**academy dog training by haywood: Advanced Analysis of Motor Development** Kathleen M. Haywood, Mary Ann Robertson, Nancy Getchell, 2011-12-30 Advanced Analysis of Motor Development explores how research is conducted in testing major issues and questions in motor

development. It also looks at the evolution of research in the field, its current status, and possible future directions. This text is one of the few to examine motor development models and theories analytically while providing a context for advanced students in motor development so they can understand current and classic research in the field. Traditionally, graduate study in motor development has been approached through a compilation of readings from various sources. This text meets the need for in-depth study in a more cohesive manner by presenting parallels and highlighting relationships among research studies that independent readings might not provide. In addition, *Advanced Analysis of Motor Development* builds a foundation in the theories and approaches in the field and demonstrates how they drive contemporary research in motor development. A valuable text for graduate students beginning their own research projects or making the transition from student to researcher, this text focuses on examining and interpreting research in the field. Respected researchers Haywood, Robertson, and Getchell explain the history and evolution of the field and articulate key research issues. As they examine each of the main models and theories that have influenced the field, they share how motor development research can be applied to the fields of physical education, special education, physical therapy, and rehabilitation sciences. With its emphasis on critical inquiry, *Advanced Analysis of Motor Development* will help students examine important topics and questions in the field in a more sophisticated manner. They will learn to analyze research methods and results as they deepen their understanding of developmental phenomena. For each category of movement skills covered (posture and balance, foot locomotion, ballistic skills, and manipulative skills), the authors first offer a survey of the pertinent research and then present an in-depth discussion of the landmark studies. In analyzing these studies, students will come to appreciate the detail of research and begin to explore possibilities for their own future research. Throughout the text, special elements help students focus on analysis. Tips for Novice Researchers sidebars highlight issues and questions raised by research and offer suggestions for further exploration and study. Comparative tables detail the differences in the purpose, methods, and results of key studies to help students understand not only what the studies found but also the relevance of those findings. With *Advanced Analysis of Motor Development*, readers will discover how research focusing on the major issues and central questions in motor development is produced and begin to conceptualize their own research. Readers will encounter the most important models and theories; dissect some of the seminal and recent articles that test these models and theories; and examine issues such as nature and nurture, discontinuity and continuity, and progression and regression. *Advanced Analysis of Motor Development* will guide students to a deeper understanding of research in life span motor development and enable them to examine how the complexities of motor development can be addressed in their respective professions.

**academy dog training by haywood: Life Span Motor Development** Kathleen M. Haywood, Nancy Getchell, 2018-10-30 Please note: This text was replaced with a seventh edition. This version is available only for courses using the sixth edition and will be discontinued at the end of the semester. *Life Span Motor Development, Sixth Edition With Web Study Guide*, uses the model of constraints in discussing reasons for changes in movement throughout the life span, Focusing on assessment more heavily than previous editions, this updated edition encourages students to examine how the interactions of the individual, environment, and task bring about changes in a person's movements. The principles of motor development are presented in an accessible manner so that even readers with minimal movement science background will comprehend the material. A key component of the sixth edition is an improved web study guide featuring revised lab activities and better functionality. New to this edition, lab activity record sheets and questions are available as fillable documents so that students can complete and submit them electronically, resulting in increased efficiency and reduced paperwork for instructors. In several labs, guided assessments teach students to observe video and categorize movements accurately. These assessments cue students to look at particular parts of the movement and guide students through questions, answers, and feedback. Then students are provided opportunities for unguided assessments via video clips or live observation, putting into practice what they have learned in the guided assessments. There are

also over 100 new video clips in the web study guide, including a comprehensive video diary of the motor development milestones in the first nine months of a baby's life. Life Span Motor Development, Sixth Edition, contains several other updates that are appealing to instructors and students alike:

- A new full-color interior provides for a more engaging presentation of the material.
- Updated research includes Generation R studies and connections to fitness and motor skills.
- An updated presentation package and image bank, plus a test package and chapter quizzes, are included.
- An instructor guide includes recommendations on using the lab activities in the web study guide both in and out of class.
- Multiple learning exercises that were previously part of the web resource have been moved to the book to allow the video-rich lab activities to occupy students' learning time when they are online.

As in past editions, students understand how maturational age and chronological age are distinct and how functional constraints affect motor skill development and learning. It also covers normal and abnormal developmental issues across the full life span, especially in the formative years. The text shows how the four components of physical fitness—cardiorespiratory endurance, strength, flexibility, and body composition—interact to affect a person's movements over the life span. It also describes how relevant social, cultural, psychosocial, and cognitive influences can affect a person's movements. Significant updates focus on assessment, including new figures that help to explain in detail the functional constraints approach to assessment. Life Span Motor Development, Sixth Edition, not only provides students with the observational skills necessary for assessing motor development, but it also expertly ties the information to real life. The text continues to emphasize the application of motor development concepts to the real world by beginning each chapter with an example of a common experience and then revisiting that experience at the end of the chapter, allowing readers to apply the material to the example. The book also retains the objectives; running glossary; and key points, sidebars, and application questions throughout each chapter. Life Span Motor Development, Sixth Edition, encompasses the most current research in motor development. It is enhanced with practical online resources for instructors and students, making the concepts of motor development come alive. The text gives students a solid foundation not only for beginning their studies in motor development but also for applying the concepts to real-world situations.

Haywood, Nancy Getchell, 2021-06-01 Life Span Motor Development, Seventh Edition With HKPropel Access, is a leading text for helping students examine and understand how interactions of the developing and maturing individual, the environment, and the task being performed bring about changes in a person's movements. This model of constraints approach, combined with an unprecedented collection of video clips marking motor development milestones, facilitates an unmatched learning experience for the study of motor development across the life span. The seventh edition expands the tradition of making the student's experience with motor development an interactive one. Related online learning tools delivered through HKPropel include more than 190 video clips marking motor development milestones to sharpen observation techniques, with interactive questions and 47 lab activities to facilitate critical thinking and hands-on application. The lab activities may be assigned and tracked by instructors through HKPropel, along with chapter quizzes (assessments) that are automatically graded to test comprehension of critical concepts. The text also contains several updates to keep pace with the changing field: Content related to physical growth and development of the skeletal, muscle, and adipose systems is reorganized chronologically for a more logical progression. New material on developmental motor learning demonstrates the overlap between the disciplines of motor development and motor learning. New insights into motor competence help explain the relationship between skill development and physical fitness. The text helps students understand how maturational age and chronological age are distinct and how functional constraints affect motor skill development and learning. It shows how the four components of physical fitness—cardiorespiratory endurance, strength, flexibility, and body composition—interact to affect a person's movements over the life span, and describes how relevant social, cultural, psychosocial, and cognitive influences can affect a person's movements. **academy dog training by haywood: Greening the Academy** Samuel Fassbinder, Anthony Nocella, Richard Kahn, 2012-12-30 This is the academic Age of the Neoliberal Arts. Campuses—as places characterized by democratic debate and controversy, wide ranges of opinion typical of vibrant public spheres, and service to the larger society—are everywhere being creatively destroyed in order to accord with market and military models befitting the academic-industrial complex. While it has become increasingly clear that facilitating the sustainability movement is the great 21st century educational challenge at hand, this book asserts that it is both a dangerous and criminal development today that sustainability in higher education has come to be defined by the complex-friendly “green campus” initiatives of science, technology, engineering and management programs. By contrast, Greening the Academy: Ecopedagogy Through the Liberal Arts takes the standpoints of those working for environmental and ecological justice in order to critique the unsustainable disciplinary limitations within the humanities and social sciences, as well as provide tactical reconstructive openings toward an empowered liberal arts for sustainability. Greening the Academy thus hopes to speak back with a collective demand that sustainability education be defined as a critical and moral vocation comprised of the diverse types of humanistic study that will benefit the well-being of our emerging planetary community and its numerous common locales.

**academy dog training by haywood: Practical Ethics** Peter Singer, 2011-02-21 For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

**academy dog training by haywood: The Other Side of the World** Mary Jo Clark, Thomas Corbett, Haywood Turrentine, 2011-07 The Other Side of the World: Vision and Reality embraces and celebrates the experiences of idealistic, young Peace Corps volunteers as they confronted the ancient and enigmatic civilization of India four decades ago. Prompted by memories and emotions tapped during a gathering on the 40-year reunion of their return to the States, members of India 44 A&B provide reflections that are honest, compelling, insightful, riotous, humbling, and yet redemptive. These reflections give expression to feelings long repressed and, at the same time, uncover the mysterious ways in which their service in remote India transformed and redirected the

trajectory of their lives. Their stories provide a humorous and deeply moving description of village life, where imperfect language skills and limited technical capabilities interacted with good intentions and stubborn dedication to produce embarrassment on the one hand, and the occasional minor miracle on the other. This is not a feel-good testimony to the Peace Corps on its golden anniversary. Rather, it is a sobering depiction of the lives of volunteers living in one of the Peace Corps' most demanding site countries, where frustrations and challenges were found in abundance. Yet at the end of the day, these stories generally attest to the wisdom of the Peace Corps concept, which affirms the powers of volunteerism and the giving of self. For many, it was the first time these volunteers had articulated their feelings since leaving India. Mary Jo Clark, Thomas Corbett, Michael Simonds and Haywood Turrentine compiled the book. Respectively, the authors reside in San Diego, California, Madison, Wisconsin, the greater Hartford area, and Birmingham, Alabama. <http://sbpra.com/HaywoodTurrentine>

**academy dog training by haywood:** Integrative Gastroenterology Gerard E. Mullin, Marvin Singh, Alyssa Parian, 2019-09-27 Digestive complaints have become increasingly common. Recent statistics show that gastrointestinal complaints account for nearly a third of all visits to primary care doctors and that nearly one in two Americans suffer from digestive disease. Millions more suffer from conditions such as migraine headaches, arthritis, mood disorders, chronic fatigue, asthma, allergies, and menstrual dysfunction, which are all related to a disorder in digestive health. Despite the evidence in support of integrative approaches to treatment and prevention of digestive symptoms, these approaches are largely overlooked in treating gastrointestinal disorders. Rather, treatment plans tend to be exclusively pharmacologically based and have appreciable toxicity. Integrative Gastroenterology, Second edition, is a comprehensive guide to helping health care practitioners understand and appreciate how to manage patients with gastrointestinal conditions integrating conventional and complementary approaches. This text reviews the latest advances in science and research with regards to the gut microbiome, physiology, and interconnections between the gut and other organ systems. Coverage includes a diverse range of treatment methods, such as probiotics, meditation, massage, yoga, supplements, special diets, energy medicine, homeopathy, and acupuncture, as well as a special section devoted to mind-body medicine in digestive health and disease. In discussing unconventional treatments, the authors address many of the controversies that surround the remedies.

**academy dog training by haywood: *Light, Paper, Process*** Virginia Heckert, 2015-04-14 From its beginnings, photography has been shaped by the desire to understand and explore the essence of the medium. *Light, Paper, Process* features the work of seven artists—Alison Rossiter, Marco Breuer, James Welling, Lisa Oppenheim, Chris McCaw, John Chiara, and Matthew Brandt—who investigate the possibilities of analog photography by finding innovative, surprising, and sometimes controversial ways to push light-sensitive photographic papers and chemical processing beyond their limits. A panoply of practices emerges in the work of these artists. Some customize cameras with special lenses or produce images on paper without a camera or film. Others load paper, rather than film, in the camera or create contact-printing with sources of light other than the enlarger, while still others use expired photographic papers and extraneous materials, such as dust and sweat, selected to match the particular subject of the photograph. All of the artists share a willingness to embrace accident and chance. Trial and error contribute to an understanding of the materials and their potential, as do the attitudes of underlying curiosity and inventive interrogation. The act of making each image is like a performance, with only the photographer present. The results are stunning. This lavish publication accompanies an eponymous exhibition on view at the J. Paul Getty Museum from April 14 to September 6, 2015.

**academy dog training by haywood: *Climate Change and Aviation*** Stefan Gossling, Paul Upham, 2012-05-04 'This is a timely, challenging and fascinating book on a topic of central importance to the success or otherwise of our climate change policies. It sets down a clear marker for what has to be done in the aviation sector.' Professor John Whitelegg, Stockholm Environment Institute, University of York, UK 'Climate Change and Aviation presents a clear picture of the transport sector's greatest challenge: how to reconcile aviation's immense popularity with its considerable environmental damage and its dependence on liquid hydrocarbon energy sources. This book avoids wishful thinking and takes the much harder, but more productive, path of considering difficult solutions that clash with short-term and short-sighted expectations about the unlimited growth potential for flying.' Professor Anthony Perl, Urban Studies Program, Simon Fraser University, Canada 'A convincing and timely collection that brings together an impressive range of expertise. The book integrates various perspectives into a powerful core argument - we must do something, and quickly, to tackle the impact of aviation on our environment. The authors recognise the political difficulties associated with promoting change but present constructive options for policy

makers. Required reading, especially for transport ministers set on promoting the growth of air travel.' Professor Jon Shaw, Director of the Centre for Sustainable Transport, University of Plymouth, UK Trends such as the massive growth in availability of air travel and air freight are among those which have led to aviation becoming one of the fastest growing emitters of greenhouse gases. These trends have also caused a shift in expectations of how we do business, where we go on holiday, and what food and goods we can buy. For these reasons aviation is (and is set to stay) high up on global political, organizational and media agendas. This textbook is the first to attempt a comprehensive review of the topic, bringing together an international team of leading scientists. Starting with the science of the environmental issues, it moves on to cover drivers and trends of growth, socio-economics and politics, as well as mitigation options, the result being a broad yet detailed examination of the field. This is essential reading for undergraduate and postgraduate courses in transport, tourism, the environment, geography and beyond, while also being a valuable resource for professionals and policymakers seeking a clear understanding of this complex yet urgently pressing issue.

**academy dog training by haywood: Scientific and Humane Issues in the Use of Random Source Dogs and Cats in Research** National Research Council, Division on Earth and Life Studies, Institute for Laboratory Animal Research, Committee on Scientific and Humane Issues in the Use of Random Source Dogs and Cats in Research, 2009-11-30 Scientific and Humane Issues in the Use of Random-Source Dogs and Cats in Research examines the value of random-source animals in biomedical research and the role of Class B dealers who acquire and resell live dogs and cats to research institutions. Findings include that, while some random-source dogs and cats may be necessary and desirable for National Institutes of Health (NIH)-funded research, there is no clear need to obtain those animals from Class B dealers. Several options for random-source animal acquisition already exist and additional options are recommended, which would further ensure the welfare of these animals and foster a positive public image for NIH. While the scientific community has recognized and responded to concerns for humane treatment of animals in research, government oversight has thus far been unable to fully enforce the Animal Welfare Act in regard to Class B dealers of live animals. Although the animals acquired by Class B dealers are destined for research-and NIH research in particular-the standard of care while in the possession of some Class B dealers requires an inordinate amount of government enforcement and is not commensurate with

the policies of most NIH-funded research laboratories. This dichotomy of standards reflects poorly on public perceptions of NIH and jeopardizes animal welfare. This book will be crucial for NIH and other groups using random-source animals in research, including veterinary schools and research facilities. Animal welfare advocates, policy makers, and concerned pet owners will also find this a vital and informative work for reconciling the needs of research with the welfare of animals.

**academy dog training by haywood:** Dog Shows and Doggy People Charles Henry Lane, 2007-10 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

**academy dog training by haywood:** Management of Animal Care and Use Programs in Research, Education, and Testing Robert H. Weichbrod, Gail A. (Heidbrink) Thompson, John N. Norton, 2017-09-07 AAP Prose Award Finalist 2018/19 Management of Animal Care and Use Programs in Research, Education, and Testing, Second Edition is the extensively expanded revision of the popular Management of Laboratory Animal Care and Use Programs book published earlier this century. Following in the footsteps of the first edition, this revision serves as a first line management resource, providing for strong advocacy for advancing quality animal welfare and science worldwide, and continues as a valuable seminal reference for those engaged in all types of programs involving animal care and use. The new edition has more than doubled the number of chapters in the original volume to present a more comprehensive overview of the current breadth and depth of the field with applicability to an international audience. Readers are provided with the

latest information and resource and reference material from authors who are noted experts in their field. The book: - Emphasizes the importance of developing a collaborative culture of care within an animal care and use program and provides information about how behavioral management through animal training can play an integral role in a veterinary health program - Provides a new section on Environment and Housing, containing chapters that focus on management considerations of housing and enrichment delineated by species - Expands coverage of regulatory oversight and compliance, assessment, and assurance issues and processes, including a greater discussion of globalization and harmonizing cultural and regulatory issues - Includes more in-depth treatment throughout the book of critical topics in program management, physical plant, animal health, and husbandry. Biomedical research using animals requires administrators and managers who are knowledgeable and highly skilled. They must adapt to the complexity of rapidly-changing technologies, balance research goals with a thorough understanding of regulatory requirements and guidelines, and know how to work with a multi-generational, multi-cultural workforce. This book is the ideal resource for these professionals. It also serves as an indispensable resource text for certification exams and credentialing boards for a multitude of professional societies Co-publishers on the second edition are: ACLAM (American College of Laboratory Animal Medicine); ECLAM (European College of Laboratory Animal Medicine); IACLAM (International Colleges of Laboratory Animal Medicine); JCLAM (Japanese College of Laboratory Animal Medicine); KCLAM (Korean College of Laboratory Animal Medicine); CALAS (Canadian Association of Laboratory Animal Medicine); LAMA (Laboratory Animal Management Association); and IAT (Institute of Animal Technology).

Bradbeer, 2018-09 *Lethal and Non-Lethal Fires: Historical Case Studies of Converging Cross-Domain Fires in Large Scale Combat Operations*, provides a collection of ten historical case studies from World War I through Desert Storm. The case studies detail the use of lethal and non-lethal fires conducted by US, British, Canadian, and Israeli forces against peer or near-peer threats. The case studies span the major wars of the twentieth-century and present the doctrine the various organizations used, together with the challenges the leaders encountered with the doctrine and the operational environment, as well as the leaders' actions and decisions during the conduct of operations. Most importantly, each chapter highlights the lessons learned from those large scale combat operations, how they were applied or ignored and how they remain relevant today and in the future.

**academy dog training by haywood:** Enlightenment Now Steven Pinker, 2018-02-13 INSTANT NEW YORK TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF 2018 ONE OF THE ECONOMIST'S BOOKS OF THE YEAR My new favorite book of all time. --Bill Gates If you think the

world is coming to an end, think again: people are living longer, healthier, freer, and happier lives, and while our problems are formidable, the solutions lie in the Enlightenment ideal of using reason and science. By the author of the new book, *Rationality*. Is the world really falling apart? Is the ideal of progress obsolete? In this elegant assessment of the human condition in the third millennium, cognitive scientist and public intellectual Steven Pinker urges us to step back from the gory headlines and prophecies of doom, which play to our psychological biases. Instead, follow the data: In seventy-five jaw-dropping graphs, Pinker shows that life, health, prosperity, safety, peace, knowledge, and happiness are on the rise, not just in the West, but worldwide. This progress is not the result of some cosmic force. It is a gift of the Enlightenment: the conviction that reason and science can enhance human flourishing. Far from being a naïve hope, the Enlightenment, we now know, has worked. But more than ever, it needs a vigorous defense. The Enlightenment project swims against currents of human nature--tribalism, authoritarianism, demonization, magical thinking--which demagogues are all too willing to exploit. Many commentators, committed to political, religious, or romantic ideologies, fight a rearguard action against it. The result is a corrosive fatalism and a willingness to wreck the precious institutions of liberal democracy and global cooperation. With intellectual depth and literary flair, *Enlightenment Now* makes the case for reason, science, and humanism: the ideals we need to confront our problems and continue our progress.

**academy dog training by haywood:** *Writing to Heal* Dale Darley, 2019-01-14 Writing to heal - Change your life through journaling, reflecting and creative life stories Author: Dale Darley Writing in a journal is powerful, cathartic and life-changing. This book has been described by one reader as different from any other journaling book that she has bought, because of it's positive perspective. Another reader told me Just wanted to let you know that I started reading your book this morning and was instantly hooked. I found a book to write in and have written seven pages on the most traumatic experience in my life, cried buckets but loved getting it down on paper and feel so much better with it being out and there are so many pages to add over the next four days. This bit comes from my soul - your book is, I feel going to save my life, not from death but disillusionment - a life of disillusionment - can you imagine! I've been facing that for a while, and today you gave me the path out of that, the path I've been looking in the long grass for! For the first time in 2 years, I sit here now with a jewel of excitement in my belly - so long since I felt that. Another said 'I feel as if you really get me and I can finally write and let it all out.' I wrote this book as a result of being in one dark place too many. I had written and journaled for years, using my writing to get my feelings out. As I sat and reflected I found ways to overcome my perceived problems. When I was out walking stories started to come into my head. It was then I realised that creative life writing, where you take your journal entries and turn them into stories was not only fun but incredibly healing. Do you feel stuck? Do you want clarity? Do you want to write and journal in a positive way? Do you want to have fun with your journaling? Then *Writing to Heal* is for you... *Writing to Heal* takes you on a journey that asks you first to pick up your pen and write. To then reflect on what you have written and rewrite it with positive intention so that you change the story. This book guides you from starting to journal, through reflective practice and on into creative life writing. Writing stories is a fantastic way for anyone who is interested in making changes to their lives, to be in control of what happens next and to let the healing begin. When you start to use stories to change the way you think, your perspective changes. My dream is that this book inspires you to write and to consider writing your life story or memoir. It's easy to read, pick up and flick through, one of those bedside books to dip into when you are pondering what to write.

**academy dog training by haywood: Foxfire** Joyce Carol Oates, 1994-08-01 New York Times bestselling author Joyce Carol Oates's strongest and most unsparing novel yet—an always engrossing, often shocking evocation of female rage, gallantry, and grit. The time is the 1950s. The place is a blue-collar town in upstate New York, where five high school girls join a gang dedicated to pride, power, and vengeance on a world that seems made to denigrate and destroy them. Here is the secret history of a sisterhood of blood, a haven from a world of male oppressors, marked by a liberating fury that burns too hot to last. Above all, it is the story of Legs Sadovsky, with her lean, on-the-edge, icy beauty, whose nerve, muscle, hate, and hurt make her the spark of Foxfire: its guiding spirit, its burning core. At once brutal and lyrical, this is a careening joyride of a novel—charged with outlaw energy and lit by intense emotion. Amid scenes of violence and vengeance lies this novel's greatest power: the exquisite, astonishing rendering of the bonds that link the Foxfire girls together. Foxfire reaffirms Joyce Carol Oates's place at the very summit of American writing.
