📖 **Accounting bachelor degree classes: Contemporary Issues in Accounting** Elaine Conway, Darren Byrne, 2018-06-01 The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.

accounting bachelor degree classes: The Corporation Joel Bakan, 2019-09-03 The inspiration for the film that won the 2004 Sundance Film Festival Audience Award for Best Documentary, *The Corporation* contends that the corporation is created by law to function much like a psychopathic personality, whose destructive behavior, if unchecked, leads to scandal and ruin. Over the last 150 years the corporation has risen from relative obscurity to become the world's dominant economic institution. Eminent Canadian law professor and legal theorist Joel Bakan contends that today's corporation is a pathological institution, a dangerous possessor of the great power it wields over people and societies. In this revolutionary assessment of the history, character, and globalization of the modern business corporation, Bakan backs his premise with the following observations: -The corporation's legally defined mandate is to pursue relentlessly and without exception its own economic self-interest, regardless of the harmful consequences it might cause to others. -The corporation's unbridled self-interest victimizes individuals, society, and, when it goes awry, even shareholders and can cause corporations to self-destruct, as recent Wall Street scandals reveal. -Governments have freed the corporation, despite its flawed character, from legal constraints through deregulation and granted it ever greater authority over society through privatization. But Bakan believes change is possible and he outlines a far-reaching program of achievable reforms through legal regulation and democratic control. Featuring in-depth interviews with such wide-ranging figures as Nobel Prize winner Milton Friedman, business guru Peter Drucker, and cultural critic Noam Chomsky, *The Corporation* is an extraordinary work that will educate and

enlighten students, CEOs, whistle-blowers, power brokers, pawns, pundits, and politicians alike.

accounting bachelor degree classes: Career as an Accountant Institute for Career Research, 2014-06 Accounting is one of the most in-demand careers today, with more new jobs opening up every day. The opportunities available to accountants, auditors and similar professionals in the field are expected to continue expanding as international business increases and more government regulations take effect. Accounting is rated among the top five careers by such publications as *Forbes* and *CNN/Money*, with new graduates earning an average of \$55,000 in their first year on the job. Accountants work with businesses, governments and other organizations to analyze and manage their finances. Accountants use spreadsheets and other computer applications to record, communicate and interpret financial results. They track transactions, recommend cost-cutting measures, and ensure that taxes are paid promptly and correctly. Accountants also help individuals and families file their taxes and manage their personal finances. Opportunities for accountants can be found in cities of all sizes across the country. Some accountants are employed directly by businesses, government agencies, not-for-profits, colleges and similar organizations. Others work for public accounting firms that are retained by organizations to provide financial services. Accountants may also be self-employed, such as those who specialize in providing tax services for families. A four-year degree from an accredited college or university is typically the minimum requirement to land your first job as an accountant. A graduate degree can be helpful, particularly for management positions or highly technical financial analysis work. Many accountants obtain professional licenses,

most notable the Certified Public Accountant (CPA). State licensing requirements vary, but CPAs generally must obtain additional college credit hours, have experience working in the field, and pass a rigorous examination. Employment experts predict that the number of accounting and auditing jobs will grow by over 15 percent within the coming decade, as economic expansion drives the need for financial expertise. Accountants and auditors are paid on average \$65,000 a year, a significant increase from just \$60,000 only a few years ago, and earnings are expected to continue to track upward.

accounting bachelor degree classes: *BASIC CONCEPTS OF ACCOUNTING* Dr.R.L. Ladda,
accounting bachelor degree classes: *In Retrospection* Edgardo G. Calansingin, 2012-04-02 The Author began his story with his birth in 1931 in a small town of Murcia, Province of Negros Occidental and Negros Islands in an underdeveloped country of the Philippines in the Far East. Cresencio L. Calansingin, his father secured an employment as one of the swimming pool cleaners and Angelina G. Calansingin, his mother moved to the Mambucal Spring Summer Resort at the Provincial Government Forest Reservation area at the mountainside of Canlaon Mountain of Negros Islands. The couple transferred down to the Bago River Ferry Mambucal Bridge, two years later, when both secured employment as Toll Collectors of the Bridge. Bago River was an isolated location, six kilometers east to the Mambucal Spring Summer Resort and eight kilometers west to the town of Murcia. The Author at a very tender age had the river for a playground. He contracted ear infections because of daily diving into the water and swimming on the river. The infection spread and hardened his sinus cavities causing stammering of speech. Ignorance, neglect, and distances to the Provincial Hospital 34 kilometers west to Bacolod City, the capital of the Province aggravated his medical condition. The Authors father died when he was 6 years old and his mother remarried a year later. Then World War II broke out and the Authors paternal grandparents decided they took the orphaned boy under their custody in as much as the widowed mother married a widower who had two children by his previous marriage. The Author at age 10 years old, worked with his grandfather, aged 56 years old. They cleared a two-hectare piece of land of abandoned sugarcanes, plowed, and harrowed the soil using plows or harrows pulled by the carabaos while each walked after each work animal pulling the farm implement. The Author stumbled many times after the plow handle every time the plowshare hit the resisting sugarcane roots that embedded deeply and securely to the earth. There were hundreds of rows in a hectare and hundreds of roots in a row and he stumbled hundreds of times while his grandfather looked after his welfare and waited patiently for his recovery and they went on plowing the fields. Plowing and harrowing the fields were two aspects of rice farming, they sat, knelt, and pulled away every weed from every root of the plants that competed against the plants for nutrients from the soil. They were hard labor but they needed the rice from the plants for subsistence. The Author discovered that chewing sugarcanes the whole day or eating root crops such as camote (sweet potato), cassava, and corn did not supply the required nutrition. He needed the staple food of rice and fish for daily existence. Food, shelter, and clothing were his grandparents preoccupation during wartime. They planted rice, camote, cassava, corn, beans, and mongo according to the months (season). They raised fowls for supplemental food. His grandfather was a

skilled carpenter and they built a hut made of cogon grasses and bamboo tree materials. His grandmother assembled pieces of clothes and sewed them for his pants and shirt because he refused wearing clothes improvised out of empty sugar sacks. A group of marauders swooped down late one night and carted all their foodstuff, clothes, and they started all over again. His grandmother saw to it that they ate rice once a day while root crops made up for breakfast and dinner. They went half-hungry every day for months until they produced again the much-needed staple food. Three long years of World War II was not a dream. It was waking up every morning, heading to the carabao enclosure, and taking the work animals to labor or to pastures whether under the heat of the dry season sun or under the downpour of the rainy days. Work animals need food too and his daily tasks included riding them to pastures. He grazed the carabaos to the tall abandoned sugarcane for the animals loved chewing the offshoot sugarcane leaves, then he disembarked suddenly and went after the birds n

accounting bachelor degree classes: *The Choice* Marge Brantmeyer, 2020-11-15 The bad news: suicide is a large and growing public health problem. Human beings are the only creatures in the natural world that can suffer from a hopelessness so deep that suicide seems like the only relief from the anguish. Human beings are also the only species that fall prey to chemical dependence and an associated downward spiral of mental health that can end in suicide. This book presents the stories of individuals struggling with terminal illness, grief, alcoholism, prison, drug addiction, compulsive gambling, PTSD, depression, and abuse (including cyberbullying). All of these individuals find themselves at a decision point where they must choose to find a way to Survive or take their own life through Suicide. Almost everyone has fleeting thoughts of suicide at least once during their lifetime. Most people do not want to discuss their thoughts of suicide with anyone for fear of being negatively judged or labeled by others. The good news: the vast majority of people with suicidal thoughts can be treated with therapy and/or medication. This book is intended to be a reference guide with information about depression, alcoholism, addiction, and associated therapy avenues.

accounting bachelor degree classes: *Globalization and Social Responsibility* Kiymet Tunca Caliyurt, David Crowther, 2008-12-11 Over the last decade the question of the relationship between organisations and society has been subject to much debate, often of a critical nature. The decade has seen protests concerning the actions of organisations, exposures of corporate exploitation and unfolding accounting scandals. At the same time ethical behaviour and a concern for the environment have been shown to have a positive correlation with corporate performance. The nature of corporate social responsibility is therefore a topical one for businesses and academics. There are however many different perspectives upon what is meant by corporate social responsibility and how this might be applied within organisations. This book explores some of these different perspectives based upon the experiences of different people in different parts of the world. There has been much written about globalisation – some of it positive and much of it negative. It is a subject which arouses definite opinions. Despite the fact that the word globalisation is part of the title of this book it is not

our intention to contribute to this debate. Instead we use the word globalisation in its original sense to represent the ubiquity of the concern for Corporate Social Responsibility (CSR) which is the subject matter of this book. Specifically we are concerned with the social contract between an organisation and its stakeholders. It is apparent that any actions which an organisation undertakes will have an effect not just upon itself but also upon the external environment within which that organisation resides. In considering the effect of the organisation upon its external environment it must be recognised that this environment includes both the business environment in which the firm is operating, the local societal environment in which the organisation is located and the wider global environment. Effectively therefore there is a social contract between organizations and their stakeholders. Recognition of the rights of all stakeholders and the duty of a business to be accountable in this wider context therefore has been largely a relatively recent phenomenon. The economic view of accountability only to owners has only recently been subject to debate to any considerable extent. In the current environment there is a need to debate this issue and its implications. This book therefore recognises the international scope of the interest in corporate social responsibility both through the contributions made by the authors of the respective chapters, who come from various parts of the world, and also through the international importance of the perspectives offered by these contributors. In doing so the various authors demonstrate that corporations are a part of society just as much as each of us is as a individual. Furthermore they demonstrate that the issues and concerns are not local ones but are international in scope and concern us all. The contributions to this book provide a representation of the range of concern for this relationship and the range of topics which fall within the subject matter of CSR. Among the authors who have contributed to this book are representatives from every continent and from a wide range of disciplines. The topics which are considered in the various chapters are equally diverse.
