activate honor society membership: *God's Choice* Alan Peshkin, 1988-06-15 Is Bethany Baptist Academy God's choice? Ask the fundamentalist Christians who teach there or whose children attend the academy, and their answer will be a yes as unequivocal as their claim that the Bible is God's inerrant, absolute word. Is this truth or arrogance? In *God's Choice*, Alan Peshkin offers readers the opportunity to consider this question in depth. Given the outsider's rare chance to observe such a school firsthand, Peshkin spent eighteen months studying Bethany's high school—interviewing students, parents, and educators, living in the home of Bethany Baptist Church members, and participating fully in the church's activities. From this intimate research he has fashioned a rich account of Christian schooling and an informed analysis of a clear alternative to public education.

activate honor society membership: *Reproducing Domination* Percy C. Hintzen, Charisse Burden-Stelly, Aaron Kamugisha, 2022-11-29 *Reproducing Domination: On the Caribbean Postcolonial State* collects thirteen key essays on the Caribbean by Percy C. Hintzen, the foremost political sociologist in Anglophone Caribbean studies. For the past forty years, Hintzen has been one of the most articulate and discerning critics of the postcolonial state in Caribbean scholarship, making seminal contributions to the study of Caribbean politics, sociology, political economy, and diaspora studies. His work on the postcolonial elites in the region, first given full articulation in his book *The Costs of Regime Survival: Racial Mobilization, Elite Domination, and Control of the State in Guyana and Trinidad*, is unparalleled. *Reproducing Domination* contains some of Hintzen's most important Caribbean essays over a twenty-five-year period, from 1995 to the present. These works have broadened and deepened his earlier work in *The Costs of Regime Survival* to encompass the entire Anglophone Caribbean; interrogated the formation and consolidation of the postcolonial Anglophone Caribbean state; and theorized the role of race and ethnicity in Anglophone Caribbean politics. Given the recent global resurgence of interest in elite ownership patterns and their relationship to power and governance, Hintzen's work assumes even more resonance beyond the shores of the Caribbean. This groundbreaking volume serves as an important guide for those concerned with tracing the consolidation of power in the new elite that emerged following flag independence in the 1960s.

activate honor society membership: *Islands in the Street* Martin Sanchez-Jankowski, 1991 From the Introduction: The overall goal of the research project was to understand the gang phenomenon in the United States. In order to accomplish this goal, I thought it necessary to understand what was similar in the way all gangs behaved and what was idiosyncratic to certain gangs. In addition, I thought it was also necessary to understand why certain gangs grew, others declined but lingered on, and others declined and died. What follows is an explanation of the research design, the method of data gathering, the method of data analysis and presentation, and some ethical issues related to the research. Past research on gangs had for the most part focused on gangs in one section of a city, gangs in one city, or gangs of one ethnic group. In order to understand the nature of the gang as an organization and the gang phenomenon in general, I believed it was necessary to undertake a comparative study. This was the only way to understand what gangs have in common with each other and what is idiosyncratic to particular gangs.

activate honor society membership: *Prepare the Way of the Lord* Kirsten Marie Hartvigsen, 2012-10-30 This study analyzes an oral performance of the entire Gospel of Mark, with emphasis on involvement with characters and events, the emotional effects of such involvement, and how these processes maintain or shape the identity of those who hear the Gospel. Insights from cognitive poetics and psychonarratology are employed to illuminate the complex, cognitive processes that take place when audience members experience an oral performance of the Gospel. Consequently, this study expands previous research on the Gospel of Mark which was conducted on the basis of narrative criticism, orality criticism, and performance criticism by including cognitive aspects. Cognitive poetics and psychonarratology have to my knowledge not been extensively employed to illuminate an oral performance of the Gospel of Mark previously. This investigation provides: (1) An original, coherent theoretical and methodological framework; (2) An analysis of mechanisms which promote involvement with characters and events in the Markan narrative; (3) An examination of the prospective emotional effects of such involvement; (4) Reflections on the potential of these

mechanisms with regard to identity maintenance or formation through cultural memory; (5) A cognitive poetic commentary on the entire Gospel of Mark.

It has been completely rewritten, mostly by Phillips, and much has been added while keeping the existing framework. Thus, the algebraic tools play a major role, and are introduced early, leading to a more satisfactory operational calculus and spectral theory. The Laplace-Stieltjes transform methods, used by Hille, have not been replaced but rather supplemented by the new tools. - Foreword.

It centres around a special class of ideals in a polynomial ring: the class of toric ideals. They are characterized as those prime ideals that are generated by monomial differences or as the defining ideals of toric varieties (not necessarily normal). The interdisciplinary nature of the study of Gröbner bases is reflected by the specific applications appearing in this book. These applications lie in the domains of integer programming and computational statistics. The mathematical tools presented in the volume are drawn from commutative algebra, combinatorics, and polyhedral geometry.

activate honor society membership: *When Race Trumps Merit* Heather Mac Donald, 2023-04-18 Does your workplace have too few black people in top jobs? It's racist. Does the advanced math and science high school in your city have too many Asians? It's racist. Does your local museum employ too many white women? It's racist, too. After the Black Lives Matter protests of 2020, prestigious American institutions, from the medical profession to the fine arts, pleaded guilty to "systemic racism." How else explain why blacks are overrepresented in prisons and underrepresented in C-suites and faculty lounges, their leaders asked? The official answer for those disparities is "disparate impact," a once obscure legal theory that is now transforming our world. Any traditional standard of behavior or achievement that impedes exact racial proportionality in any enterprise is now presumed racist. Medical school admissions tests, expectations of scientific accomplishment in the award of research grants, the enforcement of the criminal law—all are under assault, because they have a "disparate impact" on underrepresented minorities. When Race Trumps Merit provides an alternative explanation for those racial disparities. It is large academic skills gaps that cause the lack of proportional representation in our most meritocratic organizations and large differences in criminal offending that account for the racially disproportionate prison population. The need for such a corrective argument could not be more urgent. Federal science agencies now treat researchers' skin color as a scientific qualification. Museums and orchestras choose which art and music to promote based on race. Police officers avoid making arrests and prosecutors decline to bring charges to avoid disparate impact on minority criminals. When Race Trumps Merit breaks powerful taboos. But it is driven by a sense of alarm, supported by detailed case studies of how disparate-impact thinking is jeopardizing scientific progress, destroying public order, and poisoning the appreciation of art and culture. As long as alleged racism remains the only allowable explanation for racial differences, we will continue tearing down excellence and putting lives, as well as civilizational achievement, at risk.

activate honor society membership: Speech Recognition in Adverse Conditions Sven Mattys, Ann Bradlow, Matthew Davis, Sophie Scott, 2013-12-19 Speech recognition in 'adverse conditions' has been a familiar area of research in computer science, engineering, and hearing sciences for several decades. In contrast, most psycholinguistic theories of speech recognition are built upon evidence gathered from tasks performed by healthy listeners on carefully recorded speech, in a quiet environment, and under conditions of undivided attention. Building upon the momentum initiated by the Psycholinguistic Approaches to Speech Recognition in Adverse Conditions workshop held in Bristol, UK, in 2010, the aim of this volume is to promote a multi-disciplinary, yet unified approach to the perceptual, cognitive, and neuro-physiological mechanisms underpinning the recognition of degraded speech, variable speech, speech experienced under cognitive load, and speech experienced by theoretically relevant populations. This collection opens with a review of the

literature and a formal classification of adverse conditions. The research articles then highlight those adverse conditions with the greatest potential for constraining theory, showing that some speech phenomena often believed to be immutable can be affected by noise, surface variations, or attentional set in ways that will force researchers to rethink their theory. This volume is essential for those interested in speech recognition outside laboratory constraints.

activate honor society membership: Computational Materials, Chemistry, and Biochemistry: From Bold Initiatives to the Last Mile Sadasivan Shankar, Richard Muller, Thom Dunning, Guan Hua Chen, 2021-01-25 This book provides a broad and nuanced overview of the achievements and legacy of Professor William ("Bill") Goddard in the field of computational materials and molecular science. Leading researchers from around the globe discuss Goddard's work and its lasting impacts, which can be seen in today's cutting-edge chemistry, materials science, and biology techniques. Each section of the book closes with an outline of the prospects for future developments. In the course of a career spanning more than 50 years, Goddard's seminal work has led to dramatic advances in a diverse range of science and engineering fields. Presenting scientific essays and reflections by students, postdoctoral associates, collaborators and colleagues, the book describes the contributions of one of the world's greatest materials and molecular scientists in the context of theory, experimentation, and applications, and examines his legacy in each area, from conceptualization (the first mile) to developments and extensions aimed at applications, and lastly to de novo design (the last mile). Goddard's passion for science, his insights, and his ability to actively engage with his collaborators in bold initiatives is a model for us all. As he enters his second half-century of scientific research and education, this book inspires future generations of students and researchers to employ and extend these powerful techniques and insights to tackle today's critical problems in biology, chemistry, and materials. Examples highlighted in the book include new materials for photocatalysts to convert water and CO₂ into fuels, novel catalysts for the highly selective and active catalysis of alkanes to valuable organics, simulating the chemistry in film growth to develop two-dimensional functional films, and predicting ligand-protein binding and activation to enable the design of targeted drugs with minimal side effects.

activate honor society membership: Postmodernism and the Ethics of Theological Knowledge Justin Thacker, 2016-04-08 This book establishes the necessary integration of theological knowledge with theological ethics. It does this as a response to the postmodern critique of Christianity, as exemplified in Rorty and Lyotard. They argue that any claim to know God is necessarily tyrannical. Contemporary responses to such postmodern thinking often fail to address adequately the ethical critique that is made. This book redresses that balance by suggesting that our knowledge of God and love of the Other are so intimately connected that we cannot have one without the other. In the absence of love, then, we simply do not know God. Justin Thacker proposes that an effective theological response to postmodernity must address both knowledge and ethics in an integrated fashion as presented in this book.

Zelin, 2020-02-11 Tunisia became one of the largest sources of foreign fighters for the Islamic State—even though the country stands out as a democratic bright spot of the Arab uprisings and despite the fact that it had very little history of terrorist violence within its borders prior to 2011. In *Your Sons Are at Your Service*, Aaron Y. Zelin uncovers the longer history of Tunisian involvement in the jihadi movement and offers an in-depth examination of the reasons why so many Tunisians became drawn to jihadism following the 2011 revolution. Zelin highlights the longer-term causes that affected jihadi recruitment in Tunisia, including the prior history of Tunisians joining jihadi organizations and playing key roles in far-flung parts of the world over the past four decades. He contends that the jihadi group Ansar al-Sharia in Tunisia was able to take advantage of the universal prisoner amnesty, increased openness, and the lack of governmental policy toward it after the revolution. In turn, this provided space for greater recruitment and subsequent mobilization to fight abroad once the Tunisian government cracked down on the group in 2013. Zelin marshals cutting-edge empirical findings, extensive primary source research, and on-the-ground fieldwork, including a variety of documents in Arabic going as far back as the 1980s and interviews with Ansar al-Sharia members and Tunisian fighters returning from Syria. The first book on the history of the Tunisian jihadi movement, *Your Sons Are at Your Service* is a meticulously researched account that challenges simplified views of jihadism's appeal and success.
