accounting workbooks with answers pdf: Applied Accounting Richard Beck, Gauda Johannes Maseko, Marina Chalmers, Noluthando Radebe, Tracey Walker, Pieter Pelle, 2017-07-20 Applied Accounting is tailored to meet the needs of students taking a first year course in Financial accounting as part of a Diploma in Accounting or a National Diploma (Accounting) both in terms of the curriculum covered and in terms of the approach toward teaching and learning. The book is suitable even for students who may not have taken Accounting at Grade 12 level as it bridges the gap between school and the first level of tertiary study. The book does this by referencing prior knowledge covered at school level and by scaffolding the level of conceptual engagement. Furthermore, students are exposed to every day financial objects or transactions such as what a cheque is, or how internet banking works and understanding is supported through the use of photographs, source documents and links to video clips and audio clips as well as instructions on practical activities. Language is pitched at a level accessible to first-year students, starting simply and progressively introducing students to the appropriate-level of Accounting discourse. Explanations are given in a step-by-step manner and explain to students why they are doing what they are doing. The text immediately highlights the key take-home points for the student. The text is extremely practical with plenty of exercises for students to practise, either alone or in pair work and group work encouraging interactive learning. In-text diagrams and tables further clarify concepts while online assessments provide further reinforcement of concepts. Applied Accounting also aims to inculcate a sense of work readiness and work ethics by teaching basic Life skills and how to self-manage.

accounting workbooks with answers pdf: A Spiral Workbook for Discrete Mathematics Harris Kwong, 2015-11-06 A Spiral Workbook for Discrete Mathematics covers the standard topics in a sophomore-level course in discrete mathematics: logic, sets, proof techniques, basic number theory, functions, relations, and elementary combinatorics, with an emphasis on motivation. The text explains and clarifies the unwritten conventions in mathematics, and guides the students through a detailed discussion on how a proof is revised from its draft to a final polished form. Hands-on exercises help students understand a concept soon after learning it. The text adopts a spiral approach: many topics are revisited multiple times, sometimes from a different perspective or at a higher level of complexity, in order to slowly develop the student's problem-solving and writing skills.
