abbott elementary episode guide: Unaccountable Marty Makary, 2012-09-18 New York Times Bestseller "Every once in a while a book comes along that rocks the foundations of an established order that's seriously in need of being shaken. The modern American hospital is that establishment and Unaccountable is that book."-Shannon Brownlee, author of Overtreated Dr. Marty Makary is co-developer of the life-saving checklist outlined in Atul Gawande's bestselling The Checklist Manifesto. As a busy surgeon who has worked in many of the best hospitals in the nation, he can testify to the amazing power of modern medicine to cure. But he's also been a witness to a medical culture that routinely leaves surgical sponges inside patients, amputates the wrong limbs, and overdoses children because of sloppy handwriting. Over the last ten years, neither error rates nor costs have come down, despite scientific progress and efforts to curb expenses. Why? To patients, the healthcare system is a black box. Doctors and hospitals are unaccountable, and the lack of transparency leaves both bad doctors and systemic flaws unchecked. Patients need to know more of what healthcare workers know, so they can make informed choices. Accountability in healthcare would expose dangerous doctors, reward good performance, and force positive change nationally, using the power of the free market. Unaccountable is a powerful, no-nonsense, non-partisan diagnosis for healing our hospitals and reforming our broken healthcare system.

As an immigrant to the United States, Talusan came to be perceived as white. An academic scholarship to Harvard provided access to elite circles of privilege but required Talusan to navigate through the complex spheres of race, class, sexuality, and her place within the gay community. She emerged as an artist and an activist questioning the boundaries of gender. Talusan realized she did not want to be confined to a prescribed role as a man, and transitioned to become a woman, despite the risk of losing a man she deeply loved. Throughout her journey, Talusan shares poignant and powerful episodes of desirability and love that will remind readers of works such as *Call Me By Your Name* and *Giovanni's Room*. Her evocative reflections will shift our own perceptions of love, identity, gender, and the fairness of life.

This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children.
