accounting home work help: *Career as an Accountant* Institute for Career Research, 2014-06 Accounting is one of the most in-demand careers today, with more new jobs opening up every day. The opportunities available to accountants, auditors and similar professionals in the field are expected to continue expanding as international business increases and more government regulations take effect. Accounting is rated among the top five careers by such publications as *Forbes* and *CNN/Money*, with new graduates earning an average of \$55,000 in their first year on the job. Accountants work with businesses, governments and other organizations to analyze and manage their finances. Accountants use spreadsheets and other computer applications to record, communicate and interpret financial results. They track transactions, recommend cost-cutting measures, and ensure that taxes are paid promptly and correctly. Accountants also help individuals and families file their taxes and manage their personal finances. Opportunities for accountants can be found in cities of all sizes across the country. Some accountants are employed directly by businesses, government agencies, not-for-profits, colleges and similar organizations. Others work for public accounting firms that are retained by organizations to provide financial services. Accountants may also be self-employed, such as those who specialize in providing tax services for families. A four-year degree from an accredited college or university is typically the minimum requirement to land your first job as an accountant. A graduate degree can be helpful, particularly for management

positions or highly technical financial analysis work. Many accountants obtain professional licenses, most notable the Certified Public Accountant (CPA). State licensing requirements vary, but CPAs generally must obtain additional college credit hours, have experience working in the field, and pass a rigorous examination. Employment experts predict that the number of accounting and auditing jobs will grow by over 15 percent within the coming decade, as economic expansion drives the need for financial expertise. Accountants and auditors are paid on average \$65,000 a year, a significant increase from just \$60,000 only a few years ago, and earnings are expected to continue to track upward.

accounting home work help: The Reluctant Disciple Jim O'Shea, 2018-10-01 Ryan Kates is a paranormal expert, TV host, and skeptic. He hosts News4th, a nationally popular cable show focused on UFOs, ghosts, and everything that goes bump in the night. Ryan is used to dealing with the weird and unexplainable, but when bizarre paranormal phenomena rock the planet he finds himself questioning his long-held views. As these phenomena escalate, mass hysteria and political tensions begin to mount on a global scale. The world begins to spin out of control, and a former flame reenters Ryan's life, bringing her family along for the ride. The pawns are moved into place, and Ryan must confront the ultimate evil on the world stage, culminating in a supernatural encounter far beyond his wildest dreams. The Reluctant Disciple establishes a credible connection between End Times biblical prophecy and our society's fascination with the paranormal, taking readers on a thrill ride they won't soon forget.
