ABA Therapy Training Videos: A Comprehensive Guide to Effective Learning

Author: Dr. Emily Carter, BCBA-D

Dr. Emily Carter is a Board Certified Behavior Analyst – Doctorate (BCBA-D) with over 15 years of experience in the field of applied behavior analysis (ABA). She has extensive experience in training professionals and parents in ABA techniques and is a renowned speaker and author on the topic. Her expertise lies in developing and implementing evidence-based ABA programs for individuals with autism spectrum disorder (ASD) and other developmental disabilities. She has authored several publications on the effective use of aba therapy training videos in professional development.

Publisher: Spectrum Publishing, a leading publisher specializing in educational resources for professionals working with individuals with autism and other developmental disabilities. Spectrum Publishing is dedicated to providing high-quality, evidence-based materials that support best practices in the field.

Editor: Sarah Miller, M.Ed., BCBA

Sarah Miller holds a Master's degree in Education and is a Board Certified Behavior Analyst (BCBA). She has over 10 years of experience in editing and reviewing educational materials related to ABA therapy, ensuring accuracy and clarity for professionals and students alike.

Keywords: aba therapy training videos, ABA training videos online, online ABA certification, ABA video tutorials, applied behavior analysis training, autism therapy training, ABA techniques, behavior analysis videos, virtual ABA training, discrete trial training videos, naturalistic teaching videos

Introduction to ABA Therapy Training Videos

The field of Applied Behavior Analysis (ABA) is constantly evolving, demanding continuous professional development for practitioners. ABA therapy training videos have emerged as a powerful tool for learning and enhancing skills, offering flexibility and accessibility unavailable through traditional methods. This comprehensive guide explores the various methodologies and approaches utilized in aba therapy training videos, highlighting their benefits and considerations for effective learning.

Methodologies Covered in ABA Therapy Training Videos

1. Discrete Trial Training (DTT): Many aba therapy training videos demonstrate DTT, a structured teaching method involving clear instructions, prompts, and immediate reinforcement. Videos often illustrate the steps involved in teaching various skills, such as requesting, matching, and imitation, providing learners with visual examples of effective implementation and error correction strategies.
1. Naturalistic Teaching Strategies (NET): ABA therapy training videos also showcase NET, a less structured approach that integrates learning into naturally occurring situations. Videos may demonstrate how to capitalize on naturally occurring opportunities for teaching, reinforcing desired behaviors within the child's environment. These videos often emphasize the importance of child choice and engagement.
1. Verbal Behavior (VB): A significant portion of aba therapy training videos focuses on VB, which emphasizes the functional aspects of language. Videos may demonstrate the analysis of verbal operants (mands, tacts, echoics, etc.) and provide strategies for teaching language skills within an ABA framework.
1. Functional Behavior Assessment (FBA) and Behavior Intervention Plans (BIP): Effective intervention necessitates understanding the function of challenging behaviors. ABA therapy training videos often demonstrate how to conduct FBAs, identifying the antecedents and consequences maintaining problem behaviors. These videos also illustrate the development and implementation of BIPs, providing strategies to replace challenging behaviors with more adaptive ones.
1. Data Collection and Analysis: Accurate data collection is critical in ABA. ABA therapy training videos teach various data collection methods (e.g., frequency, duration, latency) and demonstrate how to graph and interpret data to track progress and make data-driven decisions regarding intervention. These videos often highlight the importance of objective measurement.

1. **Ethics and Professional Conduct:** Reputable aba therapy training videos emphasize ethical considerations within ABA practice. These videos often address issues such as confidentiality, informed consent, and professional boundaries.

Approaches and Styles in ABA Therapy Training Videos

1. **Demonstrative Videos:** These videos showcase therapists interacting with clients, illustrating specific ABA techniques in real-world settings. They provide clear visuals of effective implementation and can be exceptionally useful for beginners.
1. **Explanatory Videos:** These videos focus on theoretical concepts and principles of ABA. They often use animations, diagrams, and narration to explain complex ideas in a digestible manner.
1. **Case Study Videos:** These videos present case studies of individuals receiving ABA therapy, illustrating the application of various techniques and the progress achieved. They can be valuable for understanding the individualized nature of ABA interventions.
1. **Interactive Videos:** Some aba therapy training videos incorporate interactive elements, allowing learners to practice skills and receive immediate feedback.

Benefits of Using ABA Therapy Training Videos

Accessibility: ABA therapy training videos provide anytime, anywhere access to learning materials, eliminating geographical barriers and scheduling constraints.

Affordability: Compared to in-person training, aba therapy training videos

are often more cost-effective.

Repetition and Review: Learners can revisit videos as needed, reinforcing key concepts and techniques.

Visual Learning: Videos cater to visual learners, providing a clear and engaging way to understand complex information.

Standardization: High-quality aba therapy training videos can ensure consistent delivery of information and techniques across various settings.

Considerations When Choosing ABA Therapy Training Videos

Credibility: Choose videos from reputable sources, created by qualified professionals with proven experience in ABA. Look for videos that cite evidence-based practices.

Content Accuracy: Ensure the content aligns with current ethical guidelines and best practices in ABA.

Interactive Elements: Interactive videos enhance engagement and retention.

Learner Support: Consider whether the provider offers additional support materials or opportunities for interaction with instructors.

Conclusion

ABA therapy training videos offer a valuable resource for professionals and parents seeking to enhance their knowledge and skills in ABA. By carefully selecting high-quality, credible videos, learners can benefit from the accessibility, flexibility, and engagement that this learning modality provides. The various methodologies and approaches highlighted in this guide underscore the diverse applications of aba therapy training videos in supporting the development of effective and ethical ABA practices.

FAQs

1. Are ABA therapy training videos sufficient for full certification? No, videos usually supplement other requirements for certification such as supervised fieldwork and examinations.
2. What types of devices can I use to access these videos? Most videos are accessible on computers, tablets, and smartphones.
3. How much do ABA therapy training videos cost? The cost varies depending on the provider and the length/content of the video series.
4. Are there free ABA therapy training videos available? While some free resources exist, comprehensive training typically requires a paid subscription or purchase.

5. How do I ensure the quality of ABA therapy training videos? Look for videos from reputable sources with qualified instructors and evidence-based content.
6. Can ABA therapy training videos be used for continuing education credits? Some providers offer CEU credits, but it's crucial to verify this with the training provider.
7. Are ABA therapy training videos suitable for parents? Yes, many videos cater to parents and caregivers, providing practical strategies for supporting their children at home.
8. What are the limitations of using only ABA therapy training videos for learning? Videos lack the hands-on experience and personalized feedback provided by in-person training.
9. How can I find ABA therapy training videos that are specific to my needs (e.g., working with toddlers)? Look for videos that specifically mention the age group or skill set you are interested in.

aba therapy training videos: Turn Autism Around Mary Lynch Barbera, Ph.D., 2022-03-29 Help remediate—and in some cases eliminate—autism and other developmental delays in young children, even in as little as 15 minutes a day with this toolkit of behavioral practices that can be taught at home. Developmental delays and signs of autism usually show up before 18 months of age, yet children are often not diagnosed until they are 4 or 5 years old. In Turn Autism Around, Dr. Mary Barbera explains why parents can't afford to worry and wait in long lines for evaluations and treatment while not knowing how to help their children. She empowers parents, caregivers, and early intervention professionals to regain hope and take back control with simple strategies to dramatically improve outcomes for their children. Dr. Barbera has created a new approach to teaching kids with developmental delays that uses the science of Applied Behavior Analysis (ABA) married with a positive, child-friendly methodology that any parent can use—whether or not their child has delays—to learn to teach communication skills, socialization strategies, as well as tackle sleep, eating, potty training, and behavior challenges in a positive, effective, and lasting way. Turn Autism Around is the first book of its kind that calls attention to an important fact: parents can make a tremendous impact on their child's development through behavioral practices taught at home, even in as little as 15 minutes a day. Her program shows these autism and developmental delays can be remediated, and in some cases, delays can be caught up altogether, if parents intervene while the child is young. This book is for parents of young children aged one-to-five years who are passionate about helping their child as well as learning how they can change the trajectory of their child's and family's life.

aba therapy training videos: The Verbal Behavior Approach Mary Lynch Barbera, 2007-05-15 The Verbal Behavior (VB) approach is a form of Applied Behavior Analysis (ABA), that is based on B.F. Skinner's analysis of verbal behavior and works particularly well with children with minimal or no speech abilities. In this book Dr. Mary Lynch Barbera draws on her own experiences as a Board Certified Behavior Analyst and also as a parent of a child with autism to explain VB and how to use it. This step-by-step guide provides an abundance of information about how to help children develop better language and speaking skills, and also explains how to teach non-vocal children to use sign language. An entire chapter focuses on ways to reduce problem behavior, and there is also useful information on teaching toileting and other important self-help skills, that would benefit any child. This book will enable parents and professionals unfamiliar with the principles of

ABA and VB to get started immediately using the Verbal Behavior approach to teach children with autism and related disorders.

aba therapy training videos: Parents' Education as Autism Therapists Michael Keenan, Ken P. Kerr, Karola Dillenburger, 2000 Clear, focused, and practical, this book is a useful introduction to ABA for parents and professionals working with children with autism. Successful child rearing is an essential skill for any parent. For most of us this skill is handed down from our own parents and society in general. In real terms this means that rather than relying on any formal instruction to help us, we bring up our children using skills based largely upon common sense and a willingness to do our best. These methods are, by-and-large, successful in everyday situations. However, when it comes to more difficult aspects of developing skills in our children, we need something more dependable than good will. Applied Behaviour Analysis (ABA), the systematic implementation of scientifically proven behavioural principles offers just that. Aimed at enhancing people's lives in ways that they or their carers feel are important, it includes a variety of methods and techniques which can be used to promote, decrease, or maintain skills for daily living. ABA has been used to help children with autism for many years in many countries. In Northern Ireland the PEAT group offers parents the education necessary to become their own child's therapists using ABA. In this book these parents and the professionals involved in their training share their knowledge, experience, and successes.

aba therapy training videos: Population One Tyler McNamer, 2013-06-03 Being different from the masses is one of the greatest gifts that you possess! Let's face it: Who wants to be just like everyone else? Talk about boring! People come in all shapes and sizes and are born with natural and unnatural gifts and talents like no other, and your greatest challenge is to discover your gifts and then apply them to the world to create a better place, a better planet, a better universe! That is my challenge to you so that all of us can get along peacefully and become truly a population of one. I would like to ask you some questions to help you discover what makes you unique, different, and awesome. Are you different? Are you unique? Do you look different than others? Talk differently than others? Do you walk differently than others? Have you been born with talents that very few others have? Have you been brainwashed to look at your talents as a disability? Do you stay up nights dwelling on all the things in life you don't have, rather than focus on all the blessings you do have? Have you ever been bullied at school, at home, and in many areas in your life? Have you ever been called a retard, dumb, disabled? If you have answered yes to any of these questions, perhaps you have yet to understand, accept, and apply your unique gifts to make the world a better place. If you have answered Yes to any of these questions, I feel your pain, I have walked in your shoes, and I can

empathize with your situation. I have been bullied, called a retard, told that I am disabled, put in special classes, advised that I should not expect to reach my goals. My name is Tyler McNamer and I have been called ALL of the above many, many times in my life. I am nineteen years old and have been blessed with autism my entire life. I have chosen to accept my label of autism not as a disability but as an extraordinary ability and I want to help you overcome the label that you may have suffered from for many years of your life. So what is autism? The dictionary defines autism as a mental condition, present from early childhood, characterized by great difficulty in communicating and forming relationships with others. Also, it is defined as a mental condition in which fantasy dominates over reality. So just how many people today are affected by this condition? According to a recent WebMD study, 1 in 88 kids today has autism and for boys the numbers is 1 in 54. Also you might be surprised to learn that since 2002, autism has increased by 78 percent. Let's put those numbers in perspective. A high school with 1,000 students enrolled is going to have 11 students with this condition, and a bigger high school with 2,500 students is going to have 28 students with autism. So, now that you know more about autism, let me highlight some of the things you will learn by reading this book since I want to assure you that this book is not just a book about autism it is a book about how we can all live together in harmony regardless of our differences. In this book, you are going to learn that, despite our differences and diversities, we can get along and become a population of one to serve others. In this book, you will learn the importance of becoming the leader in your own life, following your dreams. You will learn to focus on your blessings instead of being discouraged by your challenges. In this book, you will learn to embrace change and continue to learn for a lifetime. In this book, you will learn what it is like to be blessed with the unique ability of having autism. You will learn how not only to cope with your gifts, but to thrive in life and pursue your goals despite your challenges. In this book, you will learn how to turn your ability into a blessing to serve others

aba therapy training videos: STAR Program Manual Joel R. Arick, Lauren Loos, Ruth Falco, David A. Krug, 2015-05-05

aba therapy training videos: The Autistic Brain Temple Grandin, Richard Panek, 2014-03-27
Want to read just one book about autism? Read this. Written by Temple Grandin, one of the world's most accomplished and well-known adults with autism, this thought-provoking, insightful and inspirational book - with illustrative diagrams and key points pulled out for emphasis - will assist not only fellow autistics and families with affected members, but also researchers and physicians seeking to better understand the condition. 'An extraordinary source of inspiration for autistic children, their parents - and all people' -- Time 'The Autistic Brain can both enlighten readers with little exposure to autism and offer hope and compassion to those who live with the condition' -- Scientific American 'Grandin has helped us understand autism not just as a phenomenon, but as a different but coherent mode of existence that otherwise confounds us...' -- New York Times 'Enjoyable, insightful read' -- ***** Reader review 'This book is a delight from start to finish' -- ***** Reader review 'Superb, readable book' -- ***** Reader review 'Great book. Very insightful and easy to follow' -- ***** Reader review

***** It's estimated that one in almost a hundred people are diagnosed as being on the autistic spectrum but there is far more hope for them today than ever before thanks to ground-breaking new research. In this fascinating and highly readable book, Temple Grandin offers her own experience as an autistic person alongside remarkable new discoveries about the autistic brain, as well as genetic research. She highlights long-ignored sensory problems as well as the need to treat autism symptom by symptom, rather than with an umbrella diagnosis. Most exciting of all, she argues that raising and educating children on the autistic spectrum needs to be less about focusing on their weaknesses, and more about fostering their unique contributions. Written in a clear, concise and accessible way, with illustrative diagrams and key points pulled out for emphasis, this is an all-encompassing guide that will change the perception of autism.

aba therapy training videos: *Understanding Pathological Demand Avoidance Syndrome in*

Children Margaret Duncan, Zara Healy, Ruth Fidler, Phil Christie, 2011-09-15 This straightforward guide offers a complete overview of Pathological Demand Avoidance Syndrome (PDA) and gives practical advice for overcoming the difficulties it poses in a wide range of contexts from diagnosis through to adulthood. Starting with an exploration into the background of PDA that answers many of the immediate questions triggered when a child is first diagnosed, the book goes on to look at the impact of the condition on different areas of the child's life and what can be done to help. The authors present useful information on early intervention options and workable strategies for managing PDA positively on a day-to-day basis. They also examine ways to minimize common difficulties that may be encountered at home and school, making life easier for the child, family and peers. The final chapters tackle new problems that can arise when the teenage years hit and how to assist a successful transition from adolescence to adulthood. Illustrative case examples are included throughout, and the book concludes with a list of valuable resources for further information and advice. Full of helpful guidance and support, this user-friendly introductory handbook is essential reading for anyone caring for, or working with, children with PDA.

aba therapy training videos: *An Introduction to Behavior Analysis* Gregory J. Madden, Derek D. Reed, Florence D. DiGennaro Reed, 2021-05-10 AN INTRODUCTION TO BEHAVIOR ANALYSIS Explore a fascinating introductory treatment of the principles of behavior analysis written by three leading voices in the field An Introduction to Behavior Analysis delivers an engaging and comprehensive introduction to the concepts and applications for graduate students of behavior analysis. Written from the ground up to capture and hold student interest, the book keeps its focus on practical issues. The book offers readers sound analyses of Pavlovian and operant learning, reinforcement and punishment, motivation and stimulus control, language and rule-following, decision-making and clinical behavior analysis. With fully up to date empirical research references and theoretical content, An Introduction to Behavior Analysis thoroughly justifies every principle it describes with empirical support and explicitly points out where more data are required. The text encourages students to analyze their own experiences and some foundational findings in the field in a way that minimizes jargon and maximizes engagement. Readers will also benefit from the inclusion of: A clear articulation and defense of the philosophical assumptions and overarching goals of behavior analysis. A thorough description of objective data collection, experimental methods, and data analysis in the context of psychology An exploration of the core principles of behavior analysis, presented at a level comprehensible to an introductory audience A broad array of principles that cover issues as varied as language, substance-use disorders, and common psychological disorders Perfect for students taking their first course in behavior analysis or behavior modification, An Introduction to Behavior Analysis will also earn a place in the libraries of students pursuing certification through the Behavior Analysis Certification Board or taking courses in the applied psychological sciences.

aba therapy training videos: *LEGO®-Based Therapy* Simon Baron-Cohen, Georgina Gomez De La Cuesta, Daniel B. LeGoff, GW Krauss, 2014-06-21 This complete guide to LEGO® Therapy contains everything you need to know in order to set up and run a LEGO® Club for children with autism spectrum disorders or related social communication difficulties and anxiety conditions. By providing a joint interest and goal, LEGO® building can become a medium for social development such as sharing, turn-taking, making eye-contact, and following social rules. This book outlines the theory and research base of the approach and gives advice on all practical considerations including space, the physical layout of the room and choosing and maintaining materials, as well as strategies for managing behaviour, further skill development, and how to assess progress. Written by the pioneer of the approach alongside those who helped form it through their research and evaluation, this evidence-based manual is essential reading for professionals working with autism who are interested in running a LEGO® Club or learning more about the therapy.

aba therapy training videos: *Autism, Asperger's & ADHD* Dr Simon Bignell, 2018-05-10 These conditions are highly related to each other and overlap. For Parents seeking to learn more, Students looking for an authoritative text on the topic, and Professionals already familiar with these

conditions, this book outlines the answers to common questions. This no-nonsense guide summarises the essential information on the autism spectrum and Attention-Deficit/Hyperactivity Disorder (ADHD) so that you do not have to go looking for it when straight answers are needed about the real-world issues facing people with these conditions and those who care for them. The book introduces these fascinating conditions, covering issues such as assessment, diagnosis, prevalence rates, sex differences, and the conditions that often occur alongside. Topics such as theories and causes are covered, suitable for the person new to the topic as well as the informed professional. Strategies, interventions and treatment are covered, as well as themes such as mainstream school inclusion and Special School provision, policy and legislation. 'Autism, Asperger's & ADHD: What You Need to Know. A Guide for Parents, Students and other Professionals' draws from research and practical experience and summarises essential things that every person should know about the autism spectrum and ADHD. Dr Simon Bignell PhD, SFHEA, MBPsS, CPsychol is a Senior Lecturer in Psychology at the University of Derby, a Senior Fellow of the Higher Education Academy. He is a researcher and author on children's developmental conditions and specialises in Autism and ADHD. He has been awarded research grants, published in scientific books, journals and encyclopaedias and given invited keynote talks at conferences across the world. His course, 'Autism, Asperger's & ADHD', which he has taught since 2006, has been studied by over 25,000 learners.

aba therapy training videos: Parenting Autism: Nurturing And Celebrating Your Unique Child Sanjukta B. Mukherji, 2021-10-12 Stress. Anxiety. Uncertainty. Raising a child is a difficult job, but nurturing a child with autism can be especially daunting. Parents of children with autism face a myriad of challenges as they come to terms with a diagnosis, grapple with unfamiliar behaviors, and sift through potential intervention options. As the child grows, new worries arise causing anguish and overwhelming emotions. In this candid account of her journey as a mother of a child with autism, Sanjukta B. Mukherji provides a personal perspective combined with her professional knowledge as she guides other parents through nurturing a child with autism. A behavior analyst and expert in the field of special education, Mukherji shares how to: - Identify early signs of autism - Navigate early intervention options - Implement evidence-based parenting strategies - Evaluate schooling opportunities - Find coping strategies for children and caregivers This book will teach you to celebrate your children for who they are, and help them live an independent and fulfilling life.

aba therapy training videos: Early Start Denver Model for Young Children with Autism Sally J. Rogers, Geraldine Dawson, 2010-01-01 Supported by the principles of developmental psychology and applied behavior analysis, ESDM's intensive teaching interventions are delivered within play-based, relationship-focused routines. The manual provides structured, hands-on strategies for working with very young children in individual and group settings to promote development in such key domains as imitation; communication; social, cognitive, and motor skills; adaptive behavior; and play. --from publisher description

aba therapy training videos: Turning Fierce Dogs Friendly Kellie Snider, 2018-01-09 Learn how to harness the power of worthwhile reinforcement to build safe, friendly behaviors in aggressive dogs. The positive training based, Constructional Aggression Treatment (CAT), as described in Turning Fierce Dogs Friendly, has proven successful for many pet owners and trainers around the world. As a functional approach to changing aggressive behavior, it offers a humane alternative to desensitization, counter conditioning, and distraction procedures. CAT typically produces long-lasting results in far less time than any positive treatment available, without the undesirable side-effects that are common with punishment procedures. The ultimate outcome is a once-aggressive dog that is now friendly. Inside Turning Fierce Dogs Friendly: Step-by-step instructions for performing CAT with aggressive dogs Understand the normal behaviors of all dogs, of specific breeds, and of your own individual dog How to be awake and aware of your dog's behavior and your own Discover your dog's worthwhile reinforcement for safe, friendly behaviors Advice for developing good observation skills and staying on task The issues that can make or break

successful aggression treatment: consistency, safety, and follow-through Equipment, handling procedures, and preventing opportunities to practice undesirable behavior When to call a professional

aba therapy training videos: Teaching Social Skills to People with Autism Andy Bondy, Mary Jane Weiss, 2013 Difficulties with social skills are among the biggest challenges for children with autism. This landmark, research-based essay collection is an overview of the best practices for teaching social skills to people with autism. Thirteen contributors include well known professionals who describe what works best for learners with autism: - parent training to increase their toddler's engagement & play - combining approaches in small group settings with typically developing peers - targeting core deficits of autism with Pivotal Response Treatment - using conversational scripts, video modeling, and peer-mediated interventions - employing naturalistic teaching strategies Behavior analysts, teachers, early interventionists, SLPs, graduate students, and anyone who instructs other professionals how to teach children with autism can consult this book to find tried-and-true approaches to teaching social skills. Parents, too, may wish to consult this book if they are seeking a more effective approach to helping their child master social skills.

aba therapy training videos: The Palgrave Handbook of Child Mental Health Jessica Nina Lester, Michelle O'Reilly, 2015-12-17 A landmark publication in the field, this state of the art reference work includes contributions from leading thinkers across a range of disciplines on topics including ADHD, autism, depression, eating disorders and trauma. It is an essential resource for all those involved or interested in child mental health.

aba therapy training videos: The 5 Scientific Laws of Life and Leadership Brett DiNovi, Paul Gavoni, 2021-10-15 In this book, consultants Brett DiNovi and Paul Gavoni, Behavioral Analysts, help leaders of schools, businesses, governments, families, and everyday life to learn and implement leadership principles based on behavioral science and proven case studies. The success of their company, Brett DiNovi & Associates, and their book comes from showing how behavior karma works in learning to master the 5 Scientific Laws of Life and Leadership in everyday scenarios and in crises. The book shows how to create opportunities, get feedback, and achieve desired outcomes -- in other words, how to successfully meet goals and fulfill values, repeatedly and reliably.

aba therapy training videos: Universal Access in Human-Computer Interaction. Applications and Services Constantine Stephanidis, 2011-06-18 The four-volume set LNCS 6765-6768 constitutes the refereed proceedings of the 6th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2011, held as Part of HCI International 2011, in Orlando, FL, USA, in July 2011, jointly with 10 other conferences addressing the latest research and development efforts and highlighting the human aspects of design and use of computing systems. The 72 revised papers included in the fourth volume were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: speech, communication and dialogue; interacting with documents and images; universal access to education and learning; well being, health and rehabilitation applications; and universal access in complex working environments.

aba therapy training videos: Women and Girls with Autism Spectrum Disorder Sarah Hendrickx, 2015-05-21 The difference that being female makes to the diagnosis, life and experiences of a person with an Autism Spectrum Disorder (ASD) has largely gone unresearched and unreported until recently. In this book Sarah Hendrickx has collected both academic research and personal stories about girls and women on the autism spectrum to present a picture of their feelings, thoughts and experiences at each stage of their lives. Outlining how autism presents differently and can hide itself in females and what the likely impact will be for them throughout their lifespan, the book looks at how females with ASD experience diagnosis, childhood, education, adolescence, friendships, sexuality, employment, pregnancy and parenting, and aging. It will provide invaluable guidance for the professionals who support these girls and women and it will offer women with autism a guiding light in interpreting and understanding their own life experiences through the

experiences of others.

aba therapy training videos: The New Social Story Book Carol Gray, 2010 Different social stories to help teach children with autism everyday social skills.

aba therapy training videos: The Nine Degrees of Autism Philip Wylie, Wenn Lawson, Luke Beardon, 2015-10-12 The Nine Degrees of Autism presents a much-needed positive tool for understanding the developmental process of autism, and to facilitate the improved mental health and well-being of individuals on the spectrum. The ground-breaking model charts nine distinct stages of development - from pre-identification, to learning to live with changes in self-image following a late diagnosis, through to self-acceptance and wellbeing. Using the model as a framework each chapter focuses on a particular stage of the process. Experts provide personal insights into the environmental and societal challenges faced by individuals with autism, and dispel a number of popular misconceptions. The positive developmental model described in this book will encourage people on the Spectrum to accept themselves by focusing on their gifts rather than weaknesses, and to avoid identifying with negative medical classifications. The developmental process which the authors describe is also applicable to other 'hidden' neurological conditions such as Dyslexia, Dyspraxia, Aphasia, and ADHD. The book should be read by anyone who wants to understand the real nature and experience of autism and will also be essential reading for a range of professionals seeking to work more effectively with individuals on the spectrum.

aba therapy training videos: Natural Language Acquisition on the Autism Spectrum Marge Blanc, 2012

aba therapy training videos: Learning ACT Jason B. Luoma, Steven C. Hayes, Robyn D. Walser, 2017-12-01 Acceptance and commitment therapy (ACT) is among the most remarkable developments in contemporary psychotherapy. This second edition of the pioneering ACT skills-training manual for clinicians provides a comprehensive update—essential for both experienced practitioners and those new to using ACT and its applications. ACT is a proven-effective treatment for numerous mental health issues, including depression, anxiety, stress, addictions, eating disorders, schizophrenia, borderline personality disorder, and more. With important revisions based on new developments in contextual behavioral science, Learning ACT, Second Edition includes up-to-date exercises and references, as well as material on traditional, evidence-based behavioral techniques for use within the ACT framework. In this fully revised and updated edition of Learning ACT, you'll find workbook-format exercises to help you understand and take advantage of ACT's unique six process model—both as a tool for diagnosis and case conceptualization, and as a basis for structuring treatments for clients. You'll also find up-to-the-minute information on process coaching, new experiential exercises, an increased focus on functional analysis, and downloadable extras that include role-played examples of the core ACT processes in action. By practicing the exercises in this workbook, you'll learn how this powerful modality can improve clients' psychological flexibility and help them to live better lives. Whether you're a clinician looking for in-depth training and better treatment outcomes for individual clients, a student seeking a better understanding of this powerful modality, or anyone interested in contextual behavioral science, this second edition provides a comprehensive revision to an important ACT resource.

aba therapy training videos: The Psychology of Fashion Carolyn Mair, 2018-04-09 The Psychology of Fashion offers an insightful introduction to the exciting and dynamic world of fashion in relation to human behaviour, from how clothing can affect our cognitive processes to the way retail environments manipulate consumer behaviour. The book explores how fashion design can impact healthy body image, how psychology can inform a more sustainable perspective on the production and disposal of clothing, and why we develop certain shopping behaviours. With fashion imagery ever present in the streets, press and media, The Psychology of Fashion shows how fashion and psychology can make a positive difference to our lives.

aba therapy training videos: Discrete-Trials Teaching With Children With Autism Daniela Fazzio, PhD, BCBA-D, Garry L. Martin, 2011-11-01 Discrete-trials teaching, or DTT, is a very important teaching technique developed by behavior analysts. The DTT Manual has taught

numerous groups of individuals to conduct DTT with children with autism in as quickly as 6 hours. The manual is the product of the joint work of Dr. Daniela Fazzio, PhD, BCBA-D and Dr. Garry L. Martin, PhD, Distinguished Professor of Psychology. The manual addresses an area of much need in the field of autism treatment; effective and efficient training for parents and professionals. It was written with them in mind and it has been empirically tested several times, with several university students, paraprofessionals, and parents. It will be easy to navigate for individuals with a high school diploma, regardless of any prior experience in psychology or special education.

aba therapy training videos: Stepped Care and e-Health William O'Donohue, Crissa Draper, 2010-10-21 Stepped care provides the least intrusive intervention to individuals seeking treatment by providing a range of treatment intensities. In the past two decades, computers and the internet have provided a new and efficient medium that lends well to adding steps in a stepped-care model. While there is ample evidence to support the positive effects of bibliotherapy or self-help books, computer-aided therapy (also known as e-health) has the potential to take these effects even further. This volume will be of interest to practitioners and organizations attempting to serve rural and underserved communities. The book focuses on evidence-based treatment, making it consistent with quality improvement initiatives.

aba therapy training videos: Parent Training for Autism Spectrum Disorder Cynthia R. Johnson, Eric M. Butter, Lawrence Scahill, 2018-10 Through this clinical guide, practitioners will learn how to teach parents of children with autism spectrum disorder new skills and behaviors so that they can promote their children's long-term improvement.

aba therapy training videos: Authoring Autism M. Remi Yergeau, 2018-01-05 In *Authoring Autism* M. Remi Yergeau defines neurodivergence as an identity—neuroqueerness—rather than an impairment. Using a queer theory framework, Yergeau notes the stereotypes that deny autistic people their humanity and the chance to define themselves while also challenging cognitive studies scholarship and its reification of the neurological passivity of autistics. They also critique early intensive behavioral interventions—which have much in common with gay conversion therapy—and questions the ableist privileging of intentionality and diplomacy in rhetorical traditions. Using storying as their method, they present an alternative view of autistic rhetoricity by foregrounding the cunning rhetorical abilities of autistics and by framing autism as a narrative condition wherein autistics are the best-equipped people to define their experience. Contending that autism represents a queer way of being that simultaneously embraces and rejects the rhetorical, Yergeau shows how autistic people queer the lines of rhetoric, humanity, and agency. In so doing, they demonstrate how an autistic rhetoric requires the reconceptualization of rhetoric's very essence.

aba therapy training videos: Early Childhood Music Therapy and Autism Spectrum Disorders Petra Kern, Marcia Humpal, 2012-09-15 This comprehensive book includes an overview of recent developments in ASD and effective music therapy interventions based on ASD-specific approaches, instructional strategies and techniques for use in children's natural environments. Therapists wishing to conduct family-centered practice and to support parents integrate music into home routines will find a wealth of information, together with insights from music therapists who are parents of children with ASD. The book also looks at collaboration and consultation with interdisciplinary team members, including early childhood educators, speech-language pathologists and occupational therapists. Case scenarios, examples, checklists, charts, tip sheets, music scores, and online resources make this book accessible for everyone. Throughout the book's sixteen chapters, renowned experts share knowledge and practical applications that will give music therapists, students, professionals, educators, families and anyone interested in working with young children with ASD, a detailed understanding of the implementation and range of music therapy practices that can benefit these children and their families.

aba therapy training videos: The Connected Child: Bring Hope and Healing to Your Adoptive Family Karyn B. Purvis, David R. Cross, Wendy Lyons Sunshine, 2007-03-16 An extremely useful parenting handbook... truly outstanding ... strongly recommended. --Library Journal (starred review) A tremendous resource for parents and professionals alike. --Thomas Atwood, president and CEO,

National Council for Adoption The adoption of a child is always a joyous moment in the life of a family. Some adoptions, though, present unique challenges. Welcoming these children into your family--and addressing their special needs--requires care, consideration, and compassion. Written by two research psychologists specializing in adoption and attachment, *The Connected Child* will help you: Build bonds of affection and trust with your adopted child Effectively deal with any learning or behavioral disorders Discipline your child with love without making him or her feel threatened A must-read not only for adoptive parents, but for all families striving to correct and connect with their children. --Carol S. Kranowitz, author of *The Out-of-Sync Child* Drs. Purvis and Cross have thrown a life preserver not only to those just entering uncharted waters, but also to those struggling to stay afloat. --Kathleen E. Morris, editor of *S. I. Focus* magazine Truly an exceptional, innovative work . . . compassionate, accessible, and founded on a breadth of scientific knowledge and clinical expertise. --Susan Livingston Smith, program director, Evan B. Donaldson Adoption Institute *The Connected Child* is the literary equivalent of an airline oxygen mask and instructions: place the mask over your own face first, then over the nose of your child. This book first assists the parent, saying, in effect, 'Calm down, you're not the first mom or dad in the world to face this hurdle, breathe deeply, then follow these simple steps.' The sense of not facing these issues alone--the relief that your child's behavior is not off the charts--is hugely comforting. Other children have behaved this way; other parents have responded thusly; welcome to the community of therapeutic and joyful adoptive families. --Melissa Fay Greene, author of *There is No Me Without You: One Woman's Odyssey to Rescue Africa's Children*

aba therapy training videos: The Zones of Regulation Leah M. Kuypers, 2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.

aba therapy training videos: Autism: New Insights for the Healthcare Professional: 2013 Edition , 2013-07-22 Autism: New Insights for the Healthcare Professional: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Diagnosis and Screening. The editors have built Autism: New Insights for the Healthcare Professional: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Diagnosis and Screening in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Autism: New Insights for the Healthcare Professional: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies.
