1688com in english language: Alibaba's World Porter Erisman, 2015-05-12 In September 2014, a Chinese company that most Americans had never heard of held the largest IPO in history - bigger than Google, Facebook and Twitter combined. Alibaba, now the world's largest e-commerce company, mostly escaped Western notice for over ten years, while building a customer base more than twice the size of Amazon's, and handling the bulk of e-commerce transactions in China. How did it happen? And what was it like to be along for such a revolutionary ride? In *Alibaba's World*, author Porter Erisman, one of Alibaba's first Western employees and its head of international marketing from 2000 to 2008, shows how Jack Ma, a Chinese schoolteacher who twice failed his college entrance exams, rose from obscurity to found Alibaba and lead it from struggling startup to the world's most dominant e-commerce player. He shares stories of weathering the dotcom crash, facing down eBay and Google, negotiating with the unpredictable Chinese government, and enduring the misguided advice of foreign experts, all to build the behemoth that's poised to sweep the ecommerce world today. And he analyzes Alibaba's role as a harbinger of the new global business landscape—with its focus on the East rather than the West, emerging markets over developed ones, and the nimble entrepreneur over the industry titan. As we face this near future, the story of Alibaba—and its inevitable descendants—is both essential and instructive.

1688com in english language: *Why Customers Would Rather Have a Smartphone than a Car* Cor Molenaar, 2016-03-03 *Why Customers Would Rather Have a Smartphone than a Car* explores some of the fundamental changes in consumer behaviour: Why do we buy less in shops and more on the internet? Why do we spend more on gadgets, smartphones and apps and not more on food, holidays or clothing? Why do most business people only look at symptoms and not the causes of changing customer behaviour? The new generation buys differently from the baby boomers; they have different priorities and preferences. The internet has changed us in the way we think, act and communicate. Whilst many retailers now understand the need for change, few of them have established convincing or sustainable models for the future. Cor Molenaar argues that by understanding the drivers behind these new consumer behaviours, retailers can identify the opportunities this represents and adapt their offering accordingly. The kind of relationship retailing he advocates involves the way the retailer interacts with their customer; the new environment that they need to sustain along with their ability to relate customer data, technology and new services. The author interweaves examples from traditional and virtual retailing with his research on consumer psychology and buying behaviour to offer a sophisticated and at times challenging guide for all those involved in retailing, as well as those responsible for planning and designing social and retail space.

1688com in english language: *Corporate China 2.0* Qiao Liu, 2016-12-23 This book argues that that the rise of great firms - those with sustainable high return on invested capital (ROIC) - will lay the foundation for China's successful economic transformation. Drawn from the author's research on corporate finance and the Chinese economy, the author maintains that being big could be easy but means little for corporate China, especially in the context of China's transition from an investment-led economy to an efficiency-driven one. The work discusses both internal and external impediments that lead to lack of great companies in China and suggests institutional conditions which foster the rise of great companies in China, including, reversing the government's obsession with GDP, reforming the financial system, and promoting entrepreneurship. Policy makers, investors, corporate executives, and MBA students and scholars will appreciate case studies of Huawei, Alibaba, Xiaomi, and Lenovo, among others, that illustrate the endeavors made by Chinese entrepreneurs at the grassroots level and highlight what makes successful companies in China.

This book analyzes extensive data on the world's rapidly changing and growing access to, use and geographies of information and communications technologies. It studies not only the spatial differences in technology usage worldwide, but also examines digital differences in the major world nations of China, India, the United States and Japan at the state and provincial levels. At the global level, factors such as education, innovation, judicial independence and investment are important to explaining differences in the adoption and use of technology. The country studies corroborate consistent determinants for technology usage for education, urban location, economic prosperity, and infrastructure, but also reveal unique determinants, such as social capital in the United States and India, exports in China and working age population and patents in Japan. Spatial patterns are revealed that indicate clusters of high and low technology use for various nations around the world, the countries of Africa and for individual states/provinces within nations. Based on theory, novel findings and phenomena that have remained largely unreported, the book considers the future of the worldwide digital divides, the policy role of governments and the challenges of leadership.

It is 1685 and England is on the brink of a renewed civil war. King Charles II has died without an heir and his brother James is to take the throne. But the people are bitterly divided, and many do not welcome the new king or his young queen. Ned Ferryman cannot persuade his sister, Alinor, that he is right to return from America with his Pokanoket servant, Rowan, to join the rebel army. Instead, Alinor and her daughter Alys, have been coaxed by the manipulative Livia to save the queen from the coming siege. The rewards are life-changing: the family could return to their beloved Tidelands, and Alinor could rule where she was once lower than a servant. Alinor’s son is determined to stay clear of the war, but, in order to keep his own secrets in the past, Livia traps him in a plan to create an imposter Prince of Wales—a surrogate baby to the queen. From the last battle in the desolate Somerset Levels to the hidden caves on the slave island of Barbados, this third volume of an epic story follows a family from one end of the empire to another, to find a new dawn in a world which is opening up before them with greater rewards and dangers than ever before.
