1770 technology blvd daytona beach fl 32117: Taxation of Foreign Business Income Within the European Internal Market Jérôme Monsenego, 2012 The rules of the Member States on the taxation of the foreign business income of companies, whether such rules are based on the fiscal principle of territoriality or on the principle of worldwide taxation, are in conflict with the objective of achievement of the internal market. This objective is indeed difficult to reach when it comes to the taxation of foreign income, given that the Member States are far from taxing companies doing business cross-border as if their operations were purely domestic. Areas of conflict include particularly the taxation of foreign profits, the deduction of foreign losses, the elimination of international double taxation and the attribution of profits to permanent establishments. This dissertation analyses this conflict on the basis of a study of the case law of the European Court of Justice as well as some of the key provisions of the European treaties. It appears that both the fiscal principle of territoriality and the principle of worldwide taxation give rise to complex issues of compatibility with the law of the European Union. Although the analysis conducted throughout the dissertation provides some guidance for the taxation of the foreign business income of companies, it is concluded that the Court cannot, by itself, efficiently resolve the conflict between such taxation and the objective of achievement of the internal market.

1770 technology blvd daytona beach fl 32117: Economics R. Glenn Hubbard, Anthony Patrick O'Brien, 2024-03 Our approach in this new edition remains what it was in the first edition: to provide students and instructors with a text that delivers complete coverage of economic topics using many real-world examples. Our goal from the beginning has been to teach economics in a widget-free way by using real-world business and policy examples. It's an understatement to say that much has happened in the economy since our last edition appeared. The effects of the Covid-19 pandemic disrupted the economy as nothing else has in the lifetimes of today's students (and instructors). Congress, the Trump and Biden administrations, and the Federal Reserve responded to the severe recession of 2020 with fiscal and monetary policies that were also unprecedented. Partially as a result, the U.S. economy experienced the highest rates of inflation in 40 years. We have incorporated these developments in the new real-world examples and policy discussions in this edition and also in the extensive digital resources--

1770 technology blvd daytona beach fl 32117: Rurally Screwed Jessie Knadler, 2013-04-02 A magazine editor in New York, Jessie Knadler had a habit of always looking over her shoulder for better options. She wasn't quite sure moving to Montana and marrying a cowboy was a better option—but, head over heels in love, she did it anyway. At a loss in her new rural environment, she hoped that activities like chicken farming and fence building might provide her with a more profound, virtuous sense of self (and make her husband Jake love her even more). It all led her to some strange situations—and surprising realizations. Written with huge personality and searing wit, *Rurally Screwed* is an immensely entertaining and moving memoir about the things we do for love—and the lengths we'll go to find our true identity.

1770 technology blvd daytona beach fl 32117: JeongMee Yoon Bonnie Yochelson, 2019 Why do girls love pink toys, and boys love blue ones? The fine arts photographer Jeongmee Yoon (*1969, Seoul) poses this question in her work, The Pink and Blue Project, for which she began photographing Korean and American girls and boys in their rooms in 2005. The gender-specific color schemes quickly established themselves as an overarching phenomenon, independent of cultural or ethnic background. Yoon's impressive portraits, for which she spent hours carefully arranging pink or blue objects, question these color codes and the consumer habits of both parents and children. They reveal the connections linking gender identity and social norms, consumer culture, and media. She continued this project by visiting the children years later and capturing how their favorite colors had changed. Jeongmee Yoon was awarded the ILWOO Foundation Prize for her project.
