Through several expert contributions, conducted both with qualitative and quantitative methodologies, this book provides an up-to-date portrait of the debate by exploring corporate NFD either in its mandated contents or voluntary information. Contributing authors provide studies that encompass the different lines of NFD, namely non-financial risk reporting, sustainability reporting, and intellectual capital reporting, as well as the integration of financial and non-financial information through IR, the assurance of the NFD and IR through auditing activities, and the role of management and CFOs in NFD and IR.

Perché il settore finanziario, storicamente orientato al profitto, si avvicina alle questioni socioambientali? Può la finanza sostenibile offrire soluzioni concrete alla crisi socio-ecologica contemporanea? Il libro, sulla base di una ricerca in cui è esplorata la rete degli attori che intervengono nella costruzione dei discorsi pubblici e politici sulla finanza sostenibile in Italia, analizza i significati attribuiti a questo concetto. Contrariamente a quanto espresso nelle rappresentazioni mainstream, la finanza sostenibile si configura come uno strumento utile a riprodurre discorsivamente alcuni principi del paradigma neoliberista, nonché a sorreggere l'attivazione di corsi d'azione pubblica mirati a un progressivo processo di finanziarizzazione della sostenibilità.

Zeff, 2015-03-26 The International Accounting Standards Board (IASB) and its International Financial Reporting Standards (IFRSs), have acquired a central position in the practice and regulation of financial reporting around the world. As a unique instance of a private-sector body setting standards with legal force in many jurisdictions, the IASB's rise to prominence has been accompanied by vivid political debates about its governance and accountability. Similarly, the IASB's often innovative attempts to change the face of financial reporting have made it the centre of numerous controversies. This book traces the history of the IASB from its foundation as successor to the International Accounting Standards Committee (IASC), and discusses its operation, changing membership and leadership, the development of its standards, and their reception in jurisdictions around the world. The book gives particular attention to the IASB's relationships with the European Union, the United States, and Japan, as well as to the impact of the financial crisis on the IASB's work. By its in-depth coverage of the history of the IASB, the book provides essential background information that will enrich the perspective of everyone who has to deal with IFRSs or the IASB at a technical or policy-making level.

This comes at a time when the international market has seen a boom in dealmaking, with many markets reaching post-crisis peaks and some recording all-time highs. Mega-deals have been at the heart of the expanding market, with companies tapping into cash piles and cheap debt to fund transformational deals. Looking behind the headline figures, however, a number of factors suggest dealmaking may not continue to grow as rapidly as it has done recently. This book examines this topic and more across over 55 jurisdictions, as well as providing more general interest chapters covering the European Union, European Private Equity, M&A Litigation, and Offshore Private Equity. Contributors include: Didier Marti, Bredin Prat; Heinrich Knepper, Hengeler Mueller; Javier Ruiz-Camara Bayo, Uria Menendez.
