a trip through history quest: Ancient South Arabia through History George Hatke, Ronald Ruzicka, 2019-04-25 South Arabia, an area encompassing all of today's Yemen and neighboring regions in Saudi Arabia and Oman, is one of the least-known parts of the Near East. However, it is primarily due to its remoteness, coupled with the difficulty of access, that South Arabia remains under-researched, for this region was, in fact, very important during pre-Islamic times. By virtue of its location at the crossroads of caravan and maritime routes, pre-Islamic South Arabia linked the Near East with Africa and the Mediterranean with India. The region is also unique in that it has a written history extending as far back as the early first millennium BCE—a far longer history, indeed, than any other part of the Arabian Peninsula. The papers collected in this volume make a number of important contributions to the study of the history and languages of ancient South Arabia, as well as the history of the modern study of South Arabia's past, which will be of interest to scholars and laypeople alike.

a trip through history quest: *On Being Adjacent to Historical Violence* Irene Kacandes,

2021-12-06 This book offers to academic and general public readers timely reflections about our relationships to violence. Taking cues from the self-reflexivity, themes, and subject matters of Holocaust, queer, and Black studies, this large group of diverse intellectuals wrestles with questions that connect past, present and future: where do I stand in relation to violence? What is my attitude toward that adjacency? Whose story gets to be told by whom? What story do I take this image to be telling? How do I co-witness to another's suffering? How do I honor the agency and resilience of family members or historical personages? How do past violence and injustice connect to the present? In smart, self-conscious, passionate, and often painfully beautiful prose, cultural practitioners, historians and cultural studies scholars such as Angelika Bammer, Doris Bergen, Ann Cvetkovich, Marianne Hirsch, Priscilla Layne, Mark Roseman, Leo Spitzer, Susan R. Suleiman and Viktor Witkowski explore such questions, inviting readers to do the same. By making available compelling examples of thinkers performing their own work within the cauldron of crises that came to a boil in 2020 and continued into the next year, this volume proposes strategies for moving forward with hope.

a trip through history quest: *Order and History* Eric Voegelin, 2000 Annotation In Search of Order brings to a conclusion Eric Voegelin's masterwork, *Order and History*. Voegelin conceived *Order and History* as a philosophical inquiry concerning the principal types of order of human existence in society and history as well as the corresponding symbolic forms. In previous volumes, Voegelin discussed the imperial organizations of the ancient Near East and their existence in the form of the cosmological myth; the revelatory form of existence in history, developed by Moses and the prophets of the Chosen People; the polis, the Hellenic myth, and the development of philosophy as the symbolism of order; and the evolution of the great religions, especially Christianity. This final volume of *Order and History* is devoted to the elucidation of the experience of transcendence that Voegelin discussed in earlier volumes. He aspires to show in a theoretically acute manner the exact nature of transcendental experiences. Voegelin's philosophical inquiry unfolds in the historical context of the great symbolic enterprise of restating man's humanity under the horizon of the modern sciences and in resistance to the manifold forces of our age that deform human existence. His stature as one of the major philosophical forces of the twentieth century clearly emerges from these concluding pages. In *Search of Order* deepens and clarifies the meditative movement that Voegelin, now in reflective distance to his own work, sees as having been operative throughout his search. Because of Voegelin's death, on January 19, 1985, *In Search of Order* is briefer than it otherwise might have been; however, the theoretical presentation that he had set for himself is essentially completed here. Just as this volume serves Voegelin well in his striking analyses of Hegel, Hesiod, and Plato, it will serve as a model for the reader's own efforts in search of order.

a trip through history quest: *A History of Homosexuality in Europe, Vol. I & II* Florence Tamagne, 2006 Outstanding Academic Title 2005 - Choice Magazine The period between the two world wars was crucial in the history of homosexuality in Europe. It was then that homosexuality first came out into the light of day. Just crawling out from under the Victorian blanket, Europe was devastated by a gruesome war that consumed the flower of its youth. Tamagne examines the currents of nostalgia and yearning, euphoria, rebellion, and exploration in the postwar era, and the bonds forged at school and on the battlefield, in a scholarly treatise charting the early days of the homosexual and lesbian scene. Berlin became the capital of the new culture, and the center of a political movement seeking rights and protections for what we now call gays and lesbians. In England, the struggle was brisk to undermine the structures and strictures of Victorianism; whereas in France (which was more tolerant, over all), homosexuality remained more subtle and nonmilitant. However, the social and political backlash soon became apparent, first of all in Germany. More conservative attitudes arrested the evolution of the new mores, and it was not until the 1960s that the new wave of the sexual revolution once again swept the continent. Tamagne's work outlines the long and arduous journey from the shadows toward acceptability as the homosexual and lesbian community sets out to find a new legitimacy at various levels of society. She weaves together cultural references from literature, songs and theater, news stories and private correspondence,

police reports and government documents to give a rounded picture of the evolving scene. * The first volume argues that homosexuality, a 'high culture' sort, enjoyed a golden age consequent upon the Great War's liberalization of morals. In volume 2, reaction and repression march through the 1930s. [...] A lively read. Highly recommended. - CHOICE Magazine * Florence Tamagne holds a PhD from the prestigious Institute of Political Studies in Paris, France. This is her second book tracing the evolution of homosexuality in Europe.

a trip through history quest: A Theology of Preaching Richard A. Lischer, 2001-06-08 Richard Lischer's book is a stirring affirmation of preaching's importance as a major enterprise in its own right. It is, he writes, a theological preface whose aim is to show how theology informs preaching and how preaching, as a kerygmatic, oral, practical activity, informs theology and brings it to its final form of expression. Dr. Lischer points to the historically negative results of preaching's exclusion from theology, and then shows the benefits derived from the proper interaction of the two disciplines. As he elaborates on this theme, he explores the centrality of the Resurrection in both theology and preaching, the relation of the law and the gospel, and how preaching calls upon theology to recover its oral-aural foundation. For Lischer, the act of preaching is an exercise of the preacher's imagination. The real work of imagination is not inserting clever stories or esthetically-pleasing images into the argument of the sermon. It is knowing how to read texts in such a way that they will be allowed to function according to their original power and intent.

a trip through history quest: Blue Eyes on African-American History Philip J. Reiss, 2013-10-04 Until Bayard Rustin's lecture in the fall of 1962, no other person had brought author Philip Reiss so far toward gaining an understanding of what it was like for African-Americans living as second-class citizens in this nation, which sponsors a pledge calling for liberty and justice for all. The Rustin lecture became Reiss's point of departure on his quest to learn more fully of the African-American experience; it prompted him to become aware and to truly understand that the entire nation shared responsibility for the dilemma of deep-seated injustices that African-Americans constantly faced. In Blue Eyes on African-American History, Reiss provides an account of a white professor's learning and teaching about African-American history from 1970 to 1999 at a SUNY community college. Reiss includes specifics of how and why he took on the challenge of teaching African-American history and discusses the historical events he deems critical for understanding of that history. His study relates the impact of economic exploitation facilitated by racism and how these twin evils are central to the African-American historical narrative. Along with factual history, this volume intersperses some of Reiss's experiences as a young boy, as a young adult serving in the military, and as a professor teaching his course. It provides unique insight into a turbulent time in America.

a trip through history quest: *Manifest Insanity* Diogenes of Mayberry, 2019-08-14 *Manifest Insanity* is an irreverent social commentary that traces the history of Judeo-Christian doctrines and how they have evolved over the centuries, impudently contradicting the perception that these established beliefs were original to their traditions, and specifically challenging the evangelical Christian concept of literal inerrancy. The historical information is presented in an informal, but polemical, conversation between teachers and students in a Christian high school as they move from class to class throughout the day. The narrative exposes some of the historical misunderstandings and outright doctrinal forgeries that the Religious Right trumpets in their attempts to force their morality on mainstream society. Woven into the story is a satirical re-imagining of Dr. Strangelove, as modern-day liberal secularism—replacing the Soviet paranoia of the Cold War era—fuels the right-wing hype of a godless society on the road to hell. The Four Horsemen of New Atheism—Dawkins, Dennett, Harris and Hitchens—have demonstrated in this new era of confrontational tactics that no longer will secularists smile politely and remain respectfully silent of religious beliefs, but will stand up and challenge the irrationality of blind faith. Following their lead, *Manifest Insanity* is a scathing indictment of the Christian Right and their attempts to hijack school boards in order to indoctrinate children using the public school system. *Manifest Insanity* is a thoroughly researched, insightful, thought-provoking and comprehensive analysis of the religious history that shaped the political and social views of American evangelical Christians—yet, an

entertaining, humorous and accessible read.

a trip through history quest: The Critical Imagination in African Literature Maik Nwosu, Obiwu, 2015-06-09 In African studies, the "Echeruoan ideal" is understood as an intervention or intellectual engagement characterized by a broadness of vision as well as a depth of analysis. The essays gathered in this volume celebrate that ideal and honor Echeruo's contribution to the African intellectual tradition. Editors Nwosu and Obiwu explore the driving forces in the literature of Africa and the African diaspora. Contributors examine such themes as migration and exile, trauma and repression, violence and rebellion, and gender and human rights. Showcasing a rich diversity of cultural and academic backgrounds, this volume inaugurates a new paradigm for further examination of African literature as world literature and for analysis of African literature through the lens of psychoanalytic semiotics. While varied in modes of inquiry, the essays are unified in their ambition to explore new theoretical directions, reinvigorating the conversation around how African literature is read and studied.

a trip through history quest: Queer Disability through History Daisy Holder, 2024-11-30

Persecuted, outlawed, imprisoned, shunned. You might think this refers only to the LGBTQ+ community, but their experience is remarkably closely aligned to the experience of the Disabled community. This book examines the histories of these two movements as they ran alongside each other often intersecting. Both the Disabled and the LGBTQ+ movements have rich and intriguing pasts that date back beyond recorded history. As Holder explores the journey of these movements the journey highlights their shared history through the stories of the people who brought both into modern consciousness. They represent vital landmarks in the little-explored intersections between the two groups' past and present. Turn-of-the-century Mexican bisexual painter, Frida Kahlo, was Disabled by both polio and injury; Michelangelo turned his artistic talents toward homoerotic poetry to manage his arthritis. The iconic Marsha P Johnson lived with and cared for those with AIDS, and Dr Fryer, the psychiatrist with depression, has been credited with planting the seed that led to the removal of homosexuality from the American diagnostic manual of mental disorders. While many of these events seem small, they shape our Queer and Disability cultures and shared history, to show just how far we've come and how far we still have to go.

a trip through history quest: The Oxford History of the Novel in English , 2024-04-04 The Oxford History of the Novel in English is a twelve-volume series presenting a comprehensive, global, and up-to-date history of English-language prose fiction, written by a large, international team of scholars. The series is concerned with novels as a whole, not just the 'literary' novel, and each volume includes chapters on the processes of production, distribution, and reception, and on popular

fiction and the fictional sub-genres, as well as outlining the work of major novelists, movements, and tendencies. This book offers an account of US fiction during a period demarcated by two traumatic moments: the eve of the entry of the United States into the Second World War and the onset of the Covid-19 pandemic. The aftermath of the Second World War was arguably the high point of US nationalism, but in the years that followed, US writers would increasingly explore the possibility that US democracy was a failure, both at home and abroad. For so many of the writers whose work this volume explores, the idea of nation became suspect as did the idea of national literature as the foundation for US writing. Looking at post-1940s writing, the literary historian might well chart a movement within literary cultures away from nationalism and toward what we would call cosmopolitanism, a perspective that fosters conversations between the occupants of different cultural spaces and that regards difference as an opportunity to be embraced rather than a problem to be solved. During this period, the novel has had significant competition for the US public's attention from other forms of narrative and media: film, television, comic books, videogames, and the internet and the various forms of social media that it spawned. If, however, the novel becomes a residual form during this period, it is by no means archaic. The novel has been reinvigorated over the past eighty years by its encounters with both emergent forms (such as film, television, comic books, and digital media) and the emergent voices typically associated with multiculturalism in the United States.

a trip through history quest: *Making History in Twentieth-century Quebec* Ronald Rudin, 1997-01-01 The first comprehensive examination of the way French-speaking Quebecers have written about their past in the 20th century. Rudin's analysis offers new ways of thinking about Quebec society over the course of this century.

a trip through history quest: *Fortunes of History* Donald R. Kelley, 2008-10-01 In *Fortunes of History* Donald R. Kelley offers an authoritative examination of historical writing during the "long nineteenth century"—the years from the French Revolution to those just after the First World War. He provides a comprehensive analysis of the theories and practices of British, French, German, Italian, and American schools of historical thought, their principal figures, and their distinctive methods and self-understandings. Kelley treats the modern traditions of European world and national historiography from the Enlightenment to the "new histories" of the twentieth century, attending not only to major authors and schools but also to methods, scholarship, criticisms, controversies, ideological questions, and relations to other disciplines.

Rush as you scale the Golden Stairs of the Chilkoot Trail. Catch the Long Look across El Despoblado as you stand at the South Rim of the Chisos Mountains in Texas. Walk in the Dreaming tracks of the local Arrente as you trek the Larapinta Trail along the spine of Central Australia's ancient MacDonnell Ranges. Or follow delightful paths through sheep paddocks and woodlands filled with bluebells and birdsong along Great Britain's Cotswold Way. But it isn't all about the hikes and the history. There is plenty of practical information on Internet resources and recommended reading along with suggestions on what to do before or after the hike. Learn about local fauna, regional food specialties and unique customs - like the sensuous rituals linked with maté tea in Patagonia or the grizzly tradition of the SourToe Cocktail in Dawson City, Yukon.
