advent physical therapy grandville: The Five Continents of Theatre Eugenio Barba, Nicola Savarese, 2019-02-11 The Five Continents of Theatre undertakes the exploration of the material culture of the actor, which involves the actors' pragmatic relations and technical functionality, their behaviour, the norms and conventions that interact with those of the audience and the society in which actors and spectators equally take part. The material culture of the actor is organised around body-mind techniques (see A Dictionary of Theatre Anthropology by the same authors) and auxiliary techniques whose variety concern: ■ the diverse circumstances that generate theatre performances: festive or civil occasions, celebrations of power, popular feasts such as carnival, calendar recurrences such as New Year, spring and summer festivals; ■ the financial and organisational aspects: costs, contracts, salaries, impresarios, tickets, subscriptions, tours; ■ the information to be provided to the public: announcements, posters, advertising, parades; ■ the spaces for the performance and those for the spectators: performing spaces in every possible sense of the term; ■ sets, lighting, sound, makeup, costumes, props; ■ the relations established between actor and spectator; ■ the means of transport adopted by actors and even by spectators. Auxiliary techniques repeat themselves not only throughout different historical periods, but also across all theatrical traditions. Interacting dialectically in the stratification of practices, they respond to basic needs that are common to all traditions when a performance has to be created and staged. A comparative overview of auxiliary techniques shows that the material culture of the actor, with its diverse processes, forms and styles, stems from the way in which actors respond to those same practical needs. The authors' research for this aspect of theatre anthropology was based on examination of practices, texts and of 1400 images, chosen as exemplars.

advent physical therapy grandville: Esthetic Oral Rehabilitation with Veneers Richard D. Trushkowsky, 2020-04-16 This book acquaints the clinician with the full range of parameters that need to be considered before undertaking an esthetic rehabilitation with veneers and describes current clinical concepts and techniques. The initial chapters provide the foundation for a

Occlusion prior to the initiation of treatment and following treatment is key to the longevity of restorations, and this aspect is given careful consideration. Detailed advice is also offered on proper selection of materials and their placement. The guidance provided will ensure that the reader is fully equipped to gather and assess all relevant information prior to commencement of the final treatment. The treatment itself can range from minimally invasive to more complex depending on the requirements of each individual case. Among the clinical concepts discussed in the book are the use of etched porcelain restorations, minimally invasive CAD/CAM veneers, and the ink glue technique.

advent physical therapy grandville: Beyoncé in Formation Omise'eke Natasha Tinsley, 2018-11-06 Making headlines when it was launched in 2015, Omise'eke Tinsley's undergraduate course "Beyoncé Feminism, Rihanna Womanism" has inspired students from all walks of life. In Beyoncé in Formation, Tinsley now takes her rich observations beyond the classroom, using the blockbuster album and video Lemonade as a soundtrack for vital new-millennium narratives. Woven with candid observations about her life as a feminist scholar of African studies and a cisgender femme married to a trans spouse, Tinsley's "Femme-onade" mixtape explores myriad facets of black women's sexuality and gender. Turning to Beyoncé's "Don't Hurt Yourself," Tinsley assesses black feminist critiques of marriage and then considers the models of motherhood offered in "Daddy Lessons," interspersing these passages with memories from Tinsley's multiracial family history. Her

chapters on nontraditional bonds culminate in a discussion of contemporary LGBT politics through the lens of the internet-breaking video "Formation," underscoring why Beyoncé's black femme-inism isn't only for ciswomen. From pleasure politics and the struggle for black women's reproductive justice to the subtext of blues and country music traditions, the landscape in this tour is populated by activists and artists (including Loretta Lynn) and infused with vibrant interpretations of Queen Bey's provocative, peerless imagery and lyrics. In the tradition of Roxanne Gay's *Bad Feminist* and Jill Lepore's best-selling cultural histories, Beyoncé in *Formation* is the work of a daring intellectual who is poised to spark a new conversation about freedom and identity in America.

advent physical therapy grandville: *Zoological Surrealism* James Leo Cahill, 2019-02-19 An archive-based, in-depth analysis of the surreal nature and science movies of the pioneering French filmmaker Jean Painlevé Before Jacques-Yves Cousteau, there was Jean Painlevé, a pioneering French scientific and nature filmmaker with a Surrealist's eye. Creator of more than two hundred films, his studies of strange animal worlds doubled as critical reimaginations of humanity. With an unerring eye for the uncanny and unexpected, Painlevé and his assistant Geneviève Hamon captured oneiric octopuses, metamorphic crustaceans, erotic seahorses, mythic vampire bats, and insatiable predatory insects. *Zoological Surrealism* draws from Painlevé's early oeuvre to rethink the entangled histories of cinema, Surrealism, and scientific research in interwar France. Delving deeply into Painlevé's archive, James Leo Cahill develops an account of "cinema's Copernican vocation"—how it was used to forge new scientific discoveries while also displacing and critiquing anthropocentric viewpoints. From Painlevé's engagements with Sergei Eisenstein, Georges Franju, and competing Surrealists to the historiographical dimensions of Jean Vigo's concept of social cinema, *Zoological Surrealism* taps never-before-examined sources to offer a completely original perspective on a cutting-edge filmmaker. The first extensive English-language study of Painlevé's early films and their contexts, it adds important new insight to our understanding of film while also contributing to contemporary investigations of the increasingly surreal landscapes of climate change and ecological emergency.

advent physical therapy grandville: How to Read Architecture Paulette Singley, 2019-06-26 How to Read Architecture is based on the fundamental premise that reading and interpreting architecture is something we already do, and that close observation matters. This book enhances this skill so that given an unfamiliar building, you will have the tools to understand it and to be inspired by it. Author Paulette Singley encourages you to misread, closely read, conventionally read, and unconventionally read architecture to stimulate your creative process. This book explores three essential ways to help you understand architecture: reading a building from the outside-in, from the inside-out, and from the position of out-and-out, or formal, architecture. This book erodes boundaries between the frequently compartmentalized fields of interior design, landscape design, and building design with chapters exploring concepts of terroir, scenography, criticality, atmosphere, tectonics, inhabitation, type, form, and enclosure. Using examples and case studies that span a wide range of historical and global precedents, Singley addresses the complex interaction among the ways a building engages its context, addresses its performative exigencies, and operates as an autonomous aesthetic object. Including over 300 images, this book is an essential read for both undergraduate and postgraduate students of architecture with a global focus on the interpretation of buildings in their context.

advent physical therapy grandville: The Eccentric Core Ronna Burger, Patrick Goodin, 2018 This volume is a tribute to the thought of Seth Benardete by contributors who had the rare good fortune of studying with him or those who discovered the treasure of his writings. Benardete was fully immersed in the world of the ancients, starting with Homer, but their works opened up for him a way to the fundamental questions-about justice and love, nature and law, human and divine. Finding the problem of the human good grounded in the city, and the problem of being in god, he was led to the conclusion that Political philosophy is the eccentric core of philosophy. While Benardete wrote this statement reflecting on the theological-political issue in the work of his teacher, Leo Strauss, the paradoxical notion of an eccentric core, in giving this volume its title, is

meant to capture a characteristic of his own way of thinking. The essays in this collection-on the Bible and Homer, the pre-Socratics, Plato, Aristotle, and the Roman writers-indicate the range of Benardete's studies and teaching. The centrality of Plato is evident at the same time in those pieces as well as in the reviews of Benardete's books included here, along with three of his own previously unpublished essays. advent physical therapy grandville: Strong Bonds. Child-animal Relationships in Comics

, 2021 Snoopy and Charlie Brown, Calvin and Hobbes, Tintin and Snowy? comics are home to many memorable child and animal figures. Many cultural productions, especially children's literature and cartoons, stress the similarities between children and animals, similarities that have their limits and

often place the child, as human, above the animal. Still, these fictional situations offer opportunities for thinking of child-animal relationships in diverse ways through, for instance, considering the possibilities of privileged contact between children and animals or of animals that are more knowledgeable and powerful than children and even adults. Despite the prevalence and success of child-animal tandems in comics and culture, we know very little about these relationships. What makes them so popular? How do they work? How much do they vary across time and cultures? What do they tell us about the place of animals and children in comics and in the real world? 'Strong Bonds: Child-animal Relationships in Comics' takes a first, important step in this direction. Bringing together scholars with a diverse range of comics expertise, the volume's chapters combine contextualized readings of comics with relevant theories for interrogating childhood and animality, their overlaps and divergences. The strong bonds between children and animals mapped out here point towards alternative modes of conceptualizing family and identity and, ultimately, alternative means of reading, interpreting and imagining. With chapters on early comics (the Italian children's magazine 'Corriere dei Piccoli' during WWI, Harold Gray's 'Little Orphan Annie') international and regional classics ('Tintin', the Flemish 'Jommeke') and contemporary graphic novels (Bryan Talbot's 'A Tale of One Bad Rat', Brecht Evens's 'Panther'), this critical anthology sheds light on a vast array of child-animal relationships in comics from Europe and North America.
