Mnyandu uses trade patterns, analyses of governmental organizations and initiatives, and other socio-economic data to determine the extent to which developmental change or stasis has taken place as relations between South Africa and China have deepened. Tracing South Africa's changing attitudes and policies towards China's involvement, the impact of programs involving commodities trades on unemployment, and the prospective outcomes of an endogenous developmental policy, Mnyandu concludes by proposing a quadri-linear model as a tool for more comprehensive analyses of China's relations not only with South Africa, but other African countries as well to avoid disinformation on Africa-China issues.

african studies courses online: *The Legend of the Black Mecca* Maurice J. Hobson,

2017-10-03 For more than a century, the city of Atlanta has been associated with black achievement in education, business, politics, media, and music, earning it the nickname the black Mecca. Atlanta's long tradition of black education dates back to Reconstruction, and produced an elite that flourished in spite of Jim Crow, rose to leadership during the civil rights movement, and then took power in the 1970s by building a coalition between white progressives, business interests, and black Atlantans. But as Maurice J. Hobson demonstrates, Atlanta's political leadership--from the election of Maynard Jackson, Atlanta's first black mayor, through the city's hosting of the 1996 Olympic Games--has consistently mishandled the black poor. Drawn from vivid primary sources and unnerving oral histories of working-class city-dwellers and hip-hop artists from Atlanta's underbelly, Hobson argues that Atlanta's political leadership has governed by bargaining with white business interests to the detriment of ordinary black Atlantans. In telling this history through the prism of the black New South and Atlanta politics, policy, and pop culture, Hobson portrays a striking schism between the black political elite and poor city-dwellers, complicating the long-held view of Atlanta as a mecca for black people.

african studies courses online: *Introduction to African American Studies* Talmadge Anderson, James Benjamin Stewart, 2007 There is an ongoing debate as to whether African American Studies is a discipline, or multidisciplinary or interdisciplinary field. Some scholars assert that African American Studies use a well-defined common approach in examining history, politics, and the family in the same way as scholars in the disciplines of economics, sociology, and political science. Other scholars consider African American Studies multidisciplinary, a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses--be they anthropological, psychological, historical, etc., --to study the African world experience. In this model the boundaries between traditional disciplines are accepted, and researches in African American Studies simply conduct discipline based an analysis of particular topics. Finally, another group of scholars insists that African American Studies is interdisciplinary, an enterprise that generates distinctive analyses by combining perspectives from d

african studies courses online: *Hip-Hop in Africa* Msia Kibona Clark, 2018-04-30 Throughout Africa, artists use hip-hop both to describe their lives and to create shared spaces for uncensored social commentary, feminist challenges to patriarchy, and resistance against state institutions, while at the same time engaging with the global hip-hop community. In *Hip-Hop in Africa*, Msia Kibona Clark examines some of Africa's biggest hip-hop scenes and shows how hip-hop helps us understand specifically African narratives of social, political, and economic realities. Clark looks at the use of hip-hop in protest, both as a means of articulating social problems and as a tool for mobilizing listeners around those problems. She also details the spread of hip-hop culture in Africa following its emergence in the United States, assessing the impact of urbanization and demographics on the spread of hip-hop culture. *Hip-Hop in Africa* is a tribute to a genre and its artists as well as a timely examination that pushes the study of music and diaspora in critical new directions. Accessibly written by one of the foremost experts on African hip-hop, this book will easily find its place in the classroom.

african studies courses online: *Beyond Liberal Order* Harry Verhoeven, Anatol Lieven, 2022-05-01 What does liberal order actually amount to outside the West, where it has been most institutionalised? Contrary to the Atlantic or Pacific, liberal hegemony is thin in the Indian Ocean

World; there are no equivalents of NATO, the EU or the US-Japan defence relationship. Yet what this book calls the 'Global Indian Ocean' was the beating heart of earlier epochs of globalisation, where experiments in international order, market integration and cosmopolitanisms were pioneered. Moreover, it is in this macro-region that today's challenges will face their defining hour: climate change, pandemics, and the geopolitical contest pitting China and Pakistan against the USA and India. The Global Indian Ocean states represent the greatest range of political systems and ideologies in any region, from Hindu-nationalist India and nascent democracy in Indonesia and South Africa, to the Gulf's mixture of tribal monarchy and high modernism. These essays by leading scholars examine key aspects of political order, and their roots in the colonial and pre-colonial past, through the lenses of state-building, nationalism, international security, religious identity and economic development. The emergent lessons are of great importance for the world, as the 'global' liberal order fades and new alternatives struggle to be born.

african studies courses online: Making Modern Girls Abosede A. George, 2014-11-15 In *Making Modern Girls*, Abosede A. George examines the influence of African social reformers and the developmentalist colonial state on the practice and ideology of girlhood as well as its intersection with child labor in Lagos, Nigeria. It draws from gender studies, generational studies, labor history, and urban history to shed new light on the complex workings of African cities from the turn of the twentieth century through the nationalist era of the 1950s. The two major schemes at the center of this study were the modernization project of elite Lagosian women and the salvationist project of British social workers. By approaching children and youth, specifically girl hawkers, as social actors and examining the ways in which local and colonial reformers worked upon young people, the book offers a critical new perspective on the uses of African children for the production and legitimization of national and international social development initiatives. *Making Modern Girls* demonstrates how oral sources can be used to uncover the social history of informal or undocumented urban workers and to track transformations in practices of childhood over the course of decades. George revises conventional accounts of the history of development work in Africa by drawing close attention to the social welfare initiatives of late colonialism and by highlighting the roles that African women reformers played in promoting sociocultural changes within their own societies.

african studies courses online: *Black Performance Theory* Thomas F. DeFrantz, Anita Gonzalez, 2014-04-14 Black performance theory is a rich interdisciplinary area of study and critical method. This collection of new essays by some of its pioneering thinkers—many of whom are performers—demonstrates the breadth, depth, innovation, and critical value of black performance theory. Considering how blackness is imagined in and through performance, the contributors address topics including flight as a persistent theme in African American aesthetics, the circulation of minstrel tropes in Liverpool and in Afro-Mexican settlements in Oaxaca, and the reach of hip-hop politics as people around the world embrace the music and dance. They examine the work of contemporary choreographers Ronald K. Brown and Reggie Wilson, the ways that African American playwrights translated the theatricality of lynching to the stage, the ecstatic music of Little Richard, and Michael Jackson's performance in the documentary *This Is It*. The collection includes several essays that exemplify the performative capacity of writing, as well as discussion of a project that re-creates seminal hip-hop album covers through tableaux vivants. Whether deliberating on the tragic mulatta, the trickster figure Anansi, or the sonic futurism of Nina Simone and Adrienne Kennedy, the essays in this collection signal the vast untapped critical and creative resources of black performance theory. african studies courses online: *Dockside Reading* Isabel Hofmeyr, 2021-11-08 In *Dockside Reading* Isabel Hofmeyr traces the relationships among print culture, colonialism, and the ocean through the institution of the British colonial Custom House. During the late nineteenth and early twentieth centuries, dockside customs officials would leaf through publications looking for obscenity, politically objectionable materials, or reprints of British copyrighted works, often dumping these condemned goods into the water. These practices, echoing other colonial imaginaries of the ocean as a space for erasing incriminating evidence of the violence of empire, informed later censorship regimes under apartheid in South Africa. By tracking printed matter from ship to shore, Hofmeyr shows how literary institutions like copyright and censorship were shaped by colonial control of coastal waters. Set in the environmental context of the colonial port city, *Dockside Reading* explores how imperialism colonizes water. Hofmeyr examines this theme through the concept of hydrocolonialism, which puts together land and sea, empire and environment.

african studies courses online: *Critical Terms for the Study of Africa* Gaurav Desai, Adeline Masquelier, 2018-12-07 For far too long, the Western world viewed Africa as unmappable terrain—a repository for outsiders' wildest imaginings. This problematic notion has had lingering effects not only on popular impressions of the region but also on the development of the academic study of Africa. *Critical Terms for the Study of Africa* considers the legacies that have shaped our understanding of the continent and its place within the conceptual grammar of contemporary world affairs. Written by a distinguished group of scholars, the essays compiled in this volume take stock

of African studies today and look toward a future beyond its fraught intellectual and political past. Each essay discusses one of our most critical terms for talking about Africa, exploring the trajectory of its development while pushing its boundaries. Editors Gaurav Desai and Adeline Masquelier balance the choice of twenty-five terms between the expected and the unexpected, calling for nothing short of a new mapping of the scholarly field. The result is an essential reference that will challenge assumptions, stimulate lively debate, and make the past, present, and future of African Studies accessible to students and teachers alike.

african studies courses online: *Dreaming the Present* Irvin J. Hunt, 2022-02-22 This is a story of art and movement building at the limits of imagination. In their darkest hours, W. E. B. Du Bois, Ella Baker, George Schuyler, and Fannie Lou Hamer gathered hundreds across the United States and beyond to build vast, but forgotten, networks of mutual aid: farms, shops, schools, banks, daycares, homes, health clinics, and burial grounds. They called these spaces cooperatives, local challenges to global capital, where people pooled all they had to meet their needs. By reading their activism as an artistic practice, Irvin Hunt argues that their primary need was to free their movement from the logic of progress. From a remarkably diverse archive, Hunt extrapolates three new ways to describe the time of a movement: a continual beginning, a deliberate falling apart, and a simultaneity, a kind of all-at-once-ness. These temporalities reflect how a people maneuvered the law, reappropriated property, built autonomous communities, and fundamentally reimagined what a movement can be. Their movement was not the dream of a brighter day; it was the making of today out of the stuff of dreams. Hunt offers both an original account of Black mutual aid and, in a world of diminishing futures, a moving meditation on the possibilities of the present.

african studies courses online: *Letter from Birmingham Jail* Martin Luther King, 2025-01-14 A beautiful commemorative edition of Dr. Martin Luther King's essay Letter from Birmingham Jail, part of Dr. King's archives published exclusively by HarperCollins. With an afterword by Reginald Dwayne Betts On April 16, 1963, Dr. Martin Luther King Jr., responded to an open letter written and published by eight white clergymen admonishing the civil rights demonstrations happening in Birmingham, Alabama. Dr. King drafted his seminal response on scraps of paper smuggled into jail. King criticizes his detractors for caring more about order than justice, defends nonviolent protests, and argues for the moral responsibility to obey just laws while disobeying unjust ones. Letter from Birmingham Jail proclaims a message - confronting any injustice is an acceptable and righteous reason for civil disobedience. This beautifully designed edition presents Dr. King's speech in its entirety, paying tribute to this extraordinary leader and his immeasurable contribution, and inspiring a new generation of activists dedicated to carrying on the fight for justice and equality.

african studies courses online: *Decolonizing African Studies Pedagogies* Nathan Andrews, Nene Ernest Khalema, 2023-11-16 Despite the long history of decolonization as a 'third world' political project, decolonization as an intellectual project has gained tremendous momentum in recent times, signalled by movements such as #RhodesMustFall, #BlackInTheIvory, and Why Is My Curricula So White among others. These movements situate the coloniality of power within ongoing practices in academia and seek to disrupt systemic racism and oppressive structures of knowledge production and dissemination. Assembling critical perspectives of scholars engaged in African Studies and other cognate disciplines on the continent and in the diaspora, the book elucidates and fuses ideas together to produce nuanced pedagogical advances in the service of students, academics, and educators. It contributes ideas on how to navigate systems, curricula, and academic contexts that have perpetuated a colonial toxicity that undermines Black agency and epistemic justice. This book will be of interest to students, researchers, educational leaders and policy makers across diverse disciplines interested in championing a decolonial praxis in academic spaces and

universities.

african studies courses online: *Comparative Area Studies* Ariel Ira Ahram, Patrick Köllner, Rudra Sil, 2018 In the post-World War II era, the emergence of 'area studies' marked a signal development in the social sciences. As the social sciences evolved methodologically, however, many dismissed area studies as favoring narrow description over general theory. Still, area studies continues to play a key, if unacknowledged, role in bringing new data, new theories, and valuable policy-relevant insights to social sciences. In *Comparative Area Studies*, three leading figures in the field have gathered an international group of scholars in a volume that promises to be a landmark in a resurgent field. The book upholds two basic convictions: that intensive regional research remains indispensable to the social sciences and that this research needs to employ comparative referents from other regions to demonstrate its broader relevance. *Comparative Area Studies (CAS)* combines the context-specific insights from traditional area studies and the logic of cross- and inter-regional empirical research. This first book devoted to CAS explores methodological rationales and illustrative applications to demonstrate how area-based expertise can be fruitfully integrated with cutting-edge comparative analytical frameworks.

Vulnerable and resilient, openhanded and openhearted, these women forge their lives in a place that in turn threatens and protects—a common prison and a shared home. Naylor renders both loving and painful human experiences with simple eloquence and uncommon intuition in this touching and unforgettable read.

african studies courses online: *Crossing the Color Line* Carina E. Ray, 2015-10-15 Interracial sex mattered to the British colonial state in West Africa. In *Crossing the Color Line*, Carina E. Ray goes beyond this fact to reveal how Ghanaians shaped and defined these powerfully charged relations. The interplay between African and European perspectives and practices, argues Ray, transformed these relationships into key sites for consolidating colonial rule and for contesting its hierarchies of power. With rigorous methodology and innovative analyses, Ray brings Ghana and Britain into a single analytic frame to show how intimate relations between black men and white

women in the metropole became deeply entangled with those between black women and white men in the colony in ways that were profoundly consequential. Based on rich archival evidence and original interviews, the book moves across different registers, shifting from the micropolitics of individual disciplinary cases brought against colonial officers who “kept” local women to transatlantic networks of family, empire, and anticolonial resistance. In this way, Ray cuts to the heart of how interracial sex became a source of colonial anxiety and nationalist agitation during the first half of the twentieth century.

african studies courses online: Black Campus Life Antar A. Tichavakunda, 2021-12-01 An in-depth ethnography of Black engineering students at a historically White institution, *Black Campus Life* examines the intersection of two crises, up close: the limited number of college graduates in science, technology, engineering, and math (STEM) fields, and the state of race relations in higher education. Antar Tichavakunda takes readers across campus, from study groups to parties and beyond as these students work hard, have fun, skip class, fundraise, and, at times, find themselves in tense racialized encounters. By consistently centering their perspectives and demonstrating how different campus communities, or social worlds, shape their experiences, Tichavakunda challenges assumptions about not only Black STEM majors but also Black students and the “racial climate” on college campuses more generally. Most fundamentally, *Black Campus Life* argues that Black collegians are more than the racism they endure. By studying and appreciating the everyday richness and complexity of their experiences, we all—faculty, administrators, parents, policymakers, and the broader public—might learn how to better support them. This book is freely available in an open access edition thanks to TOME (Toward an Open Monograph Ecosystem)—a collaboration of the Association of American Universities, the Association of University Presses, and the Association of Research Libraries. african studies courses online: Remembrances in Black Charles F. Robinson II, Lonnie R. Williams, 2010-12-01 With the admittance in 1948 of Silas Hunt to the University of Arkansas Law School, the university became the first southern public institution of higher education to officially desegregate without being required to do so by court order. The process was difficult, but an important first step had been taken. Other students would follow in Silas Hunt's footsteps, and they along with the university would have to grapple with the situation. *Remembrances in Black* is an oral history that gathers the personal stories of African Americans who worked as faculty and staff and of students who studied at the state's flagship institution. These stories illustrate the anguish, struggle, and triumph of individuals who had their lives indelibly marked by their experiences at the school. Organized chronologically over sixty years, this book illustrates how people of color navigated both the evolving campus environment and that of the city of Fayetteville in their attempt to fulfill personal aspirations. Their stories demonstrate that the process of desegregation proved painfully slow to those who chose to challenge the forces of exclusion. Also, the remembrances question the extent to which desegregation has been fully realized.

african studies courses online: *Black Intellectual Thought in Modern America* Brian D. Behnken, Gregory D. Smithers, Simon Wendt, 2017-09-07 Contributions by Tunde Adeleke, Brian D. Behnken, Minkah Makalani, Benita Roth, Gregory D. Smithers, Simon Wendt, and Danielle L. Wiggins Black intellectualism has been misunderstood by the American public and by scholars for generations. Historically maligned by their peers and by the lay public as inauthentic or illegitimate, black intellectuals have found their work misused, ignored, or discarded. Black intellectuals have also been reductively placed into one or two main categories: they are usually deemed liberal or, less frequently, as conservative. The contributors to this volume explore several prominent intellectuals, from left-leaning leaders such as W. E. B. Du Bois to conservative intellectuals like Thomas Sowell, from well-known black feminists such as Patricia Hill Collins to Marxists like Claudia Jones, to underscore the variety of black intellectual thought in the United States. Contributors also situate the development of the lines of black intellectual thought within the broader history from which these trends emerged. The result gathers essays that offer entry into a host of rich intellectual traditions.

african studies courses online: *Philosophy of African American Studies* Stephen Ferguson, 2015-09-16 In this ground-breaking book, Stephen C. Ferguson addresses a seminal question that is too-often ignored: What should be the philosophical basis for African American studies? The volume explores philosophical issues and problems in their relationship to Black studies. Ferguson shows that philosophy is not a sterile intellectual pursuit, but a critical tool to gathering knowledge about the Black experience. Cultural idealism in various forms has become enormously influential as a framework for Black studies. Ferguson takes on the task of demonstrating how a Marxist philosophical perspective offers a productive and fruitful way of overcoming the limitations of idealism. Focusing on the hugely popular Afrocentric school of thought, this book's engaging discussion shows that the foundational arguments of cultural idealism are based on a series of analytical and historical misapprehensions. In turn, Ferguson argues for the centrality of the Black working class—both men and women—to Black Studies.
