age of wonders 4 society traits: *Figuring Age* Kathleen Woodward, 1999-03-22 *Figuring Age* engages the virtually invisible subject of older women in western culture. Like other markers of social difference, age is given meaning by a culture. Yet unlike gender and race, the subjects of age and aging have received little sustained attention. Central to *Figuring Age* is the crucial question of how women are aged by culture. How are older women represented in a visual culture that is dominated by images of youth in television, film, and life performance? How do psychoanalysis, rejuvenation therapy and hormone replacement therapy, the fashion system, cosmetic surgery, and midlife bodybuilding shape our views of aging as well as of the older body itself? What is the timing of aging? To what extent is aging a culturally-induced trauma?

age of wonders 4 society traits: Anthem Ayn Rand, 2021-07-07 About this Edition This 2021-2022 Digital Student Edition of Ayn Rand's Anthem was created for teachers and students receiving free novels from the Ayn Rand Institute, and includes a historic Q&A with Ayn Rand that cannot be found in any other edition of Anthem. In this Q&A from 1979, Rand responds to questions about Anthem sent to her by a high school classroom. About Anthem Anthem is Ayn Rand's "hymn to man's ego." It is the story of one man's rebellion against a totalitarian, collectivist society. Equality 7-2521 is a young man who yearns to understand "the Science of Things." But he lives in a bleak, dystopian future where independent thought is a crime and where science and technology have regressed to primitive levels. All expressions of individualism have been suppressed in the world of Anthem; personal possessions are nonexistent, individual preferences are condemned as sinful and romantic love is forbidden. Obedience to the collective is so deeply ingrained that the very word "I" has been erased from the language. In pursuit of his quest for knowledge, Equality 7-2521 struggles to answer the questions that burn within him — questions that ultimately lead him to uncover the mystery behind his society's downfall and to find the key to a future of freedom and progress. Anthem anticipates the theme of Rand's first best seller, *The Fountainhead*, which she stated as "individualism versus collectivism, not in politics, but in man's soul."

age of wonders 4 society traits: *Brave New World* Aldous Huxley, 2011-07-01 This classic novel of a perfectly engineered society is “one of the most prophetic dystopian works of the twentieth century” (The Wall Street Journal). Half a millennium from now, in the World State, the watchword is that every one belongs to every one else. No matter what class of human you are bred to be—from the intellectual Alphas to the Epsilons who provide the manual labor—you are a part of the efficient, well-oiled whole. You are nourished, secure, and blissfully serene thanks to the freely distributed drug called soma. And while sex is strongly encouraged, the old way of procreation is forbidden, eliminating even the pains of childbirth. But when a man and woman journey beyond these confines to where the “savages” reside, and bring back two outsiders, the cracks begin to show. Named as one of the 100 best English-language novels of the twentieth century by the Modern Library, *Brave New World* is one of the first truly dystopian novels. Influenced by the historic events of Huxley’s era yet as relevant today as ever, it is a remarkable depiction of the conflict between progress and the human spirit. “Chilling. . . . That he gave us the dark side of genetic engineering in 1932 is amazing.” —Providence Journal-Bulletin “It is a frightening experience, indeed, to discover how much of his satirical prediction of a distant future became reality in so short a time.” —The New York Times Book Review

age of wonders 4 society traits: *The Problem with Education Technology* Ben Fink, Robin Brown, 2016-02-02 Education is in crisis—at least, so we hear. And at the center of this crisis is technology. New technologies like computer-based classroom instruction, online K-12 schools,

MOOCs (massive open online courses), and automated essay scoring (AES) may be our last great hope—or the greatest threat we have ever faced. In *The Problem with Education Technology*, Ben Fink and Robin Brown look behind the hype to explain the problems—and potential—of these technologies. Focusing on the case of automated essay scoring, they explain the technology, how it works, and what it does and doesn't do. They explain its origins, its evolution (both in the classroom and in our culture), and the controversy that surrounds it. Most significantly, they expose the real problem—the complicity of teachers and curriculum-builders in creating an education system so mechanical that machines can in fact often replace humans—and how teachers, students, and other citizens can work together to solve it. Offering a new perspective on the change that educators can hope, organize, and lobby for, *The Problem with Education Technology* challenges teachers and activists on “our side,” even as it provides new evidence to counter the profit-making, labor-saving logics that drive the current push for technology in the classroom.

age of wonders 4 society traits: Generational Politics in the United States Sally

Friedman, David Schultz, 2024-06-18 The role of generations is an important, yet often overlooked, variable in the study of American politics. A topic of research in sociology, business, and marketing, the focus on generations frequently occurs in American pop culture and journalism. The general public often assumes that different generations have different political leanings and beliefs—that the Silent Generation is all Republican, white, and conservative, or that Millennials are liberal and diverse—but are these assumptions true? *Generational Politics in the United States* is the first comprehensive book that examines the concept of generations from a political science perspective. It defines what a generation is and how to sort out the differences between life cycle, cohort, and aging effect. The book then brings together chapters from an array of political science scholars that examine the role of generations in American politics and how it relates to other variables such as age, race, gender, and socioeconomic status. It discusses how politics in the United States are impacted by changes in generations, including how the passing of the Baby Boom generation and rise of the Millennials and Gen Z will change American politics. By examining the differences in political attitudes, engagement, and impact of recent generations, *Generational Politics in the United States* suggests how generational change will impact American politics in the future.

age of wonders 4 society traits: The American Historical Romance George Dekker, 1990-05-03 This book traces the tradition of American historical fiction from its origins in the early nineteenth century to the eve of World War II. It examines the historical novel's connections with Enlightenment and Romantic theories of history; with the rise of literary regionalism; with the ambitions of Romantic writers to revive the epic and romance; with changing conceptions of gender roles; and with the authors' troubled responses to the great revolutionary and imperialistic conflicts of the modern era. However, though inevitably much concerned with the theory of genre and with the specific contents of the genre of historical romance, Professor Dekker devotes most of his book to new readings of major texts by James Fenimore Cooper, Nathaniel Hawthorne, Herman Melville,

Mark Twain, Allen Tate, Edith Wharton, Willa Cather, and William Faulkner, as well as to the Briton whose name was synonymous with the genre for most of the nineteenth century - Sir Walter Scott. 'The American Historical Romance is the richest, most fully meditated and most rewarding yet written by this author ... It is the most important book on the relations of British and American fiction to come out for many years. No devotee of the American novel will ignore it.' -- The Times Literary Supplement

age of wonders 4 society traits: Apologetics in the Roman Empire Mark J. Edwards, Martin Goodman, Simon Price, Chris Rowland, 1999-06-17 This book is the first to tackle the origins and purpose of literary religious apologetic in the first centuries of the Christian era by discussing, on their own terms, texts composed by pagan and Jewish authors as well as Christians. Previous studies of apologetic have focused primarily on the Christian apologists of the second century. These, and other Christian authors, are represented also in this volume but, in addition, experts in the religious history of the pagan world, in Judaism, and in late antique philosophy examine very different literary traditions to see to what extent techniques and motifs were shared across the religious divide. Each contributor has investigated the probable audience, the literary milieu, and the specific social, political, and cultural circumstances which elicited each apologetic text. In many cases these questions lead on to the further issue of the relation between the readers addressed by the author and the actual readers, and the extent to which a defined literary genre of apologetic developed. These studies, ranging in time from the New Testament to the early fourth century, and including novel contributions by specialists in ancient history, Jewish history, ancient philosophy, the New Testament, and patristics, will put the study of ancient religious apologetic on to a new footing.
