But this ignores the unprecedented rate of social and technological change. A building only begins its life when the contractors leave. With resources at a premium and a greater need for a sustainable use of building materials, can we still afford to construct new housing or indeed any buildings that ignore the need for flexibility or the ability to evolve over time? Our design culture needs to move beyond the idealisation of a creative individual designer generating highly specific forms with fixed uses. The possibilities of adaptation and flexibility have often been overlooked, but they create hugely exciting 'loose-fit' architectures that emancipate users to create their own versatile and vibrant environments. acc highland business center: Women Reclaiming the City Tigran Haas, 2023-04-04 The originality of *Women Reclaiming the City* lies not only in the variety of themes being presented, but also in the variety of all these different highly respected women researchers. This book is the first in which current societal themes revolving around urbanism, architecture, and city planning are put

forth solely through female perspectives. It reveals the importance of having female lenses on certain societal debates. Twenty-five leading female urban scholars draw on principles, concepts, and positions that are foundational to other frameworks and fields—specifically, critical studies, indigenous and ethnic studies, postcolonial theory, queer theory, feminist theory, progressive urban theory, social ecology, urban planning and design, architecture, urban economics and urban social geography, landscape urbanism, new urbanism, heritage management and urbanism, political ecology, and cultural studies— to present alternatives to the current classical theories and conceptualizations that have failed to engage a truly intersectional analysis of dominant city and urban discourses, policies, and practices. The book is intended for scholars of urban studies, policy makers, and city planning professionals.

Case Studies in Retrofitting Suburbia: Urban Design Strategies for Urgent Challenges provides summaries, data, and references on how these challenges manifest in suburbia and discussion of successful urban design strategies to address them in Part I. From modest interventions with big ripple effects to ambitious do-overs, examples of redevelopment, reinhabitation, and greening of changing suburban places from coast to coast are described in depth in 32 brand new case studies. acc highland business center: *China and the International Human Rights Regime* Rana Siu Inboden, 2021-03-18 Prior to China's entry into the United Nations (UN) in 1971, there was fierce debate about its anticipated behavior and impact. Proponents of Chinese membership argued that integration into the United Nations would ultimately change or civilize the People's Republic of China (PRC) while skeptics countered that the ...the UN is not going to serve as a reform school for Peking, and that China was likely to attempt to alter the international system. When Chinese Communist Party (CCP) leaders failed to challenge the existing global order and eventually adjusted their own priorities and goals to fit into it and even benefit from the prevailing international order, its behavior alleviated concerns of destructive behavior. Yet, the larger question of China's longer-term impact on and role in international regimes remains an open question. Even if the PRC has not acted as a spoiler of the international system, are there subtle yet significant ways that it has pursued change toward international regimes? This question become more pressing and salient with China's ascendancy and rising weight in global politics, especially given indications that it is shedding its earlier status quo posture and shifting to a more assertive one. As scholar Elizabeth Economy noted, in a June 2018 speech PRC President Xi Jinping put the world on notice: China has its own ideas about how the world should be run and is prepared, as he put it, to 'lead in the reform of global governance.' Scholars have begun grappling with--
