Methodologies and Approaches of Accounting Firms in the Philippines

Accounting firms in the Philippines generally adhere to internationally recognized accounting standards, primarily Philippine Financial Reporting Standards (PFRS), which are aligned with International Financial Reporting Standards (IFRS). However, the specific methodologies and approaches can vary depending on the size and specialization of the firm, as well as the client's needs.

For practitioners in the private and public sectors and their academic colleagues. accounting firms in the philippines: Communication that Counts Pia Patricia P. Tenedero, 2022-11-29 To date, communication research in accounting has largely focused on the competencies that define what constitutes 'effective communication'. Highly perception-based, skills-focused and Global North-centric, existing research tends to echo the skills deficit discourse which overemphasizes the role of the higher education system in developing students' work-relevant communication skills. This book investigates dominant views about communication and interrogates what shapes these views in the accounting field from a Global South perspective, exploring the idea of 'good communication' in the globalized accounting field. Taking the occupational stereotype of shy employees who are good with numbers but bad with words as its starting point, this book examines language and communication practices and ideologies in accounting education and work in the Philippines. As an emerging global leader in offshore accounting, the Philippines is an ideal context for an exploration of multilingual, multimodal and transnational workplace communication.

accounting firms in the philippines: Business Ethics in Theory and Practice Patricia Werhane, Alan E. Singer, 2013-04-17 This book originated in a symposium on business ethics that took place in the Faculty of Commerce at the University of Canterbury in September of 1997. Professor Werhane, who was a visiting Erskine Fellow, provided the keynote address, and many of the papers in this collection were originally presented at this symposium. We are grateful to Kluwer Publishers for the opportunity to publish these essays in their series on International Business Ethics. We want to thank the Olsson Center for Applied Ethics at the Darden School, University of Virginia, and the Erskine Trust and the Department of Management at the University of Canterbury for their support of Professor Werhane's fellowship, research for this text, and funding for its production. We especially want to thank Lisa Spiro, who copy-edited and prepared the manuscript for publication. INTRODUCTION AND OVERVIEW This book originated in a symposium on business ethics that took place in the faculty of commerce, at the University of Canterbury, in September

1997. Professor Werhane, who was a visiting Erskine Fellow, provided the keynote address. Contributions to the proceedings were. inter-disciplinary, spanning theory and practice. Subsequent contributions were obtained from within New Zealand and from Asia. The book starts off on rather a pessimistic note: the new managerialism (the kind of thing Scott Adams jokes about in the world-famous Dilbert cartoons) is economically suspect and psychologically damaging.

accounting firms in the philippines: Critical Histories of Accounting Richard K. Fleischman, Warwick Funnell, Stephen P. Walker, 2013 The critical tradition in accounting historiography has come to occupy a prominent place in the discipline's academic scholarship. Some critical literature has confronted the responsibility of accounting and accountants in precipitating contemporary crises, such as the audit failures that spawned Sarbanes-Oxley and the world-wide recession. Certain contemporary issues have long histories, such as the difficulties encountered by women to break the glass ceiling in public accounting, and the suffering of indigenous peoples under the imperialistic yoke. Other episodes in accounting's long history are seemingly more divorced from the present, but in reality they all have contemporary significance. Slavery in the New World, for example, although abolished more than a century ago, is still rampant in parts of the world, albeit less formally. Critical accounting historians feel it a duty to harken to the suppressed voices of the past, those groups of people who had no access to an accounting record - women, persons of color, indigenous populations, alienated proletarians, victims of governmental incompetence and graft, and many voiceless others. *Critical Histories of Accounting: Sinister Inscriptions in the Modern Era* draws on the foremost work in this developing literature, both that authored by the co-editors of this volume, and that written by others. Editors Richard K. Fleischman, Warwick N. Funnell, and Steve Walker have written extensively about the dark side of accounting, gauging the complicity of those performing accounting functions in episodes in human history that are at worst evil and at best reprehensible. The editors have also hand-selected a series of historical and contemporary episodes that have been critically investigated by the wider accounting history community, preceded by a thorough introduction.

accounting firms in the philippines: Connecting and Distancing Ho Khai Leong, 2009
Connecting and distancing have been two prominent themes permeating the writings on the historical and contemporary developments of the relationship between Southeast Asia and China. As neighbours, the nation-states in Southeast Asia and the giant political entity in the north communicated with each other through a variety of diplomatic overtures, political agitations, and cultural nuances. In the last two decades with the rise of China as an economic powerhouse in the region, Southeast Asia's need to connect with China has become more urgent and necessary as it

attempts to reap the benefit from the successful economic modernization in China. At the same time, however, there were feelings of ambivalence, hesitation and even suspicions on the part of the Southeast Asian states vis-a-vis the rise of a political power which is so less understood or misunderstood. The contributors of this volume are authors of various disciplinary backgrounds: history, political science, economics and sociology. They provide a spectrum of perspectives by which the readers can view Sino-Southeast Asia relations.

accounting firms in the philippines: Research Handbook on International Banking and Governance James R. Barth, Dr. Chen Lin, Clas Wihlborg, 2012-01-01 The recent financial crisis has stimulated much debate on the governance of financial institutions, as well as research on the effects of governance arrangements on risk-taking, performance and financial institutions more generally. Furthermore, researchers are asking how regulation, legislation, politics and other factors influence the governance of financial institutions and their behavior in different dimensions. The specially commissioned contributions featured in this timely Handbook confront these complex issues. The contributors – top international scholars from finance, law and business – explore the role of governance, both internal and external, in explaining risk-taking and other aspects of the behavior of financial institutions. Additionally, they discuss market and policy features affecting objectives and quality of governance. The chapters provide in-depth analysis of factors such as: ownership, efficiency and stability; market discipline; compensation and performance; social responsibility; and governance in non-bank financial institutions. Only through this kind of rigorous examination can one hope to implement the financial reforms necessary and sufficient to reduce the likelihood and severity of future crises. Bringing the reader to the frontier of research on governance of financial institutions, this volume is sure to inspire future research in scholars and students of financial institutions, governance and banking as well as all those involved with private financial institutions and public regulatory and supervisory authorities.
