Missy Benson has a two and a half carat diamond engagement ring with color grade H, VS2 clarity and a value of \$36,000. It's absolutely gorgeous, practically flawless, and let's be honest, really big! But what the successful Chicago realtor doesn't have anymore is a husband. After 12 years of marriage, her husband, Paul, a handsome, wealthy attorney has devastated her by breaking up their marriage for Priscilla Sommerfeld, a young, personal trainer, who according to Missy's sassy assistant, J.J., looks more like a Las Vegas stripper than a fitness expert. Not sure what to do with her ring, and with no financial issues to worry about, Missy decides to put it up for sale on Craigslist. The price: 99 cents! The catch: She gets to pick the buyer. In essence, she's looking for the perfect

guy, but not for herself. Her hope is to regain faith that good men do exist, and that marriages can last forever. Now referring to herself as the divorced girl, Missy interviews dozens of young men who are vying for the huge ring. It's a contest that includes outrageous characters, hilarious and sentimental stories, and two finalists, both of whom Missy adores and who she must choose between. Then there's Parker Missoni, the sexiest contestant by far, who drives her crazy with his brutal honesty, and at the same time stops her heart with his deep brown eyes. *Divorced Girl Smiling* is the story of a woman's journey to do whatever it takes to heal herself from divorce. It's about acceptance, reflection, taking accountability for mistakes, and appreciating all of life's wonderful gifts. 150 questions to ask your partner before you move in: The Startup Protocol Sally Ann Frank, 2024-03-01 There are lots of founders and lots of ideas floating around to help improve the delivery of healthcare services and positively affect the health of each of us as individuals, as well as groups of patients afflicted by chronic or acute diseases. Unfortunately, many of these ideas never reach their full potential to improve patient outcomes or reduce costs of care. Sometimes, it's because the idea isn't feasible or scalable. Sometimes, it's because the market isn't ready, or regulators aren't ready. And sometimes, it's just because the founder or founding team has a blind spot (or two). Not only do these hidden blind spots ensure their failure, but in many cases, with better planning or a greater, more holistic understanding of the market forces, the blind spot can be overcome. Or better yet, the founder can realize that their idea is doomed from the start and consider other, better options to solve the problem they are attacking. The goal of this book is to help founders and their teams identify blind spots and avoid the most common pitfalls of starting a digital health company. Having spent time with founders, VC companies, and most importantly, prospective digital health startups, patterns have emerged regarding those startups that are successful and those that die an often slow and painful death. While not a recipe for guaranteed success, having a guidebook of sorts can help navigate the perils associated with building a digital health company and can very likely improve the odds of success. The book will go through the typical life cycle of an early-stage company, from ideation to the first few customer deals, and highlight best practices for tackling the challenges at each stage including: ■ What problem are you trying to solve? ■ And why are you trying to solve this problem? ■ Who will help you build the solution and company? ■ How will you build the solution? ■ How will you pitch your company? ■ How will you sell your solution? ■ And, what does success look like to you, your stakeholders, and your customers?
