Accounting Degree: Bachelor of Arts or Science? A Comprehensive Analysis

Author: Dr. Evelyn Reed, CPA, CMA

Dr. Evelyn Reed is a Professor of Accounting at the University of California, Berkeley, with over 20 years of experience in accounting education and practice. She is a Certified Public Accountant (CPA) and a Certified Management Accountant (CMA), holding a PhD in Accounting from Stanford University. Her research focuses on the evolution of accounting curricula and the career paths of graduates with Bachelor of Arts (BA) and Bachelor of Science (BS) degrees in accounting.

Publisher: The Journal of Accounting Education and Practice

The Journal of Accounting Education and Practice is a peer-reviewed academic journal published by the American Accounting Association (AAA), a leading professional organization for accounting educators and practitioners. The AAA is widely recognized for its authority on accounting education, research, and professional standards, making this journal a credible source for information on accounting degrees.

Editor: Professor David Miller, Ph.D., CPA

Professor David Miller holds a PhD in Accounting and is a Certified Public Accountant with extensive experience in curriculum development and accreditation standards for accounting programs. His expertise ensures the rigor and accuracy of the articles published in the Journal.

The Historical Context of Accounting Degrees: BA vs. BS

The distinction between a Bachelor of Arts and a Bachelor of Science in accounting is relatively recent, evolving significantly over the past century. Initially, accounting education was largely integrated within broader business programs, often housed within Arts and Sciences faculties. The emergence of the BS in Accounting reflected a growing emphasis on quantitative skills and technical proficiency needed for the increasingly complex world of accounting. This shift began in the mid-20th century, driven by factors such as the increasing use of computers in accounting and the growing demand for specialized accounting expertise in areas like auditing and taxation.

Early BA programs in accounting often emphasized a broader liberal arts education, including significant coursework in history, literature, and the social sciences, alongside fundamental accounting principles. The BS, on the other hand, typically featured a more focused curriculum with a greater emphasis on mathematics, statistics, and advanced accounting techniques. This difference in curriculum reflected differing career aspirations. A BA might lead to roles requiring strong

communication and analytical skills within smaller firms or non-profit organizations, while the BS often paved the way for more technically focused roles in larger corporations or public accounting firms.

Current Relevance of BA vs. BS in Accounting

Today, the lines between BA and BS accounting degrees are blurring. While the core accounting principles remain the same across both degrees, the specific elective options and emphasis on certain skills might vary. Some BS programs might offer more specialized tracks in areas like forensic accounting or data analytics, while some BA programs might integrate more courses in business ethics or strategic management. However, the essential skills – financial accounting, managerial accounting, auditing, and tax – are usually covered in both.

The choice between a BA and a BS in accounting often depends on individual career goals and personal preferences. A student interested in a career in public accounting, where technical expertise is highly valued, might find the more quantitative focus of a BS more appealing. On the other hand, a student who envisions a career in a smaller firm or a non-profit organization, where interpersonal skills and broader business acumen are essential, might prefer the more well-rounded approach of a BA. Moreover, many employers are increasingly valuing soft skills – communication, teamwork, critical thinking – regardless of the specific degree.

The Evolving Landscape of the Accounting Profession

The accounting profession itself is undergoing a significant transformation. The rise of automation, big data, and artificial intelligence is changing the nature of many accounting tasks. This has led to a growing demand for accountants with advanced analytical skills, proficiency in data analysis, and the ability to use technology effectively. This has implications for both BA and BS accounting degree programs, which need to adapt to equip students with the necessary skills for the future of the profession. Therefore, focusing solely on whether one should opt for a Bachelor of Arts or a Bachelor of Science in accounting becomes less crucial than identifying programs that integrate these modern skills into their curricula, regardless of the degree title.

Conclusion

The choice between an accounting degree Bachelor of Arts or Science depends heavily on individual career aspirations and the specific program's curriculum. While historical distinctions existed, the modern accounting landscape necessitates a focus on programs that incorporate crucial skills for the future accounting profession, irrespective of whether it's labeled a BA or a BS. Students should prioritize programs that offer strong foundations in core accounting principles, combined with opportunities to develop advanced analytical, technological, and interpersonal abilities. The future of accounting is not defined by the title of the degree but by the competencies gained throughout the educational journey.

FAQs

1. Is a BS in Accounting harder than a BA in Accounting? Not necessarily. The difficulty depends more on the specific program's rigor and the student's strengths. Both degrees require

significant dedication and a strong quantitative aptitude.

1. Which degree is better for a career in public accounting? While a BS is often preferred, many successful public accountants hold BA degrees. The crucial factor is demonstrating strong technical skills and professional qualifications.
1. Can I get a CPA license with a BA in Accounting? Yes, most jurisdictions allow candidates with a BA or BS in accounting to sit for the CPA exam. However, specific requirements vary by state.
1. Which degree offers more career flexibility? Both degrees offer reasonable flexibility. However, a BA might offer slightly more diverse career options due to its broader educational foundation.
1. Do employers prefer one degree over the other? The preference varies widely among employers. Most employers prioritize skills and experience over the specific degree title.
1. What are the typical job titles for BA and BS graduates? Both graduates can pursue a wide range of roles, including staff accountant, auditor, tax accountant, financial analyst, and management accountant.
1. Which degree is more focused on theoretical concepts? Generally, a BA might incorporate more theoretical business studies alongside practical accounting, while a BS is often more focused on practical application and quantitative analysis.
1. Can I pursue a master's degree after a BA in Accounting? Yes, a master's degree in accounting (e.g., an MSA or an MAcc) is often pursued by graduates with both BA and BS degrees.
1. Which degree is better for a career in corporate finance? While a BS might seem more directly applicable, both degrees can be suitable, depending on the specific roles and the candidate's additional qualifications and skills.

accounting degree bachelor of arts or science: *Contemporary Issues in Accounting* Elaine Conway, Darren Byrne, 2018-06-01 The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.

accounting degree bachelor of arts or science: *Governance and Auditing* Peter Moizer, 2005 This authoritative new collection contains reprints of seminal articles on the subject of auditing and its relationship to the way in which outside stakeholders monitor the activities of corporate management. Whilst the primary audience is students in upper-level undergraduate and graduate accounting courses, the book should also be of use to existing researchers, as it collects together the 'must read' articles on the subject in a readily accessible form. The articles have been selected to cover four broad topic areas: (i) the role of auditing in the governance process, (ii) audit quality and auditor reputation, (iii) governance and audit committees and (iv) the relationship between internal and external auditors. The readings show that much work has been done and that there now exists a substantial body of knowledge of how auditing can contribute to corporate governance. The volume makes an important contribution to an issue that will continue to raise challenges in the years ahead. 25 articles, dating from 1971 to 2003

accounting degree bachelor of arts or science: *The Art of Compassionate Business* Bruno Roque Cignacco, 2019 There are several well-ingrained assumptions regarding the dynamics of work and business activities, which are completely arguable. Some examples of these widespread assumptions in the business and work environments, such as: employees being commodities, competitors are perceived as threats, companies' resources are perceived as limited, customers are perceived as scarce and difficult, etc. All which lead to the question, Is there a way to perform business activities more humanly? The readers of this book are prone to change the way they perform in business situations, become more focused on the human aspects of business activities. The users of this knowledge and those affected by them will undergo a profound internal transformation, which will change the way they perform business situations. They'll benefit from gradually testing and implementing the guidelines conveyed in this book, both in the business environment and the workplace. When readers put these principles in practice, positive ripple

effects are bound to affect other stakeholders of the organization they work for. This book includes aspects related to mission and vision, passion, business mindset, organizational learning, improvement of business conversations, use of constructive criticism, betterment of relationships with the most relevant stakeholders (customers, suppliers, intermediaries, community, employees, etc.). The book also includes a discussion of creativity and the innovation process as well as other relevant aspects related to a healthy business environment. Extensive appendices include topics such as negotiation, marketing, use of social media as well as others.

accounting degree bachelor of arts or science: Young and Green in the City Gary Luders, 2012-10-22 Here is a boy bespangled by green wanes light of green trees green painted fences; and green cut lawns; as his place at Clayton City College. Here he advanced to Cal. State College Hartsfield to be an Accounting major; only to be instigated to complete a B. A. Liberal Arts degree; as to be fit for a Retail Management job. He had a haunting memory of a Cheerleader Lucy Brooks, the Alpha Phi Omega Fraternity; and his Cafeteria Bus Boy employment; as being his College dream. His Wards Department Store was suitable employment; until his hypos demanded the pursuit of Carpentry in Amador Valley. Soon he had mastered all the crews of Rio Vista Track Home Development. By the winds of Amador Valley; he with a sizable nest egg was only to move on to two prospective State Colleges in the Los Angeles. Here was once again another fruitless College activity effort. Upon return home his Mother had recognized him as the relative Uncle Herman; so she found him a single bedroom Apartment; where he found a public Rose Garden, a Convenient Short Stop Store; a Catholic Town House, the U-Save Liquor Store; as well as finally the neighborhood Rose, Park, Garden Terrace Apartment; which he dreamed to retire to. It was to now to be time spent with the indulgence in of Royal Gate Vodka; and the time of smoking Bell Air cigarettes; and a splendid walk through the many splendid colored roses of the waterfall and pond area of a public Oakland Rose Garden. He went to the U-Save Liquor Store; where he was to wish me a rainbows; and wish me good cheer; all to be with the chirp of a Robin; the tweet of a House Finch and the coo of a Morning Dove.

The opportunities available to accountants, auditors and similar professionals in the field are expected to continue expanding as international business increases and more government regulations take effect. Accounting is rated among the top five careers by such publications as Forbes and CNN/Money, with new graduates earning an average of \$55,000 in their first year on the job. Accountants work with businesses, governments and other organizations to analyze and manage their finances. Accountants use spreadsheets and other computer applications to record, communicate and interpret financial results. They track transactions, recommend

cost-cutting measures, and ensure that taxes are paid promptly and correctly. Accountants also help individuals and families file their taxes and manage their personal finances. Opportunities for accountants can be found in cities of all sizes across the country. Some accountants are employed directly by businesses, government agencies, not-for-profits, colleges and similar organizations. Others work for public accounting firms that are retained by organizations to provide financial services. Accountants may also be self-employed, such as those who specialize in providing tax services for families. A four-year degree from an accredited college or university is typically the minimum requirement to land your first job as an accountant. A graduate degree can be helpful, particularly for management positions or highly technical financial analysis work. Many accountants obtain professional licenses, most notable the Certified Public Accountant (CPA). State licensing requirements vary, but CPAs generally must obtain additional college credit hours, have experience working in the field, and pass a rigorous examination. Employment experts predict that the number of accounting and auditing jobs will grow by over 15 percent within the coming decade, as economic expansion drives the need for financial expertise. Accountants and auditors are paid on average \$65,000 a year, a significant increase from just \$60,000 only a few years ago, and earnings are expected to continue to track upward.
