afk arena vexing voodoo guide: *Agents of Transculturation* Sebastian Jobs, Gesa Mackenthun, 2013 Ever since antiquity, but increasingly since the global transformation of the world order in the early modern period, communication between members of different cultural groups depended on translators, diplomats, traders, and other specialists with a knowledge of both cultures. Successful communication and traffic relied on the mediating agency of persons who had been exposed, often in their childhood or through captivities, to the customs and languages of both cultures involved in the contact. Other border crossers and go-betweens acted as missionaries, traders, political refugees, beachcombers, pirates, anthropologists, actors in zoos, runaway slaves, and itinerant doctors. Because of their frequently precarious lives, the written traces left by these figures are often thin.

While some of their lives have to be carefully reconstructed through critical readings of the documents left by others (frequently by their enemies), others have left autobiographical texts which allow for a richer assessment of their function as cultural border crossers and mediators. With examples covering from various historical periods between the early modern period and the present, as well as geographical areas such as the Mediterranean, Africa, the Americas, Hawaii, New Zealand and northern Europe, scholars from various disciplines and methodological backgrounds - reaching from history to religious studies and from literary studies to ethnology - fathom the intricacies of in-betweenness and reflect on the impact which agents of transculturation have in situations of cultural, social and political encounters.

afk arena vexing voodoo guide: *International Migration Research* Ewa Morawska, 2017-03-02 The centrality of international migration as a process articulating major transformations of contemporary societies offers an opportunity to make it the shared component of the theoretical and research agendas of the social science disciplines. In this volume a multidisciplinary team of authors presents a stocktaking account of current research on international migration in order to lay the ground for such an interdisciplinary collaboration. The first part of the book scrutinizes the theoretical concepts and interpretative frameworks that inform migration research and their impact on empirical studies in selected disciplines. The next two sections examine the epistemological premises underlying migration research in different fields of the social sciences and the challenges of 'informed translations' between these approaches. The final section considers the interdependency between the academic study of migration and the social and political contexts in which it is embedded. The book invites researchers to address the challenges raised by the empowerment of migration research, offering ways of communicating across different specializations and guiding readers towards a meaningful interdisciplinarity.

afk arena vexing voodoo guide: *Economic Interdependence and War* Dale C. Copeland, 2014-11-02 Does growing economic interdependence among great powers increase or decrease the chance of conflict and war? Liberals argue that the benefits of trade give states an incentive to stay peaceful. Realists contend that trade compels states to struggle for vital raw materials and markets. Moving beyond the stale liberal-realist debate, *Economic Interdependence and War* lays out a dynamic theory of expectations that shows under what specific conditions interstate commerce will reduce or heighten the risk of conflict between nations. Taking a broad look at cases spanning two centuries, from the Napoleonic and Crimean wars to the more recent Cold War crises, Dale Copeland demonstrates that when leaders have positive expectations of the future trade environment, they want to remain at peace in order to secure the economic benefits that enhance long-term power. When, however, these expectations turn negative, leaders are likely to fear a loss of access to raw materials and markets, giving them more incentive to initiate crises to protect their commercial interests. The theory of trade expectations holds important implications for the understanding of Sino-American relations since 1985 and for the direction these relations will likely take over the next two decades. *Economic Interdependence and War* offers sweeping new insights into historical and contemporary global politics and the actual nature of democratic versus economic peace.

afk arena vexing voodoo guide: *Global and Regional Problems* Professor Pami Aalto, Professor Sami Moisio, Professor Vilho Harle, 2013-04-28 Distinctive due to explicit and systematically developed links between international relations (IR) and related disciplines, this book addresses global and regional interactions and the complex policy problems that often characterise this agenda. Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations, states, diplomats, mediators and humankind in general. Whilst the authors do not reject the present IR, they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline, but also for those working on 'international', 'foreign', 'global' or 'interregional' issues in other disciplines and fields of research. In this instance they pay particular attention to linking up with peace research, international political economy (IPE) and cultural political economy (CPE), sociology, political geography, development studies, linguistics, cultural studies, environmental studies and energy research, gender studies, and traditions of area studies.

afk arena vexing voodoo guide: Crisis and War Patrick James, 1988 Using an analysis of patterns of international crisis and war from 1948 to 1975, Patrick James suggests why some international crises result in war while others do not. Over one hundred cases are used to assess the three most prominent explanations for crisis escalation to war: (1) war is the result of rational choice by leaders who expect to gain from it; (2) war is the product of the outward projection of political unrest within states; and (3) war is the result of classical balance of power politics. James concludes that the best explanations for war include elements from all three categories.

By sharing his research, advice, and a healthy dose of common sense, he'll help you rest easy knowing you have a plan for the worst—even if the worst never comes. afk arena vexing voodoo guide: Humanities, Culture, and Interdisciplinarity Julie Thompson Klein, 2012-02-01 The study of culture in the American academy is not confined to a single field, but is a broad-based set of interests located within and across disciplines. This book investigates the relationship among three major ideas in the American academy—interdisciplinarity, humanities, and culture—and traces the convergence of these ideas from the colonial college to new scholarly developments in the latter half of the twentieth century. Its aim is twofold: to define the changing relationship of these three ideas and, in the course of doing so, to extend present thinking about the concept of American cultural studies. The book includes two sets of case studies—the first on the implications of interdisciplinarity for literary studies, art history, and music; the second on the shifting trajectories of American studies, African American studies, and women's studies—and concludes by asking what impact new scholarly practices have had on humanities education, particularly on the undergraduate curriculum.

afk arena vexing voodoo guide: *Explaining the Iraq War* Frank P. Harvey, 2011-10-20 The

almost universally accepted explanation for the Iraq War is very clear and consistent - the US decision to attack Saddam Hussein's regime on March 19, 2003 was a product of the ideological agenda, misguided priorities, intentional deceptions and grand strategies of President George W. Bush and prominent 'neoconservatives' and 'unilateralists' on his national security team. Despite the widespread appeal of this version of history, Frank P. Harvey argues that it remains an unsubstantiated assertion and an underdeveloped argument without a logical foundation. His book aims to provide a historically grounded account of the events and strategies which pushed the US-UK coalition towards war. The analysis is based on both factual and counterfactual evidence, combines causal mechanisms derived from multiple levels of analysis and ultimately confirms the role of path dependence and momentum as a much stronger explanation for the sequence of decisions that led to war.

afk arena vexing voodoo guide: *Interdisciplinary Research : Case Studies from Health and Social Science* Frank Kessel, Patricia Rosenfield Carnegie Corporation of New York, Norman Anderson American Psychological Association, 2008-03-11 Interdisciplinary research now receives a great deal of attention because of the rich, creative contributions it often generates. But a host of factors--institutional, interpersonal and intellectual--also make a daunting challenge of conducting research outside one's usual domain. This newly updated and revised edition of *Interdisciplinary Research* is a substantive and practical guide to the most effective avenues for collaborative and integrative research in the social, behavioral, and bio-medical sciences. It provides answers to questions such as what is the best way to conduct interdisciplinary research on topics related to human health, behavior, and development? Which are the most successful interdisciplinary research programs in these areas? How do you identify appropriate collaborators? How do you find dedicated funding streams? How do you overcome peer-review and publishing challenges? This is the only book that provides answers directly from researchers who have carried out successful interdisciplinary programs. The editors give a concise account of the lessons that can be taken from the book, and then present a series of case studies that reveal the most successful interdisciplinary research programs. These programs provide a variety of models of how best to undertake interdisciplinary research. Each of the chapter authors has carried out innovative, collaborative programs, and all give compelling accounts of the benefits of interdisciplinary research and the central strategies required to achieve them.

afk arena vexing voodoo guide: Human Rights Activism and the End of the Cold War Sarah B. Snyder, 2011-06-20 Two of the most pressing questions facing international historians today are how and why the Cold War ended. *Human Rights Activism and the End of the Cold War* explores how, in the aftermath of the signing of the Helsinki Final Act in 1975, a transnational network of activists committed to human rights in the Soviet Union and Eastern Europe made the topic a central element in East-West diplomacy. As a result, human rights eventually became an important element of Cold War diplomacy and a central component of détente. Sarah B. Snyder demonstrates how this network influenced both Western and Eastern governments to pursue policies that fostered the rise of organized dissent in Eastern Europe, freedom of movement for East Germans and improved human rights practices in the Soviet Union - all factors in the end of the Cold War.

afk arena vexing voodoo guide: *Why Nations Fight* Richard Ned Lebow, 2010-09-02 Four generic motives have historically led states to initiate war: fear, interest, standing and revenge. Using an original dataset, Richard Ned Lebow examines the distribution of wars across three and a half centuries and argues that, contrary to conventional wisdom, only a minority of these were motivated by security or material interest. Instead, the majority are the result of a quest for standing, and for revenge - an attempt to get even with states who had previously made successful territorial grabs. Lebow maintains that today none of these motives are effectively served by war - it is increasingly counterproductive - and that there is growing recognition of this political reality. His analysis allows for more fine-grained and persuasive forecasts about the future of war as well as highlighting areas of uncertainty.

afk arena vexing voodoo guide: *Theories of Violent Conflict* Jolle Demmers, 2016-08-10 This revised and updated second edition introduces students of violent conflict to a variety of prominent theoretical approaches, and examines the ontological stances and epistemological traditions underlying these approaches. *Theories of Violent Conflict* takes the centrality of the 'group' as an actor in contemporary conflict as a point of departure, leaving us with three main questions: • What makes a group? • Why and how does a group resort to violence? • Why and how do or don't they stop? The book examines and compares the ways by which these questions are addressed from a number of perspectives: primordialism/constructivism, social identity theory, critical political economy, human needs theory, relative deprivation theory, collective action theory and rational choice theory. The final chapter aims to synthesize structure and agency-based theories by proposing a critical discourse analysis of violent conflict. With new material on violence, religion, extremism and military urbanism, this book will be essential reading for students of war and conflict studies, peace studies, conflict analysis and conflict resolution, and ethnic conflict, as well as security studies and IR in general.

afk arena vexing voodoo guide: *Bridges and Boundaries* Colin Elman, Miriam Fendius Elman, 2001-04-13 Bridges and Boundaries offers a conversation between what might loosely be described as traditionalist diplomatic and military historians, and political scientists who employ qualitative case study methods to examine international relations. The book opens with a series of chapters discussing differences, commonalities, and opportunities for cross-fertilization between the two disciplines. To help focus the dialogue on real events and research, the volume then revisits three empirical topics that have been studied at length by members of both disciplines: British hegemony in the nineteenth century; diplomacy in the interwar period and the causes of World War II; and the origins and course of the Cold War. For each of these subjects, a political scientist, a historian, and a commentator reflect on how disciplinary guild rules have shaped the study of international events. The book closes with incisive overviews by Robert Jervis and Paul W. Schroeder. Bridges and Boundaries explores how historians and political scientists can learn from one another and illustrates the possibilities that arise when open-minded scholars from different disciplines sit down to talk.

afk arena vexing voodoo guide: *Explaining Foreign Policy* Steve A. Yetiv, 2011-03-01 Steve A. Yetiv has developed an interdisciplinary, integrated approach to studying foreign policy decisions, which he applies here to understand better how and why the United States went to war in the Persian Gulf in 1991 and 2003. Yetiv's innovative method employs the rational actor, cognitive, domestic politics, groupthink, and bureaucratic politics models to explain the foreign policy behavior of governments. Drawing on the widest set of primary sources to date—including a trove of recently declassified documents—and on interviews with key actors, he applies these models to illuminate the decision-making process in the two Gulf Wars and to develop theoretical notions about foreign policy. What Yetiv discovers, in addition to empirical evidence about the Persian Gulf and Iraq wars, is that no one approach provides the best explanation, but when all five are used, a fuller and more complete understanding emerges. Thoroughly updated with a new preface and a chapter on the 2003 Iraq War, *Explaining Foreign Policy*, already widely used in courses, will continue to be of interest to students and scholars of foreign policy, international relations, and related fields.
