Jurkiewicz, Craig Dunn, 2006-05-01 The goal of this volume is to begin to create those critical linkages between positive psychological attributes and relevant research areas. Undoubtedly, there are many topics in positive psychology that could not be covered in just one volume, and many more topical linkages to business ethics and social responsibility that need to be made. While much research yet needs to be done in this nascent area, we hope that much as other volumes on positive psychology served as an impetus for research in social psychology (see Snyder & Lopez, 2002) and organizational behavior (Cameron, Dutton, & Quinn, 2003), this volume will ignite scientific interest in the role positive psychology plays in key areas such as ethics and social responsibility. As the study of positive psychology continues to emerge more fully, it may well help us to better comprehend the impact of this paradigm on predicting ethical decision making, organizational citizenship, and social responsibility toward the end of creating more positive and productive workplaces in general.

In particular, it focuses on their professional identity in the classroom, and how these identities are transferred to the workplace. This allows the author to present a model of learning Business English that corresponds to the lived experiences of students in China, but which can also be applied to other ESP learner contexts. In doing so, he demonstrates how to research the professional identity of ESP learners from multiple perspectives, and contributes to the validity of research on language learning and learner identity. This book will appeal to scholars of English for Specific Purposes, Second Language Acquisition, and TESOL Education.

Benjamin studies this unequal relationship through 1934, by examining U.S. trade, investment, and capital lending; Cuban institutions and social movements; and U.S. foreign policy. Benjamin convincingly argues that U.S. hegemony shaped Cuban internal politics by exploiting the island's economy, dividing the nationalist movement, co-opting Cuban moderates, and robbing post-1933 leadership of its legitimacy.
