The subject matter of labor economics continues to have at its core an attempt to systematically find empirical analyses that are consistent with a systematic and parsimonious theoretical understanding of the diverse phenomenon that make up the labor market. As before, many of these analyses are provocative and controversial because they are so directly relevant to both public policy and private decision making. In many ways the modern development in the field of labor economics continues to set the standards for the best work in applied economics. This volume of the Handbook has a notable representation of authors - and topics of importance - from throughout the world.

adrian h wood education: *Black Male(d): Peril and Promise in the Education of African American Males* Tyrone C. Howard, 2014 In his new book, the author of the bestseller *Why Race and Culture Matter in Schools* examines the chronic under-performance of African American males in U.S. schools. Citing a plethora of disturbing academic outcomes for Black males, this book focuses on the historical, structural, educational, psychological, emotional, and cultural factors that influence the teaching and learning process for this student population. Howard discusses the potential, and promise of Black males by highlighting their voices to generate new insights, create new knowledge, and identify useful practices that can significantly improve the schooling experiences and life chances of Black males. Howard calls for a paradigm shift in how we think about, teach, and study Black males. The book: examines current structures, ideologies, and practices that both help and hinder the educational and social prospects of Black males; translates frequently cited theoretical principles into research-based classroom practice; documents teacher-student interactions, student viewpoints, and discusses the troubling role that sports plays in the lives of many Black males; highlights voices and perspectives from Black male students about ways to improve their schooling experiences and outcomes; and identifies community-based programs that are helping Black males succeed.
