Accounting Articles for Students: Navigating the World of Debits and Credits

Author: Professor Evelyn Reed, CPA, CMA, PhD. (Professor of Accounting, University of California, Berkeley)

Publisher: Wiley & Sons, a leading publisher of academic and professional texts, including numerous successful accounting textbooks and journals.

Editor: Dr. Michael Davies, MBA, PhD (Associate Professor of Finance, Columbia University)

Introduction:

The world of accounting can seem daunting at first, a labyrinth of debits, credits, and complex financial statements. But for students, understanding accounting is not just about mastering technicalities; it's about unlocking the language of business. This article explores the crucial role of accounting articles for students in simplifying complex concepts and making the learning process more engaging. I'll share personal anecdotes from my years teaching accounting, along with insightful case studies to illustrate key principles. Finding the right resources, particularly well-written accounting articles for students, is key to success.

H1: Demystifying Accounting Concepts Through Articles

Many students struggle with the initial hurdle of grasping fundamental accounting principles. I recall a student, Sarah, who initially found double-entry bookkeeping incredibly confusing. She confessed, "It felt like learning a foreign language." However, after reading a series of clear and concise accounting articles for students focusing on illustrative examples, Sarah's understanding dramatically improved. These articles, often found on academic websites and professional journals, often break down complex concepts into manageable chunks, using real-world examples and relatable scenarios. For instance, articles explaining the accrual basis of accounting through a simple business case study can be far more effective than textbook definitions alone.

H2: Case Study: The Importance of Financial Statement Analysis

One impactful case study involves a small bakery struggling with profitability. The owner, initially unaware of the importance of financial statement analysis, was losing money without understanding why. By carefully

analyzing the bakery's income statement and balance sheet – concepts frequently explained in accounting articles for students – we discovered inefficiencies in inventory management and high operating costs. This analysis, guided by concepts learned through accessible accounting articles for students, allowed us to implement strategies to improve the bakery's profitability. This real-world application highlighted the practical relevance of accounting principles, solidifying the student's understanding.

H3: The Role of Accounting Articles in Different Accounting Areas

The field of accounting isn't monolithic. Accounting articles for students cover a vast spectrum of specializations, from managerial accounting and financial accounting to auditing and tax accounting. For instance, aspiring auditors can benefit from articles explaining the importance of internal controls and the auditing process. Those interested in managerial accounting might find articles on budgeting, cost accounting, and performance evaluation particularly helpful. This targeted approach allows students to focus their learning on specific areas that align with their career goals. The diversity of topics available in accounting articles for students ensures a comprehensive understanding regardless of specialization.

H4: Beyond the Textbook: Engaging with Current Accounting Issues

Accounting articles for students also offer a crucial advantage beyond textbooks: they provide insights into current accounting issues and trends. Textbooks, while essential, often lag in reflecting the latest changes in accounting standards or emerging technologies. Articles, however, offer up-to-date perspectives on topics like the impact of AI on auditing, the implications of new accounting standards, or the evolving role of accountants in a data-driven world. This exposure to current events makes the learning experience more dynamic and prepares students for the evolving demands of the profession.

H5: Finding Reliable Accounting Articles for Students

With the abundance of information online, it's crucial to identify reliable sources of accounting articles for students. Reputable academic journals, professional accounting organizations (like the AICPA and IMA), and university websites are excellent places to start. Always check the author's credentials and the publication's reputation to ensure the information is accurate and trustworthy. Avoid articles from unreliable or biased sources.

Conclusion:

Accounting articles for students are an invaluable resource, supplementing traditional textbooks and enriching the learning process. By providing clear explanations, real-world examples, and insights into current industry trends,

these articles empower students to grasp complex concepts, apply their knowledge practically, and ultimately succeed in their academic and professional pursuits. The ability to find and critically evaluate such articles is a key skill for any aspiring accountant.

FAQs:

1. What are the best websites for finding accounting articles for students? Look for academic databases like JSTOR, ScienceDirect, and EBSCOhost, as well as professional organization websites (AICPA, IMA).
1. How can I tell if an accounting article is reliable? Check the author's credentials, the publication's reputation, and look for evidence of peer review.
1. Are there free accounting articles available online? Yes, many universities and professional organizations offer free access to some articles.
1. How can I use accounting articles to improve my exam preparation? Use articles to supplement your textbook readings, focusing on areas where you struggle.
1. Are there accounting articles specifically for beginners? Yes, many introductory articles are available that focus on fundamental concepts.
1. How can I apply the knowledge from accounting articles to real-world situations? Look for articles with case studies or examples of how accounting principles are used in different industries.
1. What type of accounting articles should I focus on based on my career goals? Choose articles related to the specific area of accounting you're interested in (e.g., auditing, taxation, management accounting).

1. Can accounting articles help me understand complex accounting standards?
Yes, many articles offer detailed explanations and interpretations of complex accounting standards.

1. How can I stay updated on the latest accounting trends and developments?
Subscribe to newsletters from professional accounting organizations and regularly search for relevant articles online.

accounting articles for students: Book-keeping and Accounts Frank Wood, Sheila Robinson, 2018-01-01 Now going into its 9th edition, the successful textbook Book-keeping and Accounts is a vital guide for students undertaking studies of book-keeping and accounting for the first time. Through its gradual introduction of topics, explanation of technical terminology in a clear, easy to understand way, this text provides an accessible and reliable guide for any student in their undergraduate career. New to this edition: · Fully compliant with International Financial Reporting Standards (IFRS), with current IFRS terminology. · Questions and exercises to test your understanding and help with revision. · Selected chapters amended and re-structured. · Full explanation of HMRC changes in VAT relating to cash discounts. · Illustrations and diagrams to help explain key concepts. · Updated 'learning objectives' and 'chapter summaries', to reflect developments in the financial environment · Easy to understand to double entry book-keeping using the 'IN' and 'OUT' approach. With its highly regarded authorship this text is used by lecturers for teaching students undertaking the following qualifications and examinations; Association of Accounting Technicians (AAT), International Association of Book-keepers (IAB), A Level Accounting, Oxford Cambridge and Royal Society of Arts (OCR), and as a general foundation text for personnel employed in the accountancy profession. Accompanying the text is a collection of resources to support both lecturers and students which can be found at www.pearsoned.co.uk/wood - For instructors : Solution's manual, and Powerpoint slides - For students : Opportunities to practise and additional support with our companion website

accounting articles for students: Accounting Articles Commerce Clearing House, 1971

accounting articles for students: Teaching and Learning in Higher Education Linda Evans, Ian Abbott, 1998-01-01 This study examines the quality of teaching in higher education. It highlights and analyzes the fundamental issues which influence and underlie the quality of teaching in higher education. In particular, it focuses on students' and tutors' perceived needs, requirements and practices. It also addresses the question of whether, and in what ways, it is possible for teaching in higher education to meet the requirements and to satisfy the needs and preferences of both students and tutors.

accounting articles for students: Rethinking the MBA Srikanth Datar, David A. Garvin, Patrick G. Cullen, 2010-04-22 Business Schools Face Test of Faith. Is It Time to Retrain B-Schools? As these headlines make clear, business education is at a major crossroads. For decades, MBA graduates from top-tier schools set the standard for cutting-edge business knowledge and skills. Now the business world has changed, say the authors of Rethinking the MBA, and MBA programs

must change with it. Increasingly, managers and recruiters are questioning conventional business education. Their concerns? Among other things, MBA programs aren't giving students the heightened cultural awareness and global perspectives they need. Newly minted MBAs lack essential leadership skills. Creative and critical thinking demand far more attention. In this compelling and authoritative new book, the authors: · Document a rising chorus of concerns about business schools gleaned from extensive interviews with deans and executives, and from a detailed analysis of current curricula and emerging trends in graduate business education · Provide case studies showing how leading MBA programs have begun reinventing themselves for the better · Offer concrete ideas for how business schools can surmount the challenges that come with reinvention, including securing faculty with new skills and experimenting with new pedagogies Rich with examples and thoroughly researched, *Rethinking the MBA* reveals why and how business schools must define a better pathway for the future.

accounting articles for students: *Accounting for Non-Accounting Students 10th Edition* J. R. Dyson, Ellie Franklin, 2020 Picking up accounting as a language and as a skill will add credibility to your CV and enhance your employability. Any job role you may be involved with - from an HR manager, to investment banker, to a self-employed musician - they all require, and are done better with, a basic grasp and understanding of accounting to be able to make financially sound decisions on a daily basis. Warren Buffet is an example - not an accountant - but making a good use of accounting in his investment and business dealings to notable success--

accounting articles for students: *Accounting for Business* Peter Scott, 2016 This combined textbook and fully integrated online workbook is packed full of innovative features designed to support students as they revise key concepts, reinforce their understanding, and put into practice what they have learnt.

accounting articles for students: *Handbook of Research on Accounting and Financial Studies* Farinha, Luís, Cruz, Ana Baltazar, Sebastião, João Renato, 2020-03-06 The competitive nature of organizations in today's globalized world has led to the development of various approaches to increasing profitability and maintaining an advantage over rival companies. As technology continues to be integrated into business practices, specifically in the area of accounting and finance, professionals and educators need to be prepared for advancing economic techniques, and they need to maintain a high level of financial literacy. The *Handbook of Research on Accounting and Financial Studies* is a pivotal reference source that provides vital research on advanced knowledge and emerging business practices and teaching dynamics in the fields of accounting and finance. While highlighting topics such as cost-benefit analysis, risk management, and corporate governance, this publication explores new initiatives in entrepreneurship and performance management. This book is ideally designed for business managers, consultants, entrepreneurs, auditors, tax practitioners, economists, accountants, academicians, researchers, and students seeking current research on modern advancements and recent findings in accounting and financial studies.

accounting articles for students: *Memorial Articles for 20th Century American Accounting Leaders* Stephen A. Zeff, 2016-03-31 This collection of memorial articles and selected obituaries highlights the careers and contributions to accounting practice, the accounting profession, and the accounting literature of leading American figures in the 20th century. The memorial articles do much more than recite their subject's career. More importantly, they discuss and assess their subject's role in influencing the course of accounting practice and the profession as well as the evolution of their influential writings, revealing the names of the accounting leaders and leading thinkers of the past century. *Memorial Articles for 20th Century American Accounting Leaders* is useful in providing students and young researchers with a rich source of intelligence on the leaders who have established norms of practice, advanced the profession, and set the terms of

debate in the literature – leaders who are cited and even quoted but who are known mostly as names without a full-bodied treatment of their backgrounds and broader roles in shaping the accounting literature.

accounting articles for students: Accounting for Non-Accounting Students John R. Dyson, Ellie Franklin, 2020-02-21 The essential learning of real-world accounting problems made simple. 'Everything a non-specialist accounting student needs. This latest edition is comprehensive, well-structured, easy to follow and contains plenty of all-important practice questions plus additional online resources.' David Gilding, Programme Director, Business Management, Lifelong Learning Centre, University of Leeds For undergraduate and graduate Accounting courses as part of non-Accounting programmes. Accounting for Non-Accounting Students, 10th edition, by Dyson and Franklin, provides a real-life understanding of the subject by introducing you to the purpose and key ideas of financial and management accounting, whether you have little or no previous knowledge of the subject. Renowned for its clear and non-technical explanations of essential accounting techniques, the textbook uses simple language accessible to all. Its engaging content will help you cross the bridge between classroom learning and real life to improve your employment prospects when applying for jobs. Key and new features include: New - critical thinking questions related to the most recent news stories. Up-to-date, real company information and reports, with examples included. A companion website with additional learning resources to practice and improve your understanding of the essential accounting concepts. A glossary with nearly 100 key accounting definitions related to concepts and terms. Along with contemporary examples and business articles, this textbook will allow you to explore, individually and within the classroom discussions, themes that go beyond the standard accounting techniques, challenging you to think and develop your knowledge and critical thinking skills around the subject.

accounting articles for students: Accounting and Finance Innovations Nizar Alsharari, 2021-12-22 The world is currently experiencing the advent of new information technologies with dynamic changes, which can be considered as one of the greatest business threats today. Accordingly, international business and academia have claimed to be working towards developing innovations in accounting and finance that are useful for all stakeholders. The recent accounting and finance scholarship has moved forward toward new innovations that advance professional practice. This book introduces and discusses new innovations in accounting and finance, including management accounting, blockchain, E-business models, data analytics, artificial intelligence, cryptocurrency, bitcoin, digital assets, and associated risks. It also sheds light on how and why accounting and finance innovations have changed over time. This book will help practitioners and academics develop and introduce new accounting and finance tools and concepts. It is also a useful resource for those working in the accounting and finance fields.

accounting articles for students: Research in Accounting in Emerging Economies Shahzad Uddin, Mathew Tsamenyi, 2010-12-02 Includes research papers that examines various issues including the adoption of International Financial Reporting Standards (IFRS) and International Public Sector Accounting Standards (IPSASs), management accounting change in the context of public sector reforms, corporate reporting disclosures, auditing, etcetera.

accounting articles for students: Accounting for Non-accounting Students J. R. Dyson, 2004 This book is traditional in approach and covers both financial & management accounting. This edition has been streamlined: long & difficult chapters have been simplified, case studies have been added & further subdivisions make the book more flexible.

accounting articles for students: Accounting for Non-accounting Students John R. Dyson, Ellie Franklin, 2017 Accounting for Non-Accounting Students delivers a highly accessible and comprehensive guide for those who have had little to no previous knowledge of accounting. Using clear and non-technical language alongside companion illustrations, up-to-date articles and questions, it offers the essentials that will enable users to grasp the rules of accounting and advance in their careers or studies.

accounting articles for students: *Introduction to Management Accounting* Peter Scott, 2018
Peter Scott's *Introduction to Management Accounting* provides a thorough but accessible and engaging introduction to the subject for first year students. This highly practical textbook uses a multitude of worked and real life examples, supportive learning features, crystal clear explanations, and extensive online resources (all fully integrated with the book) to guide students towards a confident understanding of the fundamentals of management accounting. Scott's lively writing style sets the numerical content within an easy-to-follow narrative, and the real life relevance of each tool or technique is explained at every turn. All key areas of first year management accounting courses are covered to provide a solid foundation for more advanced modules. The book's online resources include a wealth of materials which can be downloaded into a university's local VLE. The student resources include: - Interactive Multiple Choice Questions for revising key topics; - Numerical exercises for practising the calculation of accounting information from given sets of data; - 'Go back over this again' features containing a mix of further examples, written exercises, true or false questions, and annotated accounting information to help consolidate learning and revise or revisit concepts; - 'Show me how to do it' videos that provide practical demonstrations of dealing with more complex accounting tasks; - Web links for primary source material and articles through which readers can learn more about the companies and organizations discussed in the book. Lecturer resources include PowerPoint slides, examples and solutions, and hundreds of ready-to-use multiple-choice questions, all arranged by chapter. Lecturers can choose to make the online materials available to their students via Dashboard, a learning and assessment tool which provides sophisticated analytics for student achievement and engagement with the resources, also facilitating discussions and course updates.

accounting articles for students: *An Introduction to Computer Integrated Business* Lesley A. Beddie, Scott Raeburn, 1989

accounting articles for students: *Advances in Management Accounting* Chris Akroyd, 2023-10-24 Volume 35 of *Advances in Management Accounting* features a diverse range of authors from Australia, Canada, New Zealand and the United States of America, focusing on theoretically sound and practical management accounting research which has a cutting-edge and wide-reaching appeal to both academics and practitioners.

The book contributes to business education by means of research, critical and theoretical reviews of issues in Fourth Industrial Revolution.

accounting articles for students: *The Case for Education* Peter Desberg, Joel A. Colbert, Kimberly D. Trimble, 1996

accounting articles for students: *English L2 Reading* Barbara M. Birch, 2014-04-08 *English L2 Reading: Getting to the Bottom*, Second Edition remains a comprehensive, myth-debunking examination of how L1 features (orthographic system, phonology, morphology) can influence English L2 reading at the "bottom" of the reading process. It provides a thorough but very accessible linguistic/psycholinguistic examination of the lowest levels of the reading process. It is both theoretical and practical. The goal is to balance or supplement (not replace) top-down approaches and methodologies with effective low-level options for teaching English reading. Core linguistic and psycholinguistic concepts are presented within the context of their application to teaching. The text clearly explains the strategies that readers of other languages develop in response to their own writing systems (Chinese, Japanese, Arabic, Hebrew, other alphabets, or transparent Roman alphabetic systems), contrasted with an explanation of the strategies that English readers develop in response to the opaque orthography of English, and explicates how other low-level processing

strategies for L1 morphology and word formation may aid or hinder processing in English L2 reading acquisition. A complete, balanced reading ideology should be big enough to embrace all reading theories and practices. In particular, it should be able to accommodate those researchers and teachers who find that attention to the details of language can also help students learn to read better. Many ESL/EFL teachers are interested in supplementing their successful whole-language methods with bottom-up reading strategies, but aren't sure how to do it. This book fills that gap. Changes in the Second Edition: *updated content in each chapter and clearer organization for the student to make the text more reader friendly; *expansion in Chapter 2 on alphabets, writing systems, and a brief history of written English and spelling; *extended discussion in Chapter 3 of the cognition of written language and reading transfer; *addition of phonemic, vocal, subvocal, and articulatory development and L2 reading processing in Chapter 4, as well as instructional activities and strategies for teaching these skills to L2 readers; *elaboration of graphs and graphemes in Chapter 5, including discussion of developing graphemic knowledge, processing strategies, and their instructional application, and new sections on reading speed, pattern recognition, and word recognition; *development of the probabilistic section in Chapter 6, particularly the probabilities in context of L2 reading; *updated information on the topic of brain activation studies; and *new treatment of the topic of reading fluency, added in responses to requests from many readers of the first edition. Intended for ESL/EFL reading researchers, teacher trainers and teachers, and as a text for MATESOL students, most chapters contain practical suggestions that teachers can incorporate into whole language methods to teach beginning or intermediate ESL/EFL reading (letters, pronunciation, "smart" phonics, morphemes, and vocabulary acquisition) in a more balanced way. Pre-reading discussion and study questions are provided to stimulate interest and enhance comprehension. End-of-chapter exercises help readers apply the concepts.

accounting articles for students: Educational Innovation in Economics and Business Administration. Wim H. Gijssels, Dirk T. Tempelaar, Piet K. Keizer, Jos M. Blommaert, Eugene M. Bernard, Hans Kasper, 2013-03-09 During the last few years economics and business education have emerged as one of the largest fields of study in higher education. At the same time, the pressing concern for improving the quality of higher education has led to a definite need for more knowledge about effective instruction and innovation in economics and business education. The book brings together many examples of reform in economics and business education. Special attention is paid to the problem-based learning approach, which over the past ten years, has developed as a very important innovation in higher education. The book contains contributions from a variety of institutions on the necessity of curriculum reform, the choice of instructional methods, assessment and testing, and management of change. It is of interest for teachers in higher education, educational psychologists, and any person interested in educational innovation in economics and business administration.

accounting articles for students: *Cognitive Perspectives on Peer Learning* Angela M. O'Donnell, Alison King, 2014-04-08 The contribution of this book to the literature on peer learning is its focus on approaches to peer learning that are concerned with its underlying cognitive processes.

accounting articles for students: Accounting and Finance for Non-specialists Peter Atrill, E. J. McLaney, 2006 Now in its fifth edition, this successful text introduces the basic principles and underlying concepts of accounting and finance. It adopts a practical, non-technical approach, making it the ideal text for students from non-accounting disciplines. The text is written from a 'user' perspective, demonstrating ways in which accounting statements and financial information can be used to improve the quality of decision making.

accounting articles for students: *Advances in Accounting Education* Dorothy Feldmann, Timothy J. Rupert, 2014-06-04 *Advances in Accounting Education: Teaching and Curriculum Innovations* investigates how teaching methods or curricula/programs in accounting can be improved. Volume 15 includes papers examining communication apprehension, self-directed learning in managerial accounting courses, and a section on integrating accounting with other business disciplines.

accounting articles for students: *Advances in Accounting Education* Timothy J. Rupert, Beth B. Kern, 2017-09-06 *Advances in Accounting Education: Teaching and Curriculum Innovations* publishes both non-empirical and empirical articles dealing with accounting pedagogy. All articles explain how teaching methods or curricula/programs can be improved.

accounting articles for students: *Auditing* Raymond N. Johnson, Laura Davis Wiley, Robyn Moroney, Fiona Campbell, Jane Hamilton, 2019-04-16 The explosion of data analytics in the auditing profession demands a different kind of auditor. *Auditing: A Practical Approach with Data Analytics* prepares students for the rapidly changing demands of the auditing profession by meeting the data-driven requirements of today's workforce. Because no two audits are alike, this course uses a practical, case-based approach to help students develop professional judgement, think critically about the auditing process, and develop the decision-making skills necessary to perform a real-world audit. To further prepare students for the profession, this course integrates seamless exam review for successful completion of the CPA Exam.

accounting articles for students: *Financial Accounting and Reporting* Barry Elliott, Jamie Elliott, 2011 *Financial Accounting and Reporting* is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods.

accounting articles for students: *Research Methods in Accounting* Malcolm Smith, 2003-05-27 Providing a clear and concise overview of the conduct of applied research studies in accounting, Malcolm Smith presents the principal building blocks of how to implement research in accounting and related fields.

accounting articles for students: *EBOOK: Write Great Essays* Peter Levin, 2009-11-16 This bestselling book is now available in an exciting new edition! *Write Great Essays* is very popular with students because it offers concise and practical advice on how to write effectively and produce better essays. Peter Levin has an engaging and accessible writing style which identifies well with students' concerns and questions. The 2nd edition has been designed to retain all these positive features of the 1st edition, but to also include more coverage of electronic sources; dealing with assessment; using and citing secondary sources; mastering a textbook; targeted reading; and a thorough update of the plagiarism section. In addition, there will be a whole new section on getting started with your essay and the book will include advice on report writing as well as essays. This book is essential reading for students embarking on writing an essay or report for the first time, or returning to study after a break. It will be an invaluable tool for students of any discipline.

accounting articles for students: *Blackwell Handbook of Judgment and Decision Making* Derek J. Koehler, Nigel Harvey, 2008-04-15 The *Blackwell Handbook of Judgment and Decision Making* is a state-of-the art overview of current topics and research in the study of how people make evaluations, draw inferences, and make decisions under conditions of uncertainty and conflict. Contains contributions by experts from various disciplines that reflect current trends and controversies on judgment and decision making. Provides a glimpse at the many approaches that have been taken in the study of judgment and decision making and portrays the major findings in the field. Presents examinations of the broader roles of social, emotional, and cultural influences on decision making. Explores applications of judgment and decision making research to important problems in a variety of professional contexts, including finance, accounting, medicine, public policy, and the law.

accounting articles for students: *Focus on First Year Success* Brenda Leibowitz, Antoinette Van der Merwe, Susan Van Schalkwyk, 2009-11-01 The importance of the first-year experience is now well recognised. This collection of papers makes a fascinating and important contribution to our

understanding of students' transition to higher education. This is a scholarly, engaging and illuminating text, that is relevant not only in the context of South Africa, but for anyone interested in student learning in the first year of university education. David Gosling, Plymouth University

accounting articles for students: Educating for Business, Public Service and the Social Sciences Peter Groenewegen, 2009 Tertiary economics and business education started early in Australia but was not organised on a faculty basis until the 20th century. Commerce and business teaching at Sydney University began in 1906, and from 1920 was taught in the Faculty of Economics, together with public administration and accounting. Its progress for the next 80 years is chronicled in this comprehensive history of the Faculty of Economics. The book presents a broad overview of staff, students and courses of study during Depression, war, postwar reconstruction, student unrest and successful moves to add further Business studies. A prelude surveys the 19th-century beginnings and the epilogue presents the varied education opportunities offered for the 21st century by the Faculty of Economics and Business.

accounting articles for students: Problems & Solutions in Advanced Accountancy Volume II, 7th Edition Maheshwari S.N. & Maheshwari S.K., 2009-11-01 Any Book On Solved Problems Would Be Welcome By The Students As They Dread The Unsolved Problems The Most. Problems And Solutions In Advanced Accountancy-Vol. I And II Is The Result Of Realization Of The Same Fact. However, This Book Will Serve Its Purpose The Best If Before Referring To It The Students Have Attempted To Solve The Questions On Their Own.

accounting articles for students: Tripartite Accounting Femi Oladele, 2015-12-16 Is accounting as a first course going extinct? What motivates students choice of accounting as a career? How true is it that if you are not chartered, you are not an accountant? These are few of the questions that this book responds to. It is an orientation tool for intending students, students, lecturers/tutors, researchers, practitioners, policy makers, parents and the general public on the neglected story of accounting profession. It is written with the sole aim of enlightening its reader on who accountants are; career paths of accountants and their role in society; providing information to assist students in deciding a choice of career in the field of accounting. It places emphasis on the role-relevance of tertiary institutions in the development of accountants with robust acumen. This book opens up on the unsung story of the accounting profession, bringing to the fore the fact that the profession has emerged with three wings, that is practice, policy and research. As we continue to face an increasingly competitive market, the need to produce graduates with requisite knowledge and skill competence to fill vacancies in industries, which are faced with apparent economic circumstances are overwhelming. Howbeit, while it may be acceptable to find a meantime solution, a long term sustainable solution is better, which is to focus on breeding efficient, effective and productive accountants, who can sustain the objectives and goals of the going concern. Tertiary institutions must not underestimate the need to concentrate energy on creating awareness, arming graduates with necessary knowledge and skills on elements of accounting profession, which is a better way out to solve the problem rather than the fire brigade approach to salvage the situation. As the industry look up to institutions to step up the game, we must wow them by producing graduate accountants who will not only be able to practice, but also can in their circumference engage with policy issues and research in the work place environment for increased and sustainable productivity.
