ah guide service: Down Home William Mackey, Patrice Mackey, 2016-01-30 In 1969 after 20 years living in New York City, Engineer, Photographer & Educator William Henry Mackey, Jr. returned to the rural Georgia backwoods where he had been raised. During the 20 years since he had left, the South had undergone drastic changes, from the Civil Rights Era to the technological advances in farming techniques, yet at the same time it remained the same simple place where he had grown up. Mackey proceeded to photograph and interview friends, family and other residents of the area in an effort to document their history and recollections of an era that was fast fading under the onslaught of 'progress'. The result is a fascinating look into the legacy of rural Blacks in coastal Georgia and the political, technological and social changes they underwent during the century since the Emancipation Proclamation.

ah guide service: **The Goblin's Secrets** Goblin Sachs, 2019-08-18 In order to succeed in World of Warcraft Classic, you will need a lot of gold. In addition to the thousands of gold you will spend on your spells, mounts, gear, enchantments, and respecs, you will also need to consistently purchase large quantities of consumables and utility items to stay competitive in serious raiding/PvP. Without enough gold, you will always be outclassed by players who do have enough. However, accumulating gold is very difficult in World of Warcraft. By the time The Burning Crusade was about to launch, World of Warcraft (WoW) had 8 million active subscribers with likely millions more accounts that were created but stopped subscribing at some point. Out of the millions of players who played the game, there was not a single recorded instance of someone hitting the gold cap (~215,000 gold) on one character. This means it is more common for someone to be a billionaire in America (about 1 out of 600,000) than it is for someone to have 215,000 gold. This is why I have compiled the most comprehensive, optimal, and practical guide on gold making in World of Warcraft Classic. I played the original WoW through Wrath of the Lich King with a Hunter main and Druid alt and have played on 3 different vanilla WoW private servers where I have over 25 level 60 characters and amassed hundreds of thousands of gold among them. My love of the game evolved past raiding and PvPing and I became consumed by the economic PvP (competing against other goblins to earn more gold). With WoW Classic's release, I am happy to finally share everything I have learned about making gold. This book will cover the most optimal and practical strategies for gold making while discarding the less optimal ones that are often repeated in popular guides. This book will also include resources such a full list of level appropriate mobs to grind while leveling, a full list of the most lucrative twink items in the level 19 and 29 brackets, a full list of the most lucrative BoE limited supply vendors to camp, a step by step action plan for the launch of Classic WoW and much much more.

Presented in companion electronic format updated quarterly, its problem-based orientation spans the full spectrum of problems encountered in adult primary care practice. Chapters address screening, diagnosis, prevention and management, including indications for referral and approaches to patient education and shared decision making. Clear, practical, bulleted recommendations and an extensive annotated bibliography of best references follow detailed discussions of pathophysiology, clinical presentation, differential diagnosis, and strategies for workup and treatment. Now with its 40th-anniversary edition, this exceptional text is a must-have resource for physicians, nurse practitioners, physician assistants, students, and residents-offering the most complete and up-to-date resource available for primary care education and practice.

ah guide service: *Transforming Health and Social Education to Include a Greater Focus on Public Health Education in the Curriculum* Sharon Brownie, Constance Shumba, Louise Ackers, Georgina A.V. Murphy, 2023-12-14 Now more than ever, an increased emphasis is needed on educational changes and innovations to effectively prepare health and social service professionals for 21st-century practice. Earlier work of the Lancet Independent Global Commission has been instrumental in validating the need for curricula change to include a focus on social determinants, public health priorities, and strategies to sustain healthy communities. The need to further strengthen the public health focus within health and social service education has been fuelled by the COVID-19 pandemic and the growing recognition of specific issues challenging society such as that highlighted within the technical report recently released by the World Health Organization recognizing Parkinson’s Disease as a public health issue. Each is an example of the need to prepare a future health and social service workforce well equipped in responding to major public health issues while contributing to global health and human wellbeing. The goal of this Research Topic is to provide additional evidence-based contributions to strengthen the public health focus in health and social service education. We aim to commission and publish a broad range of works including original research, case studies, pedagogical innovations, curriculum developments, program evaluations, and debate.
