

aetna online health assessment

A Critical Analysis of the Aetna Online Health Assessment: Impact and Future Trends

Author: Dr. Anya Sharma, PhD, MPH, Health Informatics and Public Health Specialist at the University of California, Berkeley.

Publisher: HealthTech Insights (a hypothetical reputable publisher focusing on healthcare technology advancements)

Editor: Sarah Miller, RN, BSN, experienced healthcare journalist with over 10 years of experience covering digital health solutions.

Keywords: Aetna online health assessment, digital health assessment, online health risk assessment, Aetna health assessment, preventive healthcare, telehealth, health risk factors, personalized health recommendations, employee wellness programs, health insurance, Aetna wellness program.

Summary: This analysis examines the Aetna online health assessment, evaluating its strengths, weaknesses, impact on current healthcare trends, and potential future developments. The assessment is positioned as a valuable tool for preventive care and personalized health management, but challenges related to data privacy, user engagement, and algorithm bias are explored. The article concludes by suggesting strategies for improvement and highlighting the broader significance of such digital health tools in the evolving healthcare landscape.

1. Introduction: The Rise of Digital Health Assessments

The healthcare industry is undergoing a significant transformation, driven largely by advancements in technology and a growing emphasis on preventative care. Digital health tools, such as the Aetna online health assessment, are playing an increasingly crucial role in this evolution. These assessments offer a convenient and potentially cost-effective way to identify health risks, promote healthier lifestyles, and improve overall health outcomes. This analysis delves into the specifics of the Aetna online health assessment, exploring its features, impact, and future implications within the broader context of digital health.

2. Features and Functionality of the Aetna Online Health Assessment

The Aetna online health assessment is a self-administered questionnaire designed to evaluate an individual's health risks based on a variety of factors. These factors typically include demographics, lifestyle choices (diet, exercise, smoking), medical history, and family history of certain diseases. The assessment typically utilizes validated questionnaires and algorithms to generate a personalized health risk profile. Following

completion of the Aetna online health assessment, users often receive a detailed report outlining their risk levels for various conditions, along with personalized recommendations for improving their health. This might include suggestions for lifestyle changes, preventative screenings, and referrals to appropriate healthcare resources. A key component of the Aetna online health assessment's functionality is its integration with Aetna's broader health management programs, allowing for seamless tracking of progress and engagement with personalized wellness initiatives.

3. Impact on Current Healthcare Trends

The Aetna online health assessment reflects several significant current healthcare trends:

Preventive Care: The assessment actively promotes preventive healthcare by identifying potential health risks early on. Early detection can lead to timely interventions, reducing the likelihood of severe health issues and related healthcare costs.

Personalized Medicine: By providing personalized risk profiles and recommendations, the Aetna online health assessment contributes to the growing trend of personalized medicine, tailoring healthcare interventions to individual needs.

Telehealth and Remote Monitoring: The online format of the assessment aligns with the expansion of telehealth and remote patient monitoring, enabling access to healthcare services regardless of geographical location or other barriers.

Value-Based Care: By focusing on preventive measures and proactive health management, the Aetna online health assessment contributes to the shift toward value-based care, emphasizing quality over quantity of services.

Employee Wellness Programs: Many employers utilize the Aetna online health assessment as a component of their employee wellness programs, demonstrating its application in workplace health promotion initiatives.

4. Strengths and Limitations of the Aetna Online Health Assessment

Strengths:

Convenience and Accessibility: The online format makes the assessment readily accessible to a wide range of individuals, regardless of their location or schedule.

Personalized Feedback: The generation of personalized health risk profiles and recommendations enhances user engagement and motivates behavior change.

Integration with other health programs: The seamless integration with other Aetna health programs streamlines the user experience and provides a holistic approach to health management.

Data-driven insights: The assessment provides valuable data that can be used to identify population-level trends and inform health interventions.

Limitations:

Data Privacy Concerns: Concerns regarding the security and privacy of user data collected through the Aetna online health assessment need to be carefully addressed. Transparency and robust security measures are crucial to build trust.

Algorithmic Bias: The algorithms used in the assessment could potentially exhibit biases based on factors such as race, gender, or socioeconomic

status, leading to inaccurate or unfair risk assessments. Continuous monitoring and evaluation are needed to mitigate such biases.

User Engagement: Maintaining user engagement with the assessment and its subsequent recommendations can be challenging. Strategies to encourage ongoing participation are essential.

Limited Clinical Applicability: While the Aetna online health assessment provides valuable insights, it should not replace professional medical advice. The results should be interpreted in consultation with a healthcare provider.

5. Future Trends and Implications

The Aetna online health assessment, and similar digital health tools, are likely to undergo significant evolution in the coming years. Future developments may include:

Artificial Intelligence (AI) Integration: AI-powered algorithms could enhance the accuracy and personalization of risk assessments, leading to more precise and targeted interventions.

Wearable Technology Integration: Integration with wearable devices could provide continuous health data, leading to a more comprehensive and real-time understanding of individual health status.

Enhanced User Experience: Further improvements in the user interface and user experience could boost user engagement and adherence to recommendations.

Expansion of Functionality: The assessment's functionality may expand to include additional health metrics, such as mental health and social determinants of health.

6. Conclusion

The Aetna online health assessment represents a valuable contribution to the growing field of digital health. By facilitating preventive care, personalized medicine, and remote health monitoring, it addresses many pressing challenges within the healthcare system. However, it's crucial to acknowledge and address the limitations concerning data privacy, algorithmic bias, and user engagement. Continuous improvement and responsible development are essential to ensure that such tools maximize their potential for improving population health while upholding ethical standards. The future of the Aetna online health assessment, and similar platforms, is intertwined with the broader evolution of digital health and its integration into the fabric of healthcare delivery.

FAQs

1. Is the Aetna online health assessment confidential? Aetna implements robust security measures to protect user data. However, it's crucial to review their privacy policy for detailed information.
1. How accurate are the health risk assessments? The accuracy depends on the completeness and accuracy of the information provided by the user. The assessment uses established algorithms, but individual results should be viewed as estimates, not definitive diagnoses.

1. What if I have pre-existing conditions? The assessment can still provide valuable information, but it's crucial to discuss the results with your physician to determine the appropriate course of action.
1. Is the Aetna online health assessment free? The availability and cost of the assessment depend on your specific plan and employer-sponsored programs. Check with your Aetna representative for details.
1. How often can I take the Aetna online health assessment? This depends on your specific plan and Aetna's guidelines. Some programs allow for annual reassessments.
1. What types of recommendations will I receive? Recommendations will vary depending on your individual risk profile and may include lifestyle changes, preventative screenings, and referrals to specialists.
1. Is the data shared with my employer? The sharing of data with your employer depends on your specific plan and program parameters. Review the relevant terms and conditions for specific details.
1. Can I access my results later? Yes, typically you can access and save your results for future reference. Check the Aetna website for instructions.
1. What if I disagree with the assessment's results? Discuss your concerns with your healthcare provider, who can provide further clarification and guidance.

aetna online health assessment: *Colorectal Cancer Screening* Joseph Anderson, MD, Charles Kahi, MD, 2011-04-23 Colorectal Cancer Screening provides a complete overview of colorectal cancer screening, from epidemiology and molecular abnormalities, to the latest screening techniques such as stool DNA and FIT, Computerized Tomography (CT) Colonography, High Definition Colonoscopes and Narrow Band Imaging. As the text is devoted entirely to CRC screening, it features many facts, principles, guidelines and figures related to screening in an easy access format. This volume provides a complete guide to colorectal cancer screening which will be informative to the subspecialist as well as the primary care practitioner. It represents the only text that provides this up to date information about a subject that is continually changing. For the primary practitioner, information on the guidelines for screening as well as increasing patient participation is presented. For the subspecialist, information regarding the latest imaging techniques as well as flat adenomas and chromoendoscopy are covered. The section on the molecular changes in CRC will appeal to both groups. The text includes up to date information about colorectal screening that encompasses the entire spectrum of the topic and features photographs of polyps as well as diagrams of the morphology of polyps as well as photographs of CT colonography images. Algorithms are presented for all the suggested guidelines. Chapters are devoted to patient participation in screening and risk factors as well as new imaging technology. This useful volume explains the rationale behind screening for CRC. In addition, it covers the different screening options as well as the performance characteristics, when available in the literature, for each test. This volume will be used by the sub specialists who perform screening tests as well as primary care practitioners who refer patients to be screened for colorectal cancer.

aetna online health assessment: *Finding What Works in Health Care* Institute of Medicine, Board on Health Care Services, Committee on Standards for Systematic Reviews of Comparative Effectiveness Research, 2011-07-20 Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence. Systematic reviews identify, select, assess, and synthesize the findings of similar but separate studies, and can help clarify what is known and not known about the potential benefits and harms of drugs, devices, and other healthcare services. Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices, for patients to make well-informed choices about their own care, for professional medical societies and other organizations that develop clinical practice guidelines. Too often systematic reviews are of uncertain or poor quality. There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In *Finding What Works in Health Care* the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness research. The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain. *Finding What Works in Health Care* also proposes a framework for improving the quality of the science underpinning systematic reviews. This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research.

aetna online health assessment: *Informed Consent and Health Literacy* Institute of Medicine, Board on Population Health and Public Health Practice, Roundtable on Health Literacy, 2015-03-04 Informed consent - the process of communication between a patient or research subject and a physician or researcher that results in the explicit agreement to undergo a specific medical intervention - is an ethical concept based on the principle that all patients and research subjects should understand and agree to the potential consequences of the clinical care they receive. Regulations that govern the attainment of informed consent for treatment and research are crucial

to ensuring that medical care and research are conducted in an ethical manner and with the utmost respect for individual preferences and dignity. These regulations, however, often require - or are perceived to require - that informed consent documents and related materials contain language that is beyond the comprehension level of most patients and study participants. To explore what actions can be taken to help close the gap between what is required in the informed consent process and communicating it in a health-literate and meaningful manner to individuals, the Institute of Medicine's Roundtable on Health Literacy convened a one-day public workshop featuring presentations and discussions that examine the implications of health literacy for informed consent for both research involving human subjects and treatment of patients. Topics covered in this workshop included an overview of the ethical imperative to gain informed consent from patients and research participants, a review of the current state and best practices for informed consent in research and treatment, the connection between poor informed consent processes and minority underrepresentation in research, new approaches to informed consent that reflect principles of health literacy, and the future of informed consent in the treatment and research settings. Informed Consent and Health Literacy is the summary of the presentations and discussion of the workshop.

aetna online health assessment: *Improving Diagnosis in Health Care* National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Health Care Services, Committee on Diagnostic Error in Health Care, 2015-12-29 Getting the right diagnosis is a key aspect of health care - it provides an explanation of a patient's health problem and informs subsequent health care decisions. The diagnostic process is a complex, collaborative activity that involves clinical reasoning and information gathering to determine a patient's health problem. According to *Improving Diagnosis in Health Care*, diagnostic errors-inaccurate or delayed diagnoses-persist throughout all settings of care and continue to harm an unacceptable number of patients. It is likely that most people will experience at least one diagnostic error in their lifetime, sometimes with devastating consequences. Diagnostic errors may cause harm to patients by preventing or delaying appropriate treatment, providing unnecessary or harmful treatment, or resulting in psychological or financial repercussions. The committee concluded that improving the diagnostic process is not only possible, but also represents a moral, professional, and public health imperative. *Improving Diagnosis in Health Care*, a continuation of the landmark Institute of Medicine reports *To Err Is Human* (2000) and *Crossing the Quality Chasm* (2001), finds that diagnosis-and, in particular, the occurrence of diagnostic errors-has been largely unappreciated in efforts to improve the quality and safety of health care. Without a dedicated focus on improving diagnosis, diagnostic errors will likely worsen as the delivery of health care and the diagnostic process continue to increase in complexity. Just as the diagnostic process is a collaborative activity, improving diagnosis will require collaboration and a widespread commitment to change among health care professionals, health care organizations, patients and their families, researchers, and policy makers. The recommendations of *Improving Diagnosis in Health Care* contribute to the growing momentum for change in this crucial area of health care quality and safety.

aetna online health assessment: *Measuring Well-being* Matthew T. Lee, Laura D. Kubzansky, Tyler J. VanderWeele, 2021 This edited volume explores conceptual and practical challenges in measuring well-being. Given the bewildering array of measures available, and ambiguity regarding when and how to measure particular aspects of well-being, knowledge in the field can be difficult to reconcile. Representing numerous disciplines including psychology, economics, sociology, statistics, public health, theology, and philosophy, contributors consider the philosophical and theological traditions on happiness, well-being and the good life, as well as recent empirical research on well-being and its measurement. Leveraging insights across diverse disciplines, they explore how research can help make sense of the proliferation of different measures and concepts, while also proposing new ideas to advance the field. Some chapters engage with philosophical and theological traditions on happiness, well-being and the good life, some evaluate recent empirical research on well-being and consider how measurement requirements may vary by context and purpose, and others more explicitly integrate methods and synthesize knowledge across

disciplines. The final section offers a lively dialogue about a set of recommendations for measuring well-being derived from a consensus of the contributors. Collectively, the chapters provide insight into how scholars might engage beyond disciplinary boundaries and contribute to advances in conceptualizing and measuring well-being. Bringing together work from across often siloed disciplines will provide important insight regarding how people can transcend unhealthy patterns of both individual behavior and social organization in order to pursue the good life and build better societies--

aetna online health assessment: A Framework for Educating Health Professionals to Address the Social Determinants of Health National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Global Health, Committee on Educating Health Professionals to Address the Social Determinants of Health, 2016-10-14 The World Health Organization defines the social determinants of health as the conditions in which people are born, grow, work, live, and age, and the wider set of forces and systems shaping the conditions of daily life. These forces and systems include economic policies, development agendas, cultural and social norms, social policies, and political systems. In an era of pronounced human migration, changing demographics, and growing financial gaps between rich and poor, a fundamental understanding of how the conditions and circumstances in which individuals and populations exist affect mental and physical health is imperative. Educating health professionals about the social determinants of health generates awareness among those professionals about the potential root causes of ill health and the importance of addressing them in and with communities, contributing to more effective strategies for improving health and health care for underserved individuals, communities, and populations. Recently, the National Academies of Sciences, Engineering, and Medicine convened a workshop to develop a high-level framework for such health professional education. A Framework for Educating Health Professionals to Address the Social Determinants of Health also puts forth a conceptual model for the framework's use with the goal of helping stakeholder groups envision ways in which organizations, education, and communities can come together to address health inequalities.

aetna online health assessment: Laboratory Tests for the Detection of Reproductive Tract Infections WHO Regional Office for the Western Pacific, World Health Organization. Regional Office for the Western Pacific, 1999 On cover and title page: STI/HIV.

aetna online health assessment: Oral Health Literacy Institute of Medicine, Board on Population Health and Public Health Practice, Roundtable on Health Literacy, 2013-02-19 The Institute of Medicine (IOM) Roundtable on Health Literacy focuses on bringing together leaders from the federal government, foundations, health plans, associations, and private companies to address challenges facing health literacy practice and research and to identify approaches to promote health literacy in both the public and private sectors. The roundtable serves to educate the public, press, and policy makers regarding the issues of health literacy, sponsoring workshops to discuss approaches to resolve health literacy challenges. It also builds partnerships to move the field of health literacy forward by translating research findings into practical strategies for implementation. The Roundtable held a workshop March 29, 2012, to explore the field of oral health literacy. The workshop was organized by an independent planning committee in accordance with the procedures of the National Academy of Sciences. The planning group was composed of Sharon Barrett, Benard P. Dreyer, Alice M. Horowitz, Clarence Pearson, and Rima Rudd. The role of the workshop planning committee was limited to planning the workshop. Unlike a consensus committee report, a workshop summary may not contain conclusions and recommendations, except as expressed by and attributed to individual presenters and participants. Therefore, the summary has been prepared by the workshop rapporteur as a factual summary of what occurred at the workshop.

aetna online health assessment: Attention-Deficit/Hyperactivity Disorder in Children and Adolescents Brian P. Daly, Aimee K. Hildenbrand, Shannon G. Litke, Ronald T. Brown, 2023-12-11 State-of-the-art guidance on the effective assessment and treatment of children and adolescents with ADHD New updated edition Provides guidance on multimodal care and diversity

issues Includes downloadable handouts This updated new edition of this popular text integrates the latest research and practices to give practitioners concise and readable guidance on the assessment and effective treatment of children and adolescents with attention-deficit/hyperactivity disorder (ADHD). This common childhood condition can have serious consequences for academic, emotional, social, and occupational functioning. When properly identified and diagnosed, however, there are many interventions that have established benefits. This volume is both a compact how to reference, for use by professionals in their daily work, and an ideal educational reference for students. It has a similar structure to other books in the Advances in Psychotherapy series, and informs the reader of all aspects involved in the assessment and management of ADHD. Practitioners will particularly appreciate new information on the best approaches to the ideal sequencing of treatments in multimodal care, and the important diversity considerations. Suggestions for further reading, support groups, and educational organizations are also provided. A companion volume Attention-Deficit/Hyperactivity Disorder (ADHD) in Adults is also available.

aetna online health assessment: Birth Settings in America National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Assessing Health Outcomes by Birth Settings, 2020-05-01 The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.

aetna online health assessment: Integrated Electrophysical Agents[Formerly Entitled *Electrotherapy: Evidence-Based Practice*] Tim Watson, Ethne Nussbaum, 2020-03-28 Electrophysical Modalities (formerly Electrotherapy: Evidence-Based Practice) is back in its 13th edition, continuing to uphold the standard of clinical research and evidence base for which it has become renowned. This popular textbook comprehensively covers the use of electrotherapy in clinical practice and includes the theory which underpins that practice. Over recent years the range of therapeutic agents involved and the scope for their use have greatly increased and the new edition includes and evaluates the latest evidence and most recent developments in this fast-growing field. Tim Watson is joined by co-editor Ethne Nussbaum and both bring years of clinical, research and teaching experience to the new edition, with a host of new contributors, all leaders in their specialty.

aetna online health assessment: Drug-Induced Sleep Endoscopy Nico de Vries, Ottavio Piccin, Olivier M. Vanderveken, 2020-11-11 The definitive resource on the innovative use of DISE for obstructive sleep apnea Obstructive sleep apnea is the most prevalent sleep-related breathing disorder, impacting an estimated 1.36 billion people worldwide. In the past, OSA was almost exclusively treated with Continuous Positive Airway Pressure (CPAP), however, dynamic assessment of upper airway obstruction with Drug-Induced Sleep Endoscopy (DISE) has been instrumental in developing efficacious alternatives. Drug-Induced Sleep Endoscopy: Diagnostic and Therapeutic Applications by Nico de Vries, Ottavio Piccin, Olivier Vanderveken, and Claudio Vicini is the first textbook on DISE written by world-renowned sleep medicine pioneers. Twenty-four chapters feature contributions from an impressive group of multidisciplinary international experts. Foundational chapters encompass indications, contraindications, informed consent, organization and logistics, patient preparation, and drugs used in DISE. Subsequent chapters focus on treatment outcomes, the role of DISE in therapeutic decision making and upper airway stimulation, pediatric sleep endoscopy, craniofacial syndromes, advanced techniques, and more. Key Highlights Comprehensive

video library highlights common and rare DISE findings A full spectrum of sleep disordered breathing and OSA topics, from historic to future perspectives Insightful clinical pearls on preventing errors and managing complications including concentric and epiglottis collapse Discussion of controversial DISE applications including oral appliances and positional and combination therapies This unique book is essential reading for otolaryngology residents, fellows, and surgeons. Clinicians in other specialties involved in sleep medicine will also benefit from this reference, including pulmonologists, neurologists, neurophysiologists, maxillofacial surgeons, and anesthesiologists.

aetna online health assessment: *Humanizing Healthcare: Hardwire Humanity into the Future of Health* Summer Knight, 2021-04-06 From a top healthcare futurist, frontline innovator, and Deloitte consultant comes a bold new vision for Humanizing Healthcare—hardwiring humanity at every point of care—that is good for people and good for business. Our nation’s healthcare and life science industry has changed dramatically over the past few decades—and not always for the better. In addition to rising costs and access challenges, the current system has caused needless suffering for patients and clinicians alike: physically, emotionally, financially, and socially. There have been numerous efforts to overhaul the system, but nothing has yet cured healthcare of its illnesses. In *Humanizing Healthcare*, paramedic-turned-physician executive and Deloitte Managing Director Summer Knight draws on her years of experience on the frontlines of healthcare to offer a powerful road map for real reform. Her refreshingly human approach to transforming our healthcare system provides practical strategies to: Identify core problems in the current system—and find the best workable solutions. Combine healthcare with social services—and build stronger networks of support. Use digital technology and virtual visits to provide expert care at lower costs. Empower healthcare consumers to make smarter choices in their treatment and purchasing options. Form therapeutic alliances between the clinical team (physicians and staff) and the home team (family and friends). Build a solid foundation for ongoing improvements that are truly sustainable, affordable, and humane. This is a clear, compassionate guide to how the industry can transform to embody a more human perspective and use it as a collective north star that will positively impact all stakeholders—consumers, providers, caregivers, staff, executives, shareholders, and the government—alike. Most importantly, this book will open your eyes to what’s possible when you create high-quality, deeply felt alliances that deliver consumer-driven care with value to all. *Humanizing Healthcare* is the future of health.

aetna online health assessment: *Convergent Strabismus* L.E. Evens, 2012-12-06 When the Board of Directors of the Belgian Ophthalmological Society, in its session of November 26th 1978, asked me to prepare a report on strabismus to be presented at the joint meeting of the Dutch and Belgian Ophthalmological Societies to be held on June 13th 1981, I felt greatly honored but still more overwhelmed by the immensity of the task. I took advantage of the complete liberty given to me by the Board of Directors, first to limit the work to one particular form of strabismus, i.e. the convergent comitant form; second, to seek the help of what I thought to be the best strabologists in the Low Countries; third, to aim not at an encyclopedic treatise but at a practical volume destined to the general ophthalmologist. This volume is thus limited to the various aspects of convergent strabismus, more accurately of comitant convergent strabismus. The omission of the word comitant is purposely made to avoid the difficulties accompanying the explanation of this term and all the acrobatics needed to explain that most comitant strabismus are not completely comitant. The choice of this particular form of strabismus seems logical. First of all, it is the most common form of strabismus. On the other hand, most principles concerning examination and treatment can with some modifications be applied to other forms of strabismus.

aetna online health assessment: *Race, Ethnicity, and Language Data* Institute of Medicine, Board on Health Care Services, Subcommittee on Standardized Collection of Race/Ethnicity Data for Healthcare Quality Improvement, 2009-12-30 The goal of eliminating disparities in health care in the United States remains elusive. Even as quality improves on specific measures, disparities often

persist. Addressing these disparities must begin with the fundamental step of bringing the nature of the disparities and the groups at risk for those disparities to light by collecting health care quality information stratified by race, ethnicity and language data. Then attention can be focused on where interventions might be best applied, and on planning and evaluating those efforts to inform the development of policy and the application of resources. A lack of standardization of categories for race, ethnicity, and language data has been suggested as one obstacle to achieving more widespread collection and utilization of these data. Race, Ethnicity, and Language Data identifies current models for collecting and coding race, ethnicity, and language data; reviews challenges involved in obtaining these data, and makes recommendations for a nationally standardized approach for use in health care quality improvement.

aetna online health assessment: Weights & Measures Barbara Rosen, Linda Barrington, 2008

aetna online health assessment: *Males With Eating Disorders* Arnold E. Andersen, 2014-06-17 First published in 1990. The subject of anorexia nervosa and, more recently, bulimia nervosa in males has been a source of interest and controversy in the fields of psychiatry and medicine for more than 300 years. These disorders, sometimes called eating disorders, raise basic questions concerning the nature of abnormalities of the motivated behaviors: Are they subsets of more widely recognized illnesses such as mood disorders? Are they understandable by reference to underlying abnormalities of biochemistry or brain function? In what ways are they similar to and in what ways do they differ from anorexia nervosa and bulimia nervosa in females? This book will be of interest to a wide variety of people—physicians, psychologists, nurses, social workers, occupational therapists, nutritionists, educators, and all others who may be interested for personal or professional reasons.

aetna online health assessment: Old Records Never Die Eric Spitznagel, 2016-04-12 A Hudson Booksellers Best Non-Fiction Book of the Year, with foreword by Wilco's Jeff Tweedy High Fidelity meets Killing Yourself to Live when one man searches for his lost record collection. As he finds himself within spitting distance of middle-age, journalist Eric Spitznagel feels acutely the loss of... something. Freedom? Maybe. Coolness? Could be. The records he sold in a financial pinch? Definitely. To find out for sure, he sets out on a quest to find the original vinyl artifacts from his past. Not just copies. The exact same records: The Bon Jovi record with his first girlfriend's phone number scrawled on the front sleeve. The KISS Alive II he once shared with his little brother. The Replacements Let It Be he's pretty sure, 20 years later, would still smell like weed. As he embarks on his hero's journey, he reminisces about the actual records, the music, and the people he listened to it with—old girlfriends, his high school pals, and, most poignantly, his father and his young son. He explores the magic of music and memory as he interweaves his adventures in record-culture with questions about our connection to our past, the possibility of ever recapturing it, and whether we would want to if we could. Memories are far more indelible when married to the physical world, and Spitznagel proves the point in this vivid book. We love vinyl records because they combine the tactile, the visual, the seeable effects of age and care and carelessness. When he searches for the records he lost and sold, Spitznagel is trying to return to a tangible past, and he details that process with great sensitivity and impact.—Dave Eggers, New York Times bestselling author of *The Circle*

aetna online health assessment: Integration of Medical and Dental Care and Patient Data Valerie Powell, Franklin M. Din, Amit Acharya, Miguel Humberto Torres-Urquidy, 2012-01-18 This book informs readers of the needs and rationale for the integration of medical and dental care and information with an international perspective as to how and where medical and dental care separated into specific domains. It provide high level guidance on issues involved with care and data integration and how to achieve an integrated model of health care supported by integrated HIT. A

patient typically expects that a visit to a dentist can usually be resolved immediately. This expectation places a premium on instant, accurate, thorough, and current information. The state-of-the-art of fully integrated (dental-medical) electronic health record (EHR) is covered and this is contrasted with the current state of dental-medical software. While dentists in the US Veterans Health Administration (VHA), the US Indian Health Service (IHS), or the US military, for example, have access to fully integrated health records, most US clinicians still gather information from separate sources via fax or phone calls. The authors provide an in-depth discussion of the role of informatics and information science in the articulation of medical and dental practices and clinical data with the focus on applied clinical informatics to improve quality of care, practice efficiency, coordination and continuity of care, communication between physicians and dentists and to provide a more comprehensive care for the patients. Lastly, the book examines advances in medical and dental research and how these may affect dentistry in the future. Most new advances in healthcare research are information-intensive.

aetna online health assessment: The Promise of Assistive Technology to Enhance Activity and Work Participation National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on the Use of Selected Assistive Products and Technologies in Eliminating or Reducing the Effects of Impairments, 2017-09-01 The U.S. Census Bureau has reported that 56.7 million Americans had some type of disability in 2010, which represents 18.7 percent of the civilian noninstitutionalized population included in the 2010 Survey of Income and Program Participation. The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) program. As of December 2015, approximately 11 million individuals were SSDI beneficiaries, and about 8 million were SSI beneficiaries. SSA currently considers assistive devices in the nonmedical and medical areas of its program guidelines. During determinations of substantial gainful activity and income eligibility for SSI benefits, the reasonable cost of items, devices, or services applicants need to enable them to work with their impairment is subtracted from eligible earnings, even if those items or services are used for activities of daily living in addition to work. In addition, SSA considers assistive devices in its medical disability determination process and assessment of work capacity. The Promise of Assistive Technology to Enhance Activity and Work Participation provides an analysis of selected assistive products and technologies, including wheeled and seated mobility devices, upper-extremity prostheses, and products and technologies selected by the committee that pertain to hearing and to communication and speech in adults.

aetna online health assessment: Guidelines for Perinatal Care American Academy of Pediatrics, American College of Obstetricians and Gynecologists, 1997 This guide has been developed jointly by the American Academy of Pediatrics and the American College of Obstetricians and Gynecologists, and is designed for use by all personnel involved in the care of pregnant women, their fetuses, and their neonates.

aetna online health assessment: Knowing What Works in Health Care Institute of Medicine, Board on Health Care Services, Committee on Reviewing Evidence to Identify Highly Effective Clinical Services, 2008-05-29 There is currently heightened interest in optimizing health care through the generation of new knowledge on the effectiveness of health care services. The United States must substantially strengthen its capacity for assessing evidence on what is known and not known about what works in health care. Even the most sophisticated clinicians and consumers struggle to learn which care is appropriate and under what circumstances. Knowing What Works in Health Care looks at the three fundamental health care issues in the United States-setting priorities for evidence assessment, assessing evidence (systematic review), and developing evidence-based clinical practice guidelines-and how each of these contributes to the end goal of effective, practical health care systems. This book provides an overall vision and roadmap for improving how the nation uses scientific evidence to identify the most effective clinical services. Knowing What Works in Health Care gives private and public sector firms, consumers, health care

professionals, benefit administrators, and others the authoritative, independent information required for making essential informed health care decisions.

aetna online health assessment: Healthcare Analytics Hui Yang, Eva K. Lee, 2016-10-13 Features of statistical and operational research methods and tools being used to improve the healthcare industry With a focus on cutting-edge approaches to the quickly growing field of healthcare, Healthcare Analytics: From Data to Knowledge to Healthcare Improvement provides an integrated and comprehensive treatment on recent research advancements in data-driven healthcare analytics in an effort to provide more personalized and smarter healthcare services. Emphasizing data and healthcare analytics from an operational management and statistical perspective, the book details how analytical methods and tools can be utilized to enhance healthcare quality and operational efficiency. Organized into two main sections, Part I features biomedical and health informatics and specifically addresses the analytics of genomic and proteomic data; physiological signals from patient-monitoring systems; data uncertainty in clinical laboratory tests; predictive modeling; disease modeling for sepsis; and the design of cyber infrastructures for early prediction of epidemic events. Part II focuses on healthcare delivery systems, including system advances for transforming clinic workflow and patient care; macro analysis of patient flow distribution; intensive care units; primary care; demand and resource allocation; mathematical models for predicting patient readmission and postoperative outcome; physician-patient interactions; insurance claims; and the role of social media in healthcare. Healthcare Analytics: From Data to Knowledge to Healthcare Improvement also features: • Contributions from well-known international experts who shed light on new approaches in this growing area • Discussions on contemporary methods and techniques to address the handling of rich and large-scale healthcare data as well as the overall optimization of healthcare system operations • Numerous real-world examples and case studies that emphasize the vast potential of statistical and operational research tools and techniques to address the big data environment within the healthcare industry • Plentiful applications that showcase analytical methods and tools tailored for successful healthcare systems modeling and improvement The book is an ideal reference for academics and practitioners in

operations research, management science, applied mathematics, statistics, business, industrial and systems engineering, healthcare systems, and economics. Healthcare Analytics: From Data to Knowledge to Healthcare Improvement is also appropriate for graduate-level courses typically offered within operations research, industrial engineering, business, and public health departments.

aetna online health assessment: Home Health Care Nursing Ida Marie Martinson, Ann Widmer, Carmen J. Portillo, 2002 This New Edition of Home Health Care Nursing is a comprehensive and authoritative text for nurses working in the dynamic field of home health. Administrative and clinical content is included, providing all the essential, detailed material that today's home health care nurse needs. It places home health nursing in the context of the health care system, discussing such administrative issues as the continuum of care, discharge planning, managed care, and reimbursement. It also presents the basic competencies of home health: assessment, nursing diagnosis, symptom control, nutritional support, and rehabilitation. Caring for clients throughout the lifespan and in a family context is emphasized, as well as the specialized care of clients with specific disorders most commonly seen in the home, such as pulmonary disease, cancer, AIDS, stroke, Alzheimer's disease, heart failure, and renal and genitourinary disorders. Finally, it identifies and discusses the professional challenges of ethics, stress, and research in home health nursing. Case studies are included throughout the book to help illustrate the concepts being discussed Paediatric content added to each chapter of the Specific Disorders section as appropriate; helps guide the care of this population of home care clients New chapters on Case Management and Home Health Care (chapter 2) and Managed Care (chapter 5) New chapters on Cultural Competency in Home Care (chapter 14) and Psychiatric Home Care Nursing (chapter 26) An extensively revised chapter on Research in Home Care

aetna online health assessment: Quality First United States. Advisory Commission on Consumer Protection and Quality in the Health Care Industry, 1998

aetna online health assessment: Fischer's Mastery of Surgery Josef E. Fischer, 2012 The scope of Fischer's Mastery of Surgery, Sixth Edition, is consistent with the broad training of a general surgeon, providing extensive coverage of vascular surgery as well as of common thoracic, breast, esophageal, endocrine, colorectal, gastric, pancreatic, liver, and biliary procedures. Each procedural chapter reviews the essentials of diagnosis, anatomy, and pre-operative planning, but focuses most heavily on step-by-step depictions and descriptions of procedures. Each chapter concludes, as is traditional for this classic text, with an editorial commentary which strives to put the chapter in a broad context and provide helpful critiques of the most recent literature. The sixth edition will include a dozen new chapters, including endovascular treatment of varicose veins, fasciotomy, and thoracic aortic transaction. The vascular section has been completely reorganized and will incorporate both open and endovascular procedures. For the first time, the sixth edition is in full color.--Provided by publisher.

aetna online health assessment: How to Thrive in Counseling Private Practice Anthony Centore, Anthony Centore Ph D, 2016-07-25 Are you looking to start, build or grow a counseling private practice? Are you wanting to get off the ground, open your doors, or build a caseload of clients? Are you confused about networking, marketing, licensing, networking, billing or other practice management issues that you never even heard of when you were in grad school? Are you thinking about converting a successful solo practice into a larger group or agency? In this work, Dr. Anthony Centore (Licensed Counselor, Private Practice Consultant for the American Counseling Association, and CEO of Thriveworks) shares road-tested practice building strategies from his direct, extensive, experience growing a successful chain of mental health counseling practices. A must have resource for anyone getting started, or working to grow, a coaching or counseling practice.

aetna online health assessment: Patient Assessment in Pharmacy Yolanda M. Hardy, 2014-09-29 Patient Assessment in Pharmacy: A Culturally Competent Approach thoroughly prepares pharmacy students to assess patients from a variety of cultural and ethnic groups in a culturally appropriate manner. Featuring a practical approach, this essential resource begins by establishing

the importance of culturally competent care as well as the process for conducting a patient history and interview. Later chapters focus on specific organ systems and discuss common medical conditions that a pharmacist may encounter, with an emphasis on medical conditions that may have a higher incidence in certain cultural groups.

aetna online health assessment: *Health Informatics in the Cloud* Mark L. Braunstein, 2012-10-16 Despite its high cost, the US healthcare system produces relatively short life spans, and is wasteful, inefficient and has serious safety and quality issues. While other industries have surmounted similar challenges by transforming themselves through information technology, healthcare lags behind. Major reasons are that our approaches to care delivery and financial incentives were designed for a bygone era. Beyond that the technology offered to practitioners has often been overly expensive, poorly designed, overly proprietary, hard to implement and difficult to use. Spurred by a unique, one-time Federal stimulus and the new mobile, wireless and cloud technologies now available, this landscape is rapidly changing. To succeed going forward practitioners, and those interested in entering the field, need to understand the new driving forces and have a basic understanding of contemporary clinical informatics. Practitioners, in particular, need to understand the alternative technologies and approaches available for their use in individual patient care and more continuous management of their chronic disease patients. To efficiently meet these needs, this book provides an introduction to the rationale for care transformation through clinical informatics; its application to patient care outside of hospitals; and a look at its future. Key points are illustrated throughout by actual examples of open source and commercial health IT products and services. While written with practitioners and students entering the field of clinical informatics in mind, the book eschews technical terminology and is easily accessible by the lay reader not proficient in clinical medicine or information technology.
