acct 3110 entrance exam: Ancient India Upinder Singh, 2021 Upinder Singh urges us to abandon simplistic stereotypes and instead think of ancient India in terms of the coexistence of five powerful contradictions-between social inequality and promises of universal salvation, the valorization of desire and detachment, goddess worship and misogyny, violence and non-violence, and religious debate and conflict. She does so using a vast array of sources including religious and philosophical texts, epics, poetry, plays, technical treatises, satire, biographies, and inscriptions, as well as the material and aesthetic evidence of archaeology and art from sites across the subcontinent. Singh's scholarly but highly accessible style, clear explanation, and balanced interpretations offer an understanding of the historian's craft and unravel the many threads of what we think of as ancient Indian culture. This is not a dead or forgotten past but one invoked in different contexts even today. Further, in spite of enormous historical changes over the centuries, the contradictions discussed here still remain.
