139 practice complete your assignment: The Challenge of Existential Social Work

Practice Mark Griffiths, 2017-08-29 Social work is being constantly shaped by external forces such as new information technology, managerialism, increased public accountability and programme risk management. Although an appreciation of how these forces impact on direct service is required, an exclusive focus on them can prevent social workers from genuinely embracing current practice opportunities. Existentialism – a philosophy that emphasises our existence in the world as free and responsible agents helping to shape our own experiences through the choices we make – has influenced the development of social work almost from its origins. This ground-breaking text highlights social work's existential heritage and the existential threats and challenges to current social work practice, and explores how existential philosophy can help direct service social workers find purpose and meaning in their daily practice in a radically uncertain and alienated twenty first century world. This is a fascinating read from one of the leading scholars in existentialist social work, and an essential guide for today's student and practitioner in the application of existential social work practice.

He follows this by looking at theoretically driven approaches and their associated methods of intervention. One generic case study is used throughout, tweaked slightly but maintaining the same service users and issues so you can see how the theory of explanation or approach and the associated method of intervention is applied. You are also able to sharpen up your critical thinking skills as the author invites you to reflect on the theories of explanation and approaches discussed. Making Sense of Theory and its Application to Social Work Practice will be immensely valuable to both social work students and practitioners.

139 practice complete your assignment: *Dying, Death, & Bereavement in Social Work Practice* Terry A. Wolfer, Vicki M. Runnion, 2008 Practitioners who work with clients at the end of their lives face difficult decisions concerning the client's self-determination, the kind of death he or she will have, and the prolongation of life. They must also remain sensitive to the beliefs and needs of family members and the legal, ethical, and spiritual ramifications of the client's death. Featuring twenty-three decision cases based on interviews with professional social workers, this unique volume allows students to wrestle with the often incomplete and conflicting information, ethical issues, and time constraints of actual cases. Instead of offering easy solutions, this book provides detailed accounts that provoke stimulating debates among students, enabling them to confront their own responses, beliefs, and uncertainties to hone their critical thinking and decision making skills for professional practice. *Please note: Teaching Notes for this volume will be available from Electronic Hallway in Spring 2010. To access the Teaching Notes, you must first become a member of the Electronic Hallway. The main Electronic Hallway web page is at <https://hallway.org/index.php>.
