Introduction: Embarking on Your 18 Week Marathon Training Plan (Intermediate)

This 18-week marathon training plan is designed for intermediate runners who have completed at least one half-marathon and consistently run 3-4 times per week. It assumes a current weekly mileage of 20-30 miles. This plan provides a structured approach to increase mileage gradually, minimizing the risk of injury and maximizing performance. Remember, consistency and listening to your body are crucial for successful marathon training. This 18 week marathon training plan intermediate level program prioritizes building a solid foundation and preventing overtraining.

Phase 1: Building the Base (Weeks 1-6)

This phase focuses on building a solid aerobic base. The primary goal is to increase weekly mileage gradually, improving endurance and reducing the risk of injury.

Weekly Mileage: Starts at 25-30 miles and increases by 5-7 miles per week, reaching 40-45 miles by week 6.

Key Workouts: Easy runs (majority of runs), one short tempo run per week (2-4 miles at comfortably hard pace), and one interval workout every other week (6-8 x 800m or 400m repeats).

Long Runs: Gradually increase long run distance, starting at 8 miles and reaching 12 miles by week 6.

Research shows that consistent long runs are crucial for building endurance and preparing the body for the demands of a marathon. (1)

Rest & Recovery: Include at least one complete rest day per week.

Phase 2: Increasing Intensity (Weeks 7-12)

Phase 2 increases training intensity and volume. This phase introduces longer tempo runs and more challenging interval workouts.

Weekly Mileage: Increases to 45-55 miles.

Key Workouts: Two tempo runs per week (3-6 miles), two interval workouts per week (various distances and repetitions). Tempo runs improve lactate threshold, while intervals enhance speed and endurance. (2)

Long Runs: Increase long run distance gradually, reaching 16-18 miles by week 12. This 18 week marathon training plan intermediate plan ensures a gradual progression.

Rest & Recovery: Maintain at least one rest day per week, potentially adding a second shorter rest day if needed. Active recovery (light walks or stretching) is encouraged on rest days.

Phase 3: Tapering and Peak Performance (Weeks 13-18)

This phase involves reducing mileage and intensity to allow the body to recover and peak for race day.

Weekly Mileage: Gradually decrease mileage by approximately 20% each week, focusing on quality over quantity. (3)

Key Workouts: One tempo run per week, and one shorter interval workout (reduce repetitions and distance).

Long Runs: Gradually shorten long run distance, maintaining a shorter, high-quality run.

Rest & Recovery: Increase rest days to allow for optimal recovery and prevent overtraining. Prioritize sleep and nutrition. This phase of your 18 week marathon training plan intermediate plan is critical for success.

Nutrition and Hydration for Your 18 Week Marathon Training Plan Intermediate

Proper nutrition and hydration are crucial for successful marathon training. This 18 week marathon training plan intermediate plan strongly recommends:

Carbohydrate Loading: Increase carbohydrate intake during the weeks leading up to the marathon to maximize glycogen stores. (4)

Hydration: Drink plenty of water throughout the day, especially during and after runs. Electrolyte balance is also important, especially during longer runs.

Protein Intake: Ensure adequate protein intake for muscle repair and recovery.

Injury Prevention Strategies in Your 18 Week Marathon Training Plan Intermediate

Preventing injuries is essential. Key strategies include:

Proper Footwear: Wear appropriate running shoes for your foot type and running style.

Gradual Progression: Avoid increasing mileage or intensity too quickly. This 18 week marathon training plan intermediate emphasizes gradual progression.

Cross-Training: Incorporate low-impact activities such as swimming or cycling to reduce stress on joints.

Strength Training: Include strength training exercises to improve muscle strength and stability. (5)

Stretching: Regular stretching improves flexibility and reduces muscle soreness.

18 week marathon training plan intermediate: 80/20 Triathlon Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In 80/20 Triathlon, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.

With more than 75 detailed exercises plus six easy-to-follow training plans for half and full marathons, Smart Marathon Training will get you to the starting line feeling refreshed and ready to run your best race yet. This innovative program eliminates junk miles, paring down training to three essential runs per week and adding a dynamic strength and cross-training program to build overall fitness. Runners will train for their best performance in less time and avoid the injuries, overtraining, and burnout that come from running too much. Smart Marathon Training builds up a runner's body to resist injury. Runners gain the strength they need to run long using functional exercises that target the hips, glutes, and quads. Running is a full-body sport, so this training program also builds a strong core and upper body to avoid injuries that begin above the waist. No one fakes a marathon or half-marathon--everyone has to do the work. But Smart Marathon Training replaces long, grinding miles with low-impact cross-training. Horowitz outlines a cycling plan to complement run workouts, boosting base fitness while saving runners' bodies for their best runs.

18 week marathon training plan intermediate: The Non-Runner's Marathon Trainer David A. Whitsett, Forrest A. Dolgener, Tanjala Jo Kole, 1998-02-01 Athlete. Runner. Marathoner. Are these words you wouldn't exactly use to describe yourself? Do you consider yourself too old or too out of shape to run a marathon? But somewhere deep inside have you always admired the people who could reach down and come up with the mental and physical strength to complete such a daunting and rewarding accomplishment? It doesn't have to be somebody else crossing the finish line. You can be a marathoner. *The Non-Runner's Marathon Trainer* is based on the highly successful marathon class offered by the University of Northern Iowa, which was featured in a *Runner's World* article titled *Marathoning 101*. The class has been offered five times over 10 years, and all but one student finished the marathon. That is approximately 200 students -- all first time marathoners and many with absolutely no running background. This book follows the same 16-week, four-day-a-week workout plan. What makes the success rate of this program so much higher than any other? The special emphasis on the psychological aspects of endurance activities. You don't have to love to run -- you don't even have to like it -- but you have to realize that you are capable of more than you have ever thought possible. One participant in the program explained it like this: I'm doing this for me -- not for others or the time clock. I just feel better when I run, plus it helps me to cope with things in general. The skills we've learned in this class don't apply just to marathoning -- they apply to life! Just like you never know what the next step in a marathon will bring, so too, you never know what will happen next in life. But if you don't keep going, you're never going to find out. By staying relaxed, centered, and positive you handle just about anything that comes your way. This is marathon running for real people, people with jobs and families and obligations outside of running. *The Non-Runner's Marathon Trainer* has proven successful for men and women of all ages. Now let it work for you.

Running with Purpose is a leadership memoir with insights, inspirational stories, and tangible takeaways for current and aspiring leaders, entrepreneurs, and the 150+ million runners worldwide and those in the broader running community who continually invest in themselves. This leadership memoir starts with Jim Weber's seventh-grade dream to run a successful company that delivered something people passionately valued. Fast forward to 2001, Jim became the CEO of Brooks and, as the struggling brand's fourth CEO in two years, he faced strong headwinds. A lifelong competitor, Jim devised a one-page strategy that he believed would not only save the company but would also lay the foundation for Brooks to become a leading brand in the athletic, fitness, and outdoor categories. In the pages of Running with Purpose, you will find: Brooks' bold strategy and unique brand positioning that fueled its move from the back of the pack to lead. The key to building a purpose-driven brand that is oriented around customer obsession, building trust, competing with heart, and having fun along the way. Brooks' business and brand to surge. An inside look at the ups and downs of Jim's personal journey, which led to his conviction that life is too short not to enjoy what you do and the people by your side.
