advance financial mt juliet: What is Orientation? Werner Stegmaier, 2019-08-19 The very first thing one does in all situations of life is orient oneself. Decisions of orientation, which are mostly made under uncertainty and the pressure of time, largely determine subsequent decisions. But what is orientation? The problems of orientation are as old as humankind, the word is used everywhere, but the concept has never been thoroughly investigated. The philosopher Werner Stegmaier comprehensively clarifies for the first time the conditions and structures of orientation, including those of our sexual, economic, media, political, legal, scientific, artistic, religious, moral, and ethical orientations. He thereby establishes a new philosophical language and offers a philosophy for our time. As if I unexpectedly slipped down into a deep vortex, I am swirled around in a way that I can neither put a foot down, nor swim to the surface. Nonetheless, I will work my way out ... (René Descartes, Philosopher) As often as my speculation seems to lead me too far from the paved road of common sense, I stand still and seek to orient myself. I look back at the point from which we started, and I seek to compare the two guideposts I have. (Moses Mendelssohn, Philosopher) A philosophical problem has the form: 'I do not know my way about.' (Ludwig Wittgenstein, Philosopher) The second O, orientation - as the repository of our genetic heritage, cultural tradition, and previous experiences - is the most important part of the O-O-D-A loop since it shapes the way we observe, the way we decide, the way we act. (John Boyd, Military Strategist)

The college was named to honor five Irish brothers, Samuel, Hugh, Alexander, Jesse, and David Meharry. They gave more than \$30,000 in cash and real estate to fund an institution that would educate medical professionals to serve the black community. By the mid-20th century, Meharry Medical College graduated approximately half the black doctors in the United States. The evolution of Meharry Medical College is a compelling story that occurs during succeeding eras. In many ways, its evolution reflects the changing tides of race relations in America. Nearly 150 years later, Meharry continues to be a significant medical institution that holds true to its motto: Dedicated to the worship of God through service to man.

According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. *Expanding Underrepresented Minority Participation* analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. *Expanding Underrepresented Minority Participation* suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of

their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

advance financial mt juliet: Capitalism and Desire Todd McGowan, 2016-09-20 Despite creating vast inequalities and propping up reactionary world regimes, capitalism has many passionate defenders—but not because of what it withholds from some and gives to others. Capitalism dominates, Todd McGowan argues, because it mimics the structure of our desire while hiding the trauma that the system inflicts upon it. People from all backgrounds enjoy what capitalism provides, but at the same time are told more and better is yet to come. Capitalism traps us through an incomplete satisfaction that compels us after the new, the better, and the more. Capitalism's parasitic relationship to our desires gives it the illusion of corresponding to our natural impulses, which is how capitalism's defenders characterize it. By understanding this psychic strategy, McGowan hopes to divest us of our addiction to capitalist enrichment and help us rediscover enjoyment as we actually experienced it. By locating it in the present, McGowan frees us from our attachment to a better future and the belief that capitalism is an essential outgrowth of human nature. From this perspective, our economic, social, and political worlds open up to real political change. Eloquent and enlivened by examples from film, television, consumer culture, and everyday life, *Capitalism and Desire* brings a new, psychoanalytically grounded approach to political and social theory.

advance financial mt juliet: Who Wants to Run? Andrew B. Hall, 2019-04-02 The growing ideological gulf between Democrats and Republicans is one of the biggest issues in American politics today. Our legislatures, composed of members from two sharply disagreeing parties, are struggling to function as the founders intended them to. If we want to reduce the ideological gulf in our legislatures, we must first understand what has caused it to widen so much over the past forty years. Andrew B. Hall argues that we have missed one of the most important reasons for this ideological gulf: the increasing reluctance of moderate citizens to run for office. While political scientists, journalists, and pundits have largely focused on voters, worried that they may be too partisan, too uninformed to vote for moderate candidates, or simply too extreme in their own political views, Hall argues that our political system discourages moderate candidates from seeking office in the first place. Running for office has rarely been harder than it is in America today, and the costs dissuade moderates more than extremists. Candidates have to wage ceaseless campaigns, dialing for dollars

for most of their waking hours while enduring relentless news and social media coverage. When moderate candidates are unwilling to run, voters do not even have the opportunity to send them to office. To understand what is wrong with our legislatures, then, we need to ask ourselves the question: who wants to run? If we want more moderate legislators, we need to make them a better job offer.
