age of wonder 4 guide: The Age of Wonder Richard Holmes, 2009-07-14 The Age of Wonder is a colorful and utterly absorbing history of the men and women whose discoveries and inventions at the end of the eighteenth century gave birth to the Romantic Age of Science. When young Joseph Banks stepped onto a Tahitian beach in 1769, he hoped to discover Paradise. Inspired by the

scientific ferment sweeping through Britain, the botanist had sailed with Captain Cook in search of new worlds. Other voyages of discovery—astronomical, chemical, poetical, philosophical—swiftly follow in Richard Holmes's thrilling evocation of the second scientific revolution. Through the lives of William Herschel and his sister Caroline, who forever changed the public conception of the solar system; of Humphry Davy, whose near-suicidal gas experiments revolutionized chemistry; and of the great Romantic writers, from Mary Shelley to Coleridge and Keats, who were inspired by the scientific breakthroughs of their day, Holmes brings to life the era in which we first realized both the awe-inspiring and the frightening possibilities of science—an era whose consequences are with us still. age of wonder 4 guide: *World of Wonders* Aimee Nezhukumatathil, 2020-09-08 “A poet celebrates the wonders of nature in a collection of essays that could almost serve as a coming-of-age memoir.” —Kirkus Reviews As a child, Nezhukumatathil called many places home: the grounds of a Kansas mental institution, where her Filipina mother was a doctor; the open skies and tall mountains of Arizona, where she hiked with her Indian father; and the chillier climes of western New York and Ohio. But no matter where she was transplanted—no matter how awkward the fit or forbidding the landscape—she was able to turn to our world’s fierce and funny creatures for guidance. “What the peacock can do,” she tells us, “is remind you of a home you will run away from and run back to all your life.” The axolotl teaches us to smile, even in the face of unkindness; the touch-me-not plant shows us how to shake off unwanted advances; the narwhal demonstrates how to survive in hostile environments. Even in the strange and the unlovely, Nezhukumatathil finds beauty and kinship. For it is this way with wonder: it requires that we are curious enough to look past the distractions in order to fully appreciate the world’s gifts. age of wonder 4 guide: *That Sense of Wonder* Francesco Dimitri, 2018-11-29 How to reclaim wonder in our lives and achieve the good life. All of us experience a sense of wonder at some point in our lives. Perhaps you felt it when you experienced your first kiss; when you grasped the perfectly balanced beauty of an equation; or when you first saw the rose windows of Chartres Cathedral? Whatever the circumstances that triggered the feeling, you were left speechless by this extraordinary world of ours. We may speak different languages, cling to different ideas about politics, religion and love - but a longing for wonder connects us all through space and time. Wonder is the impulse behind scientific and philosophical inquiry, artistic creativity and spiritual yearning. It is the most fruitful human sense: firing our curiosity; inspiring us to hope and dream. But our sense of wonder - that feeling we had as children seeing the Milky Way for the first time - gets used up. Faced with the practical demands of adulthood, we trade a sense of wonder for a sense of reality, which all too often brings anxiety and unhappiness in its wake. By exploring the nature of wonder in many areas of human experience, from the natural world to the spirit world, from science to storytelling, Francesco Dimitri reveals how we can reclaim our sense of wonder - not to become children again, but to become happier and more fulfilled adults, better equipped to face the challenges of modern life.

age of wonder 4 guide: Freedom Journeys Rabbi Arthur O. Waskow, Rabbi Phyllis O. Berman, 2011-02-01 How does the story of the Exodus echo in our own generation and in our own lives? For us to hear the Oneness of God, we must grow into a place where the cosmic and the political are deeply the same truth. —from Part V The story Jews retell on Passover is about rising up against tyranny, about the triumph of the God who sides with the despised against a resplendent emperor. Exploring how this tale applies to our own time enriches the ancient account—and it expands and transforms the community for which Exodus is a collective family story. Exodus is not only the saga of the escape from slavery, but also a story of courage, celebration, rebirth and community from which people of all faith traditions have learned and can continue to learn. Calling us to relearn and rethink the Passover story, Rabbi Arthur O. Waskow and Rabbi Phyllis O. Berman share: The enduring spiritual resonance of the Hebrews' journey for our own time Social justice, ecological and feminist perspectives on the Exodus How the Passover story has been adapted and used by African American as well as Christian and Muslim communities to provide insight and inspiration. In the sixty years since, science fiction has become a recognized and established literary genre with a significant and growing body of scholarship. The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre. Over forty contributors with

diverse and complementary specialties present a history of science fiction across national and genre boundaries, and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past. Science fiction as a literary genre is the central focus of the volume, but fundamental to its story is its non-literary cultural manifestations and influence. Coverage thus includes transmedia manifestations as an integral part of the genre's history, including not only short stories and novels, but also film, art, architecture, music, comics, and interactive media.

age of wonder 4 guide: Rethinking Western Approaches to Counterinsurgency Russell W.

Glenn, 2015-05-22 This book critically examines the Western approach to counter-insurgency in the post-colonial era and offers a series of recommendations to address current shortfalls. The author argues that current approaches to countering insurgency rely too heavily on conflicts from the post-World War II years of waning colonialism. Campaigns conducted over half a century ago – Malaya, Aden, and Kenya among them – remain primary sources on which the United States, British, Australian, and other militaries build their guidance for dealing with insurgent threats, this though both the character of those threats and the conflict environment are significantly different than was the case in those earlier years. This book addresses the resulting inconsistencies by offering insights, analysis, and recommendations drawn from campaigns more applicable to counter-insurgency today. Eight post-colonial conflicts; to include Northern Ireland, Sierra Leone, Colombia and Iraq; provide the basis for analysis. All are examples in which counterinsurgents attained or continue to demonstrate considerable progress when taking on enterprises better known for disaster and disappointment. Recommendations resulting from these analyses challenge entrenched beliefs to serve as the impetus for essential change. Rethinking Western Approaches to Counterinsurgency will be of much interest to students of counter-insurgencies, military and strategic studies, security studies and IR in general.

age of wonder 4 guide: HUMANS AND THE COSMOS Antony Black, 2014-06-20 What kind of

a universe do we live in? Where do we fit into the galaxies? Does God explain it all? We live in a staggering cosmos which only we understand and appreciate. This book locates us in a cosmic story. We need to bring together science, the humanities, experience and self-awareness. The world revealed by modern science is a source of great wonder. Yet Darwinism makes belief in a loving god virtually impossible. And by our knowledge and appetites we are destroying our habitat by carbon emissions and global warming. Death is a fact of life, but, unless we take drastic action, human life itself will become barely possible. What can we do to save our grandchildren? How can we find happiness without god and without destroying our descendants? We have to learn how to live in a new way. We need to deepen our instincts for reciprocity and compassion. We can learn how to thrive in harsh circumstances with the help of the philosophy, theology and poetry of both East and West. Above all, we need to use our own judgment. We can find satisfaction through, for example, art and exploration without deflowering the earth. And by meditation we can develop an inner space of still delight.

age of wonder 4 guide: Feed M. T. Anderson, 2010-05-11 Identity crises, consumerism, and star-crossed teenage love in a futuristic society where people connect to the Internet via feeds implanted in their brains. Winner of the LA Times Book Prize. For Titus and his friends, it started out like any ordinary trip to the moon - a chance to party during spring break and play around with some stupid low-grav at the Ricochet Lounge. But that was before the crazy hacker caused all their feeds to malfunction, sending them to the hospital to lie around with nothing inside their heads for days. And it was before Titus met Violet, a beautiful, brainy teenage girl who knows something about what it's like to live without the feed-and about resisting its omnipresent ability to categorize human thoughts and desires. Following in the footsteps of George Orwell, Anthony Burgess, and Kurt Vonnegut, Jr., M. T. Anderson has created a brave new world - and a hilarious new lingo - sure to appeal to anyone who appreciates smart satire, futuristic fiction laced with humor, or any story featuring skin lesions as a fashion statement.
