14114 business center drive: Unaccountable Marty Makary, 2012-09-18 New York Times Bestseller "Every once in a while a book comes along that rocks the foundations of an established order that's seriously in need of being shaken. The modern American hospital is that establishment and Unaccountable is that book."-Shannon Brownlee, author of Overtreated Dr. Marty Makary is co-developer of the life-saving checklist outlined in Atul Gawande's bestselling The Checklist Manifesto. As a busy surgeon who has worked in many of the best hospitals in the nation, he can testify to the amazing power of modern medicine to cure. But he's also been a witness to a medical culture that routinely leaves surgical sponges inside patients, amputates the wrong limbs, and overdoses children because of sloppy handwriting. Over the last ten years, neither error rates nor costs have come down, despite scientific progress and efforts to curb expenses. Why? To patients, the healthcare system is a black box. Doctors and hospitals are unaccountable, and the lack of

transparency leaves both bad doctors and systemic flaws unchecked. Patients need to know more of what healthcare workers know, so they can make informed choices. Accountability in healthcare would expose dangerous doctors, reward good performance, and force positive change nationally, using the power of the free market. Unaccountable is a powerful, no-nonsense, non-partisan diagnosis for healing our hospitals and reforming our broken healthcare system.

14114 business center drive: Being Mortal Atul Gawande, 2014-10-07 #1 New York Times Bestseller In Being Mortal, bestselling author Atul Gawande tackles the hardest challenge of his profession: how medicine can not only improve life but also the process of its ending Medicine has triumphed in modern times, transforming birth, injury, and infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot. Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the desired goal for patients and families. Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and riveting storytelling, Being Mortal asserts that medicine can comfort and enhance our experience even to the end, providing not only a good life but also a good end.

14114 business center drive: The Checklist Manifesto Atul Gawande, 2010-04-01 The New York Times bestselling author of Being Mortal and Complications reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert

professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, *The Checklist Manifesto* is essential reading for anyone working to get things right.

Preface It is now some 50 years since ferrites debuted as an important new category of magnetic materials. They were prized for a range of properties that had no equivalents in existing metal magnetic materials, and it was not long before full-fledged research and development efforts were underway. Today, ferrites are employed in a truly wide range of applications, and the efforts of the many men and women working in the field are yielding many highly intriguing results. New, high-performance

products are appearing one after another, and it would seem we have only scratched the surface of the hidden possibilities of these fascinating materials. Dr. Alex Goldman is well qualified to talk about the state of the art in ferrites. For many years Dr. Goldman has been heavily involved in the field as director of the research and development division of Spang & Co. and other enterprises. This book, *Modern Ferrite Technology*, based in part on his own experiences, presents a valuable overview of the field. It is testimony to his commitment and bountiful knowledge about one of today's most intriguing areas of technology.
