13 november in history: Consuming History Jerome de Groot, 2009-01-13 Non-academic history - 'public history' - is a complex, dynamic entity which impacts on the popular understanding of the past at all levels. In *Consuming History*, Jerome de Groot examines how society consumes history and how a reading of this consumption can help us understand popular culture and issues of representation. This book analyzes a wide range of cultural entities - from computer games to daytime television, from blockbuster fictional narratives such as *Da Vinci Code* to DNA genealogical tools - to analyze how history works in contemporary popular culture. Jerome de Groot probes how museums have responded to the heritage debate and the way in which new technologies have brought about a shift in access to history, from online game playing to internet genealogy. He discusses the often conflicted relationship between 'public' and academic history, and raises important questions about the theory and practice of history as a discipline. Whilst mainly focussing on the UK, the book also compares the experiences of the USA, France and Germany. *Consuming History* is an important and engaging analysis of the social consumption of history and offers an essential path through the debates for readers interested in history, cultural studies and the media.

13 november in history: The Big Red One James Scott Wheeler, 2007 No mission too difficult, no sacrifice too great-Duty First! For almost a century, from the Western Front of World War I to the deserts of Iraq, this motto has spurred the soldiers who wear the shoulder patch bearing the Big Red One. In this first comprehensive history of America's 1st Infantry Division, James Scott Wheeler chronicles its major combat engagements and peacetime duties during its legendary service to the

nation. The oldest continuously serving division in the U.S. Army, the Fighting First has consistently played a crucial role in America's foreign wars. It was the first American division to see combat and achieve victory in World War I and set the standard for discipline, training, endurance, and tactical innovation. One of the few intact divisions between the wars, it was the first army unit to train for amphibious warfare. During World War II, the First Division spearheaded the invasions of North Africa and Sicily before leading the Normandy invasion at Omaha Beach and fighting on through the Hurtgen Forest, the Battle of the Bulge, the Ruhr Pocket, and deep into Germany. By war's end, it had developed successful combined-arms, regimental combat teams and made advances in night operations. Wheeler describes the First Division's critical role in postwar Germany and as the only combat division in Europe during the early Cold War. After returning to the United States at Fort Riley, Kansas, the division fought valiantly in Vietnam for five trying years, successfully protecting Saigon from major infiltration along Highway 13 while pioneering air-mobile operations. It led the liberation of Kuwait in Desert Storm and kept an uneasy peace in Bosnia and Kosovo. Along the way, Wheeler illuminates the division's organizational evolution, its consistently remarkable commanders and leaders, and its equally remarkable soldiers. Meticulously detailed and engagingly written, *The Big Red One* nimbly combines historical narrative with astute analysis of the unit's successes and failures, so that its story reflects the larger chronicle of America's military experience over the past century.

13 november in history: Austrian Foreign Policy in Historical Context Günther Bischof, Anton Pelinka, Michael Gehler, In 2005, Austria celebrated the sixtieth anniversary of its liberation from the Nazi regime and the fiftieth anniversary of the State Treaty that ended the occupation and returned full sovereignty to the country. This volume of Contemporary Austrian Studies covers foreign policy in the twentieth century. It offers an up-to-date status report of Austria's foreign policy trajectories and diplomatic options. Eva Nowotny, the current Austrian ambassador to the United States, introduces the volume with an analysis of the art and practice of Austrian diplomacy in historical perspective. Ambassador Wolfgang Petritsch analyzes recent Balkans diplomacy as an EU emissary in the Bosnian and Kosovo crises. Historians Günther Kronenbitter, Alexander Lassner, Günther Bischof, Joanna Granville, and Martin Kofler provide historical case studies of pre-and post-World War I and World War II Austrian diplomacy, Austria's dealings with the Hungarian crisis of 1956, and its mediation between Kennedy and Khrushchev in the early 1960s. Political scientists Romain Kirt, Stefan Mayer, and Gunther Hauser analyze small states' foreign policymaking in a globalizing world, Austrian federal states' separate regional policy initiatives abroad and Austria's role vis-à-vis current European security initiatives. Michael Gehler periodizes post-World War II Austrian foreign policy regimes and provides a valuable summary of both the available archival and printed diplomatic source collections. A Historiography Roundtable is dedicated to the Austrian Occupation decade. Günther Bischof reports on the state of occupation historiography; Oliver Rathkolb on the historical memory of the occupation; Michael Gehler on the context of the German question; and Wolfgang Mueller and Norman Naimark on Stalin's Cold War

and Soviet policies towards Austria during those years. Review essays and book reviews on art theft, anti-Semitism, the Hungarian crisis of 1956, among other topics, complete the volume.

Making extensive use of numerous primary sources such as slave diaries, Freedmen's Bureau records, church minutes, and collections of personal papers, the book tells the stories of individuals, their triumphs and tragedies, and their accomplishments in the face of adversity.

13 november in history: Union Jacks Michael J. Bennett, 2005-12-15 Historians have given a great deal of attention to the lives and experiences of Civil War soldiers, but surprisingly little is known about navy sailors who participated in the conflict. Michael J. Bennett remedies the longstanding neglect of Civil War seamen in this comprehensive assessment of the experience of common Union sailors from 1861 to 1865. To resurrect the voices of the Union Jacks, Bennett combed sailors' diaries, letters, and journals. He finds that the sailors differed from their counterparts in the army in many ways. They tended to be a rougher bunch of men than the regular soldiers, drinking and fighting excessively. Those who were not foreign-born, escaped slaves, or unemployed at the time they enlisted often hailed from the urban working class rather than from rural farms and towns. In addition, most sailors enlisted for pragmatic rather than ideological reasons. Bennett's examination provides a look into the everyday lives of sailors and illuminates where they came from, why they enlisted, and how their origins shaped their service. By showing how these Union sailors lived and fought on the sea, Bennett brings an important new perspective to our understanding of the Civil War.

13 november in history: Governor Alexander Martin Charles D. Rodenbough, 2011-03-14 Governor Alexander Martin of North Carolina was one of the most important figures in the colonial and early state history of North Carolina. A 1756 graduate of Princeton, he was the first president of the Board of Trustees of the University of North Carolina. He served longer as governor of the state than any other person until the election of Luther Hodges in the 20th century. He was conferred an honorary doctorate by Princeton and elected to membership in the American Philosophical Society while he was a U.S. senator. While in the Senate, he fought successfully to open the Senate to the public. He was one of five North Carolina delegates to the Constitutional Convention in Philadelphia. He was a friend and protector of the Moravians and other non-conformists. He was the most powerful and effective leader from the frontier region of North Carolina for a quarter of a century. The first chapters of this biography discuss Martin's parents and their high regard for education, his time at Princeton, and his arrival in North Carolina in 1760. The next chapters explore Martin's and Rev. David Caldwell's effort to prevent bloodshed during Governor Tryon's confrontation with the Regulators that led up to the Battle of Alamance, Martin's experiences in the war as second in command of the North Carolina Regiment, his election as senator from Guilford County to the General Assembly in 1777, and his much-celebrated election as governor in 1781. The final three chapters of the book include information about his years in the U.S. Senate, his retirement at his home Danbury in Rockingham, North Carolina, his relationship with his family and his very detailed last will and testament. His home, Danbury, later gave its name to Danbury, North Carolina, in Stokes County, which his nephews helped found about 1848, long after his death.

13 november in history: Historical Dictionary of Israel Bernard Reich, David H. Goldberg, 2016-08-30 Since its creation, the State of Israel has been a magnet for attention. A country beset by conflict in its region and faced with the need to integrate mainly Jewish immigrants of disparate backgrounds into a modern and advanced democratic state and society, Israel has preoccupied observers, scholars and journalists since its independence in May 1948. Although a Jewish state Israel is also a democratic state that guarantees the rights of all of its citizens, including its large Arab and Moslem minority, in law and in practice. Israel and its modern history and politics have been the subject of substantial and often highly partisan literature, being hotly and vigorously

debated both at home and abroad. This third edition of Historical Dictionary of Israel contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 1100 cross-referenced entries on significant persons, places, events, government institutions, political parties, and battles, as well as entries on Israel's economy, society, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about the various diplomatic and political personalities, institutions, organizations, events, concepts, and documents that together define the political life of the Jewish state of Israel.

13 november in history: The Israel-Palestine Conflict Neil Caplan, 2011-09-19 The Israel-Palestine Conflict: Contested Histories provides non-specialist readers with an introduction and historical overview of the issues that have characterized and defined 130 years of the still unresolved Israeli-Palestinian conflict. Provides a fresh attempt to break away from polemical approaches that have undermined academic discussion and political debates Focuses on a series of core arguments that the author considers essentially unwinnable Introduces readers to the major historiographical debates sparked by the dispute Encourages readers to consider more useful ways of explaining and understanding the conflict, and to go beyond trying to prove who is 'right' and 'wrong' This volume suggests a fresh and original interpretation to the history of the Arab Israeli conflict. Caplan juggles skillfully and even-handedly between the two narratives, reflecting the parties' own views without embracing the cause of any party. -Joseph Nevo, University of Haifa An impressive and very valuable work. One could not ask for a better short history of the conflict. Caplan offers readers a study that is extremely well-informed, resolutely fair-minded, and filled with thoughtful insights. -Mark Tessler, University of Michigan

13 november in history: Please God Send Me a Wreck Brad Duncan, Martin Gibbs, 2015-05-25 This book explores the historical and archaeological evidence of the relationships between a coastal community and the shipwrecks that have occurred along the southern Australian shoreline over the last 160 years. It moves beyond a focus on shipwrecks as events and shows the short and long term economic, social and symbolic significance of wrecks and strandings to the people on the shoreline. This volume draws on extensive oral histories, documentary and archaeological research to examine the tensions within the community, negotiating its way between its roles as shipwreck saviours and salvors.

13 november in history: **The Times Were Strange and Stirring** Reginald F. Hildebrand, 1995-07-24 With the conclusion of the Civil War, the beginnings of Reconstruction, and the realities of emancipation, former slaves were confronted with the possibility of freedom and, with it, a new

way of life. In *The Times Were Strange and Stirring*, Reginald F. Hildebrand examines the role of the Methodist Church in the process of emancipation—and in shaping a new world at a unique moment in American, African American, and Methodist history. Hildebrand explores the ideas and ideals of missionaries from several branches of Methodism—the African Methodist Episcopal Church, the Colored Methodist Episcopal Church, and the northern-based Methodist Episcopal Church—and the significant and highly charged battle waged between them over the challenge and meaning of freedom. He traces the various strategies and goals pursued by these competing visions and develops a typology of some of the ways in which emancipation was approached and understood. Focusing on individual church leaders such as Lucius H. Holsey, Richard Harvey Cain, and Gilbert Haven, and with the benefit of extensive research in church archives and newspapers, Hildebrand tells the dramatic and sometimes moving story of how missionaries labored to organize their denominations in the black South, and of how they were overwhelmed at times by the struggles of freedom.

13 november in history: The World Anti-Doping Code Lovely Dasgupta, 2019-04-26

Following the recent doping scandals that have brought the highest echelons of international sport into disrepute, this book examines the elitism at the core of the World Anti-Doping Agency and considers how the current World Anti-Doping Code might be restructured. Analyzing the correlation between the commodification of sports and doping, and the role WADA plays in this context, it takes into consideration the perspectives of non-elite athletes as well as athletes from developing countries which have previously been excluded from the anti-doping discourse. It offers recommendations for improving the coordination and implementation of the World Anti-Doping Code and argues for the creation of a more inclusive anti-doping regime. This is an important resource for students of sports law, sports management and sports ethics, as well as vital reading for sports administrators, sports sociologists, sports policy makers, sports lawyers and arbitrators, as well as athletes themselves.

13 november in history: The Voice of the Past Paul Thompson, 2017-02-24 Oral history gives history back to the people in their own words. And in giving a past, it also helps them towards a future of their own making. Oral history and life stories help to create a truer picture of the past and the changing present, documenting the lives and feelings of all kinds of people, many otherwise hidden from history. It explores personal and family relationships and uncovers the secret cultures of work. It connects public and private experience, and it highlights the experiences of migrating between cultures. At the same time it can bring courage to the old, meaning to communities, and contact between generations. Sometimes it can offer a path for healing divided communities and those with traumatic memories. Without it the history and sociology of our time would be poor and narrow. In this fourth edition of his pioneering work, fully revised with Joanna Bornat, Paul Thompson challenges the accepted myths of historical scholarship. He discusses the reliability of oral evidence in comparison with other sources and considers the social context of its development. He looks at the relationship between memory, the self and identity. He traces oral history through its own past and weighs up the recent achievements of a movement which has become international, with notably strong developments in North America, Europe, Australia, Latin America, South Africa and the Far East, despite resistance from more conservative academics. This new edition combines the classic text of *The Voice of the Past* with many new sections, including especially the worldwide development of different forms of oral history and the parallel memory boom, as well as discussions of theory in oral history and of memory, trauma and reconciliation. It offers a deep social and historical interpretation along with succinct practical advice on designing and carrying out a project. *The Voice of the Past* remains an invaluable tool for anyone setting out to use oral history and life stories to construct a more authentic and balanced record of the past and the present.

13 november in history: White House Operations Emmette S. Redford, Richard T. McCulley, 2014-11-11 The relation of White House assistants to the president, their appropriate role in the governmental process, and the most effective means for organizing and managing the White House have been subjects of both public concern and academic dispute. *White House Operations* addresses

these and related questions by providing the first thorough analysis of how the thirty-sixth president managed his staff. By grounding their study in original documents from the Lyndon B. Johnson Presidential Library, the authors lift the veil of secrecy that clouds the inner workings of the White House. The result is an insightful elaboration of the complex, extensive, and diverse roles of White House aides—and a fascinating look at such key White House figures as McGeorge Bundy, Joseph Califano, Bill Moyers, George Reedy, Walt Rostow, Lawrence O'Brien, and Johnson himself. This exploration of Johnson's highly personalized White House operations provides far-reaching implications for the nature of effective presidential management. The comprehensive analysis of the range of work done under Johnson and the unique nature of White House assistance leads the authors to a strong and vigorous assertion for a positive role for the White House staff that clashes sharply with the thrust of many recommendations for reorganizing the presidency. Redford and McCulley convincingly demonstrate that management of the White House staff and other parts of the president's advisory system will remain crucial for successful presidential performance. The book is the fifth volume in a series designed to provide a comprehensive administrative history of the Johnson presidency. The book will be of interest to the informed general reader, presidential scholars, political scientists, U.S. historians, and students of public management and will be an important addition to academic library collections.

13 november in history: Public vs. Private Robert N. Gross, 2017-12-01 Americans today choose from a dizzying array of schools, loosely lumped into categories of public and private. How did these distinctions emerge in the first place, and what do they tell us about the more general relationship in the United States between public authority and private enterprise? In *Public vs. Private*, Robert N. Gross describes how, more than a century ago, public policies fostered the rise of modern school choice. In the late nineteenth century, American Catholics began constructing rival, urban parochial school systems, an enormous and dramatic undertaking that challenged public school systems' near-monopoly of education. In a nation deeply committed to public education, mass attendance in Catholic schools produced immense conflict. States quickly sought ways to regulate this burgeoning private sector and the competition it produced, even attempting to abolish private education altogether in the 1920s. Ultimately, however, Gross shows how the public policies that resulted produced a stable educational marketplace, where choice flourished. The creation of the educational marketplace that we have inherited today—with systematic alternatives to public schools—was as much a product of public power as of private initiative. Gross also demonstrates that schools have been key sites in the development of the American legal conceptions of public and private. Landmark Supreme Court cases about the state's role in regulating private schools, such as the 1819 *Dartmouth v. Woodward* decision, helped define and redefine the scope of government power over private enterprise. Judges and public officials gradually blurred the meaning of public and private, contributing to the broader shift in how American governments have used private entities to accomplish public aims. As ever more policies today seek to unleash market forces in education, Americans would do well to learn from the historical relationship between government, markets, and schools.

13 november in history: Manliness and Its Discontents Martin Summers, 2005-12-15 In a pathbreaking new assessment of the shaping of black male identity in the early twentieth century, Martin Summers explores how middle-class African American and African Caribbean immigrant men constructed a gendered sense of self through organizational life, work, leisure, and cultural

production. Examining both the public and private aspects of gender formation, Summers challenges the current trajectory of masculinity studies by treating black men as historical agents in their own identity formation, rather than as screens on which white men projected their own racial and gender anxieties and desires. *Manliness and Its Discontents* focuses on four distinct yet overlapping social milieus: the fraternal order of Prince Hall Freemasonry; the black nationalist Universal Negro Improvement Association, or the Garvey movement; the modernist circles of the Harlem Renaissance; and the campuses of historically black Howard and Fisk Universities. Between 1900 and 1930, Summers argues, dominant notions of what it meant to be a man within the black middle class changed from a Victorian ideal of manliness--characterized by the importance of producer values, respectability, and patriarchy--to a modern ethos of masculinity, which was shaped more by consumption, physicality, and sexuality. Summers evaluates the relationships between black men and black women as well as relationships among black men themselves, broadening our understanding of the way that gender works along with class, sexuality, and age to shape identities and produce relationships of power.

13 november in history: Fundamentals and Applications of Colour Engineering Phil Green, 2023-10-10 FUNDAMENTALS AND APPLICATIONS OF COLOUR ENGINEERING EXPERT OVERVIEW OF THE WORLD OF COLOUR ENGINEERING IN THE 21ST CENTURY, WITH NEW, UPDATED TECHNOLOGIES AND A MATLAB TOOLBOX Fundamentals and Applications of Colour Engineering provides important coverage on topics that hold the power to extend our knowledge of colour reproduction, such as colour measurement and appearance and the methods used, with additional discussion of the technologies responsible for reproducing colour across a wide range of devices, together with the colour management systems that are used to connect devices and exchange information. Composed of 20 chapters, the Editor and his team of expert contributors consider the new ICC.2 architecture, an approach that introduces an evolutionary step in colour engineering, ensuring wider possibilities for technology. The text also considers the emerging applications for advanced colour management, such as processing spectral data, handling HDR images, and the capture and reproduction of material appearance. The text is supported by a MATLAB toolbox of relevant functions and data. Fundamentals and Applications of Colour Engineering is a useful reference for anyone involved in the reproduction of colour and a strong supplementary course potential for master's degrees with a colour science component. Fundamentals and Applications of Colour Engineering includes information on: Instruments and methods of colour measurement, colorimetry, and colour difference, and colour appearance Colour spaces and colour encodings, and characterizing input devices, displays and printers Colour gamut communication and imaging standards, high dynamic range imaging, and HDR Sensor adjustment in colour management, open source tools for colour engineering, and colour transform evaluation Supporting active learning with the inclusion of a toolbox of relevant functions and data, Fundamentals and Applications of Colour Engineering is an essential resource for students in relevant programs of study, and for professionals within colour engineering and reproduction looking to maximize their skill set and keep their skills updated.

13 november in history: A History of the Hungarian Constitution Ferenc Hörcher, Thomas Lorman, 2018-12-13 The new Hungarian Basic Law, which was ratified on 1 January 2012, provoked domestic and international controversy. Of particular concern was the constitutional text's explicit claim that it was situated within a reinvigorated Hungarian legal tradition that had allegedly developed over centuries before its violent interruption during World War II, by German invaders, and later, by Soviet occupation. To explore the context and validity of this claim, and the legal traditions which have informed the stormy centuries of Hungary's constitutional development, this book brings together a group of leading historians, political scientists and legal scholars to produce a comprehensive history of Hungarian constitutional thought. Ranging in scope from an overview of Hungarian medieval jurisprudence to an assessment of the various criticisms levelled at the new Hungarian Basis Law of 2012, contributors assess the constitutions, their impacts and their legacies,

as well as the social and cultural contexts within which they were drafted. The historical analysis is accompanied by a selection of original source materials, many translated here for the first time. This is the only book in English on the subject and is essential reading for all those interested in Hungary's history, political culture and constitution.

13 november in history: A Companion to the War Film Douglas A. Cunningham, John C. Nelson, 2016-05-31 A Companion to the War Film contains 27 original essays that examine all aspects of the genre, from the traditional war film, to the new global nature of conflicts, and the diverse formats that war stories assume in today's digital culture. Includes new works from experienced and emerging scholars that expand the scope of the genre by applying fresh theoretical approaches and archival resources to the study of the war film Moves beyond the limited confines of "the combat film" to cover home-front films, international and foreign language films, and a range of conflicts and time periods Addresses complex questions of gender, race, forced internment, international terrorism, and war protest in films such as Full Metal Jacket, Good Kill, Grace is Gone, Gran Torino, The Messenger, Snow Falling on Cedars, So Proudly We Hail, Tae Guk Gi: The Brotherhood of War, Tender Comrade, and Zero Dark Thirty Provides a nuanced vision of war film that brings the genre firmly into the 21st Century and points the way for exciting future scholarship

13 november in history: Guilt-free Bottle Feeding Madeleine Morris, 2014-09-15 You are not a bad mother if you can't breastfeed. For decades mums have been told that 'breast is best', that breastfeeding is the single-most important thing we can do for our children. Despite this huge pressure on modern mums, the vast majority of us end up using formula. And we feel guilty. In Guilt-Free Bottle Feeding award-winning journalist Madeleine Morris and paediatrician Dr Sasha Howard challenge the simplistic message of 'breast is best', revealing what everybody knows, but nobody says out loud - that bottle fed babies can grow up to be perfectly happy, healthy and smart. With a thorough yet accessible analysis of health science, parenting sociology and the modern media, the authors provide a balanced, much-needed and long-overdue voice, showing mothers who don't exclusively breastfeed why they are not failures. A mix of political and practical, Guilt-Free Bottle-Feeding also offers comprehensive advice on feeding, including: Choosing a formula, and choosing a bottle Sterilising and preparing a feed How to promote bonding while bottle-feeding Moving from breast to bottle, and mixed feeding In an era where the pressure on mums is greater than ever before, Guilt-Free Bottle Feeding resets the conversation around infant feeding, supporting all families regardless of how they feed their babies. This is not an anti-breastfeeding book. This is an anti-guilt book. www.guiltfreebottlefeeding.com

13 november in history: *Revisionist Histories* Marnie Hughes-Warrington, 2013-07-18 Revision and revisionism are generally seen as standard parts of historical practice, yet they are underexplored within the growing literature on historiography. In this accessibly written volume, Marnie Hughes-Warrington discusses this paucity of work on revision in history theory and raises ethical questions about linear models and spatial metaphors that have been used to explain it. *Revisionist Histories* emphasises the role of the authors and audiences of histories alike as the writers and rewriters of history. Through study of digital environments, graphic novels and reader annotated texts, this book shows that the 'sides' of history cannot be disentangled from one another, and that they are subject to flux and even destruction over time. Incorporating diverse and controversial case studies, including the French Revolution, Holocaust Denial and European settlers' contact with Native Americans and Indigenous Australians, *Revisionist Histories* offers both a detailed account of the development of revisionism and a new, more spatial vision of historiography. An essential text for students of historiography.
