Kettl, 2009-12-01 A Brookings Institution Press and Ash Center for Democratic Governance and Innovation publication The era of strict top-down, stovepiped public management in America is over. The traditional dichotomy between public ownership and privatization is an outdated notion. Public executives have shifted their focus from managing workers and directly providing services to orchestrating networks of public, private, and nonprofit organizations to deliver those services. Unlocking the Power of Networks employs original sector-specific analyses to reveal how networked governance achieves previously unthinkable policy goals. Stephen Goldsmith and Donald F. Kettl head a stellar cast of policy practitioners and scholars exploring the potential, strategies, and best practices of high-performance networks while identifying next-generation issues in public-sector network management. They cover the gamut of public policy issues, including national security, and the book even includes a thought-provoking look at how jihadist terrorists use the principles of network management to pursue their goals. In *Democratic Renewal and the Mutual Aid Legacy of US Mexicans*, Julie Leininger Pycior traces the early origins of organizing in the decades following the US-Mexican War, when Mexicans in the Southwest established mutualista associations for their protection. Further, she traces the ways in which these efforts have been invoked by contemporary Latino civil rights leaders. Pycior notes that the Mexican immigrant associations instrumental in the landmark 2006 immigration reform marches echo mutualista societies at their peak in the 1920s. Then Mexican immigrants from San Diego to New York engaged in economic, medical, cultural, educational, and legal aid. This path-breaking study culminates with an examination of Southwest community organizing networks as crucial counterweights to the outsized role of large financial contributions in the democratic political process. It also finds ways in which this community organizing echoes the activity of mutualista groups in the very same neighborhoods a century ago.

**access fl interview number:** Hurricane Katrina James Patterson Smith, 2012-03-05 This book presents the fullest account yet written of the impact of Hurricane Katrina on the Mississippi Gulf Coast. Rooted in a wealth of oral histories, it tells the dramatic but underreported story of a people who confronted the unprecedented devastation of sixty-five-thousand homes when the eye wall and powerful northeast quadrant of the hurricane swept a record thirty-foot storm surge across a seventy-five-mile stretch of unprotected Mississippi towns and cities. James Patterson Smith takes us through life and death accounts of storm day, August 29, 2005, and the precarious days of food and water shortages that followed. Along the way the narrative treats us to inspiring episodes of neighborly compassion and creative responses to the greatest natural disaster in American history. The heroes of this saga are the local people and local officials. In often moving accounts, the book addresses the Mississippi Gulf Coast's long struggle to remove a record-setting volume of debris and get on with the rebuilding of homes, schools, jobs, and public infrastructure. Along the way readers are offered insights into the politics of recovery funding and the bureaucratic bungling and hubris that afflicted the storm response and complicated and delayed the work of recovery. Still, there are ample accounts of things done well, and a moving chapter gives us a feel for the psychological, spiritual, and material impact of the eight hundred thousand people from across the nation who gave of themselves as volunteers in the Mississippi recovery effort.
