achates guide lost ark: The Christian Invention of Time Simon Goldhill, 2022-02-03 Time is integral to human culture. Over the last two centuries people's relationship with time has been transformed through industrialisation, trade and technology. But the first such life-changing transformation - under Christianity's influence - happened in late antiquity. It was then that time began to be conceptualised in new ways, with discussion of eternity, life after death and the end of days. Individuals also began to experience time differently: from the seven-day week to the order of daily prayer and the festal calendar of Christmas and Easter. With trademark flair and versatility, world-renowned classicist Simon Goldhill uncovers this change in thinking. He explores how it took shape in the literary writing of late antiquity and how it resonates even today. His bold new cultural history will appeal to scholars and students of classics, cultural history, literary studies, and early Christianity alike.

achates guide lost ark: *Three Books of Occult Philosophy* Heinrich Cornelius Agrippa, 2021-11-16 • Corrects the many mistranslations, copyist mistakes, and errors introduced from other editions, drawing on new research and access to Agrippa's source texts • Restores all of Agrippa's original illustrations • Presents a nearly complete bibliography of Agrippa's primary sources One of the most important texts in the Western magical tradition for nearly 500 years, Heinrich Cornelius Agrippa's 1533 work *Three Books of Occult Philosophy* collates a multitude of sources from the Classical, Medieval, and Renaissance periods and organizes them into a coherent explanation of the

magical world. Divided into three parts--the natural world, the celestial world, and the divine world--the book systematically explains the philosophy, logic, and methods of magic and astrology and how they work, offering numerous examples, diagrams, techniques, and analogies. Agrippa's seminal masterpiece provided the basis for 19th-century magical orders such as the Golden Dawn and has been a primary source for countless books on magical uses of stones, herbs, incense, and astrology. Additionally, Agrippa's many lists and diagrams, especially the planetary seals and magic squares, have proven invaluable to magicians since the 16th century. Yet, up until now, all English editions of Agrippa's Three Books were based on the same flawed 1651 translation from the mysterious "J.F." In this new translation from the original 1533 Latin edition, Eric Purdue corrects the many mistranslations, copyist mistakes, and errors introduced from other editions, as well as restores all of Agrippa's original illustrations. He notates every correction from earlier editions and offers commentary to rectify the original translator's mistranslations. Drawing on major developments in the research of older magical and astrological texts since the 1990s, Purdue also presents a nearly complete bibliography of Agrippa's primary sources, revealing how Agrippa was not writing from missing or secret texts but was a mainstream scholar of his day. Presenting the first new English translation of Three Books of Occult Philosophy in more than 350 years, this three-volume hardcover boxed set repairs the gaps in knowledge pervasive in the original translation as well as restores the magical spirit of Agrippa's masterpiece, allowing us to hear Agrippa speak again.

Completed in 1173, The Book of Divine Works (Liber Divinorum Operum) is the culmination of the Visionary's Doctor's theological project, offered here for the first time in a complete and scholarly English translation. The second part examines the rewards for virtue and the punishments for vice, mapped onto a geography of purgatory, hellmouth, and the road to the heavenly city. At the end of each Hildegard writes extensive commentaries on the Prologue to John's Gospel (Part 1) and the first chapter of Genesis (Part 2)—the only premodern woman to have done so. Finally, the third part tells the history of salvation, imagined as the City of God standing next to the mountain of God's foreknowledge, with Divine Love reigning over all.

Sorkhabi, 2017-12-21 Southwest Asia is one of the most remarkable regions on Earth in terms of active faulting and folding, large-magnitude earthquakes, volcanic landscapes, petroliferous foreland basins, historical civilizations as well as geologic outcrops that display the protracted and complex 540 m.y. stratigraphic record of Earth's Phanerozoic Era. Emerged from the birth and demise of the Paleo-Tethys and Neo-Tethys oceans, southwest Asia is currently the locus of ongoing tectonic collision between the Eurasia-Arabia continental plates. The region is characterized by the high plateaus of Iran and Anatolia fringed by the lofty ranges of Zagros, Alborz, Caucasus, Taurus, and Pontic mountains; the region also includes the strategic marine domains of the Persian Gulf, Gulf of Oman, Caspian, and Mediterranean. This 19-chapter volume, published in honor of Manuel Berberian, a preeminent geologist from the region, brings together a wealth of new data, analyses, and frontier research on the geologic evolution, collisional tectonics, active deformation, and historical and modern seismicity of key areas in southwest Asia.

Upon the verge of the sea, at the entrance of a fertile plain, on the bank of a navigable river, it united the conveniences of a commercial town with the security of a military station, and the romantic beauty of a spot celebrated in all ages for its pre-eminent loveliness. Its environs, even to the heights of Vesuvius, were covered with villas, and the coast, all the way to Naples, was so ornamented with gardens and villages, that the shores of the whole gulf appeared as one city.
