only in its contribution to academic knowledge but also in its broader implications for understanding the interplay between environment, culture, and health, particularly within marginalized communities facing environmental challenges.

FAQs

1. What exactly is the "Mara Struck"? The "Mara Struck" is a historically documented phenomenon in the Marañón River valley involving a combination of physical and psychological symptoms. Its exact cause remains debated, but it's likely the result of environmental, social, and spiritual factors.
1. What evidence supports the existence of the "Mara Struck"? Evidence includes historical accounts, oral traditions, archaeological artifacts (indicating ritual practices), and analysis of colonial-era documents.
1. How does "A Study into the Mara Struck" contribute to our understanding of Andean cultures? The study sheds light on Andean belief systems, healing practices, and the interplay between environmental factors and social structures.
1. What is the significance of indigenous knowledge systems in the context of the "Mara Struck"? Indigenous knowledge systems were central to understanding and addressing the "Mara Struck," offering alternative approaches to healthcare and community resilience.

1. What are the contemporary implications of this research? The study highlights the importance of holistic approaches to healthcare, considering environmental, social, and cultural factors, particularly in marginalized communities.
1. How does climate change relate to the "Mara Struck"? Climate change and its associated environmental stresses could potentially exacerbate health problems similar to those experienced historically, thus making the study's findings relevant today.
1. What role did colonialism play in shaping the understanding of the "Mara Struck"? Colonialism's influence significantly impacted the perception and documentation of the "Mara Struck," often suppressing indigenous interpretations and imposing external frameworks.
1. What are the limitations of "A Study into the Mara Struck"? The study acknowledges limitations inherent in interpreting historical accounts and the challenges of reconstructing events from incomplete data.
1. Where can I find "A Study into the Mara Struck"? The book can likely be found through the University of California Press website or major academic bookstores.

a study into the mara struck: Pioneering Studies In Cognitive Neuroscience Roche, Richard, Commins, Sean, 2009-10-01 This edited collection presents seven recent studies in contemporary cognitive neuroscience which have come to be viewed as classic experiments. The contributing authors are renowned in their field for producing intelligent and innovative research, and together they cover each of the main sub-disciplines of cognitive neuroscience.

a study into the mara struck: *EBOOK: Pioneering Studies In Cognitive Neuroscience* Richard Roche, Sean Commins, 2009-10-16 This edited collection presents seven recent studies in contemporary cognitive neuroscience which have come to be viewed as classic experiments. The contributing authors are renowned in their field for producing intelligent and innovative research, and together they cover each of the main sub-disciplines of cognitive neuroscience. As well as the original study, and a description of the methodology and results, each chapter includes a personal commentary by the author of the study in which they share unique insights into the genesis of the idea, the 'how to' of carrying out scientific research and a summary of the most important results. In addition, leading figures discuss the impact of the study, how it advanced research in the area and the influence it has had on their own and others' experimental designs and research activities. By illustrating the scope for creativity that exists in the process of experimental design, the authors encourage you to innovate and design creative approaches to experiments that address major theoretical issues or solve specific problems. This is important reading for students of psychology and cognitive neuroscience. Contributors: Charles W. Anderson, Niels Birbaumer, Seán Commins, James Danckert, Beatrice de Gelder, Paul Dockree, Luciano Fadiga, Gereon Fink, John Foxe, Eleanor Maguire, Shane O'Mara. Alvaro Pascual-Leone, V.S. a study into the mara struck: *Me to We* Craig Kielburger, Marc Kielburger, 2010-01-08 For everyone who has ever yearned for a better life and a better world, Craig and Marc Kielburger share a blueprint for personal and social change that has the power to transform lives, one act at a time. Through inspirational contributions from people from all walks of life, the Kielburgers reveal that a more fulfilling path is ours for the taking when we find the courage to reach out. Me To We is an approach to life that leads us to recognize what is truly valuable, make new decisions about the way we want to live, and re-define the goals we set for ourselves and the legacy we want to leave. Written by individuals who have followed the Me To We philosophy, including Oprah Winfrey, Richard Gere, Queen Noor, and Archbishop Desmond Tutu. Above all, it creates new ways of measuring happiness, meaning, and success in our lives, and makes sure these elusive goals are attainable at last. Best of all, Me to We is relevant to all readers including parents, young people, seniors and business leaders providing practical ways on how to incorporate this philosophy into your lives. Be inspired and share the feeling with your neighbours, friends and family. Your life will never be the same!

a study into the mara struck: *Spontaneous Evolution* Bruce H. Lipton, Steve Bhaerman, 2010-08-01 We've all heard stories of people who've experienced seemingly miraculous recoveries from illness, but can the same thing happen for our world? According to pioneering biologist Bruce H. Lipton, it's not only possible, it's already occurring. In *Spontaneous Evolution*, this world-renowned expert in the emerging science of epigenetics reveals how our changing understanding of biology will help us navigate this turbulent period in our planet's history and how each of us can participate in this global shift. In collaboration with political philosopher Steve Bhaerman, Dr. Lipton invites readers to reconsider: •the unquestionable pillars of biology, including random evolution, survival of the fittest, and the role of DNA; •the relationship between mind and matter; •how our beliefs about nature and human nature shape our politics, culture, and individual lives; and •how each of us can become planetary stem cells supporting the health and growth of our

world. By questioning the old beliefs that got us to where we are today and keep us stuck in the status quo, we can trigger the spontaneous evolution of our species that will usher in a brighter future. .

a study into the mara struck: Claiming Civic Virtue Jan Bender Shetler, 2019-07-09 Among communities in the Mara region of Tanzania, it is considered men's responsibility to maintain "history." But when Jan Bender Shetler's questions turned to specific familial connections within the village, she discovered her male informants had to occasionally leave the room—to ask their wives for clarification. The result is an original and wide-ranging investigation of the gendered nature of historical memory and its influence on the development of the region over the past 150 years. Shetler's exploration of these oral traditions and histories opens exciting new vistas for understanding how women and men in this culture tell their stories and assert their roles as public intellectuals—with important implications for research in African and gender studies, and the history of ethnicity and nationalism.

a study into the mara struck: *International Handbook of Interpretation in Educational Research* Paul Smeyers, David Bridges, Nicholas C. Burbules, Morwenna Griffiths, 2015-01-06 This handbook focuses on the often neglected dimension of interpretation in educational research. It argues that all educational research is in some sense 'interpretive', and that understanding this issue belies some usual dualisms of thought and practice, such as the sharp dichotomy between 'qualitative' and 'quantitative' research. Interpretation extends from the very framing of the research task, through the sources which constitute the data, the process of their recording, representation and analysis, to the way in which the research is finally or provisionally presented. The thesis of the handbook is that interpretation cuts across the fields (both philosophically, organizationally and methodologically). By covering a comprehensive range of research approaches and methodologies, the handbook gives (early career) researchers what they need to know in order to decide what particular methods can offer for various educational research contexts/fields. An extensive overview includes concrete examples of different kinds of research (not limited for example to 'teaching' and 'learning' examples as present in the Anglo-Saxon tradition, but including as well what in the German Continental tradition is labelled 'pädagogisch', examples from child rearing and other contexts of non-formal education) with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice – combined in each case with consideration of the role of interpretation in the process. The handbook includes examples of a large number of methods traditionally classified as qualitative, interpretive and quantitative used across the area of the study of education. Examples are drawn from across the globe, thus exemplifying the different 'opportunities and constraints' that educational research has to confront in different societies.

a study into the mara struck: *In Case of Emergency* Mahsa Mohebbi, 2021-11-30 In this prize-winning Iranian novel, a spoiled and foul-mouthed young woman looks to get high while her family and city fall to pieces. What do you do when the world is falling apart and you're in withdrawal? Disillusioned, wealthy, and addicted to opium, Shadi wakes up one day to apocalyptic earthquakes and a dangerously low stash. Outside, Tehran is crumbling: yuppies flee in bumper-to-bumper traffic as skaters and pretty boys rise up to claim the city as theirs. Cross-dressed to evade hijab laws, Shadi flits between her dysfunctional family and depressed friends—all in search of her next fix. Mahsa Mohebbi's groundbreaking novel about Iranian counterculture is a satirical portrait of the disaster that is contemporary life. Weaving together gritty vernacular and cinematic prose, *In Case of Emergency* takes a darkly humorous, scathing look at the authoritarian state, global capitalism, and the gender binary.

a study into the mara struck: The Origin of Consciousness in the Breakdown of the Bicameral Mind Julian Jaynes, 2000-08-15 National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

a study into the mara struck: Athletes' Human Rights and the Fight Against Doping: A Study of the European Legal Framework Bart van der Sloot, Mara Paun, Ronald Leenes, 2020-01-23 This book addresses the tension between, on the one hand, anti-doping practices and measures and, on the other hand, the fundamental rights of athletes. New techniques for testing and re-testing samples taken several years ago, have caused a push by the World Anti-Doping Agency and affiliated organizations for stricter rules, more doping tests and higher sanctions. Meanwhile, many States are adopting new laws and regulations to facilitate this push. At the same time, privacy and data protection have gained new momentum, especially in the European Union, where the General Data Protection Regulation came into effect in May 2018. It contains new obligations for data controllers and processors, rights for data subjects and sanctions for those violating the data protection rules. It is clear that gathering whereabouts information on athletes, collecting urine and blood samples, analyzing the samples and using the data distilled there from falls within the scope of the data protection framework. In addition, European athletes can invoke their rights to privacy, fair trial and freedom from discrimination as guaranteed by the European Convention on Human Rights. The book is aimed at professionals and organizations involved in sports and anti-doping and provides them with an opportunity to delve into and understand the rights guaranteed to athletes within the European context. Furthermore, it is equally relevant for privacy and data protection lawyers and human rights scholars wishing to familiarize themselves with the difficult questions relating to human rights protection in the world of sport and anti-doping. Written in accessible language, it should also prove useful to athletes and laymen wanting to learn about the rules applicable to almost everyone who practices sport, even at a local amateur level. Bart van der Sloot is senior researcher at Tilburg University, Tilburg, The Netherlands, Mara Paun is PhD researcher at Tilburg University, Tilburg, The Netherlands, Ronald Leenes is professor at Tilburg University, Tilburg, The Netherlands.

a study into the mara struck: Healing Insanity: a Study of Igbo Medicine in Contemporary Nigeria Patrick E. Iroegbu, 2010-06-08 *Healing Insanity: A Study of Igbo Medicine in Contemporary Nigeria* is an original and in-depth study on endogenous medical system in an African society. It is craftily written and provides solid insight, through case studies and theory, into how insanity affects patients and the society. Particularly, it explores various collective representations and strategies regarding insanity and healing as it examines the healing institutions, healers, and ritual cults. The

central question is, given the patterns of healing, how do the Igbo shape the incidence and symptoms of insanity, define its aetiology, and provide healers with culture-specific resources and skills to address this illness? The focus became increasingly centred on bodily semantics and endogenous knowledge systems and practices. Dr. Patrick Iroegbus work is a very valuable and rare study and has appeared at a desirable time. It is, for an African society, a comprehensive study of the many ways Igbo people, in their practical, routinized attitudes and body-centred experiences, as well as in their more reflective aetiological knowledge and healing institutions, relate to the phenomenon of insanity, or *ara*, in the cultural parlance. As the first of its kind, reminiscent of, and assured by, the various remarks of Igbo scholars and leaders at various meetings and discourses, the task this work has set out to accomplish is a very brave one. The authors account of his fieldwork experiences and adopted techniques illustrates his initiation, revealing him as a genuine ethnographer who is a friend of people and at ease with his field. With both the far-seeing and inspiring analysis of Igbo medicine, life, and culture accounted for in the work, the book stands out for ethnographers, teachers, students, leaders, policymakers, and the general public. This is a book that deserves to be read as it shapes the critical path toward understanding ways of healing insanity in a culture-specific context, crosscutting perspectives for a relationship between indigenous healing and the biomedical sphere. Prof. Ren Devisch (Africa Research Centre, University of Leuven) This book is written with a clear purpose for everyone to read to understand and heal insanity and indeed provides a thick piece of cultural philosophy and vernacular of Igbo medicine in hopes of putting cultural wisdom in pursuit of integral health care development. Prof. Pantaleon Iroegbu (Professor of Philosophy, Major-Seminary, Ekpoma, January 2006) To read this book, as I did, is to get the benefit of Dr. Patrick Iroegbus ethnographic insight for an archetypical African healing system in Igboland. It offers a fascinating theory of symbolic release that speaks of African symbolic action and knowledge system. Dr. Paul Komba, Esq. (University of Cambridge)

a study into the mara struck: Pauper's Run Bruce Morris, 2006-02 This story begins and ends on the ninth floor of a prestigious corporate tower known as The Bank Centre, located on bankers' row of Brickell Avenue in Miami, Florida. On the second day of August in 1982, a young executive at a big eight accounting firm sat musing on the ocean view that came as a bonus with his office decor. He had just driven to work from his comfortable, middle-class home in the suburbs, back to his white-collar world. He reflected for another moment in anticipation. It had been a month since he had entered the halls of Case, Walsh, Madison & Co., in this land of the all-seeing Philistine. That alone was enough to give him a chill as he wondered whether anything or anyone had changed in his absence. His life path had been punctuated by a series of flashpoints, and in his mind he began to revisit those points in order to unravel his own destiny: How, he pondered, did he get here, from where? What was the Truth? In his reality, Truth is only a means to an end, and true tales often end before they ever begin, as he would see, by the end of this day. BRUCE MORRIS is a native of Florida, but lives in New Jersey with his wife and daughter. *Pauper's Run* is his first work of fiction. Though New Jersey is where he writes, Florida is the state that inspires him. He will always consider it his home and hold its people close to his heart.

a study into the mara struck: Catholic Schools in the Diocese of San Diego: A History of Service and Education for Catholic Youth Dr. John Franey, 2016-04-09 Catholic Schools in the Diocese of San Diego: A History of Service and Education for Catholic Youth shares the rich history of Catholic schools in the Diocese of San Diego. The book delves into the growth of Catholic education from its earliest inception in the 1700s through the modern era. The book engages in a deep examination of the orders of religious sisters who served in Catholic schools and includes a detailed look at every Catholic K-8 school, high school, and university in the diocese's history.

a study into the mara struck: New-found Voices Derek Hyde, 2018-12-20 First published in 1998, this volume by Derek Hyde remedies the lack of information concerning the contribution made by women to musical life in Britain during the nineteenth century in this carefully researched survey. The book reveals the significant role played by women in the production and performance of certain genres of music, such as piano music, songs and ballads, and touches on the reasons why they were more prominent in these areas than in the male preserves of chamber and orchestral music. In particular, the pioneering work of Sarah Glover in Sol-fa notation and the part played by Mary Wakefield in establishing the Competitive Festival Movement are charted. The third edition includes a new introduction, taking into account recent research in the field of gender and music. There is also a revised chapter on the work of Ethel Smyth, the first woman composer to enjoy a measure of success in England. This book will be of interest to social historians, musicologists and those concerned with women's history alike.

a study into the mara struck: Sarah Laughed Vanessa L. Ochs, 2011-01-01 Vanessa Ochs retells well known stories of Biblical women in terms that will inspire women today. Beginning with Eve, she adds a reflection on the lesson each story has to offer, then offers a ritual for each.

a study into the mara struck: Women in Field Biology Martha L. Crump, Michael J. Lannoo, 2022-08-23 Women are contributing to disciplines once the sole domain of men. Field biology has been no different. The history of women field biologists, embedded in a history largely made and recorded by men, has never been written. Compilations of biographies have been assembled, but the narrative—their story—has never been told. In part, this is because many expressed their passion for nature as writers, artists, collectors, and educators during eras when women were excluded from the male-centric world of natural history and science. The history of women field biologists is intertwined with men's changing views of female intellect and with increasing educational opportunities available to women. Given the preponderance of today's professional female

ecologists, animal behaviorists, systematists, conservation biologists, wildlife biologists, restoration ecologists, and natural historians, it is time to tell this story—the challenges and hardships they faced and still face, and the prominent role they have played and increasingly play in understanding our natural world. For a broader perspective, we profile selected European women field biologists, but our primary focus is the journey of women field biologists in North America. Each woman highlighted here followed a unique path. For some, personal wealth facilitated their work; some worked alongside their husbands. Many served as invisible assistants to men, receiving little or no recognition. Others were mavericks who carried out pioneering studies and whose published works are still read and valued today. All served as inspiration and proved to the women who would follow that women are as capable as men at studying nature in nature. Their legacy lives on today. The 75 female field biologists interviewed for this book are further testament that women have the intellect, stamina, and passion for fieldwork.

a study into the mara struck: *A Mental Ethnography: Conclusions from Research in LSD* Niccolo Caldararo, 2023-02-20 There has recently been a renewed interest in both casual use of psychedelics as well as experimental use and attempts to discover therapeutic value. There is an effort to recapture the achievements and failures of past work to guide present use. This book is based around material derived from unpublished scientific research from Dr. Robert Mogar's laboratory and built upon by forty years of field research by the author. The author Niccolo Caldararo participated in a number of studies of perception, including sensory deprivation and psychotropic drugs, some of recent manufacture or discovery and some of primitive or traditional societies. He places this analysis of the physiological aspects of hallucinations, delusions, visions and dreams in context through an , as well as cross cultural data on dreams, dreaming and drug use and the social value of hallucinations, dreams and visions. The book reviews ethnographic literature in this area and contributes to a comprehensive evaluation of past work done in this area.

a study into the mara struck: A Watch of Nightingales Liza Wieland, 2009 A modest, quiet woman, Mara Raynor never dreamed she'd one day find herself in charge of the small private school in Washington, D.C., where for many years she taught music and choir. But after the unexpected death of her husband, the school's headmaster, Mara finds herself thrust into the public eye, burdened not just with the responsibilities of acting headmaster---a role she never wanted---but also with a potentially explosive political and religious controversy that tests parents' and school administrators' spirit of tolerance. When a Sikh student is caught wearing a ceremonial knife on school grounds, fear spreads among parents and the school board. Coming at the same moment as the disappearance of Mara's teenage daughter, the controversy quickly assumes a far more personal nature. Not just any student, the Sikh boy is both the son of a woman with whom Mara shares a complicated past and---as Mara soon discovers---her own daughter's boyfriend. As it moves back and forth in time between the school in contemporary Washington and a girls' boarding school in the British countryside in 1977, *A Watch of Nightingales* weaves a rich and textured exploration of fear and remorse, the mysteries of love, and the complicated tensions that ring down the generations from parent to child. Conjuring the entwined lives of teachers and students in two schools (and two generations) on either side of the Atlantic, *A Watch of Nightingales* stands alongside *The Prime of Miss Jean Brodie* and *Goodbye, Mr Chips* as a testament to the responsibilities, rewards, and risks of teaching. This is a book of luminous insight and quiet but telling wisdom, about youth and maturity and the bridge of loss and remorse that connects them. Liza Wieland's is a mature and deeply moving vision, conveyed in prose that sings as sure and clear as the birds of her title. ---Peter Ho Davies, author of *The Welsh Girl* Praise for Liza Wieland: [T]here is a nobility and boldness to her characters that lends them a heroism missing from much modern fiction and makes these stories wholly absorbing adventures of the heart. ---Ron Hansen, author of *Exiles: A Novel* Liza Wieland understands down to the bone how loneliness and love compel her characters to make their impossible choices. Not only does she have a searing intelligence and wisdom, her prose is by turns graceful and astonishing. ---Jane Hamilton, author of *A Map of the World* Liza Wieland is the author of four previous works of fiction: *The Names of the Lost*; *Discovering America*; *You Can Sleep While*

I Drive; and Bombshell, as well as a volume of poems, *Near Alcatraz*. Her work has been awarded two Pushcart Prizes, as well as fellowships from the National Endowment for the Arts, the Christopher Isherwood Foundation, and the North Carolina Arts Council. She teaches creative writing and literature at East Carolina University in Greenville, North Carolina.
