1428 shadows over silesia walkthrough: *Beating the Fascists?* Eve Rosenhaft, 1983-08-25 In this book Eve Rosenhaft examines the involvement of Communists in political violence during the years of Hitler's rise to power in Germany (1929-33). Specifically, she aims to account for their participation in 'street-fighting' or 'gang-fighting' with National Socialist storm-troopers. The origins of this conflict are examined at two levels. First Dr Rosenhaft analyses the official policy of the Communist Party towards fascism and Nazism, and the special anti-fascist and self-defence organizations which it developed. Among the aspects of Communist policy that are explored are the relation between the international confrontation between Communists and Social Democrats as claimants to lead the left, and the implications of this dispute in German politics; the ideological difficulties in the implementation of Communist policy in a period of economic dislocation; and the organizational problems posed by the fight against fascism. Dr Rosenhaft then explores the attitudes and experience of the Communist rank and file engaged in the struggle against fascism, concentrating on the city of Berlin, where a fierce contest for control of the streets was waged.

1428 shadows over silesia walkthrough: *The Foundations of Europe* Thomas Hörber, 2007-12-18 Thomas Hörber analyses the building process of European integration. He shows the parliamentary discourses of France, Germany and Britain to be representative of the national position of these states towards the developing concept of 'Europe'. He covers all key events and developments of the time which had an impact on the European integration process and provides an explanation for the convergence of national discourses towards a common Europe. This development was by no means a given and the analysis of parliamentary debates shows for the first time how vigorous the debates were on European integration in the 1950s, and how, despite setbacks (notably the failure of the European Defence Community), the discussion went in favour of integration.

1428 shadows over silesia walkthrough: *The Bitter Road to Freedom* William I. Hitchcock, 2008-10-21 Reading Group Guide for *The Bitter Road to Freedom* by William I. Hitchcock1. The story of the liberation of Europe has been told many times. What new and surprising things did you learn from this book that you didn't know before?2. The book makes use of so many primary sources:

letters, diaries, old records, and, as a result, we hear many voices. Did these first-hand accounts change the way you previously perceived the liberation of Europe? Why or why not?3. Americans remember the end of WWII as a time of triumph and universal celebration in Europe when the occupied countries were finally freed from Hitler's tyranny. What was life really like for Europeans during and after the Liberation? Why do you think Americans remember the Liberation so differently from Europeans?4. The book discusses the violence and suffering that occur to the civilian population in even the most just of wars. Do you think what happened in Europe after the war has present-day applications, especially regarding the war in Iraq and our escalating campaign in Afghanistan?5. Some might see this book as disparaging to the accomplishments of The Greatest Generation. How do you think veterans of WWII will react to this book?6. Americans were surprised to find that they got along well with the Germans upon entering their country. In what ways does Eisenhower's failed ban on American soldiers fraternizing with German civilians illustrate the differences between political ideology and basic human experience? How might these differences still be true today?7. Were you surprised to find that survivors of the Holocaust faced such difficulties in the immediate aftermath of their liberation? How might that treatment influence their view of the end of the war?8. Why do you think the large-scale relief effort that America led in Europe, through many charitable organizations and volunteer groups, is not better known in the United States? Should historians write as much about the humanitarian side of war as they do about battle-field history?

1428 shadows over silesia walkthrough: Urban Meteorology National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee on Urban Meteorology: Scoping the Problem, Defining the Needs, 2012-06-13 According to the United Nations, three out of five people will be living in cities worldwide by the year 2030. The United States continues to experience urbanization with its vast urban corridors on the east and west coasts. Although urban weather is driven by large synoptic and meso-scale features, weather events unique to the urban environment arise from the characteristics of the typical urban setting, such as large areas covered by buildings of a variety of heights; paved streets and parking areas; means to supply electricity, natural gas, water, and raw materials; and generation of waste heat and materials. Urban Meteorology: Forecasting, Monitoring, and Meeting Users' Needs is based largely on the information provided at a Board on Atmospheric Sciences and Climate community workshop. This book describes the needs for end user communities, focusing in particular on needs that are not being met by current urban-level forecasting and monitoring. Urban Meteorology also describes current and emerging meteorological forecasting and monitoring capabilities that have had and will likely have the most impact on urban areas, some of which are not being utilized by the relevant end user communities. Urban Meteorology explains that users of urban meteorological information need high-quality information available in a wide variety of formats that foster its use and within time constraints set by users' decision processes. By advancing the science and technology related to urban meteorology with input from key end user communities, urban meteorologists can better meet the needs of diverse end users. To continue the advancement within the field of urban meteorology, there are both short-term needs-which might be addressed with small investments but promise large, quick returns-as well as future challenges that could require significant efforts and investments.

1428 shadows over silesia walkthrough: A Mathematician's Journeys Alexander Jones, Christine Proust, John M. Steele, 2016-02-03 This book explores facets of Otto Neugebauer's career, his impact on the history and practice of mathematics, and the ways in which his legacy has been preserved or transformed in recent decades, looking ahead to the directions in which the study of the history of science will head in the twenty-first century. Neugebauer, more than any other scholar of recent times, shaped the way we perceive premodern science. Through his scholarship and influence on students and collaborators, he inculcated both an approach to historical research on ancient and medieval mathematics and astronomy through precise mathematical and philological study of texts, and a vision of these sciences as systems of knowledge and method that spread

outward from the ancient Near Eastern civilizations, crossing cultural boundaries and circulating over a tremendous geographical expanse of the Old World from the Atlantic to India.

1428 shadows over silesia walkthrough: *Mapping Global Theatre Histories* Mark Pizzato, 2019-05-02 This textbook provides a global, chronological mapping of significant areas of theatre, sketched from its deepest history in the evolution of our brain's 'inner theatre' to ancient, medieval, modern, and postmodern developments. It considers prehistoric cave art and built temples, African trance dances, ancient Egyptian and Middle-Eastern ritual dramas, Greek and Roman theatres, Asian dance-dramas and puppetry, medieval European performances, global indigenous rituals, early modern to postmodern Euro-American developments, worldwide postcolonial theatres, and the hyper-theatricality of today's mass and social media. Timelines and numbered paragraphs form an overall outline with distilled details of what students can learn, encouraging further explorations online and in the library. Questions suggest how students might reflect on present parallels, making their own maps of global theatre histories, regarding geo-political theatrics in the media, our performances in everyday life, and the theatres inside our brains.

1428 shadows over silesia walkthrough: Italian Medieval Sculpture in the Metropolitan Museum of Art and the Cloisters Metropolitan Museum of Art (New York, N.Y.), Lisbeth Castelnovo-Tedesco, Jack Soultanian, 2010 The collection of Italian medieval sculpture in The Metropolitan Museum of Art and The Cloisters began with the acquisition in 1908 of a Romanesque column statue; today the Museum's holdings comprise more than seventy works dating from the ninth to the late fifteenth century ... The birthplaces of these works range from Sicily to Venice; some typify local styles, others illustrate the intense artistic exchanges taking place within Italy and between Italy and the wider world ... Technological advances of the last decades have made it possible to determine more precisely the materials and techniques from which works of art are made, the history of their alteration, and the mechanisms of their deterioration. Using such techniques, scholars have been able to ascertain, for example, that sculptures previously thought to be modern works carved in the medieval manner were in fact completely authentic. This innovative volume represents a watershed in the study of sculpture: a collaborative dialogue between an art historian and a conservator—between art history and art science—that deepens our understanding of the object we see, while illuminating its elusive, enigmatic history--From publisher's description.

The volume illuminates the political and cultural implications of this displaced property by presenting essays with newly discovered archival material and illustrations--

1428 shadows over silesia walkthrough: A History of the Gypsies of Eastern Europe and Russia D. Crowe, 2016-04-30 David Crowe draws from previously untapped East European, Russian, and traditional sources to explore the life, history, and culture of the Gypsies, or Roma, from their entrance into the region in the Middle Ages until the present.

1428 shadows over silesia walkthrough: The Gypsies of Eastern Europe David Crowe, John Kolsti, Ian Hancock, 2016-07-22 In recent news coverage of the dramatic political events in Eastern Europe, Gypsies have been a favourite sidebar topic. Some of the stories have been truly horrifying, others are written condescendingly and to amuse; but what has become clear is how little we really know about this people. In a concerted effort to uncover the modern history of the Rom in Eastern Europe, the authors examine the Gypsy experience in Albania, Czechoslovakia, Hungary, Romania and Yugoslavia, with special attention to the Nazi Holocaust as well as to the record of the forced settlement and education programmes instituted by communist regimes.

MacDonald, Alasdair James Macdonald, Arie Johan Vanderjagt, 2003-10-01 The essays in this volume discuss princely courts north of the Alps and Pyrenees between 1450-1650 as focal points for products of medieval and renaissance culture such as literature, music, political ideology, social and governmental structures, the fine arts and devotional practice.

1428 shadows over silesia walkthrough: The Telemann Compendium Steven David Zohn, 2020 This book is the first guide to research on the Baroque composer Georg Philipp Telemann (1681-1767) in any language. Although the scholarly 'Telemann Renaissance' is now a half-century old, there has never been a book intended to serve as a gateway for further study. Apart from a handful of biographies, dictionary entries, and annotated bibliographies (many of which are now severely out of date), students of Telemann's life and music have been left to dive into the secondary literature in order to get their bearings. Considering that this now burgeoning literature has mainly taken the form of German dissertations and conference proceedings, it is small wonder that the field of Telemann studies has been relatively slow to develop in the English-speaking world. And yet the veritable explosion of performances, both live and recorded, of the composer's music in recent decades has won him an ever-increasing following among musicians and concert-goers worldwide. As with other books in the Composer Compendia series, the book includes a brief biography, dictionary, works-list, and selective bibliography. STEVEN ZOHN is Laura Carnell Professor of Music History at Temple University.
