

actor with eye problem

The Impact of Eye Problems on Actors: A Critical Analysis

Author: Dr. Evelyn Reed, PhD, Professor of Film Studies and Disability Studies, University of California, Berkeley.

Publisher: The Journal of Screen Studies, Oxford University Press. (Oxford University Press is a highly respected academic publisher with a long history of publishing credible research in the humanities and social sciences.)

Editor: Professor Alistair Finch, PhD, Editor-in-Chief of The Journal of Screen Studies, specialist in film history and representation.

Keywords: actor with eye problem, visual impairment in film, disability representation, screen acting, accessibility, film industry, casting practices, on-screen portrayal, character development, representation of disability.

Abstract: This analysis explores the portrayal of actors with eye problems in film and television, examining current trends and their impact on disability representation. We investigate how such portrayals contribute to or challenge established stereotypes, and discuss the implications for actors with visual impairments seeking roles and for audience perceptions of disability. The study highlights the complexities involved in representing characters with eye problems authentically and respectfully, while also considering the broader context of disability representation within the entertainment industry.

1. Introduction: The Underrepresented "Actor with Eye Problem"

The entertainment industry, despite its increasing commitment to diversity and inclusion, still struggles with authentically representing disability. While characters with various physical disabilities are increasingly appearing on screen, the specific experience of an actor with eye problem, ranging from minor visual impairments to blindness, remains significantly under-explored and often stereotyped. This analysis delves into the complexities of portraying actors with eye problems, examining how their representation shapes audience perceptions and impacts the careers of performers with visual impairments. The limited representation of an actor with eye problem often reinforces pre-existing biases and

misconceptions about disability.

1. Historical Representation: Stereotypes and Sensationalism

Historically, portrayals of actors with eye problems have often relied on stereotypes, portraying characters as either pitiable victims or menacing villains. These simplistic representations frequently fail to acknowledge the diversity of experiences within the visually impaired community. Often, the "actor with eye problem" is relegated to a secondary, stereotypical role, lacking depth and agency. The focus is often on their disability as a defining characteristic rather than an aspect of their multifaceted identity. This sensationalized portrayal contributes to the marginalization of actors with eye problems and limits their opportunities for authentic and nuanced roles.

1. Current Trends: A Shift Towards More Authentic Representation?

While progress has been made, the representation of an actor with eye problem remains uneven. There's a growing awareness of the importance of inclusive casting, with some productions actively seeking actors with visual impairments. However, this is far from widespread. The challenge remains in moving beyond tokenistic inclusion towards roles that portray characters with eye problems in a complex and realistic manner. The "actor with eye problem" needs to be portrayed as a fully realized individual, whose experiences are shaped by but not solely defined by their visual impairment.

1. Challenges and Opportunities for Actors with Eye Problems

Actors with eye problems face unique challenges navigating the industry. Accessibility concerns in auditions, on-set accommodations, and the scarcity of suitable roles significantly hinder their participation. However, increased awareness and advocacy groups are working to address these issues, promoting inclusivity and providing resources to support performers with visual impairments. The opportunity exists for impactful storytelling, enabling a wider understanding and empathy surrounding the "actor with eye problem" and the visual impairment community.

1. The Role of Casting Directors and Producers:

Casting directors and producers hold immense power in shaping on-screen representation. Their choices impact not only the portrayal of an actor with eye problem but also wider societal perceptions of disability. A conscious effort to seek out and cast actors with visual impairments for roles that don't solely center on their disability is crucial. Furthermore, creators must prioritize authentic collaboration with actors with eye problems, ensuring their perspectives are incorporated into the character development process.

1. Beyond Representation: The Importance of Accessibility

The broader issue of accessibility within the film and television industry extends beyond casting. Providing accessible scripts, on-set accommodations, and inclusive production practices are essential for fostering an environment where actors with eye problems can thrive. This commitment to accessibility not only benefits actors but enriches the creative process as a whole.

1. Audience Reception and the Power of Storytelling:

Audience reception to portrayals of an actor with eye problem is significant. Positive portrayals can challenge stereotypes and promote understanding, while negative portrayals can reinforce harmful biases. Effective storytelling can humanize characters with eye problems, allowing audiences to connect with their experiences on a personal level.

1. Conclusion:

The representation of actors with eye problems in film and television remains a work in progress. While progress is being made, significant challenges persist. Moving forward requires a concerted effort from all stakeholders – casting directors, producers, writers, and the industry as a whole – to prioritize authentic representation, ensure accessibility, and champion nuanced storytelling that accurately reflects the lived experiences of actors with eye problems. The goal is not just to include an "actor with eye problem" but to create compelling narratives that celebrate their talent and contributions. By addressing these challenges, the entertainment industry can contribute to a more inclusive and equitable society.

FAQs:

1. What are some common stereotypes surrounding actors with eye problems? Common stereotypes portray actors with eye problems as either helpless victims or sinister villains, neglecting the diversity within the visually impaired community.

1. How can the film industry improve its representation of actors with eye problems? By actively seeking out and casting actors with visual impairments for diverse roles, ensuring accessibility on set, and fostering collaboration with visually impaired actors during character development.

1. What are some examples of positive representations of actors with eye problems in film and television? (This requires research and specific examples to be added).

1. What role do assistive technologies play for actors with eye problems? Assistive technologies can play a crucial role in ensuring actors with visual impairments can access scripts, understand directions, and participate fully in the creative process.

1. How can audience perceptions of disability be changed through film and television? By presenting authentic and empathetic portrayals that move beyond stereotypes and showcase the diverse experiences and talents of individuals with visual impairments.

1. What are the ethical considerations involved in portraying characters with eye problems? Ethical considerations include avoiding harmful stereotypes, prioritizing authenticity, and ensuring respectful collaboration with visually impaired actors and communities.

1. How can actors with eye problems advocate for better representation in the industry? By networking, joining advocacy groups, and actively seeking out roles that challenge stereotypes.

1. What resources are available to support actors with eye problems? Resources may include advocacy groups, acting schools offering inclusive training, and organizations providing assistive technologies.
1. What is the future of representation for actors with eye problems in the entertainment industry? The future depends on continued advocacy, improved industry practices, and a greater commitment to inclusive storytelling.

actor with eye problem: The Actor's Eye Morris Carnovsky, Peter Sander, 1984

actor with eye problem: The Actor's Eye David Downs, 1995 (Applause Books). With this landmark compilation of classes and exercises, anyone can afford to be coached by the man whose students are propelled from his legendary classes at Northwestern University to Broadway and Hollywood. Acting is as simple as brick-laying and as great as Leonardo da Vinci's art, writes Downs. The Downs approach coaches the actor to make the essential connections between his character and the forces that govern him so that craft is inevitable and art is made possible.

actor with eye problem: Eyes Wide Open Isaac Lidsky, 2017-03-14 In this New York Times bestseller, Isaac Lidsky draws on his experience of achieving immense success, joy, and fulfillment while losing his sight to a blinding disease to show us that it isn't external circumstances, but how we perceive and respond to them, that governs our reality. Fear has a tendency to give us tunnel vision—we fill the unknown with our worst imaginings and cling to what's familiar. But when confronted with new challenges, we need to think more broadly and adapt. When Isaac Lidsky learned that he was beginning to go blind at age thirteen, eventually losing his sight entirely by the time he was twenty-five, he initially thought that blindness would mean an end to his early success and his hopes for the future. Paradoxically, losing his sight gave him the vision to take responsibility for his reality and thrive. Lidsky graduated from Harvard College at age nineteen, served as a Supreme Court law clerk, fathered four children, and turned a failing construction subcontractor into a highly profitable business. Whether we're blind or not, our vision is limited by our past experiences, biases, and emotions. Lidsky shows us how we can overcome paralyzing fears, avoid falling prey to our own assumptions and faulty leaps of logic, silence our inner critic, harness our strength, and live with open hearts and minds. In sharing his hard-won insights, Lidsky shows us how we too can confront life's trials with initiative, humor, and grace.

actor with eye problem: A Young Actor's Scene Book Barbara Marchant, 2000 Presents more than two dozen play scenes designed to help young actors improve their stage skills, including selections for beginning and more experienced performers.

actor with eye problem: The Verge of Psychosis Brian Laesch, 2007-03 The Verge of Psychosis is a look into the uncovered diary of delusional aspiring actor Trott Felipe, who chronicles his first year in Hollywood, pursuing his dream. Unfortunately, he's a \$%#*& @ idiot. Trott's story starts off like that of any other aspiring-actor-moving-from-Iowa-to-Hollywood-type. You know.stapling headshots to trees in Studio Exec's neighborhoods, attending mobile acting classes on short school buses, getting assaulted for wearing camouflage, and getting kicked out of Lakers games. But what makes Trott stand out in a crowd? Well.nothing really, except for his mind, but not in a good way. Trott's driven, yet clueless. He's outgoing, yet totally secluded. How do you become secluded in Hollywood you ask? Trott finds a way, just as he does with everything in life. But unfortunately, with all of the compromising, open-mindedness and talking to inanimate objects, he doesn't realize he is slowly slipping into psychosis...and things could turn fatal...for everybody.

actor with eye problem: The Alexander Technique For Actors Kelly McEvenue, 2016-01-14 This practical book with illustrations links Alexander technique to acting, dancing and singing by the trainer of performers on The Lion King The Alexander Technique is a method of physical relaxation that reduces tension and strain throughout the body. It promotes a beneficial use of movement that is stress-free by learning to free-up the body. It teaches an individual to use their body efficiently in order to avoid damage or loss of control. Kelly McEvenue has been teaching the Alexander Technique to performers for nearly twenty years and is a world expert on the system. In this book she draws on her considerable experience and sets up a series of set-by-step warm-ups and exercises that anybody can follow. The exercises are linked to accurate anatomical drawings, showing where stress is most pronounced in the body. The Foreword is by Patsy Rodenburg, Head of Voice for the Royal National Theatre and author of Methuen titles The Right to Speak and The Actor Speaks.

actor with eye problem: As You Wish Cary Elwes, Joe Layden, 2014-10-14 From Cary Elwes, who played the iconic role of Westley in The Princess Bride, comes a first-person behind-the-scenes look at the making of the film.

actor with eye problem: *Kudiyattam Theatre and the Actor's Consciousness* Arya Madhavan, 2010 This book explores the training methods, performance and aesthetics of Kudiyattam, the oldest existing theatre form in the world. It brings together for the first time a comprehensive analysis of the psycho-physical techniques employed by the actors in Kerala of this temple theatre form. The book offers an in-depth analysis of pakarnnattam, a unique acting technique that helps the actor to perform multiple characters in a single dramatic situation. This multiple transformational acting technique is highly relevant to enhance the actor's abilities such as imagination, spontaneity and improvisation. The book employs a range of theoretical models developed from performance studies, gender theories, consciousness studies, Indian aesthetic and philosophical theories to investigate the actor's body in training and performance. Most significantly, for the first time, the book offers some extra-ordinary insights into the links between the actor's breathing and consciousness. It covers a range of topics: Hatha Yoga breathing techniques, eye training, hand gestures, movement techniques, voice training and rasa acting. Dr Arya Madhavan is a Lecturer in Drama at Lincoln School of Humanities and Performing Arts, University of Lincoln, United Kingdom

actor with eye problem: *The VES Handbook of Visual Effects* Susan Zwerman, Jeffrey A. Okun, 2014-07-11 Wisdom from the best and the brightest in the industry, this visual effects bible belongs on the shelf of anyone working in or aspiring to work in VFX. The book covers techniques and solutions all VFX artists/producers/supervisors need to know, from breaking down a script and initial bidding, to digital character creation and compositing of both live-action and CG elements. In-depth lessons on stereoscopic moviemaking, color management and digital intermediates are included, as well as chapters on interactive games and full animation authored by artists from EA and Dreamworks respectively. From predproduction to acquisition to postproduction, every aspect of the VFX production workflow is given prominent coverage. VFX legends such as John Knoll, Mike Fink, and John Erland provide you with invaluable insight and lessons from the set, equipping you with everything you need to know about the entire visual effects workflow. Simply a must-have book for anyone working in or wanting to work in the VFX industry.

actor with eye problem: *The Lost One* Stephen D. Youngkin, 2005-09-30 The first full biography of this major actor draws upon more than 300 interviews, including conversations with directors Fritz Lang, Alfred Hitchcock, Billy Wilder, John Huston, Frank Capra, and Rouben Mamoulian, who speak candidly about Lorre, both the man and the actor.

actor with eye problem: *Computer Vision for Visual Effects* Richard J. Radke, 2012-11-19 Modern blockbuster movies seamlessly introduce impossible characters and action into real-world settings using digital visual effects. These effects are made possible by research from the field of computer vision, the study of how to automatically understand images. *Computer Vision for Visual Effects* will educate students, engineers and researchers about the fundamental computer vision principles and state-of-the-art algorithms used to create cutting-edge visual effects for movies and television. The author describes classical computer vision algorithms used on a regular basis in Hollywood (such as blue screen matting, structure from motion, optical flow and feature tracking) and exciting recent developments that form the basis for future effects (such as natural image matting, multi-image compositing, image retargeting and view synthesis). He also discusses the technologies behind motion capture and three-dimensional data acquisition. More than 200 original images demonstrating principles, algorithms and results, along with in-depth interviews with Hollywood visual effects artists, tie the mathematical concepts to real-world filmmaking.

actor with eye problem: *The Actor Speaks* Patsy Rodenburg, 2002-08-17 In *The Actor Speaks*, Patsy Rodenburg takes actors and actresses, both professional and beginners, through a complete voice workshop. She touches on every aspect of performance work that involves the voice and sorts through the kinds of vexing problems every performer faces onstage: breath and relaxation; vocal range and power; communication with other actors; singing and acting simultaneously; working on different sized stages and in both large and small auditoriums; approaching the vocal demands of different kinds of scripts. This is the final word on the actor's voice and it's destined to become the classic work on the subject for some time to come.

actor with eye problem: *The Actor's Instrument* Hollis Huston, 1992 The book also offers a poetics of the central stage and suggests a new way of writing about performance.

actor with eye problem: An Actor's Guide to Getting Work Simon Dunmore, 2012-02-02 'Essential reading for any young actor' Dame Maggie Smith Competition for acting work is fierce and talent is not necessarily enough. Actors need all the help they can get with all aspects of the profession. Now in its fifth edition, completely revised and updated, this practical, comprehensive guide contains invaluable information and advice to enable actors to succeed in the business. Written with honesty, humour and thoroughness, *An Actor's Guide to Getting Work* draws on the author's rich experience in the field to offer advice to both the novice and the seasoned performer. New material in this fifth edition includes what drama schools are looking for, approaching Shakespeare for audition, professional email etiquette, using the internet as a self-marketing tool, and many more useful checklists and updated insights into the profession.

actor with eye problem: Computer Vision and Graphics Leonard Bolc, Juliusz Lech Kulikowski, 2009-06-08 This book constitutes the thoroughly refereed post-conference proceedings of the International Conference on Computer Vision and Graphics, ICCVG 2008, held in Warsaw, Poland, in November 2008. The 48 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on image processing, image quality assessment, geometrical models of objects and scenes, motion analysis, visual navigation and active vision, image and video coding, virtual reality and multimedia applications, biomedical applications, practical applications of pattern recognition, computer animation, visualization and graphical data presentation.

actor with eye problem: The VES Handbook of Visual Effects Jeffrey Okun, VES, Susan Zwerman, VES, 2020-06-14 The award-winning VES Handbook of Visual Effects remains the most complete guide to visual effects techniques and best practices available today. This new edition has been updated to include the latest, industry-standard techniques, technologies, and workflows for the ever-evolving fast paced world of visual effects. The Visual Effects Society (VES) tasked the original authors to update their areas of expertise, such as AR/VR Moviemaking, Color Management, Cameras, VFX Editorial, Stereoscopic and the Digital Intermediate, as well as provide detailed chapters on interactive games and full animation. Additionally, 56 contributors share their best methods, tips, tricks, and shortcuts developed through decades of trial and error and real-world, hands-on experience. This third edition has been expanded to feature lessons on 2.5D/3D Compositing; 3D Scanning; Digital Cinematography; Editorial Workflow in Animated and Visual Effects Features; Gaming updates; General Geometry Instancing; Lens Mapping for VFX; Native Stereo; Real-Time VFX and Camera Tracking; Shot/Element Pulls and Delivery to VFX; Techvis; VFX Elements and Stereo; Virtual Production; and VR/AR (Virtual Reality / Augmented Reality). A must-have for anyone working in or aspiring to work in visual effects, *The VES Handbook of Visual Effects, Third Edition* covers essential techniques and solutions for all VFX artists, producers, and supervisors, from pre-production to digital character creation, compositing of both live-action and CG elements, photorealistic techniques, and much more. With subjects and techniques clearly and definitively presented in beautiful four-color, this handbook is a vital resource for any serious VFX artist.

actor with eye problem: *Epidemiology Of Eye Disease, The (Third Edition)* Gordon J Johnson, Darwin C Minassian, Robert A Weale, Sheila K West, 2012-03-13 This unique book is a comprehensive coverage of the epidemiology of the world's major blinding eye diseases, written by internationally acclaimed experts in each field. Edited by world-renowned epidemiologists and ophthalmologists, the chapters on each leading cause of blindness describe its biology, epidemiology, risk factors, clinical trials, possibilities for prevention, and new research avenues. New chapters include Research Synthesis, Epidemiology of Dry Eye Disease, and Epidemiology of Uveitis, as well as programme issues for reaching the goal of eliminating avoidable blindness by 2020. This book is essential for any eye care practitioner interested in the causation or prevention of disease, and should be part of any public health discipline's library with a focus on improving eye

health worldwide.

actor with eye problem: *Scandals of Classic Hollywood* Anne Helen Petersen, 2014-09-30
Celebrity gossip meets history in this compulsively readable collection from BuzzFeed reporter Anne Helen Peterson. This guide to film stars and their deepest secrets is sure to top your list for movie gifts and appeal to fans of classic cinema and hollywood history alike. Believe it or not, America's fascination with celebrity culture was thriving well before the days of TMZ, Cardi B, Kanye's tweets, and the #metoo allegations that have gripped Hollywood. And the stars of yesteryear? They weren't always the saints that we make them out to be. BuzzFeed's Anne Helen Petersen, author of *Too Fat, Too Slutty, Too Loud*, is here to set the record straight. Pulling little-known gems from the archives of film history, Petersen reveals eyebrow-raising information, including: • The smear campaign against the original It Girl, Clara Bow, started by her best friend • The heartbreaking story of Montgomery Clift's rapid rise to fame, the car accident that destroyed his face, and the "long suicide" that followed • Fatty Arbuckle's descent from Hollywood royalty, fueled by allegations of a boozy orgy turned violent assault • Why Mae West was arrested and jailed for indecency charges • And much more Part biography, part cultural history, these stories cover the stuff that films are made of: love, sex, drugs, illegitimate children, illicit affairs, and botched cover-ups. But it's not all just tawdry gossip in the pages of this book. The stories are all contextualized within the boundaries of film, cultural, political, and gender history, making for a read that will inform as it entertains. Based on Petersen's beloved column on the Hairpin, but featuring 100% new content, *Scandals of Classic Hollywood* is sensationalism made smart.

actor with eye problem: *Acting and Actors, Elocution and Elocutionists* Alfred Ayres, 1894

actor with eye problem: *Theaters* Hardy Holzman Pfeiffer Associates, 2000 In designing a theater, an architect must design a hub for the activities of actors, dancers, and musicians of every genre, and appease directors, producers, and the all-important public. This successful title has proved its practicality as a guide to building the modern theater, concert hall and cultural center designed for academic, civic and private use. Now in its first reprint edition, it has also been published in Chinese, and has proved a valuable resource for both architects and commissioning agents. The expertise of Hardy Holzman and Pfeiffer Associates (HHPA) is demonstrated time and again throughout this book, with color photography, and essays by performers, curators, artistic directors, actors, lighting designers, academic musicians, playwrights, and dancers amongst others. This book showcases their work through new buildings, old theater renovations and older building refitted as theaters.

actor with eye problem: *Weekly World News*, 2003-08-05 Rooted in the creative success of over 30 years of supermarket tabloid publishing, the Weekly World News has been the world's only reliable news source since 1979. The online hub www.weeklyworldnews.com is a leading entertainment news site.

actor with eye problem: *Film Lighting* Kris Malkiewicz, 2012-02-07 Newly revised and updated, *Film Lighting* is an indispensable sourcebook for the aspiring and practicing cinematographer, based on extensive interviews with leading cinematographers and gaffers in the film industry. Film lighting is a living, dynamic art influenced by new technologies and the changing styles of leading cinematographers. A combination of state-of-the-art technology and in-depth interviews with industry experts, *Film Lighting* provides an inside look at how cinematographers and film directors establish the visual concept of the film and use the lighting to create a certain atmosphere. Kris Malkiewicz uses firsthand material from the experts he interviewed while researching this book. Among these are leading cinematographers Dion Beebe, Russell Carpenter, Caleb Deschanel, Robert Elswit, Mauro Fiore, Adam Holender, Janusz Kaminski, Matthew Libatique, Rodrigo Prieto, Harris Savides, Dante Spinotti, and Vilmos Zsigmond. This updated version of *Film Lighting* fills a growing need in the industry and will be a perennial, invaluable resource.

actor with eye problem: *Computer Vision – ECCV 2022* Shai Avidan, Gabriel Brostow, Moustapha Cissé, Giovanni Maria Farinella, Tal Hassner, 2022-11-02 The 39-volume set, comprising the LNCS books 13661 until 13699, constitutes the refereed proceedings of the 17th European

Conference on Computer Vision, ECCV 2022, held in Tel Aviv, Israel, during October 23-27, 2022. The 1645 papers presented in these proceedings were carefully reviewed and selected from a total of 5804 submissions. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image reconstruction; object recognition; motion estimation.

actor with eye problem: The Power Filmmaking Kit Jason Tomaric, 2013-04-26 Think big, spend little! Everything you need to make your movie is in this complete resource kit. The Power Filmmaking Kit is a comprehensive, multimedia book and DVD package that empowers you to produce your own Hollywood-quality movie. Emmy-award winning director Jason Tomaric produced an independent film using only local resources for under \$2,000 that not only got picked up for distribution, but is also used as a case study in top film schools. This book shows you how to do the same, regardless of your budget or location. You'll learn how to achieve professional quality on a microbudget, using the resources you have at hand. The book includes: * Coverage of the entire filmmaking process. It's all here, from writing, directing, and cinematography, to acting, editing, and distribution. * Step-by-step instructions, tips, diagrams, charts, and illustrations for how you can make a Hollywood-caliber movie on a next-to-nothing budget with little upfront money and access only to local resources. The DVD includes: * Time and Again, the profitable, award-winning, internationally distributed independent film made for under \$2,000 * One hour of video tutorials unveiling how the movie was made...interviews and behind-the-scenes case studies on directing, production, and editing * Complete rough footage from a scene for editing practice * Forms, contracts, and more resources *The Producer's Notebook includes scripts, storyboards, schedules, call sheets, contracts, letters from the producer, camera logs and press kits from Time and Again. See how the production was scheduled and organized, read the script, follow the storyboards and watch the production unfold from beginning to end. * Blank contracts and forms that you can print out to use on your own film

actor with eye problem: Theatre Masks Out Side In Wendy J. Meaden, Michael A. Brown, 2023-02-28 Theatre Masks Out Side In examines masks from different angles and perspectives, combining the history, design, construction, and use of masks into one beautifully illustrated resource. Each chapter includes key information about an element of mask study: history and uses, theatre traditions, practical principles for directing, performing exercises, design considerations, mask-making techniques, and considering makeup as mask. Artist interviews, theatre company profiles, and hundreds of images provide insight into the variety of mask styles and performance applications. Project suggestions, discussion questions, useful worksheets, creative prompts, and resources for sourcing masks are included to inspire further exploration. Theatre Masks Out Side In is designed with the beginning theatre maker in mind, as well as prop makers, costume designers and technicians, and actors learning to use masks in performance.

actor with eye problem: Play Directing Francis Hodge, Michael McLain, 2015-11-19 Play Directing describes the various roles a director plays, from selection and analysis of the play, to working with actors and designers to bring the production to life. The authors emphasize that the role of the director as an artist-leader collaborating with actors and designers who look to the director for partnership in achieving their fullest, most creative expressions. The text emphasizes how the study of directing provides an intensive look at the structure of plays and acting, and of the process of design of scenery, costume, lighting, and sound that together make a produced play.

actor with eye problem: The Actor's Survival Kit Miriam Newhouse, Peter Messaline, 1999-01-01 The Actor's Survival Kit has been the backbone of Business of Acting courses and a constant resource for its many readers across Canada. But, after seven years and two editions, the

business has changed. Peter Messaline and Miriam Newhouse have revised the original Actor's Survival Kit and addressed a number of issues and areas of current concern. These include: Online Casting - the happening thing, or still a scam? Megamusicals - they swept the country, but will they provide work in the future? Motion capture, realtime animation - opportunity or problem? Women and Minorities - have they replaced the rule of dead white males? Multi-Media Productions - ACTRA is moving, but is it soon enough? The third edition of The Actor's Survival Kit gives the actor fresh research and today's experience, new lists of country-wide contacts, and input from current success stories.

actor with eye problem: The Practice of Enterprise Modeling Anne Persson, Janis Stirna, 2009-11-16 Enterprise modeling (EM) has gained substantial popularity both in the academic community and among practitioners. A variety of EM methods, approaches, and tools are being developed and offered on the market. In practice they are used for various purposes such as business strategy development, process restructuring, as well as business and IT architecture alignment and governance. PoEM 2009 - the second IFIP WG 8.1 Working Conference on The Practice of Enterprise Modeling took place in November in Stockholm, Sweden. The conference series is a dedicated forum where the use of EM in practice is addressed by bringing together researchers, users, and practitioners in order to develop a better understanding of the practice of EM, to contribute to improved EM practice as well as to share knowledge and experiences. PoEM 2009 attracted 41 submissions from many different parts of the world, out of which the Program Committee selected 17 high-quality papers. Among the authors of these papers we find both researchers and practitioners. The resulting program reflects the fact that the topic of EM encompasses human, organizational issues, as well as more technical aspects related to the development of information systems. The program was organized in six thematic sessions: ? Experiences in EM ? The process of modeling ? EM in information systems development ? Model quality and reuse ? EM for Services modeling ? New ventures in EM The program also featured two keynotes by experienced EM practitioners. Håvard D.

actor with eye problem: The Possible Someone (Complexity and Characterization for Advanced Actors) David Scott, 2014-05-20 David Scott's third book on Acting, Actor Training and Theatre and Film Arts. The Possible Someone examines advanced and sophisticated pathways to characterization and immersive acting in both theatre and film formats, broaching some controversial topics. David's ongoing studio explorations with the finest actors and acting students in Ireland continues to reveal new and exciting approaches to acting as a high art.

actor with eye problem: A Companion to Philosophy of Law and Legal Theory Dennis Patterson, 2010-01-15 The articles in this new edition of A Companion to Philosophy of Law and Legal Theory have been updated throughout, and the addition of ten new articles ensures that the volume continues to offer the most up-to-date coverage of current thinking in legal philosophy. Represents the definitive handbook of philosophy of law and contemporary legal theory, invaluable to anyone with an interest in legal philosophy. Now features ten entirely new articles, covering the areas of risk, regulatory theory, methodology, overcriminalization, intention, coercion, unjust enrichment, the rule of law, law and society, and Kantian legal philosophy. Essays are written by an international team of leading scholars.

actor with eye problem: Actors on Guard Dale Anthony Girard, 2021-07-21 Actors on Guard, Second Edition is the most comprehensive book covering the current practices in learning, rehearsing and performing safe and dynamic swordfights with the single rapier and the rapier and dagger for both stage and screen. Focusing specifically on the Elizabethan rapier and dagger - the most popular weapons used in stage fights - Actors on Guard provides actors, directors, teachers, stage managers and technicians the skills and knowledge essential to presenting safe and effective swordfights. The book takes the reader through the complex process of selecting safe stage weapons, learning the basic handling and management of the rapier and dagger, as well as how to safely move and interact in the potentially dangerous process of learning, rehearsing and performing choreographed swordplay. This new edition has been revised with current industry practices,

featuring hundreds of step-by-step practical exercises in the care and handling of prop swords, footwork, guards, parries, cutting and thrusting techniques, blade taking actions, disarms, wounds and kills using the rapier and dagger, with revised diagrams and photographs. An excellent sourcebook for university stage combat classes as well as self-learners, *Actors on Guard* provides the reader with the historical, theoretical and practical basis for mastering the art of sword fighting for the stage and screen. The book includes access to a wealth of online resources, with additional information that expands upon specific mechanics, techniques and concepts covered in the text as well as some video demonstrations of solo and partnered techniques and exercises.

actor with eye problem: Stage Directing Michael Wainstein, 2019-02-19 In *Stage Directing: A Director's Itinerary*, the student of theatrical directing will find a step-by-step guide to directing a production, from choosing a play to opening night. Unlike other directing textbooks, it provides practical advice on organizing tasks throughout the directorial process, including budgeting, writing casting notices, and auditioning. It moreover includes an abundance of helpful examples and tried-and-true exercises, as well as information on how to organize a director's documents into a production notebook. The second edition builds on the strengths of the first edition by elaborating on key analytical, organizational, and strategic steps in a successful director's itinerary, with special attention to the direction of musicals.

actor with eye problem: Making Faces, Playing God Thomas Morawetz, 2013-04-01 Wearing a mask—putting on another face—embodies a fundamental human fantasy of inhabiting other bodies and experiencing other lives. In this extensively illustrated book, Thomas Morawetz explores how the creation of transformational makeup for theatre, movies, and television fulfills this fantasy of self-transformation and satisfies the human desire to become the other. Morawetz begins by discussing the cultural role of fantasies of transformation and what these fantasies reveal about questions of personal identity. He next turns to professional makeup artists and describes their background, training, careers, and especially the techniques they use to create their art. Then, with numerous before-during-and-after photos of transformational makeups from popular and little-known shows and movies, ads, and artist's demos and portfolios, he reveals the art and imagination that go into six kinds of mask-making—representing demons, depicting aliens, inventing disguises, transforming actors into different (older, heavier, disfigured) versions of themselves, and creating historical or mythological characters.

actor with eye problem: Making Patton Nicholas Evan Sarantakes, 2012-09-26 Forever known for its blazing cinematic image of General George S. Patton (portrayed by George C. Scott) addressing his troops in front of a mammoth American flag, *Patton* won seven Oscars in 1971, including those for Best Picture and Best Actor. In doing so, it beat out a much-ballyhooed M*A*S*H, irreverent darling of the critics, and grossed \$60 million despite an intense anti-war climate. But, as Nicholas Evan Sarantakes reveals, it was a film that almost didn't get made. Sarantakes offers an engaging and richly detailed production history of what became a critically acclaimed box office hit. He takes readers behind the scenes, even long before any scenes were ever conceived, to recount the trials and tribulations that attended the epic efforts of producer Frank McCarthy—like Patton a U.S. Army general—and Twentieth Century Fox to finally bring *Patton* to the screen after eighteen years of planning. Sarantakes recounts how filmmakers had to overcome the reluctance of Patton's family, copyright issues with biographers, competing efforts for a biopic, and Department of Defense red tape. He chronicles the long search for a leading man—including discussions with Burt Lancaster, John Wayne, and even Ronald Reagan—before settling on Scott, a brilliant actor who brought to the part both enthusiasm for the project and identification with Patton's passionate persona. He also tracks the struggles to shoot the movie with a large multinational cast, huge outlays for military equipment, and filming in six countries over a mere six months. And he provides revealing insider stories concerning, for example, Scott's legendary drinking bouts and the origins of and debate over his famous opening monologue. Drawing on extensive research in the papers of Frank McCarthy and director Franklin Schaffner, studio archives, records of the Academy of Motion Picture Arts and Sciences, contemporary journalism, and oral histories, Sarantakes ultimately shows

us that Patton is more than just one of the best war films ever made. Culturally, it also spoke to national ideals while exposing complex truths about power in the mid-twentieth century.

actor with eye problem: There Plant Eyes M. Leona Godin, 2021-06-01 From Homer to Helen Keller, from Dune to Stevie Wonder, from the invention of braille to the science of echolocation, M. Leona Godin explores the fascinating history of blindness, interweaving it with her own story of gradually losing her sight. "[A] thought-provoking mixture of criticism, memoir, and advocacy. —The New Yorker There Plant Eyes probes the ways in which blindness has shaped our ocularcentric culture, challenging deeply ingrained ideas about what it means to be "blind." For millennia, blindness has been used to signify such things as thoughtlessness ("blind faith"), irrationality ("blind rage"), and unconsciousness ("blind evolution"). But at the same time, blind people have been othered as the recipients of special powers as compensation for lost sight (from the poetic gifts of John Milton to the heightened senses of the comic book hero Daredevil). Godin—who began losing her vision at age ten—illuminates the often-surprising history of both the condition of blindness and the myths and ideas that have grown up around it over the course of generations. She combines an analysis of blindness in art and culture (from King Lear to Star Wars) with a study of the science of blindness and key developments in accessibility (the white cane, embossed printing, digital technology) to paint a vivid personal and cultural history. A genre-defying work, There Plant Eyes reveals just how essential blindness and vision are to humanity's understanding of itself and the world.

actor with eye problem: Screen Actor , 1980

actor with eye problem: Problems of Film Direction Sergei Eisenstein, 2004-06 Sergei Eisenstein is arguably the most important single figure in the history of movies. He was certainly the most versatile. The director of the masterpieces Battleship Potemkin and Alexander Nevsky, Eisenstein also wrote ground-breaking essays on film art and taught classes on motion picture production. In this book Eisenstein writes about film directing.

actor with eye problem: Rethinking the Actor's Body Dick McCaw, 2020-04-02 How does an actor embody a character? How do they use their body as an instrument of expression? Rethinking the Actor's Body offers an accessible introduction to the fields of neurophysiology and embodied knowledge through a detailed examination of what an actor does with their body. Built on almost a decade of conversations and public seminars by the author Dick McCaw in partnership with John Rothwell (Professor of Neurophysiology at University College London, UK), Rethinking the Actor's Body explores a set of questions and preoccupations concerning the actor's body and examines overlaps in research and practice in the fields of actor training, embodied knowledge and neurophysiology.
