accounting and nursing degree: Trauma Patient to Trauma Nurse Rolfe Ordon, 2021-11 Rolfe Eric Ordon, RN, has been working in the medical field since 2003. He was tragically involved in an accident with his fiancée Monica Janette Azero. He has been working hard to achieve his goals and dreams. He was inspired by his journey to success and wanted to motivate and influence others to live life to the fullest. I'm an ordinary guy doing ordinary things. Most of the time, I spent my younger years thinking I knew everything. I really didn't listen to anyone, no one was going through what I was going through. There was an event in my life that changed my whole world. This event became the inspiration behind writing this book. There are different types of people that I became while growing up and going through tough times. I became a person who made things happen, a person who watched things happen and a person who didn't know what was happening. Don't be the person who doesn't know what's happening. Once you get there, it's tough to get out of being that person. Most people start out making things happen, but as soon as tragedy comes, they become the person who starts to watch things that happen. After a while, depression sets in, and they fall so far

back in a hole, they become a person who no longer knows what's happening. This book was written to show how an ordinary guy with everyday problems was faced with a traumatic event in his life, where he had no choice but to believe in his dreams and to make things happen with no help but his faith in God and most of all believing in himself. Rolfe talks about how he had to think outside the box in order to save his house and why making it through nursing school was so important to him. Rolfe's goal in life after the accident was to have a story to tell. He wanted to influence people to do better and to live the best life they can. Be passionate about who you are and where you see yourself in the future. He wanted people to understand that hard work will always pay off. This ordinary guy went from being a trauma patient to becoming a trauma nurse.

accounting and nursing degree: In an Age of Experts Steven Brint, 2020-06-30 Since the 1960s the number of highly educated professionals in America has grown dramatically. In an Age of Experts challenges these characterizations, showing that claims about the distinctive politics and values of the professional stratum have been overstated, and that the political preferences of professionals are much more closely linked to those of business owners and executives than has been commonly assumed.
