The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

Pinch, Trevor Pinch, 1989 The impact of technology on society is clear and unmistakable. The influence of society on technology is more subtle. The 13 essays in this book have been written by a diverse group of scholars united by a common interest in creating a new field - the sociology of technology. They draw on a wide array of case studies - from cooking stoves to missile systems, from 15th-century Portugal to today's AI labs - to outline an original research program based on a synthesis of ideas from the social studies of science and the history of technology. Together they affirm the need for a study of technology that gives equal weight to technical, social, economic, and political questions--Back cover.

acumen technologies fireplace remote: *Sun Power* Neville Williams, 2014-04-22 America is on the brink of a green energy revolution that can save the planet, and increase peace and prosperity, by harnessing the unlimited solar power. After decades of promise, the technology for alternative energy solutions now exists to replace our dangerous addiction to fossil fuels with cheap, clean solar energy. Neville Williams has been on the leading edge of this revolution for decades and knows from firsthand experience how sun power can transform lives and communities for the better. He has traveled the globe bringing solar-generated electricity to struggling communities throughout Asia, Africa, India, and the developing world. From isolated villages high in the mountains of Nepal to remote settlements in South Africa, Williams has worked to bring sun power to even the most

off-the-grid reaches of the planet. He has brought that knowledge and experience back to America where he founded one of the country's fastest growing solar companies. If millions of poor families in the Third World can get their power from the sun, why can't Americans concerned with their rising power bills, dependence on foreign oil, and carbon footprints do the same? The answer is that sun power is here, it works, and can light up a new era of economic and environmental security—if we have the will to seize this historic opportunity. This book is not about predictions or promises. It's about what's happening now, all over the world, and what still needs to be done. acumen technologies fireplace remote: Roll Models Richard Holicky, 2004 I thought life was pretty much over. Paul Herman I was afraid people wouldn't see me for who I still was. Cathy Green I didn't need this to be a better person. Susan Douglas I wasn't sure I wanted to live "this way." Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your salvation or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? A wonderful roadmap with many alternate routes to living and thriving with SCI. Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center Avoids the trap of providing a "one size fits all mentality" and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading. Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences. Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies. Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades. Luríia, 1987 A welcome re-issue of an English translation of Alexander Luria's famous case-history of hypermnestic man. The study remains the classic paradigm of what Luria called 'romantic science,' a genre characterized by individual portraiture based on an assessment of operative psychological processes. The opening section analyses in some detail the subject's extraordinary capacity for recall and demonstrates the association between the persistence of iconic memory and a highly developed synaesthesia. The remainder of the book deals with the subject's construction of the world, his mental strengths and weaknesses, his control of behaviour and his personality. The result is a contribution to literature as well as to science. (Psychological Medicine).

acumen technologies fireplace remote: Broken Trust Samuel P. King, Randall W. Roth, 2006-01-01 Princess Bernice Pauahi Bishop was the largest landowner and richest woman in the Hawaiian kingdom. Upon her death in 1884, she entrusted her property--known as Bishop Estate--to five trustees in order to create and maintain an institution that would benefit the children of Hawai'i: Kamehameha Schools. A century later, Bishop Estate controlled nearly one out of every nine acres in the state, a concentration of private land ownership rarely seen anywhere in the world. Then in August 1997 the unthinkable happened: Four revered kupuna (native Hawaiian elders) and a professor of trust-law publicly charged Bishop Estate trustees with gross incompetence and massive trust abuse. Entitled Broken Trust, the statement provided devastating details of rigged appointments, violated trusts, cynical manipulation of the trust's beneficiaries, and the shameful involvement of many of Hawai'i's powerful. No one is better qualified to examine the events and personalities surrounding the scandal than two of the original Broken Trust authors. Their comprehensive account together with historical background, brings to light information that has never before been made public, including accounts of secret meetings and communications involving Supreme Court justices.

acumen technologies fireplace remote: Noise, Water, Meat Douglas Kahn, 2001-08-24 An examination of the role of sound in twentieth-century arts. This interdisciplinary history and theory of sound in the arts reads the twentieth century by listening to it—to the emphatic and exceptional sounds of modernism and those on the cusp of postmodernism, recorded sound, noise, silence, the fluid sounds of immersion and dripping, and the meat voices of viruses, screams, and bestial cries. Focusing on Europe in the first half of the century and the United States in the postwar years, Douglas Kahn explores aural activities in literature, music, visual arts, theater, and film. Placing aurality at the center of the history of the arts, he revisits key artistic questions, listening to the sounds that drown out the politics and poetics that generated them. Artists discussed include Antonin Artaud, George Brecht, William Burroughs, John Cage, Sergei Eisenstein, Fluxus, Allan Kaprow, Michael McClure, Yoko Ono, Jackson Pollock, Luigi Russolo, and Dziga Vertov.

acumen technologies fireplace remote: Watching the English Kate Fox, 2014-07-08 Updated, with new research and over 100 revisions Ten years later, they're still talking about the weather! Kate Fox, the social anthropologist who put the quirks and hidden conditions of the English under a microscope, is back with more biting insights about the nature of Englishness. This updated and revised edition of *Watching the English* - which over the last decade has become the unofficial guidebook to the English national character - features new and fresh insights on the unwritten rules and foibles of squaddies, bikers, horse-riders, and more. Fox revisits a strange and fascinating culture, governed by complex sets of unspoken rules and bizarre codes of behavior. She demystifies the peculiar cultural rules that baffle us: the rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid pantomime rule. Class anxiety tests. The roots of English self-mockery and many more. An international bestseller, *Watching the English* is a biting, affectionate, insightful and often hilarious look at the English and their society.

acumen technologies fireplace remote: Slavery and the British Country House Madge Dresser, Andrew Hann, 2013 The British country house has long been regarded as the jewel in the nation's heritage crown. But the country house is also an expression of wealth and power, and as scholars reconsider the nation's colonial past, new questions are being posed about these great houses and their links to Atlantic slavery. This book, authored by a range of academics and heritage professionals, grew out of a 2009 conference on 'Slavery and the British Country house: mapping the current research' organised by English Heritage in partnership with the University of the West of England, the National Trust and the Economic History Society. It asks what links might be established between the wealth derived from slavery and the British country house and what implications such links should have for the way such properties are represented to the public today. Lavishly illustrated and based on the latest scholarship, this wide-ranging and innovative volume provides in-depth examinations of individual houses, regional studies and critical reconsiderations of existing heritage sites, including two studies specially commissioned by English Heritage and one sponsored by the National Trust.

acumen technologies fireplace remote: The Saburo Hasegawa Reader Mark Dean Johnson, Dakin Hart, 2019-05-14 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. The Hasegawa Reader is an open access companion to the bilingual catalogue copublished with The Noguchi Museum to accompany an international touring exhibition, Changing and Unchanging Things: Noguchi and Hasegawa in Postwar Japan. The exhibition features the work of two artists who were friends and contemporaries: Isamu Noguchi and Saburo Hasegawa. This volume is intended to give scholars and general readers access to a wealth of archival material and writings by and about Saburo Hasegawa. While Noguchi's reputation as a preeminent American sculptor of the twentieth century only grows stronger, Saburo Hasegawa is less well known, despite being considered the most literate artist in Japan during his lifetime (1906-1957). Hasegawa is credited with introducing abstraction in Japan in the mid 1930s, and he worked as an artist in diverse media including oil and ink painting, photography, and printmaking. He was also a theorist and widely published essayist, curator, teacher, and multilingual conversationalist. This valuable trove of Hasegawa material includes the entire manuscript for a 1957 Hasegawa memorial volume, with its beautiful essays by philosopher Alan Watts, Oakland Museum Director Paul Mills, and Japan Times art writer Elise Grilli, as well as various unpublished writings by Hasegawa. The ebook edition will also include a dozen essays by Hasegawa from the postwar period, and one prewar essay, professionally translated for this publication to give a sense of Hasegawa's voice. This resource will be an invaluable tool for scholars and students interested in

midcentury East Asian and American art and tracing the emergence of contemporary issues of hybridity, transnationalism, and notions of a "global Asia.

acumen technologies fireplace remote: Empty Without You Roger Streitmatter, 1999-08-19 The relationship between Eleanor Roosevelt and Associated Press reporter Lorena Hickok has sparked vociferous debate ever since 1978, when archivists at the Franklin D. Roosevelt Library discovered eighteen boxes filled with letters the two women exchanged during their thirty-year friendship. But until now we have been offered only the odd quotation or excerpt from their voluminous correspondence. In *Empty Without You*, journalist and historian Rodger Streitmatter has transcribed and annotated 300 letters that shed new light on the legendary, passionate, and intense bond between these extraordinary women. Written with the candor and introspection of a private diary, the letters expose the most private thoughts, feelings, and motivations of their authors and allow us to assess the full dimensions of a remarkable friendship. From the day Eleanor moved into the White House and installed Lorena in a bedroom just a few feet from her own, each woman virtually lived for the other. When Lorena was away, Eleanor kissed her picture of dearest Hick every night before going to bed, while Lorena marked the days off her calendar in anticipation of their next meeting. In the summer of 1933, Eleanor and Lorena took a three-week road trip together, often traveling incognito. The friends even discussed a future in which they would share a home and blend their separate lives into one. Perhaps as valuable as these intimations of a love affair are the glimpses this collection offers of an Eleanor Roosevelt strikingly different from the icon she has become. Although the figure who emerges in these pages is as determined and politically adept as the woman we know, she is also surprisingly sarcastic and funny, tender and vulnerable, and even judgmental and petty -- all less public but no less important attributes of our most beloved first lady.

acumen technologies fireplace remote: *The ABC's of Science* Giuseppe Mussardo, 2020-11-05 Science, with its inherent tension between the known and the unknown, is an inexhaustible mine of great stories. Collected here are twenty-six among the most enchanting tales, one for each letter of the alphabet: the main characters are scientists of the highest caliber most of whom, however, are unknown to the general public. This book goes from A to Z. The letter A stands for Abel, the great Norwegian mathematician, here involved in an elliptic thriller about a

fundamental theorem of mathematics, while the letter Z refers to Absolute Zero, the ultimate and lowest temperature limit, - 273,15 degrees Celsius, a value that is tremendously cooler than the most remote corner of the Universe: the race to reach this final outpost of coldness is not yet complete, but, similarly to the history books of polar explorations at the beginning of the 20th century, its pages record successes, failures, fierce rivalries and tragic desperations. In between the A and the Z, the other letters of the alphabet are similar to the various stages of a very fascinating journey along the paths of science, a journey in the company of a very unique set of characters as eccentric and peculiar as those in *Ulysses* by James Joyce: the French astronomer who lost everything, even his mind, to chase the transits of Venus; the caustic Austrian scientist who, perfectly at ease with both the laws of psychoanalysis and quantum mechanics, revealed the hidden secrets of dreams and the periodic table of chemical elements; the young Indian astrophysicist who was the first to understand how a star dies, suffering the ferocious opposition of his mentor for this discovery. Or the Hungarian physicist who struggled with his melancholy in the shadows of the desert of Los Alamos; or the French scholar who was forced to hide her femininity behind a false identity so as to publish fundamental theorems on prime numbers. And so on and so forth. Twenty-six stories, which reveal the most authentic atmosphere of science and the lives of some of its main players: each story can be read in quite a short period of time -- basically the time it takes to get on and off the train between two metro stations. Largely independent from one another, these twenty-six stories make the book a harmonious polyphony of several voices: the reader can invent his/her own very personal order for the chapters simply by ordering the sequence of letters differently. For an elementary law of Mathematics, this can give rise to an astronomically large number of possible books -- all the same, but - then again - all different. This book is therefore the ideal companion for an infinite number of real or metaphoric journeys.

Selznick or Samuel Goldwyn, but the films he produced—*Casablanca*, *Jezebel*, *Now, Voyager*, *The Life of Emile Zola*, *Becket*, *True Grit*, and many other classics (as well as scores of Elvis movies)—have certainly endured. As producer of numerous films, Wallis made an indelible mark on the course of America's film industry, but his contributions are often overlooked. Bernard Dick offers the first comprehensive assessment of the producer's incredible career. A former office boy and salesman, Wallis first engaged with the film business as the manager of a Los Angeles movie theater in 1922. He attracted the notice of the Warner brothers, who hired him as a publicity assistant. Within three months he was director of the department, and appointments to studio manager and production executive quickly followed. Wallis went on to oversee dozens of productions and formed his own production company in 1944. Dick draws on numerous sources such as Wallis's personal production files and exclusive interviews with many of his contemporaries to finally tell the full story of his illustrious career. Dick combines his knowledge of behind-the-scenes Hollywood with fascinating anecdotes to create a portrait of one of Hollywood's early power players.

acumen technologies fireplace remote: Freud's Free Clinics Elizabeth Ann Danto, 2005-04-26 Today many view Sigmund Freud as an elitist whose psychoanalytic treatment was reserved for the intellectually and financially advantaged. However, in this new work Elizabeth Ann Danto presents a strikingly different picture of Freud and the early psychoanalytic movement. Danto recovers the neglected history of Freud and other analysts' intense social activism and their commitment to treating the poor and working classes. Danto's narrative begins in the years following the end of World War I and the fall of the Habsburg Empire. Joining with the social democratic and artistic movements that were sweeping across Central and Western Europe, analysts such as Freud, Wilhelm Reich, Erik Erikson, Karen Horney, Erich Fromm, and Helene Deutsch envisioned a new role for psychoanalysis. These psychoanalysts saw themselves as brokers of social

change and viewed psychoanalysis as a challenge to conventional political and social traditions. Between 1920 and 1938 and in ten different cities, they created outpatient centers that provided free mental health care. They believed that psychoanalysis would share in the transformation of civil society and that these new outpatient centers would help restore people to their inherently good and productive selves. Drawing on oral histories and new archival material, Danto offers vivid portraits of the movement's central figures and their beliefs. She explores the successes, failures, and challenges faced by free institutes such as the Berlin Poliklinik, the Vienna Ambulatorium, and Alfred Adler's child-guidance clinics. She also describes the efforts of Wilhelm Reich's Sex-Pol, a fusion of psychoanalysis and left-wing politics, which provided free counseling and sex education and aimed to end public repression of private sexuality. In addition to situating the efforts of psychoanalysts in the political and cultural contexts of Weimar Germany and Red Vienna, Danto also discusses the important treatments and methods developed during this period, including child analysis, short-term therapy, crisis intervention, task-centered treatment, active therapy, and clinical case presentations. Her work illuminates the importance of the social environment and the idea of community to the theory and practice of psychoanalysis.

acumen technologies fireplace remote: *Bosnian War Posters* Daoud Sarhandi, 2022-05-03 *Bosnian War Posters* is a unique compilation of posters and political graphic design. It includes key archive photos from the war as well as new photos that put all the images in context today. This book illustrates the entire conflict: from April 1992—when the first shots were fired in Sarajevo—to December 1995—when peace was agreed upon in Dayton, Ohio. Subsequent images depict the post-war reconstruction period and the hunt for war criminals. The posters were gathered together in Bosnia and the former Yugoslavia shortly after the Bosnian war ended. They form the only large, pan-Bosnian collection of such material that exists, offering an eye-witness account of the war from the point of view of those who lived through all its horrors. A unique pictorial study of the bloodiest European conflict since 1945, *Bosnian War Posters* will engage all those interested in graphic design, poster art, the tragic story of Yugoslavia, and the politics of nationalism in the modern age.

acumen technologies fireplace remote: *Abbé Sicard's Deaf Education* Emmet Kennedy, 2016-04-29 Abbé Sicard was a French revolutionary priest and an innovator of French and American sign language. He enjoyed a meteoric rise from Toulouse and Bordeaux to Paris and, despite his non-conformist tendencies, he escaped the guillotine. In fact, the revolutionaries acknowledged his position and during the Terror of 1794, they made him the director of the first school for the deaf. Later, he became a member of the first Ecole Normale, the National Institute, and the Académie Française. He is recognized today as having developed Enlightenment theories of pantomime, signing, and a form of universal language that later spread to Russia, Spain, and America. This is the first book-length biography of Sicard published in any language since 1873, despite Sicard's international renown. This thoughtful, engaging work explores French and American sign language and deaf studies set against the backdrop of the French Revolution and Napoleon.

acumen technologies fireplace remote: *Life on the Circuit with Lincoln* Henry Clay Whitney, 1892 Originally commenced as a pastime, and to please a circle of friends alone, success, in any degree, can only be hoped for, because of my vantage ground as an intimate and close friend of Mr. Lincoln, and because, by reason of such intimacy, of the novelty of some of the facts and deductions, and not, in any sense, by reason, but in spite of, its literary style or, rather, the lack thereof.--Preface.

acumen technologies fireplace remote: *The Multiplier Effect* Liz Wiseman, Lois Allen, Elise Foster, 2013-03-08 When you become a Multiplier, your whole team succeeds! Why do some leaders

double their team's effectiveness, while others seem to drain the energy right out of the room? Using insights gained from more than 100 interviews with school leaders, this book pinpoints the five disciplines that define how Multipliers bring out the best across their schools. By practicing these disciplines, you'll learn how to: Attract top teachers to your school Create an intense environment that demands people's best thinking Drive sound decisions by constructing debate and decision-making forums Give your team a sense of ownership for responsibilities and results

acumen technologies fireplace remote: *The Devils of Loudun* Aldous Huxley, 2010-05-25 A gripping biography by the author of *Brave New World* In 1634 Urbain Grandier, a handsome and dissolute priest of the parish of Loudun was tried, tortured and burnt at the stake. He had been found guilty of conspiring with the devil to seduce an entire convent of nuns. Grandier maintained his innocence to the end but four years after his death the nuns were still being subjected to exorcisms to free them from their demonic bondage. Huxley's vivid account of this bizarre tale of religious and sexual obsession transforms our understanding of the medieval world.

acumen technologies fireplace remote: *The Innovation Stack* Jim McKelvey, 2020-03-10 From the cofounder of Square, an inspiring and entertaining account of what it means to be a true entrepreneur and what it takes to build a resilient, world-changing company In 2009, a St. Louis glassblowing artist and recovering computer scientist named Jim McKelvey lost a sale because he couldn't accept American Express cards. Frustrated by the high costs and difficulty of accepting credit card payments, McKelvey joined his friend Jack Dorsey (the cofounder of Twitter) to launch Square, a startup that would enable small merchants to accept credit card payments on their mobile phones. With no expertise or experience in the world of payments, they approached the problem of credit cards with a new perspective, questioning the industry's assumptions, experimenting and innovating their way through early challenges, and achieving widespread adoption from merchants small and large. But just as Square was taking off, Amazon launched a similar product, marketed it aggressively, and undercut Square on price. For most ordinary startups, this would have spelled the end. Instead, less than a year later, Amazon was in retreat and soon discontinued its service. How did Square beat the most dangerous company on the planet? Was it just luck? These questions motivated McKelvey to study what Square had done differently from all the other companies Amazon had killed. He eventually found the key: a strategy he calls the Innovation Stack. McKelvey's fascinating and humorous stories of Square's early days are blended with historical examples of other world-changing companies built on the Innovation Stack to reveal a pattern of ground-breaking, competition-proof entrepreneurship that is rare but repeatable. The Innovation Stack is a thrilling business narrative that's much bigger than the story of Square. It is an irreverent first-person look inside the world of entrepreneurship, and a call to action for all of us to find the entrepreneur within ourselves and identify and fix unsolved problems--one crazy idea at a time.
