ac hotel financial district: *Evolving Transportation Networks* Feng Xie, David Levinson, 2011-04-15 Over the last two centuries, the development of modern transportation has significantly transformed human life. The main theme of this book is to understand the complexity of transportation development and model the process of network growth including its determining factors, which may be topological, morphological, temporal, technological, economic, managerial, social or political. Using multidimensional concepts and methods, the authors develop a holistic framework to represent network growth as an open and complex process with models that demonstrate in a scientific way how numerous independent decisions made by entities such as travelers, property owners, developers, and public jurisdictions could result in a coherent network of facilities on the ground. Models are proposed from innovative perspectives including self-organization, degeneration, and sequential connection to interpret the evolutionary growth of transportation networks in explicit consideration of independent economic and regulatory initiatives. Employing these models, the authors survey a series of topics ranging from network hierarchy and topology to first mover advantage. The authors demonstrate, with a wide spectrum of empirical and theoretical evidence, that network growth follows a path that is not only logical in retrospect, but also predictable and manageable from a planning perspective. In the larger scheme of innovative transportation planning, this book provides a re-consideration of conventional planning practice and sets the stage for further development on the theory and practice of the next-generation, evolutionary planning approach in transportation, making it of interest to scholars and practitioners alike in the field of transportation .

ac hotel financial district: *A People's Guide to the San Francisco Bay Area* Rachel Brahinsky, Alexander Tarr, 2020-10-06 An alternative history and geography of the Bay Area that highlights sites of oppression, resistance, and transformation. A People's Guide to the San Francisco Bay Area looks beyond the mythologized image of San Francisco to the places where collective struggle has built the region. Countering romanticized commercial narratives about the Bay Area, geographers Rachel Brahinsky and Alexander Tarr highlight the cultural and economic landscape of indigenous resistance to colonial rule, radical interracial and cross-class organizing against housing discrimination and police violence, young people demanding economically and ecologically sustainable futures, and the often-unrecognized labor of farmworkers and everyday people. The book asks who had—and who has—the power to shape the geography of one of the most watched regions in the world. As Silicon Valley's wealth dramatically transforms the look and feel of every corner of the region, like bankers' wealth did in the past, what do we need to remember about the people and places that have made the Bay Area, with its rich political legacies? With over 100 sites that you can visit and learn from, this book demonstrates critical ways of reading the landscape itself for clues to these histories. A useful companion for travelers, educators, or longtime residents, this guide links multicultural streets and lush hills to suburban cul-de-sacs and wetlands, stretching from the North Bay to the South Bay, from the East Bay to San Francisco. Original maps help guide readers, and thematic tours offer starting points for creating your own routes through the region.

ac hotel financial district: *A Desert Called Peace, Second Edition* Tom Kratman, 2013-01-24 Now with new Content by Tom Kratman HE RAISED AN ARMY AGAINST THOSE WHO TOOK EVERYTHING FROM HIM They should have picked their enemies more carefully. Five centuries from now, on a remarkably Earthlike planet that is mankind's sole colony in space, religious fanatics called the Salafi Ikhwan have murdered the uncle of former colonel Patrick Hennessey. That was their first mistake, because uncle was rich and Hennessey was rather a good colonel. But they also murdered Hennessey's wife, Linda, and their three small children, and that was their worst mistake for she was the only restraint Hennessey had ever accepted. From the pile of rubble and the pillar of fire that mark the last resting place of Linda Hennessey and her children arises a new warrior³/₄Carrera, scourge of the Salafis. He will forge an army of ruthless fanatics from the decrepit remains of failed state's military. He will wage war across half a world. He will find those who killed his family. He will destroy them, and those who support them, utterly, completely, without restraint or remorse. Only when he is finished will there be peace: the peace of an empty wind as it blows across a desert strewn with the bones of Carrera's enemies. ac hotel financial district: *New York* Michael N. Danielson, Jameson W. Doig, 1982-09-15 This volume is the fourth in the Franklin K. Lane series on the governance of major metropolitan regions. The series is sponsored by the Institute of Governmental Studies and the Institute of International Studies, University of California in Berkeley. Readers of these volumes and other relevant literature will no doubt agree with the authors of this book that similar patterns are found in New York, London, Toronto, Stockholm, and indeed in every other major metropolitan region in the United

States and in other advanced industrial societies. The presence of such common factors and trends, although they assume different configurations in various metropolitan regions, has been demonstrated by the work of many scholars, including Peter Hall, Brian Berry, Marion Clawson, Jean Gottmann, Larry Bourne and William Robson, as well as by the authors of the other Franklin K. Lane books—Donald Foley, Albert Rose and Thomas Anton. In the present volume Michael Danielson and Jameson Doig have described and analyzed the cultural, economic, political and other social forces shaping development in the New York region. They present a picture of a region singular in its attractions, problems, geographic scope, magnitude of development, and complexity of the network of organizations involved in its governance.

ac hotel financial district: *Contentious City* John Mollenkopf, 2005-08-25 Few public projects have ever dealt with economic and emotional issues as large as those surrounding the rebuilding of lower Manhattan following the terrorist attack of September 11, 2001. Picking up the pieces involved substantial challenges: deciding how to memorialize one of America's greatest tragedies, how to balance the legal claim of landowners against the moral claim of survivors who want a say in the future of Ground Zero, and how to rebuild the Trade Center site while preserving the sacredness and solemnity that Americans now attribute to the area. All the while, the governor, the mayor, the Port Authority, and the leaseholder competed with one another to advance their own interests and visions of the redevelopment, while at least leaving the impression that the decisions were the public's to make. In *Contentious City*, editor John Mollenkopf and a team of leading scholars analyze the wide-ranging political dimensions of the recovery process. *Contentious City* takes an in-depth look at the competing interests and demands of the numerous stakeholders who have sought to influence the direction of the recovery process. Lynne Sagalyn addresses the complicated institutional politics behind the rebuilding, which involve a newly formed development commission seeking legitimacy, a two-state transportation agency whose brief venture into land ownership puts it in control of the world's most famous 16 acres of land, and a private business group whose affiliation with the World Trade Center places it squarely in a fight for billions of dollars in insurance funds. Arielle Goldberg profiles five civic associations that sprouted up to voice public opinion about the redevelopment process. While the groups did not gain much leverage over policy outcomes, Goldberg argues that they were influential in steering the agenda of decision-makers and establishing what values would be prioritized in the development plans. James Young, a member of the jury that selected the design for the World Trade Center site memorial, discusses the challenge of trying to simultaneously memorialize a tragic event, while helping those who suffered find renewal and move on with their lives. Editor John Mollenkopf contributes a chapter on how the September 11 terrorist attacks altered the course of politics in New York, and how politicians at the city and state level adapted to the new political climate after 9/11 to win elected office. Moving forward after the destruction of the Twin Towers was a daunting task, made more difficult by the numerous competing claims on the site, and the varied opinions on how it should be used in the future. *Contentious City* brings together the voices surrounding this intense debate, and helps make sense of the rival interests vying for control over one of the most controversial urban development programs in history.
