She demonstrates how Black women teachers and teacher educators can heal, resist, and (re)member their identities in ways that are empowering for them and their students. Dillard emphasizes that any discussion of Black teachers' lives and work cannot be limited to truncated identities as enslaved persons in the Americas. *The Spirit of Our Work* addresses questions that remain largely invisible in what is known about teaching and teacher education. According to Dillard, this invisibility renders the powerful approaches to Black education that are embodied and marshaled by Black women teachers unknown and largely unavailable to inform policy, practice, and theory in education. *The Spirit of Our Work* highlights how the intersectional identities of Black women teachers matter in teaching and learning and how educational settings might more carefully and conscientiously curate structures of support that pay explicit and necessary attention to spirituality as a crucial consideration.

Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Saundra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Saundra McGuire has been

acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Saundra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Saundra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

Spain, plotting to break Portugal's monopoly trade with the fabled Orient, set sail from a hidden Mexican port to cross the Pacific--and then, critically, to attempt the never-before-accomplished return, the *vuelta*. Four ships set out from Navidad, each one carrying a dream team of navigators. The smallest ship, guided by seaman Lope Martín, a mulatto who had risen through the ranks to become one of the most qualified pilots of the era, soon pulled far ahead and became mysteriously lost from the fleet. It was the beginning of a voyage of epic scope, featuring mutiny, murderous encounters with Pacific islanders, astonishing physical hardships--and at last a triumphant return to the New World. But the pilot of the fleet's flagship, the Augustine friar mariner Andrés de Urdaneta, later caught up with Martín to achieve the *vuelta* as well. It was he who now basked in glory, while Lope Martín was secretly sentenced to be hanged by the Spanish crown as repayment for his services. Acclaimed historian Andrés Reséndez, through brilliant scholarship and riveting storytelling--including an astonishing outcome for the resilient Lope Martín--sets the record straight.

Language'. . . one of the most important political books of this perilous summer.—The Washington Post A must-read—Salon Highly recommended—Jack Shafer, Politico Featured in The Best New Books to Read This Summer and Lit Hub's Most Anticipated Books of 2020—Literary Hub Historic levels of polarization, a disaffected and frustrated electorate, and widespread distrust of government, the news media, and traditional political leadership set the stage in 2016 for an unexpected, unlikely, and unprecedented presidential contest. Donald Trump's campaign speeches and other rhetoric seemed on the surface to be simplistic, repetitive, and disorganized to many. As *Demagogue for President* shows, Trump's campaign strategy was anything but simple. Political communication expert Jennifer Mercieca shows how the Trump campaign expertly used the common rhetorical techniques of a demagogue, a word with two contradictory definitions—"a leader who makes use of popular prejudices and false claims and promises in order to gain power" or "a leader championing the cause of the common people in ancient times" (Merriam-Webster, 2019). These strategies, in conjunction with post-rhetorical public relations techniques, were meant to appeal to a segment of an already distrustful electorate. It was an effective tactic. Mercieca analyzes rhetorical strategies such as argument ad hominem, argument ad baculum, argument ad populum, reification, paralipsis, and more to reveal a campaign that was morally repugnant to some but to others a brilliant appeal to American exceptionalism. By all accounts, it fundamentally changed the discourse of the American public sphere.

When he was three years old, Brando Kelly Ulloa was abandoned by his immigrant father. His mother, Maria, dreaming of a more exciting life, saw no reason for her son to live as a Mexican American just because he was born one. With the help of Maria's ruthless imagination and a hastily penned jailhouse correspondence, the life of "Brando Skyhorse," the Native American son of an incarcerated political activist, was about to begin. Through a series of letters to Paul Skyhorse Johnson, a stranger in prison for armed robbery, Maria reinvents herself and her young son as American Indians in the colorful Mexican-American neighborhood of Echo Park, California, where Brando and his mother live with his acerbic grandmother and a rotating cast of surrogate fathers. It will be thirty years before Brando begins to untangle the truth, when a surprise discovery leads him to his biological father at last.
