Singapore ranks sixth in the world in healthcare outcomes well ahead of many developed countries, including the United States. The results are all the more significant as Singapore spends less on healthcare than any other high-income country, both as measured by fraction of the Gross Domestic Product spent on health and by costs per person. Singapore achieves these results at less than one-fourth the cost of healthcare in the United States and about half that of Western European countries. Government leaders, presidents and prime ministers, finance ministers and ministers of health, policymakers in congress and parliament, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think-tanks should know how this system works to achieve affordable excellence.--Publisher's website.

133 national business parkway: *Regional Visionaries and Metropolitan Boosters* Matthew Dalbey, 2002-06-30 Dalbey (Jackson State U.) hypothesizes that US regional parkways of the 1920s and 1930s emerged out of two conflicting visions of regional planning, and examines how the conflict impacted the development of Skyline Drive in Virginia and the proposed Green Mountain Parkway in Vermont. The regional view, he says, coalesced around the work of Benton MacKaye, Lewis Mumford, and the Regional Planning Association of America; and the metropolitan view grew out of market-oriented economic boosterism efforts, and was supported by Thomas Adams and the Regional Plan of New York and its Environs. He also shows how the tussle between vision and reality--social reform or economic optimization--continues to inform planning. Annotation copyrighted by Book News, Inc., Portland, OR

133 national business parkway: *Race and the Greening of Atlanta* Christopher C. Sellers, 2023-08-15 Race and the Greening of Atlanta turns an environmental lens on Atlanta's ascent to thriving capital of the Sunbelt over the twentieth century. Uniquely wide ranging in scale, from the city's variegated neighborhoods up to its place in regional and national political economies, this book reinterprets the fall of Jim Crow as a democratization born of two metropolitan movements: a well-known one for civil rights and a lesser known one on behalf of the environment. Arising out of Atlanta's Black and white middle classes respectively, both movements owed much to New Deal capitalism's undermining of concentrated wealth and power, if not racial segregation, in the Jim Crow South. Placing these two movements on the same historical page, Christopher C. Sellers spotlights those environmental inequities, ideals, and provocations that catalyzed their divergent political projects. He then follows the intermittent, sometimes vital alliances they struck as civil rights activists tackled poverty, as a new environmental state arose, and as Black politicians began winning elections. Into the 1980s, as a wealth-concentrating style of capitalism returned to the city and Atlanta became a national poster child for sprawl, the seedbeds spread both for a national environmental justice movement and for an influential new style of antistatism. Sellers contends that this new conservatism, sweeping the South with an antienvironmentalism and budding white nationalism that echoed the region's Jim Crow past, once again challenged the democracy Atlantans had achieved.

The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office--Preface.
