Starting as a noob and having a dream to become pro..... So from the title of my blog you all can guess that this is my first blog and I'm have no experience in writing blogs but I do want to share something with all of you that when I was in 9th standard there was a teacher of English and he was very expert in failing students most of the time 90% of the students were failed in his subject . It's not just that the children don't have skills or they write everything wrong in the answer book but the teacher used to point out silly mistakes and just mark failure . Sometimes we used to get only 1/2 marks in 5 marks questions .It was new for all of us because we used to get 90% at-least till 8th grade . suddenly the declination in marks makes all of our classmates very upset some of us started skipping his class .Most of us started making fun of him like we use to copy his walking style some time we use to still his books that he carries with him always also some of our teacher don't like him and they said he is nothing without his bag . Although we all were very frustrated because of his gesture that he used to have . His teaching technique was very unique and he never used white board during my whole period of study. He never used any marker to explain anything on board . He was the first teacher I ever knew who never used markers . He used to dictate when he wanted us to write something .Sometimes we asked for a word again but Never repeated the word . In the whole period of time he never told us how to do problems , we have to do things on our own and then we got wrong most of the time and he just put a cross and left the solution to do it again on our own. This was ridiculous that time we somehow by practicing we got that question correct. We also have to read the fiction and tell its meaning to class from 4/5 students he use to choose the correct explanation of the stanza it was quite fun because the student whose explanation is wrong was not allowed to sit till the class end but rule for girls were different he allow them to sit after a while. After all his cruelty we somehow started liking him because the gap between the toppers and backbenchers was no more, everyone

ae mysteries walkthrough legend of the sacred stones: The Interactive Past Angus A. A. Mol, Angenitus Arie Andries Mol, Csilla E. Ariese-Vandemeulebroucke, Krijn H. J. Boom, Aris Politopoulos, 2017 Video games, even though they are one of the present's quintessential media and cultural forms, also have a surprising and many-sided relation with the past. From seminal series like Sid Meier's Civilization or Assassin's Creed to innovative indies like Never Alone and Herald, games have integrated heritages and histories as key components of their design, narrative, and play. This has allowed hundreds of millions of people to experience humanity's diverse heritage through the thrill of interactive and playful discovery, exploration, and (re-)creation. Just as video games have embraced the past, games themselves are also emerging as an exciting new field of inquiry in disciplines that study the past. Games and other interactive media are not only becoming more and more important as tools for knowledge dissemination and heritage communication, but they also provide a creative space for theoretical and methodological innovations. The Interactive Past brings together a diverse group of thinkers -- including archaeologists, heritage scholars, game creators, conservators and more -- who explore the interface of video games and the past in a series of unique and engaging writings. They address such topics as how thinking about and creating games can inform on archaeological method and theory, how to leverage games for the communication of powerful and positive narratives, how games can be studied archaeologically and the challenges they present in terms of conservation, and why the deaths of virtual Romans and the treatment of video game chickens matters. The book also includes a crowd-sourced chapter in the form of a question-chain-game, written by the Kickstarter backers whose donations made this book possible. Together, these exciting and enlightening examples provide a convincing case for how interactive play can power the experience of the past and vice versa.

ae mysteries walkthrough legend of the sacred stones: Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

ae mysteries walkthrough legend of the sacred stones: Fiction as Method Jon K Shaw, Theo Reeves-Everson, 2017-04-07 See the world through the eyes of a search engine, if only for a millisecond; throw the workings of power into sharper relief by any media necessary; reveal access points to other worlds within our own. In the anthology Fiction as Method, a mixture of new and established names in the fields of contemporary art, media theory, philosophy, and speculative fiction explore the diverse ways fiction manifests, and provide insights into subjects ranging from the hive mind of the art collective Orphan Drift to the protocols of online self-presentation. With an extended introduction by the editors, the book invites reflection on how fictions proliferate, take on flesh, and are carried by a wide variety of mediums—including, but not limited to, the written word. In each case, fiction is bound up with the production and modulation of desire, the enfolding of matter and meaning, and the blending of practices that cast the existing world in a new light with those that participate in the creation of new openings of the possible.
