accounting podcasts for beginners: The Soul of Enterprise Ronald J Baker, Ed Kless, 2015-02-26 The world's economy has been transformed from a twentieth-century materials-based economy to the Age of the Knowledge-Based Economy - and the currency of this realm is ideas, imagination, creativity, and knowledge. According The World Bank, 80% of the developed world's wealth now resides in human capital. Perhaps President Ronald Reagan said it best in his address to Moscow State University on May 31, 1988: Like a chrysalis, we're emerging from the economy of the Industrial Revolution - an economy confined and limited by the Earth's physical resources - into, as one economist titled his book, the economy in mind, in which there are no bounds on human imagination and the freedom to create is the most precious natural resource. Written by Ronald Baker and Ed Kless, hosts of The Soul of Enterprise: Business in the Knowledge Economy, the popular radio show on Voice America's Business Channel, The Soul of Enterprise: Dialogues on Business in the Knowledge Economy sounds the clarion call that organizations can no longer ignore this seismic shift that has occurred in the economy since 1959. The Soul of Enterprise introduces the three components of Intellectual Capital - human capital, social capital, and structural capital - and how to leverage them to create wealth in today's economy, by revealing: The physical fallacy - why wealth no longer consists of tangible things, but of ideas, imagination and knowledge from human minds The best learning tool ever invented: After Action Reviews Why Frederick Taylor and the Scientific Management movement was a fraud and the wrong focus for knowledge workers The fact that effectiveness always and everywhere trumps efficiency The First Law of Pricing: All value is subjective The Second Law of Pricing: All prices are contextual The Morality of Markets: Doing well and doing good Why your organization - and you - need to be driven by a higher purpose than profit The Soul of Enterprise will inspire and challenge readers to unlock the enormous financial and competitive power hidden in the intellectual capital of their organizations and knowledge workers.

accounting podcasts for beginners: Generation Impact Sharna Goldseker, Michael Moody, 2017-10-02 An insider's guide to the coming philanthropic revolution Meet the next generation of big donors—the Gen X and Millennial philanthropists who will be the most significant donors ever and will shape our world in profound ways. Hear them describe their ambitious plans to revolutionize giving so it achieves greater impact. And learn how to help them succeed in a world that needs smart, effective donors now more than ever. As “next gen donors” step into their philanthropic roles, they have not only unprecedented financial resources, but also big ideas for how to wield their financial power. They want to disrupt the traditional world of charitable giving, and they want to do so now, not after they retire to a life of philanthropic leisure. Generation Impact pulls back the curtain on these rising leaders and their “Impact Revolution,” offering both extensive firsthand accounts and expert analysis of the hands-on, boundary-pushing, unconventional strategies next gen donors are beginning to pursue. This fascinating book also shows another side of the donors in Generation Impact: they want to respect the past even as they transform the future. They are determined to honor the philanthropic legacies and values they've inherited by making big giving more effective than ever before. If they succeed, they can make historic progress on causes from education to the environment, from human rights to health care. Based on years of research and close engagement with next gen donors, Generation Impact offers a unique profile of the new faces of philanthropy. Find out, directly from them: How they want to revolutionize giving to expand its positive impact on our lives and our communities. Which causes interest them, how they want to engage with those causes ... and, perhaps more important, how they do not want to engage. Which new tools and strategies for change excite them most. What they are learning from previous generations, and what they want to bring to their work alongside those generations. How we can all

ensure their historic potential is channeled in ways that make our world better. The Impact Revolution will be messy, but it could also result in solutions for some of our most persistent problems. Generation Impact offers targeted, practical advice to parents, families, and their advisors, as well as nonprofit professionals—those who work closest with these next gen donors—on how to engage, nurture, and encourage them as they reshape major giving and make their mark on history. Help them channel their enthusiasm—and their wealth—to make the most positive difference in a world with such great need.

accounting podcasts for beginners: *Beyond Digital* Paul Leinwand, Mahadeva Matt Mani, 2022-01-04
Two world-renowned strategists detail the seven leadership imperatives for transforming companies in the new digital era. Digital transformation is critical. But winning in today's world requires more than digitization. It requires understanding that the nature of competitive advantage has shifted—and that being digital is not enough. In *Beyond Digital*, Paul Leinwand and Matt Mani from Strategy&, PwC's global strategy consulting business, take readers inside twelve companies and how they have navigated through this monumental shift: from Philips's reinvention from a broad conglomerate to a focused health technology player, to Cleveland Clinic's engagement with its broader ecosystem to improve and expand its leading patient care to more locations around the world, to Microsoft's overhaul of its global commercial business to drive customer outcomes. Other case studies include Adobe, Citigroup, Eli Lilly, Hitachi, Honeywell, Inditex, Komatsu, STC Pay, and Titan. Building on a major new body of research, the authors identify the seven imperatives that leaders must follow as the digital age continues to evolve: Reimagine your company's place in the world Embrace and create value via ecosystems Build a system of privileged insights with your customers Make your organization outcome-oriented Invert the focus of your leadership team Reinvent the social contract with your people Disrupt your own leadership approach Together, these seven imperatives comprise a playbook for how leaders can define a bolder purpose and transform their organizations.

accounting podcasts for beginners: *Selling to Serve* James Ashford, 2016-11-01 Accountants have it tough..... and it's getting tougher. They fulfill THE most important function of any business, which is to manage their finances. They have to ensure that they are compliant and help their clients to make better decisions about the future based on what has happened in the past. So you'd think that their clients would be singing their praises, throwing money at them for the great job that they do and bending over backwards to meet their demands. But is that the reality? Not even close. The reality is that accountants are seen as a necessity and their services aren't valued to the extent that they should be. How do I know? Because I've been doing it with brave firms of forward thinking accountants who have been bold enough to acknowledge that the world of accounting has changed; accountants who joined the profession, through wanting to provide value and who are sick of it being reduced to a necessity; accountants who are sick of putting up with crap from clients, and not getting paid enough for a service that's so challenging to deliver. So if you're ready to discover how to solve this problem... let's go.
