abu garcia revo x parts diagram: De Sphaera of Johannes de Sacrobosco in the Early Modern Period Matteo Valleriani, 2020-01-01 This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his Tractatus de sphaera during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers

will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

abu garcia revo x parts diagram: The Urban Question Manuel Castells, 1977 A review of the original French edition of this book in the American Journal of Sociology hailed it as the most finished product yet to emerge from the new (Marxist) school of French urban sociology... The aim of the book is nothing less than to reconceptualize the field of urban sociology. It is carried out in two stages: a critique of the literature of urban sociology (and urbanization) and an attempt to lay the Marxist bases for a reconstructed urban sociology. The problems facing the world's cities, whether problems of development or of decay, cannot be solved until they have been diagnosed. The race riots in Detroit, the shantytowns of Paris, the financial crisis of New York must not be seen in isolation. The mushrooming cities of the third world, demolition and urban sprawl at home are located in a network of economics, social welfare and power politics, and the decisions we are called upon to make elude us in a fog of ideology. This brilliant exposition of the function of the city in social, economic and symbolic terms illuminates the creation and structuring of space by action administrative, productive and more immediately human. The interaction of environment and life-style, the complex of market forces and state policy against a background of traditional social practice is scrutinized with the aim of establishing concepts and research methods that will enable us to come to grips with the cities themselves and the way in which we view them. Castells draws on urban renewal in Paris, the English New Towns, the American megalopolis for concrete data in his empirical and theoretical investigation. In this English edition, a new Part V has been added on urban development in America. The chapters on the pobladores in Chile and the struggle of the FRAP in Quebec have been greatly extended and an Afterword traces the development of research in the past five years. -- Amazon.com.

Preservation in the Shadow of an Uncertain Future, 2020 This publication focuses on Factum Foundation's work to promote the use of high-resolution recording, digital restoration and creative re-materialisation while bringing into focus the changing attitudes towards owning, sharing, preserving and displaying cultural artefacts. It accompanies the exhibition 'La Riscoperta di un Capolavoro' at Palazzo Fava in Bologna, which has reunified the sixteen original panels that still exist from the Polittico Griffoni, a remarkable example of painting from the Bolognese Renaissance. The altarpiece stood in the Griffoni Chapel in the Church of San Petronio until it was broken up in 1725. The 16 tempera paintings by Francesco del Cossa and Ercole de' Roberti will be exhibited together with 16 facsimiles arranged in what is thought to be the original configuration of the altarpiece, allowing it to be seen as its patrons and makers intended. The aim of the collection of thoughts and images in this book is to encourage reflection on the ways that digital technologies in virtual and physical form, are changing our approach to the preservation and conservation of the material evidence of the past. 'The Aura in the Age of Digital Materiality' brings together recent projects by Factum and a wonderfully diverse collection of essays, many written especially for this book, by collaborators and friends. Their widely different backgrounds and disciplines only illustrate the importance of this subject and the huge range of its relevance. Exhibition: Genus Bononiae. abu garcia revo x parts diagram: Great Divergence and Great Convergence Leonid Grinin, Andrey Korotayev, 2015-05-09 This new monograph provides a stimulating new take on hotly contested topics in world modernization and the globalizing economy. It begins by situating what is called the Great Divergence--the social/technological revolution that led European nations to outpace the early dominance of Asia--in historical context over centuries. This is contrasted with an equally powerful Great Convergence, the recent economic and technological expansion taking place in Third World nations and characterized by narrowing inequity among nations. They are seen here as two phases of an inevitable global process, centuries in the making, with the potential for both positive and negative results. This sophisticated presentation examines: Why the developing world is growing more rapidly than the developed world. How this development began occurring under the Western world's radar. How former colonies of major powers grew to drive the world's economy. Why so many Western economists have been slow to recognize the Great Convergence. The increasing risk of geopolitical instability. Why the world is likely to find itself without an absolute leader after the end of the American hegemony. A work of rare scope, Great Divergence and Great Convergence gives sociologists, global economists, demographers, and global historians a deeper understanding of the broader movement of social and economic history, combined with a long view of history as it is currently being made; it also offers some thrilling forecasts for global development in the forthcoming decades.

Ruggles, Michel Cotte, 2017-11-30 This joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union is the second volume in an ongoing exploration of themes and issues relating to astronomical heritage in particular and to science and technology heritage in

general. It examines a number of key questions relating to astronomical heritage sites and their potential recognition as World Heritage, attempting to identify what might constitute outstanding universal value in relation to astronomy. *Heritage Sites of Astronomy and Archaeoastronomy--Volume 2* represents the culmination of several years' work to address some of the most challenging issues raised in the first ICOMOS-IAU Thematic Study, published in 2010. These include the recognition and preservation of the value of dark skies at both cultural and natural sites and landscapes; balancing archaeoastronomical considerations in the context of broader archaeological and cultural values; the potential for serial nominations; and management issues such as preserving the integrity of astronomical sightlines through the landscape. Its case studies are developed in greater depth than those in volume 1, and generally structured as segments of draft nomination dossiers. They include seven-stone antas (prehistoric dolmens) in Portugal and Spain, the thirteen towers of Chankillo in Peru, the astronomical timing of irrigation in Oman, Pic du Midi de Bigorre Observatory in France, Baikonur Cosmodrome in Kazakhstan, and Aoraki-Mackenzie International Dark Sky Reserve in New Zealand. A case study on Stonehenge, already a World Heritage Site, focuses on preserving the integrity of the solstitial sightlines. As for the first ICOMOS-IAU Thematic Study, a international team of authors including historians, astronomers and heritage professionals is led by Professor Clive Ruggles for the IAU and Professor Michel Cotte for ICOMOS.

abu garcia revo x parts diagram: *How Modern Science Came Into the World* H. F. Cohen, 2010 Once upon a time 'The Scientific Revolution of the 17th century' was an innovative concept that inspired a stimulating narrative of how modern science came into the world. Half a century later, what we now know as 'the master narrative' serves rather as a strait-jacket - so often events and contexts just fail to fit in. No attempt has been made so far to replace the master narrative. H. Floris Cohen now comes up with precisely such a replacement. Key to his path-breaking analysis-cum-narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected, revolutionary transformations, each of some twenty-five to thirty years' duration. This vision enables him to explain how modern science could come about in Europe rather than in Greece, China, or the Islamic world. It also enables him to explain how half-way into the 17th century a vast crisis of legitimacy could arise and, in the end, be overcome.

abu garcia revo x parts diagram: Oncology of CNS Tumors Jörg-Christian Tonn, Manfred Westphal, J. T. Rutka, 2010-02-03 Knowledge about the etiology and diagnosis as well as treatment concepts of neuro-oncologic diseases is rapidly growing. This turnover of knowledge makes it difficult for the physician engaged in the treatment to keep up to date with current therapies. This book sets out to close the gap and pursues several innovative concepts. As a comprehensive text on neuro-oncology, its chapters are interconnected, but at the same time some chapters or subdivisions are so thoroughly assembled that the whole volume gives the impression of several books combined into one. Neuropathology is treated in an extensive and clearly structured section. The interested reader finds for each tumor entity the latest well-referenced consensus regarding histologic and molecular pathology. Through this "book-in-the-book" concept, information on neuropathology is readily at hand in a concise form and without overloading the single chapters. Pediatric neuro-oncology differs in many entities from tumors in adult patients; also, certain tumors of the

CNS are typically or mainly found only in the child. Therefore, pediatric neuro-oncology was granted its own, book-like section. Tumor entities that are treated differently in children and adults are included both in the pediatric neuro-oncology section and in the general section. Entities that typically occur only in the child and adolescent are found in the pediatric section in order to avoid redundancies.

abu garcia revo x parts diagram: *4th International Conference on Internet of Things and Connected Technologies (ICIOTCT)*, 2019 Neeta Nain, Santosh Kumar Vipparthi, 2020-02-14 This book presents the proceedings of the 4th International Conference on Internet of Things and Connected Technologies (ICIOTCT), held on May 9-10, 2019, at Malaviya National Institute of Technology (MNIT), Jaipur, India. The Internet of Things (IoT) promises to usher in a revolutionary, fully interconnected "smart" world, with relationships between objects and their environment and objects and people becoming more tightly intertwined. The prospect of the Internet of Things as a ubiquitous array of devices bound to the Internet could fundamentally change how people think about what it means to be "online". The ICIOTCT 2019 conference provided a platform to discuss advances in Internet of Things (IoT) and connected technologies, such as various protocols and standards. It also offered participants the opportunity to interact with experts through keynote talks, paper presentations and discussions, and as such stimulated research. With the recent adoption of a variety of enabling wireless communication technologies, like RFID tags, BLE, ZigBee, embedded sensor and actuator nodes, and various protocols such as CoAP, MQTT and DNS, IoT has moved on from its infancy. Today smart sensors can collaborate directly with machines to automate decision-making or to control a task without human involvement. Further, smart technologies, including green electronics, green radios, fuzzy neural approaches, and intelligent signal processing techniques play an important role in the development of the wearable healthcare devices.

abu garcia revo x parts diagram: *The History of Water Management in the Iberian Peninsula* Ana Duarte Rodrigues, Carmen Toribio Marín, 2020-03-18 This volume approaches the history of water in the Iberian Peninsula in a novel way, by linking it to the ongoing international debate on water crisis and solutions to overcome the lack of water in the Mediterranean. What water devices were found? What were the models for these devices? How were they distributed in the villas and monastic enclosures? What impact did hydraulic theoretical knowledge have on these water systems, and how could these systems impact on hydraulic technology? Guided by these questions, this book covers the history of water in the most significant cities, the role of water in landscape transformation, the irrigation systems and water devices in gardens and villas, and, lastly, the theoretical and educational background on water management and hydraulics in the Iberian Peninsula between the sixteenth and the nineteenth centuries. Historiography on water management in the territory that is today Spain has highlighted the region's role as a mediator between the Islamic masters of water and the Christian world. The history of water in Portugal is less known, and it has been taken for granted that is similar to its neighbour. This book compares two countries that have the same historical roots and, therefore, many similar stories, but at the same time, offers insights into particular aspects of each country. It is recommended for scholars and researchers interested in any field of history of the early modern period and of the nineteenth century, as well as general readers interested in studies on the Iberian Peninsula, since it was the role model for many settlements in South America, Asia and Africa.

abu garcia revo x parts diagram: *Drought phenotyping in crops: From theory to practice* Philippe Monneveux, Jean-Marcel Ribaut, Antonia Okono, 2014-02-12 This topic is a unique attempt to simultaneously tackle theoretical and practical aspects in drought phenotyping, through both crop-specific and cross-cutting approaches. It is designed for – and will be of use to – practitioners and postgraduate students in plant science, who are grappling with the challenging task of evaluating germplasm performance under different water regimes. In Part I, different methodologies are presented for accurately characterising environmental conditions, implementing trials, and capturing and analysing the information this generates, regardless of the crop. Part II presents the state-of-art in research on adaptation to drought, and recommends specific protocols to measure different traits in major food crops (focusing on particular cereals, legumes and clonal crops). The topic is part of the CGIAR Generation Challenge Programme's efforts to disseminate crop research information, tools and protocols, for improving characterisation of environments and phenotyping conditions. The goal is to enhance expertise in testing locations, and to stimulate the development and use of traits related to drought tolerance, as well as innovative protocols for crop characterisation and breeding.

Further topics include the ferrule effect, evidence-based clinical applications of fiber posts and new methods to lute fiber posts to the root canal without dentin adhesives. INCLUDING Over 2 hours of supporting video material (designed to be worth the price of the book on its own) Hands up who knows what Euro nymphing is? It's incredibly popular and causes many online arguments - yet most anglers show CLEAR GAPS in their skills and knowledge. So if you want to go beyond bobbers and split shot, you'll need to dodge an overwhelming tide of BS online covering Tight Line Nymphing and European competition methods. While there are good books available, certain tactics are left out (keeping a number of methods known only to a handful of top anglers) and it is difficult to build a strategy for choosing and using each of the different rigs, methods and flies. The aim of this book is to arm you with the most complete range of tactics possible and give you the confidence to tackle new waters and different conditions. It does this by clearly explaining WHY to choose - as well as HOW to use - each rig & technique. The methods include: Czech nymphing (both the little-known LONG-line variant & the famous SHORT-line tactics) Polish nymphing Ladder Leader Nymphing (so you can quickly alter the spacing between your droppers, which means you're more likely to actually benefit from those fine-tuning tweaks) Classic French Nymphing The family of modern Nympe au Fil, Pêche a la Sempé and Spanish Nymphing French Leader with Dry Fly French Leader with Streamer Duo and Trio (Euro-style Hopper/Dropper with everything off the water up to the dry) Slovakian nymphing ...and even a little suspension nymphing so that the typical Tight-line Euro tactics don't have it all their own way All this is underpinned by the understanding of a freshwater biologist (and nymph fishing addict) which reveals important secrets of predators and prey behaviour in our rivers - and how to hotwire that system with our artificial flies. Stories from around the world bring the tactics to life - as well as making the take-home messages much more memorable (so you'll actually use them in your own fishing) PLUS: Full color photos of actual flies gifted during major international competition events which let you peek inside boxes of multiple World Championship competitors (including captains and coaches) Multiple Detailed Spotlight Features on: Sighters/indicators □ Reading the Water □ Stealth □ Casting □ Feeding Biology of Fish □ Trade Secret Leader Recipes and Chemical Treatments □ A Simplified Set of Fly Patterns □ Magic Bullet Method (Selecting Rigs, Flies & Fishing Locations) Method in my Madness Carefully layering the information means that there are quick win tips you can use right away - while bigger ideas build up and become absorbed naturally over the course of the book. I believe this gives you the best chance of greatly improving your ability to catch fish, to adapt to situations - and perhaps re-boot your love of fly fishing in the process! Who SHOULDN'T buy this? This is a practical, paperback manual - not an ornament. Don't buy this book if informal, conversational language or Sans Serif font aren't your things. It considers and critiques the manner in which political violence is understood and constructed, and the common assumptions that prevail regarding the causes, victims, and perpetrators of this violence. By focusing on the social and political context of these regions, the book presents a critical understanding of the nature of political violence and provides an alternative narrative to that found in mainstream analysis of terrorism. Political Violence in South and Southeast Asia brings together political scientists and anthropologists with intimate knowledge of the politics and society of these regions, who present unique perspectives on topics including assassinations, riots, state violence, the significance of geographic borders, external influences and intervention, and patterns of recruitment and rebellion. Contributors include Paula Banerjee (Calcutta University and Calcutta Research Group), Vincent Boudreau (City College of New York), Paul R. Brass (University of Washington), Naureen Chowdhury Fink (International Peace Institute, New York), Natasha Hamilton-Hart (National University of Singapore), Sankaran Krishna (University of Hawaii-Manoa), Darini Rajasingham (Social Scientists Association and International Centre for Ethnic Studies, Sri Lanka), Geoffrey Robinson (UCLA), Varun Sahni (Jawaharlal Nehru University, New Delhi), Shamuël Tharu (Jawaharlal Nehru University).

abu garcia revo x parts diagram: *Western Conceptions of Democracy and the Transatlantic Divide Over Democracy Promotion* Golareh Khalilpour, 2020-04 Do liberal Western democracies share a common understanding of democracy? If so, why is there a transatlantic divide over the promotion of democracy? While the US applies a bottom-up strategy in this respect, the European Union pursues a top-down approach. While there is consensus as to the desirability of the external promotion of democracy, disagreement persists as to what kinds of strategies work more effectively. This book suggests that differences between the US and Europe in terms of the promotion of democracy derive from different historical backgrounds, experiences with political modernisation and, hence, historically embedded conceptions of democracy. Democracy promoters choose instruments that advance their vision of an ideal transition and that are congruent with their respective understandings of democracy. This book's analysis of media debates in four Western democracies reveals different understandings with regard to the key aspects of democracy across the Atlantic and contributes to research on the transatlantic divide in this regard.
