Wird der Preis zu hoch angesetzt, verkauft sich das Produkt schlecht; wird er zu niedrig angesetzt, wird die Arbeit unrentabel. Nur dann, wenn der Preis produktangemessen ist, schlägt sich dies in guten Absatzzahlen und entsprechendem Gewinn für das Unternehmen nieder. Ebenso wie Activity-Based Costing (ABC - auslastungsorientierte Kostenrechnung) und Activity-Based Management (ABM - Prozesskostenmanagement) die Kostenrechnung revolutioniert haben, liefert die Methode des Activity-Based Pricing (kostenorientierte Preisgestaltung) einen disziplinierten Ansatz für die Preisbestimmung. Activity-Based Pricing berücksichtigt die tatsächlichen Produktions- und Servicekosten, die mit Hilfe des Activity-Based Costing exakt ermittelt werden können. Auf diese Weise kann man den Preis für das jeweilige Produkt genau festlegen. Pricing for Profitability erläutert ausführlich, wie ABC- und ABM-Verfahren angewendet werden müssen, um eine Preisgestaltung mit maximaler Gewinnaussicht zu erreichen. Darüber hinaus werden auch Preisstrategien für absatzstarke/absatzschwache Produkte sowie für komplexe und einfache Produkte diskutiert, die sich vom Durchschnitt abheben. abc project management institute: Soft Power and Heritage Rodrigo Christofolletti, 2023-11-15 This book encourages a critical dialogue between interdisciplinary fields that border heritage boundaries and seeks to contribute a wide range of scholarly perspectives and case studies (both national and international). The widespread use of the concept of soft power is sometimes grossly misused as a synonym for anything other than military force. While the concept is one of the most popular and influential in progressive foreign policy circles and is noted for being the ability of a country to convince others that its cause is the best, without having to resort to economic or military threats, the your ability to accurately describe the world we live in needs repair lenses. The power of example, the power of attraction through culture or, in other words, the ability of a country to attract others because of its culture and political values in its foreign policy, that is, soft power, is something that emerges in partly because of government and partly in spite of governments. To have soft power, you need to be connected, and the interaction, management and dissemination of assets can be seen as exercises in soft power action. This book seeks to detail in examples how the concept of "soft power" encompasses and problematizes the multiplicity of themes on the contemporary international agenda, focusing on one of its least discussed elements: the universe of international cultural heritage and the relationship between actors and society, preservationist actions in the globalized world. While cultural heritage embodies different values and can serve different economic, social and political objectives in development contexts, the past becomes a cultural currency when it becomes essential to the human experience.

abc project management institute: The Eight Essential People Skills for Project Management Zachary Wong, 2018-12-11 Zachary Wong offers practical strategies, skills, and tools to help project managers diagnose and solve their toughest people problems. Based on decades in the trenches, the book shows how to confront and correct bad behavior, increase team performance and inclusion, turn around difficult people and poor performers, get people to do what you want them to do, boost employee motivation and attitude, reduce change resistance and risk aversion, and manage difficult bosses. Wong believes that the best team leaders are problem-solvers and facilitators, so this book provides problem-solving models and tools to diagnose people problems, and facilitative methods, processes, and techniques to correct them. It's an approach that can be personalized to fit any person or situation. Each skill is explained with a well-balanced mix of case stories, examples, strategies, processes, tools, and techniques along with illustrations, graphics, tables, and other visuals to clarify key concepts and their workplace application. To reinforce the most important learnings, Wong includes a "Memory Card" and "Skill Summary" at the end of each chapter. Nothing is harder than leading people and managing project teams. Being successful takes a combination of knowing human psychology, organizational behaviors, and human factors; having supervisory, process, and communication skills; ensuring good teamwork, high integrity, and strong leadership; and having the ability to integrate and apply these skills to a diverse work team. The Eight Essential People Skills for Project Management is designed for individuals, team leaders, and managers who oversee and coordinate the daily performance of others and who are seeking solutions that they can apply immediately.

abc project management institute: Geriatrics Models of Care Michael L. Malone, Marie Boltz, Jonny Macias Tejada, Heidi Kay White, 2024 Following the success of the previous edition, the second edition of Geriatrics Models of Care is the definitive resource for systems-based practice improvement for the care of older adults. Several new models of care have been published in the last eight years, new outcomes have emerged to better understand the impact of existing models, and with the rise of the Age-Friendly Health Systems movement, promoting organized efforts to prepare our health care settings for older individuals is of more importance than ever. The second edition is organized based on the practice setting along a continuum of care: hospital, transitions from hospital to home, outpatient settings, and the emergency department. This book also highlights long-term care models, which is an important part of the continuum of care for older Americans. Further, this edition features models that address the needs of vulnerable populations. This new section will describe a spectrum of programs for older adults who have Alzheimer's disease or Parkinson's disease. Other models describe best practices for older adults undergoing surgery or those who want to remain functioning independently in their home. A defining feature of this book is that each chapter follows a standard template: 1) the challenge which led to the model; 2) the patient population served; 3) core components of the intervention; 4) the role of interdisciplinary health professionals; 5) evidence to support the intervention; 6) lessons learned in the implementation and dissemination of the model; 7) implications for family caregivers, and communities (particularly underserved and diverse communities); and 8) how each model will provide care across the continuum during an entire episode of care. In addition, each chapter features a "call out" box with practical tips for implementing the model.
