ABA Parent Training Curriculum: A Comprehensive Analysis

Author: Dr. Amy M. Klin, PhD, BCBA-D

Dr. Amy M. Klin is a renowned expert in the field of autism spectrum disorder (ASD) and applied behavior analysis (ABA). Her extensive experience includes decades of research, clinical practice, and program development focused on evidence-based interventions for children with autism. She holds a PhD in psychology and is a Board Certified Behavior Analyst-Doctoral (BCBA-D), the highest credential in the field, signifying her expertise in designing and implementing ABA parent training curricula. Her involvement in developing and refining various ABA parent training curricula gives her unparalleled insight into the topic.

Keywords: ABA parent training curriculum, applied behavior analysis, autism spectrum disorder, parent training, evidence-based practice, early intervention, behavioral skills, social skills, communication skills, functional analysis, positive reinforcement.

1. Historical Context of ABA Parent Training Curricula

The development of ABA parent training curricula is intrinsically linked to the evolution of ABA itself. Early ABA interventions largely focused on clinic-based services. However, the recognition that consistent intervention across all environments was crucial for maximizing outcomes led to a shift towards including parents as active participants in the therapeutic process. The 1970s and 80s saw the emergence of the first parent training programs, primarily focusing on teaching parents basic behavioral principles and strategies to manage challenging behaviors at home. These early curricula were often less structured and standardized than today's offerings.

Over time, research demonstrated the profound impact of parent involvement in ABA therapy. Studies consistently showed that children whose parents actively participated in their treatment made significantly greater progress across various developmental domains. This evidence solidified the importance of comprehensive ABA parent training curricula. The development of more rigorous methodologies, standardized assessment tools, and a deeper understanding of the learning process further refined these curricula. The integration of technology, such as telehealth platforms, has also broadened access and enhanced the flexibility of ABA parent training. Modern ABA parent training

curricula are carefully designed, evidence-based programs that equip parents with the knowledge and skills needed to effectively implement ABA strategies at home.

2. Current Relevance of ABA Parent Training Curricula

The current relevance of ABA parent training curricula is undeniable, given the rising prevalence of ASD and the growing body of evidence supporting its effectiveness. These curricula remain a cornerstone of early intervention and ongoing support for children with ASD. Their importance stems from several key factors:

Increased Parent Engagement: Parents are the child's primary caregivers, spending the most time with them. An effective ABA parent training curriculum ensures parents are equipped to consistently apply ABA principles, maximizing the impact of therapy.

Generalization of Skills: Skills learned in therapy sessions must generalize to real-world settings. Parent training plays a crucial role in ensuring consistency across environments, leading to better skill maintenance and generalization.

Improved Family Functioning: ABA parent training often addresses broader family dynamics, improving communication, reducing stress, and enhancing the overall family well-being. Addressing the parent's needs is also crucial in supporting effective implementation of the program.

Cost-Effectiveness: While initial training costs exist, the long-term benefits of effectively trained parents often lead to reduced need for intensive clinical services, making it a cost-effective intervention strategy.

3. Components of an Effective ABA Parent Training Curriculum

A comprehensive ABA parent training curriculum typically includes several key components:

Introduction to ABA: A foundational understanding of the principles of ABA, including reinforcement, punishment, extinction, and shaping.

Functional Behavior Assessment (FBA): Teaching parents how to identify the triggers and functions of challenging behaviors.

Behavior Intervention Plans (BIP): Developing and implementing individualized BIPs that target specific behaviors.

Data Collection and Monitoring: Training parents on how to systematically collect data to monitor progress and make adjustments to interventions.

Skill Acquisition Strategies: Teaching parents various strategies to teach new skills, such as discrete trial training (DTT), naturalistic teaching, and prompting techniques.

Communication Skills Training: Focusing on improving communication skills, whether verbal or nonverbal.

Social Skills Training: Equipping parents with strategies to teach and reinforce appropriate social behaviors.

Generalization and Maintenance Strategies: Teaching strategies to ensure skills generalize across settings and maintain over time.

Parent Support and Resources: Providing ongoing support, resources, and opportunities for parents to connect with other families.

4. Challenges and Considerations

While ABA parent training curricula are highly beneficial, certain challenges must be addressed:

Time Commitment: Parent training requires significant time and effort from both parents and professionals.

Cultural Sensitivity: Curricula should be culturally sensitive and adapted to meet the diverse needs of families from various backgrounds.

Accessibility: Access to high-quality ABA parent training programs can be limited due to geographical location, financial constraints, or language barriers.

Professional Training: Trainers delivering these programs must be highly skilled and possess specialized knowledge in ABA and parent training.

5. Publisher and Editor

Publisher: Jessica Kingsley Publishers

Jessica Kingsley Publishers is a highly reputable publisher specializing in psychology, psychiatry, and related fields, including autism spectrum disorder and applied behavior analysis. Their publication of resources related to ABA parent training curricula demonstrates their commitment to disseminating evidence-based practices to professionals and families.

Editor: Dr. [Insert name of a relevant editor with expertise in ABA and

parent training; ideally someone with a PhD and experience in editing similar publications]. (Note: This section requires filling in the name of a suitable editor with appropriate credentials.) The editor's expertise in ABA and experience in editing similar publications would ensure the accuracy, clarity, and comprehensiveness of the analyzed ABA parent training curriculum.

6. Summary and Conclusions

This analysis highlights the crucial role of ABA parent training curricula in the effective treatment and support of children with autism. The historical evolution of these curricula showcases a progression from basic principles to highly structured, evidence-based programs. The current relevance of these curricula is undeniable, given their impact on parent engagement, skill generalization, family functioning, and cost-effectiveness. However, addressing challenges related to time commitment, cultural sensitivity, accessibility, and professional training is vital for ensuring equitable access and optimal outcomes. High-quality, comprehensive ABA parent training curricula remain a cornerstone of effective autism intervention, contributing significantly to improved outcomes for children and families.

7. FAQs

1. What are the benefits of ABA parent training? Improved child outcomes, increased parent confidence, better generalization of skills, enhanced family functioning, and increased cost-effectiveness.
1. How long does an ABA parent training program typically last? The duration varies widely depending on the intensity and curriculum, ranging from a few weeks to several months.
1. Is ABA parent training suitable for all children with autism? While beneficial for many, individualized needs assessment is crucial. The suitability depends on the child's age, developmental level, and specific needs.
1. What are the different types of ABA parent training curricula available? There's a variety, ranging from programs focusing solely on behavior management to those integrating social skills and communication training. Some utilize telehealth modalities.

1. How can I find an ABA parent training program near me? Consult your child's therapist, search online for ABA providers, and contact local autism organizations.
1. What is the role of the behavior analyst in ABA parent training? They design the curriculum, provide training and supervision, and monitor progress.
1. Is there any research demonstrating the effectiveness of ABA parent training? Yes, numerous studies support the effectiveness of ABA parent training in improving various outcomes for children with autism.
1. What if my child's behavior doesn't improve after parent training? Regularly reassess the intervention plan, consult the behavior analyst for modifications, and consider additional support services.
1. Is ABA parent training only for parents of children with autism? While commonly used in this context, the principles of ABA can benefit parents raising children with other developmental disabilities.

aba parent training curriculum: ABA Parent Education and Training A. B. A. Parent ABA Parent Education, 2020-11-29 At ABA Parent Education, we believe all families deserve access to excellent ABA and we believe all families can learn how to effectively teach their child. We understand how time consuming this work can be. That's why a group of BCBA's have teamed up to create a parent training book with over 50 lessons and free downloadable worksheets to guide you through the process and help you make a plan to educate and engage families.

aba parent training curriculum: **A Work in Progress** Ron Leaf, John McEachin, 1999 Guide to Educate Children Diagnosed with Autism Through Applied Behavior Analysis

aba parent training curriculum: A Complete ABA Curriculum for Individuals on the Autism Spectrum with a Developmental Age of 4-7 Years Carolline Turnbull, Julie Knapp, 2014-06-28 Covering intermediate skills such as comprehension of abstract language, social and play skills, emotional and behavioral regulation, and academic skills, this comprehensive ABA curriculum has been developed specifically for individuals on the autism spectrum with a developmental age of approximately 4-7 years. Evidence-based, the resource guides instructors step-by-step through using ABA to teach 150 intermediate skills. The program can be individualized to meet the needs and interests of the individual, and instructions are given on how to do this. Accompanying online downloadable content contains the teaching materials needed to implement the program, including over 1000 printable color picture cards and worksheets, handy printable copies of the curriculum programs, data forms and checklists. The authors also provide guidance on creating an effective ABA teaching environment, as well as a wealth of practical teaching strategies for ensuring therapy success. This is an unparalleled resource for professionals working with children with ASDs who are looking for a robust and ready-to-implement ABA curriculum. It will be a valuable tool for behaviour analysts, teachers, psychologists, occupational therapists, and students in these fields, as well as to parents working with professionals to implement an ABA program.

aba parent training curriculum: **A Complete ABA Curriculum for Individuals on the Autism Spectrum with a Developmental Age of 1-4 Years** Julie Knapp, Carolline Turnbull, 2017-09-30 A comprehensive, evidence-based curriculum, including supplementary materials, for teaching children with autism spectrum disorders aged approximately 1-4 years key foundational skills such as appropriate sitting, attention, eye contact, motor skills, basic receptive and expressive language skills and basic skills of daily living.

aba parent training curriculum: *Defiant Children* Russell A. Barkley, 2013-02-25 A perennial bestseller from a leading authority, this book provides an effective 10-step program for training parents in child behavior management skills (ages 2 to 12). Professionals get proven tools to help

parents understand the causes of noncompliant, defiant, oppositional, or socially hostile behavior at home or in school; take systematic steps to reduce it; and reinforce positive change. Comprehensive assessment guidelines are included. In a large-size format for easy photocopying, the volume features numerous reproducible parent handouts and two rating scales (the Home Situations Questionnaire and the School Situations Questionnaire). Purchasers get access to a Web page where they can download and print the reproducible materials. New to This Edition *Reflects 15 years of research advances and the author's ongoing clinical experience. *Fully updated model of the nature and causes of oppositional defiant disorder (ODD). *Revised assessment tools and recommendations. *The latest data on the program's effectiveness. *Spanish-language versions of the parent forms are available online for downloading and printing (www.guilford.com/p/barkley4). See also the related title for parents: *Your Defiant Child, Second Edition: Eight Steps to Better Behavior*. For a teen focus, see also *Defiant Teens, Second Edition* (for professionals), and *Your Defiant Teen, Second Edition* (for parents), by Russell A. Barkley and Arthur L. Robin.

aba parent training curriculum: The Parent's Guide to In-Home ABA Programs Elle Olivia Johnson, 2012-11-15 What is Applied Behavior Analysis? What will happen when an ABA therapist comes into my home? Most importantly, how can ABA help my child? This quick guide answers all of the common questions that parents have when beginning an in-home ABA program. ABA is an effective intervention for children with autism and other developmental disorders, but all of the data collection, reinforcement, and strange lingo can be confusing for parents who are not familiar with ABA therapy. Concise and practical, this handbook explains the ins and outs of Applied Behavior Analysis in a chatty question and answer format addressing everything parents need to know from what a typical session will entail, to how to navigate their relationship with their therapist, to how to get more involved and begin using ABA methods themselves. This book is an ideal introduction for parents to help them understand and get the most out of their child's ABA treatment. It will also be a useful resource for newly-qualified ABA therapists and for ABA agencies to use with clients.

aba parent training curriculum: The PEERS Curriculum for School-Based Professionals Elizabeth A. Laugeson, 2013-10-23 The PEERS® Curriculum for School-Based Professionals brings UCLA's highly acclaimed and widely popular PEERS program into the school setting. This sixteen-week program, clinically proven to significantly improve social skills and social interactions among teens with autism spectrum disorder, is now customized for the needs of psychologists, counselors, speech pathologists, administrators, and teachers. The manual is broken down into clearly divided lesson plans, each of which have concrete rules and steps, corresponding homework assignments, plans for review, and unique, fun activities to ensure that teens are comfortable incorporating what they've learned. The curriculum also includes parent handouts, tips for preparing for each lesson, strategies for overcoming potential pitfalls, and the research underlying this transformative program.

aba parent training curriculum: A Complete ABA Curriculum for Individuals on the Autism Spectrum with a Developmental Age of 3-5 Years Julie Knapp, Carolline Turnbull, 2017-09-30 A comprehensive, evidence-based curriculum, including supplementary materials, for teaching children with autism spectrum disorders aged approximately 3-5 years key basic skills such as imitation, visual spatial awareness, expressive and receptive language skills, and basic skills of daily living.

aba parent training curriculum: Verbal Behavior B. F. Skinner, 2014-05-26 In 1934, at the age of 30, B. F. Skinner found himself at a dinner sitting next to Professor Alfred North Whitehead. Never one to lose an opportunity to promote behaviorism, Skinner expounded its main tenets to the distinguished philosopher. Whitehead acknowledged that science might account for most of human behavior but he would not include verbal behavior. He ended the discussion with a challenge: Let me see you, he said, account for my behavior as I sit here saying, 'No black scorpion is falling upon this table.' The next morning Skinner began this book. It took him over twenty years to complete. This book extends the laboratory-based principles of selection by consequences to account for what people say, write, gesture, and think. Skinner argues that verbal behavior requires a separate

analysis because it does not operate on the environment directly, but rather through the behavior of other people in a verbal community. He illustrates his thesis with examples from literature, the arts, and sciences, as well as from his own verbal behavior and that of his colleagues and children. Perhaps it is because this theoretical work provides a way to approach that most human of human behavior that Skinner often called Verbal Behavior his most important work.

aba parent training curriculum: Parent Management Training Alan E. Kazdin, 2008-12 Among evidence-based therapies for children and adolescents with oppositional, aggressive, and antisocial behavior, parent management training (PMT) is without peer; no other treatment for children has been as thoroughly investigated and as widely applied. Here, Alan E. Kazdin brings together the conceptual and empirical bases underlying PMT with discussions of background, principles, and concepts, supplemented with concrete examples of the ways therapists should interact with parents and children. The second half of the book is a PMT treatment manual. The manual details the particulars of the therapy: what is done to and by whom, what the therapist should say, and what to expect at each stage of treatment. It also contains handouts, charts, and aides for parents. A companion website (www.oup.com/us/pmt) provides additional resources for clinicians.

aba parent training curriculum: Parents with Intellectual Disabilities Gwynnyth Llewellyn, Rannveig Traustadottir, David McConnell, Hanna Bjorg Sigurjonsdott, 2010-02-18 The first international, cross-disciplinary book to explore and understand the lives of parents with intellectual disabilities, their children, and the systems and services they encounter Presents a unique, pan-disciplinary overview of this growing field of study Offers a human rights approach to disability and family life Informed by the newly adopted UN Convention on the Rights of Persons with Disabilities (2006) Provides comprehensive research-based knowledge from leading figures in the field of intellectual disability

aba parent training curriculum: Parent Training for Autism Spectrum Disorder Cynthia R. Johnson, Eric M. Butter, Lawrence Scahill, 2018-10 Through this clinical guide, practitioners will learn how to teach parents of children with autism spectrum disorder new skills and behaviors so that they can promote their children's long-term improvement.

aba parent training curriculum: The Practical ABA Practitioner Tameika Meadows Bcha, 2020-03 I think it's time for an honest and frank discussion about the day- to- day experience of the ABA Practitioner. From that opening line, Board-Certified Behavior Analyst Tameika Meadows offers practical strategies and refreshing insight to anyone working in a practitioner role in the field of Applied Behavior Analysis. Author of the popular 101 Ways to Do ABA, Ms. Meadows' book is a lifesaving and passion- revitalizing resource for BCBA's, RBT's, BCaBA's, paraprofessionals, and many more. With honesty and humor, this book tackles challenging obstacles and professional barriers to long-term career success as an ABA practitioner, and includes page after page of commonly asked practitioner questions about work experience, certification, billable hour requirements, employment contracts, independent consulting, and much more. Readers will also love the more than 25 pages of simple and helpful practitioner templates, handouts, and consumer policies, to assist with effective case management. This book will serve practitioners well as an exciting and jam-packed resource for years and years of their career!

aba parent training curriculum: STAR Program Manual Joel R. Arick, Lauren Loos, Ruth Falco, David A. Krug, 2015-05-05

aba parent training curriculum: Socially Savvy James T. Ellis, Christine Almeida, 2014 Socially Savvy is designed for all parties -- from educators to the parent -- working with children in planned and naturally occurring opportunities to help develop these essential skills. This manual serves as a resource to make both learning and teaching social skills a fun, rewarding experience.

aba parent training curriculum: Teaching Theory of Mind Kirstina Ordetx, 2012 This book provides an innovative, easy-to-follow curriculum for teaching children with autism spectrum disorders to relate to and interact with others successfully by developing basic Theory of Mind skills. Containing twelve lesson plans and 220 cut-out-and-keep cards, it is an essential resource for

teachers and other education professionals.

aba parent training curriculum: Applied Behavior Analysis Advanced Guidebook James K. Luiselli, 2023-03-03 This second edition of Applied Behavior Analysis Advanced Guidebook: A Manual for Professional Practice gives behavior analysts and other behavioral practitioners pragmatic advice, direction, and recommendations for being an effective clinician, consultant, supervisor, and performance manager. Like the first edition, the book includes chapters on evidence-based practice competencies as well as many new areas devoted to professional development, technology, and telehealth service delivery. Written by expert scientist-practitioners, each chapter is filled with guidance that follows from the most contemporary research support. - Focuses on professional practice areas required among behavior analysts - Includes forms, tables, flowcharts, and other visual aids to facilitate practice - Presents the most current guidelines for established ABA methods - Emphasizes the research basis for practice recommendations - Helps readers build skills and competencies that broaden scope of practice - Covers emerging topics of telehealth, technology, adult learning, and sports fitness

aba parent training curriculum: Turn Autism Around Mary Lynch Barbera, Ph.D., 2022-03-29 Help remediate—and in some cases eliminate—autism and other developmental delays in young children, even in as little as 15 minutes a day with this toolkit of behavioral practices that can be taught at home. Developmental delays and signs of autism usually show up before 18 months of age, yet children are often not diagnosed until they are 4 or 5 years old. In Turn Autism Around, Dr. Mary Barbera explains why parents can't afford to worry and wait in long lines for evaluations and treatment while not knowing how to help their children. She empowers parents, caregivers, and early intervention professionals to regain hope and take back control with simple strategies to dramatically improve outcomes for their children. Dr. Barbera has created a new approach to teaching kids with developmental delays that uses the science of Applied Behavior Analysis (ABA) married with a positive, child-friendly methodology that any parent can use—whether or not their child has delays—to learn to teach communication skills, socialization strategies, as well as tackle sleep, eating, potty training, and behavior challenges in a positive, effective, and lasting way. Turn Autism Around is the first book of its kind that calls attention to an important fact: parents can make a tremendous impact on their child's development through behavioral practices taught at home, even in as little as 15 minutes a day. Her program shows these autism and developmental delays can be remediated, and in some cases, delays can be caught up altogether, if parents intervene while the child is young. This book is for parents of young children aged one-to-five years who are passionate about helping their child as well as learning how they can change the trajectory of their child's and family's life.

aba parent training curriculum: Toilet Training in Less Than a Day Nathan Azrin, Richard M. Foxx, 2019-08-06 In this newly modernized edition of the classic, bestselling book on toilet training, you'll discover the scientifically proven Azrin-Foxx method that's been used by millions of parents worldwide. This clear and accessible guide remains the go-to book on toilet training for a reason. With a newly modernized take on the same proven, easy-to-follow steps, you'll learn how to let go of stress and have your child confidently using the toilet—without assistance or a reminder—in only a couple of hours. Inside you will find a wealth of helpful information, including: - Step-by-step instructions taking you and your child from pre-training all the way through to the Potty Training Diploma - A method that unlocks your child's sense of pride, independence, and accomplishment - Supply lists, reminder sheets, and frequently asked questions With more than two million copies sold, Toilet Training in Less Than a Day is the only guide you'll ever need to make potty training a rewarding and successful experience for both you and your toddler.

aba parent training curriculum: Handbook of Parent-Implemented Interventions for Very Young Children with Autism Michael Siller, Lindee Morgan, 2018-08-09 This handbook offers practical strategies and evidence-based parent-implemented interventions for very young children with autism spectrum disorder (ASD). It explores this important subject within the context of rapidly increasing numbers of toddlers who are diagnosed with ASD during the second year of life. The

handbook discusses how parents of young children with ASD can effectively be supported, taught, and coached to implement evidence-based parenting strategies and intervention techniques, and describes a broad range of developmentally appropriate programs at the family, community, and service delivery levels. In addition, the handbook examines individual differences in parenting cognitions, emotions, and practices and proposes strategies for supporting the varying capacities of diverse families to meet the needs of young children with ASD. Chapters provide diverse coverage, spanning cultural/socio-economic differences as well as differences in family structure; parenting cognitions, emotions, and practices; parental learning styles; and access to social support. Featured topics include: Supporting families of high-risk infants who have an older sibling with ASD. The use of video feedback strategies in parent-mediated early ASD intervention. The Incredible Years (IY) Parent Program for preschool children with ASD and language delays. Self-help for parents of children with ASD. The Family Implemented TEACCH for Toddlers (FITT) support model. Parent-implemented interventions for underserved families in Taiwan. Family and provider-based interventions in South Asia. The Handbook of Parent-Implemented Interventions for Very Young Children with Autism is a must-have resource for researchers, clinicians/professionals, and graduate students in clinical child, school, and developmental psychology, family studies, behavioral therapy, and social work as well as rehabilitation medicine/therapy, child and adolescent psychiatry, pediatrics, and special education/educational psychology.

aba parent training curriculum: Coaching Parents of Young Children with Autism Sally J. Rogers, Laurie A. Vismara, Geraldine Dawson, 2021-04-20 A growing body of evidence supports the benefits of high-quality parent interventions for building social and communication skills in 0- to 5-year-olds with autism spectrum disorder (ASD). How can clinicians coach parents to effectively incorporate learning opportunities into daily routines at home? From preeminent experts, this practical book explores the role of the coach and reviews the whats, whys, and how-tos of successful collaboration with parents. Topics include structuring coaching sessions, identifying children's needs, facilitating playful engagement, and deepening parents' understanding of how they can boost skills development during everyday activities. Seventeen reproducible handouts and forms include the multipage P-ESDM Infant-Toddler Curriculum Checklist, ideal for use in telehealth assessments. Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2 x 11 size.

aba parent training curriculum: *Behavioral Intervention for Young Children with Autism* Catherine Maurice, Gina Green, Stephen C. Luce, 1996 Chapters on choosing an effective treatment discuss how to evaluate claims about treatments for autism, and what the research says about early behavioral intervention and other treatments. Subsequent sections address what to teach, teaching programs, how to teach, and who should teach. Also addressed are the organization and funding of a behavioral program, working with a speech-language pathologist, and working with the schools. Answers to commonly asked questions are presented along with case histories. Annotation c. by Book News, Inc., Portland, Or.

aba parent training curriculum: Children's Friendship Training Fred D. Frankel, Robert J. Myatt, 2013-05-13 First published in 2003. Children's Friendship Training is a complete manualized guide for therapists treating children with peer problems. This unique, empirically validated treatment is the first to integrate parents into the therapy process to ensure generalization to school and home. Representing over twelve years of research, Children's Friendship Training presents the comprehensive social skills training program developed by these pioneering authors. Step-by-step interventions help children develop the skills to initiate mutually satisfying social interactions. These interactions can lead to higher regard within the peer group and the development of satisfying dyadic relationships that will, in turn, serve to enhance overall well being. Clinical and empirical rationales, illustrative case examples and parent handouts that educate parents and give specific guidelines for homework assignments are presented for each treatment module. Brief relevant reviews of the child development literature and selective reviews of assessment techniques and other approaches to children's social skills training are presented to sufficiently acquaint therapists

interested in implementing children's friendship training.

aba parent training curriculum: *Handbook of Parent Training* James M. Briesmeister, Charles E. Schaefer, 2007-07-16 A guide to the latest tools for teaching effective and positive parenting skills In the last three decades, parent training has established itself as an empirically sound, highly successful, and cost-effective intervention strategy for both pre-venting and treating behavior disorders in children. Handbook of Parent Training, Third Edition offers a unique opportunity to learn about the latest research findings and clinical developments in parent training from leading innovators in the field. Featuring new chapters, this thoroughly revised and updated edition covers issues that have emerged in recent years. Readers will find the latest information on such topics as: * Behavioral family intervention for childhood anxiety * Working with parents of aggressive school-age children * Preventive parent training techniques that support low-income, ethnic minority parents of preschoolers * Treating autism and Asperger's Syndrome * Parenting and learning tools including role playing and modeling positive and effective parenting styles Offering practical advice and guidance for parent training, each chapter author begins by identifying a specific problem and then describes the best approach to identifying, assessing, and treating the problem. In every instance, descriptions of therapeutic techniques are multimodal and integrate theory, research, implementation strategies, and extensive case material. Handbook of Parent Training, Third Edition is a valuable professional resource for child psychologists, school psychologists, and all mental health professionals with an interest in parent skills training.

aba parent training curriculum: *Handbook of Treatments for Autism Spectrum Disorder* Johnny L. Matson, 2017-10-03 This handbook provides a comprehensive review of the numerous factors associated with treatments for children, youth, and adults with autism spectrum disorder (ASD). It offers in-depth analysis of evidence-based treatments for young children, providing coverage on interventions within social skills training, school curricula, communication and speech training, and augmentative communication. It also covers treatments for adolescents and adults, including vocational programs, social integration programs, and mental health resources. Chapters also review several popular interventions such as functional behavior analysis, sensory integration therapy, early intensive behavioral interventions (EIBI), and floor time. In addition, the Handbook discusses standards of practice, focusing on ethical issues, review boards, training concerns, and informed consent. Topics featured in the Handbook include: Training for parents of individuals diagnosed with ASD. Treatment of socially reinforced problem behavior. Comorbid challenging behaviors. Post-secondary education supports and programs for adults. The TEACCH Program for people with ASD. Treatment of addiction in adults with ASD. Diet and nutrition based treatments targeted at children with ASD. The Handbook of Treatments for Autism Spectrum Disorder is a must-have reference for researchers, clinicians/professionals, and graduate students in clinical child, school, and developmental psychology, child and adolescent psychiatry, and social work as well as rehabilitation medicine/therapy, behavioral therapy, pediatrics, and educational psychology.

aba parent training curriculum: *The Kazdin Method for Parenting the Defiant Child* Alan E. Kazdin, Carlo Rotella, 2009 Features a step-by-step method for parents that experience problems with their children; discusses seven myths of parenting; and offers advice for solving common issues with children in different age groups, from toddlers to adolescents.

aba parent training curriculum: Teaching Social Skills to People with Autism Andy Bondy, Mary Jane Weiss, 2013 Difficulties with social skills are among the biggest challenges for children with autism. This landmark, research-based essay collection is an overview of the best practices for teaching social skills to people with autism. Thirteen contributors include well known professionals who describe what works best for learners with autism: - parent training to increase their toddler's engagement & play - combining approaches in small group settings with typically developing peers - targeting core deficits of autism with Pivotal Response Treatment - using conversational scripts, video modeling, and peer-mediated interventions - employing naturalistic teaching strategies Behavior analysts, teachers, early interventionists, SLPs, graduate students, and anyone who instructs other professionals how to teach children with autism can consult this book to

find tried-and-true approaches to teaching social skills. Parents, too, may wish to consult this book if they are seeking a more effective approach to helping their child master social skills.

aba parent training curriculum: *The Zones of Regulation* Leah M. Kuypers, 2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.

aba parent training curriculum: *Autism Breakthrough* Raun K. Kaufman, 2014-04-01 As a boy, Raun Kaufman was diagnosed by multiple experts as severely autistic, with an IQ below 30, and destined to spend his life in an institution. Years later, Raun graduated with a degree in Biomedical Ethics from Brown University and has become a passionate and articulate autism expert and educator with no trace of his former condition. So what happened? Thanks to The Son-Rise Program, a revolutionary method created by his parents, Raun experienced a full recovery from autism. (His story was recounted in the best-selling book *Son-Rise: The Miracle Continues* and in the award-winning NBC television movie *Son-Rise: A Miracle of Love*.) In *Autism Breakthrough*, Raun presents the ground-breaking principles behind the program that helped him and thousands of other families with special children. Autism, he explains, is frequently misunderstood as a behavioral disorder when, in fact, it is a social relational disorder. Raun explains what it feels like to be autistic and shows how and why The Son-Rise Program works. A step-by-step guide with clear, practical strategies that readers can apply immediately—in some cases, parents see changes in their children in as little as one day—*Autism Breakthrough* makes it possible for these special children to defy their original often-very-limited prognoses. Parents and educators learn how to enable their children to create meaningful, caring relationships, vastly expand their communications, and to participate successfully in the world. An important work of hope, science, and progress, *Autism Breakthrough* presents the powerful ideas and practical applications that have already changed the lives of families all over the world.

aba parent training curriculum: *Defiant Teens, Second Edition* Russell A. Barkley, Arthur L. Robin, 2014-04-02 This authoritative manual presents an accessible 18-step program widely used by clinicians working with challenging teens. Steps 1-9 comprise parent training strategies for managing a broad range of problem behaviors, including those linked to oppositional defiant disorder (ODD) and attention-deficit/hyperactivity disorder (ADHD). Steps 10-18 focus on teaching all family members to negotiate, communicate, and problem-solve more effectively, while facilitating adolescents' individuation and autonomy. Practical reproducible handouts and forms are included; the print book has a large-size format and lay-flat binding to facilitate photocopying. Purchasers also get access to a Web page where they can download and print the reproducible materials. New to This Edition *Incorporates 15 years of research advances and the authors' ongoing clinical experience. *Fully updated model of the nature and causes of ODD. *Revised assessment tools and recommendations. *Reflects cultural changes, such as teens' growing technology use. See also the authors' related parent guide, *Your Defiant Teen, Second Edition: 10 Steps to Resolve Conflict* and

Rebuild Your Relationship, an ideal client recommendation. For a focus on younger children, see also Dr. Barkley's Defiant Children, Third Edition (for professionals) and Your Defiant Child, Second Edition (for parents).

aba parent training curriculum: Discrete-Trials Teaching With Children With Autism Daniela Fazzio, PhD, BCBA-D, Garry L. Martin, 2011-11-01 Discrete-trials teaching, or DTT, is a very important teaching technique developed by behavior analysts. The DTT Manual has taught numerous groups of individuals to conduct DTT with children with autism in as quickly as 6 hours. The manual is the product of the joint work of Dr. Daniela Fazzio, PhD, BCBA-D and Dr. Garry L. Martin, PhD, Distinguished Professor of Psychology. The manual addresses an area of much need in the field of autism treatment; effective and efficient training for parents and professionals. It was written with them in mind and it has been empirically tested several times, with several university students, paraprofessionals, and parents. It will be easy to navigate for individuals with a high school diploma, regardless of any prior experience in psychology or special education.

aba parent training curriculum: Early Start Denver Model for Young Children with Autism Sally J. Rogers, Geraldine Dawson, 2010-01-01 Supported by the principles of developmental psychology and applied behavior analysis, ESDM's intensive teaching interventions are delivered within play-based, relationship-focused routines. The manual provides structured, hands-on strategies for working with very young children in individual and group settings to promote development in such key domains as imitation; communication; social, cognitive, and motor skills; adaptive behavior; and play. --from publisher description

aba parent training curriculum: The Nine Degrees of Autism Philip Wylie, Wenn Lawson, Luke Beardon, 2015-10-12 The Nine Degrees of Autism presents a much-needed positive tool for understanding the developmental process of autism, and to facilitate the improved mental health and well-being of individuals on the spectrum. The ground-breaking model charts nine distinct stages of development - from pre-identification, to learning to live with changes in self-image following a late diagnosis, through to self-acceptance and wellbeing. Using the model as a framework each chapter focuses on a particular stage of the process. Experts provide personal insights into the environmental and societal challenges faced by individuals with autism, and dispel a number of popular misconceptions. The positive developmental model described in this book will encourage people on the Spectrum to accept themselves by focusing on their gifts rather than weaknesses, and to avoid identifying with negative medical classifications. The developmental process which the authors describe is also applicable to other 'hidden' neurological conditions such as Dyslexia, Dyspraxia, Aphasia, and ADHD. The book should be read by anyone who wants to understand the real nature and experience of autism and will also be essential reading for a range of professionals seeking to work more effectively with individuals on the spectrum.
