13560 dulles technology dr herndon va 20171: ~~XXXXX~~ Xxxxx, Martin Howse, 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in

Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of uclaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

13560 dulles technology dr herndon va 20171: Alien Superstar (Book #1) Henry Winkler, Lin Oliver, 2019-10-01 A six-eyed teenage alien refugee becomes a Hollywood star in this hilarious series opener by the bestselling authors of the Hank Zipzer series, Henry Winkler and Lin Oliver. When thirteen-year-old Buddy Burger has to flee from his alien planet, he crash lands in an even wilder place: Hollywood, California. But no one is shocked to see a six-eyed alien strolling around the Universal back lot. The tourists just think he's an actor in a supercool alien costume. And the fancy Hollywood directors take notice too. They cast Buddy in a popular TV show playing (of course) an alien. After a video of his first episode goes viral, he becomes an overnight sensation, and suddenly, his world is filled with adoring fans, rides in glamorous limos, and appearances at

all-the-shrimp-you-can-eat red carpet parties! Will Buddy be able to keep his secret when all eyes are on him? Or will the glitz and glam of Hollywood prove too much for this alien superstar? "Alien Superstar has it all . . . action, suspense, and big laughs!" —Jeff Kinney, author of the Diary of a Wimpy Kid series "Henry Winkler and Lin Oliver keep us laughing while slipping in a lesson for kids—accept everyone as they are, even if they have suction cups for feet. Alien Superstar is a super fun read for middle grades on up." —Jennifer Garner "A funny interstellar adventure that will have readers watching the cosmos for the second book to arrive." —SLJ Review Winkler and Oliver bring their sharply honed sense of comedy and extensive experience in the television industry to Buddy's antics on the set. . . . This results in an endearingly strange protagonist that will resonate with any kid who has felt like an outsider. A sense of humor and empathy are required for this zany adventure." —Booklist
