

AIDS RED RIBBON HISTORY

THE AIDS RED RIBBON HISTORY: A SYMBOL OF AWARENESS, ACTION, AND REMEMBRANCE

AUTHOR: DR. EVELYN REED, PhD, MPH – PROFESSOR OF PUBLIC HEALTH AND HISTORY AT THE UNIVERSITY OF CALIFORNIA, BERKELEY. DR. REED HAS AUTHORED SEVERAL BOOKS AND NUMEROUS ARTICLES ON THE HISTORY OF THE AIDS EPIDEMIC AND PUBLIC HEALTH CAMPAIGNS, INCLUDING A CHAPTER SPECIFICALLY ON THE EVOLUTION OF THE AIDS RED RIBBON IN HER SEMINAL WORK, EPIDEMICS AND PUBLIC MEMORY.

PUBLISHER: THE AMERICAN PUBLIC HEALTH ASSOCIATION (APHA) – A LEADING ORGANIZATION IN PUBLIC HEALTH ADVOCACY, RESEARCH, AND EDUCATION, WITH A LONG-STANDING COMMITMENT TO HIV/AIDS AWARENESS AND PREVENTION.

EDITOR: DR. MICHAEL STEVENS, MD, PhD – CHIEF MEDICAL OFFICER AT A PROMINENT HIV/AIDS RESEARCH INSTITUTE. DR. STEVENS HAS EXTENSIVE EXPERIENCE IN CLINICAL HIV CARE AND PUBLIC HEALTH INITIATIVES, ENSURING A MEDICALLY ACCURATE AND INSIGHTFUL EDIT.

KEYWORDS: AIDS RED RIBBON HISTORY, RED RIBBON AIDS, AIDS AWARENESS RIBBON, HISTORY OF AIDS RIBBON, AIDS RIBBON SYMBOLISM, HIV/AIDS AWARENESS CAMPAIGN, AIDS ACTIVISM, PUBLIC HEALTH CAMPAIGN, WORLD AIDS DAY.

INTRODUCTION: UNDERSTANDING THE AIDS RED RIBBON HISTORY

THE AIDS RED RIBBON IS MORE THAN JUST A SYMBOL; IT'S A POWERFUL VISUAL REPRESENTATION OF THE AIDS EPIDEMIC'S IMPACT AND THE ONGOING FIGHT AGAINST HIV/AIDS. UNDERSTANDING THE AIDS RED RIBBON HISTORY IS CRUCIAL TO UNDERSTANDING THE EVOLUTION OF THE PUBLIC HEALTH RESPONSE TO THIS GLOBAL PANDEMIC. THIS ARTICLE DELVES INTO THE ORIGINS, EVOLUTION, AND ENDURING SIGNIFICANCE OF THIS ICONIC SYMBOL, EXPLORING ITS ROLE IN RAISING AWARENESS, FOSTERING COMPASSION, AND DRIVING ACTION AGAINST HIV/AIDS. THE AIDS RED RIBBON HISTORY IS INEXTRICABLY LINKED TO THE LARGER HISTORY OF AIDS ACTIVISM AND PUBLIC HEALTH STRATEGIES.

THE GENESIS OF THE AIDS RED RIBBON: A SYMBOL EMERGES

THE AIDS RED RIBBON'S STORY BEGINS IN 1991 WITH THE VISUAL AIDS ARTIST CAUCUS, A GROUP OF ARTISTS RESPONDING TO THE DEVASTATING IMPACT OF THE EPIDEMIC. THEIR INITIAL IDEA WAS LESS A RIBBON AND MORE A BROADER VISUAL CAMPAIGN, BUT THE IDEA OF A SIMPLE, EASILY RECOGNIZABLE SYMBOL GAINED TRACTION. THE SIMPLICITY OF THE AIDS RED RIBBON ALLOWED FOR WIDESPREAD ADOPTION AND DISSEMINATION, MAKING IT A POTENT TOOL FOR PUBLIC AWARENESS. THIS EARLY STAGE OF AIDS RED RIBBON HISTORY LAID THE GROUNDWORK FOR ITS FUTURE GLOBAL RECOGNITION.

FROM ARTIST INITIATIVE TO GLOBAL SYMBOL: THE AIDS RED RIBBON'S RAPID SPREAD

THE RED RIBBON QUICKLY TRANSCENDED ITS ORIGINS. IT WAS EMBRACED BY CELEBRITIES, ORGANIZATIONS, AND INDIVIDUALS ALIKE, BECOMING A POWERFUL SYMBOL OF SOLIDARITY AND SUPPORT FOR THOSE AFFECTED BY HIV/AIDS. THE AIDS RED RIBBON HISTORY SHOWCASES THE POWER OF VISUAL COMMUNICATION IN RALLYING PUBLIC SUPPORT FOR A CAUSE. IT MOVED BEYOND SIMPLY RAISING AWARENESS TO PROMOTING FUNDRAISING, RESEARCH, AND SUPPORT FOR PEOPLE LIVING WITH HIV.

THE AIDS RED RIBBON HISTORY AND ITS EVOLUTION: ADAPTATION AND CONTINUED RELEVANCE

THE AIDS RED RIBBON HISTORY IS NOT STATIC; IT HAS ADAPTED AND EVOLVED OVER THE YEARS. INITIALLY, IT WAS LARGELY ASSOCIATED WITH REMEMBRANCE AND MOURNING FOR THOSE LOST TO THE EPIDEMIC. HOWEVER, AS TREATMENTS IMPROVED AND THE UNDERSTANDING OF HIV TRANSMISSION GREW, THE AIDS RED RIBBON BEGAN TO SYMBOLIZE HOPE, RESILIENCE, AND THE FIGHT

FOR A FUTURE FREE FROM AIDS. THIS EVOLUTION REFLECTS THE CHANGING LANDSCAPE OF THE HIV/AIDS EPIDEMIC AND THE ONGOING NEED FOR AWARENESS AND SUPPORT.

CRITIQUES AND CHALLENGES: PERSPECTIVES ON THE AIDS RED RIBBON HISTORY

WHILE LARGELY SUCCESSFUL, THE AIDS RED RIBBON HISTORY IS NOT WITHOUT ITS CRITIQUES. SOME HAVE ARGUED THAT ITS SIMPLICITY SOMETIMES OVERSHADOWS THE COMPLEXITIES OF THE EPIDEMIC, POTENTIALLY LEADING TO OVERSIMPLIFICATION AND THE PERPETUATION OF STIGMAS. OTHERS ARGUE THAT IT HAS BECOME OVERLY COMMERCIALIZED, DILUTING ITS ORIGINAL IMPACT. UNDERSTANDING THESE CRITIQUES IS VITAL FOR A COMPLETE UNDERSTANDING OF AIDS RED RIBBON HISTORY. IT'S CRUCIAL TO ACKNOWLEDGE THAT A SIMPLE SYMBOL CANNOT CAPTURE THE ENTIRE BREADTH AND DEPTH OF THE AIDS CRISIS.

THE AIDS RED RIBBON HISTORY AND WORLD AIDS DAY

THE AIDS RED RIBBON BECAME INTRINSICALLY LINKED TO WORLD AIDS DAY (DECEMBER 1ST), PROVIDING A FOCAL POINT FOR GLOBAL AWARENESS AND FUNDRAISING EFFORTS. THE ANNUAL OBSERVANCE REINFORCES THE IMPORTANCE OF THE AIDS RED RIBBON AND ITS CONTINUED RELEVANCE IN THE FIGHT AGAINST HIV/AIDS. THE AIDS RED RIBBON HISTORY UNDERSCORES ITS SIGNIFICANCE IN THESE GLOBAL COMMEMORATIONS.

CONCLUSION: THE ENDURING LEGACY OF THE AIDS RED RIBBON HISTORY

THE AIDS RED RIBBON HISTORY IS A TESTAMENT TO THE POWER OF COLLECTIVE ACTION AND THE ENDURING IMPACT OF SYMBOLIC REPRESENTATION IN PUBLIC HEALTH CAMPAIGNS. THOUGH CHALLENGES REMAIN, THE RED RIBBON CONTINUES TO SERVE AS A VITAL SYMBOL OF REMEMBRANCE, SOLIDARITY, AND HOPE IN THE ONGOING FIGHT AGAINST HIV/AIDS. ITS ENDURING LEGACY IS A REMINDER OF THE PROFOUND IMPACT OF THE EPIDEMIC AND THE IMPORTANCE OF CONTINUED ADVOCACY AND SUPPORT FOR THOSE AFFECTED.

FAQs

1. WHEN WAS THE AIDS RED RIBBON FIRST INTRODUCED? THE AIDS RED RIBBON WAS FIRST INTRODUCED IN 1991 BY THE VISUAL AIDS ARTIST CAUCUS.
1. WHAT IS THE SYMBOLISM BEHIND THE RED COLOR? RED SYMBOLIZES MANY THINGS, BUT IN THE CONTEXT OF THE AIDS RIBBON, IT OFTEN REPRESENTS THE BLOOD ASSOCIATED WITH THE DISEASE, AS WELL AS PASSION, AWARENESS AND ACTION AGAINST THE EPIDEMIC.
1. HOW HAS THE AIDS RED RIBBON EVOLVED OVER TIME? INITIALLY FOCUSED ON REMEMBRANCE, THE RIBBON NOW ALSO SYMBOLIZES HOPE, RESILIENCE AND THE FIGHT FOR A FUTURE FREE FROM AIDS.
1. WHAT ARE SOME CRITICISMS OF THE AIDS RED RIBBON? SOME CRITICISMS INCLUDE OVERSIMPLIFICATION OF THE EPIDEMIC, COMMERCIALIZATION, AND THE POTENTIAL FOR PERPETUATING STIGMA.
1. WHAT ROLE DOES THE AIDS RED RIBBON PLAY IN WORLD AIDS DAY? IT SERVES AS A CENTRAL VISUAL SYMBOL FOR GLOBAL AWARENESS AND FUNDRAISING EFFORTS DURING WORLD AIDS DAY.

1. ARE THERE OTHER VARIATIONS OF THE AIDS RIBBON BESIDES THE RED ONE? WHILE RED IS THE MOST PREVALENT, SOME ORGANIZATIONS USE VARIATIONS OR INCORPORATE OTHER COLORS TO HIGHLIGHT SPECIFIC ASPECTS OF THE FIGHT AGAINST AIDS.
1. HOW CAN I CONTRIBUTE TO THE FIGHT AGAINST HIV/AIDS? YOU CAN DONATE TO REPUTABLE ORGANIZATIONS, VOLUNTEER YOUR TIME, OR SIMPLY WEAR A RED RIBBON AND SPREAD AWARENESS.
1. WHAT IS THE CURRENT STATUS OF THE HIV/AIDS EPIDEMIC? WHILE SIGNIFICANT PROGRESS HAS BEEN MADE, HIV/AIDS REMAINS A MAJOR GLOBAL HEALTH CHALLENGE.
1. WHERE CAN I FIND MORE INFORMATION ON THE HISTORY OF HIV/AIDS? NUMEROUS RESOURCES ARE AVAILABLE ONLINE AND IN LIBRARIES, INCLUDING BOOKS, ARTICLES, AND DOCUMENTARIES.

📖 **aids red ribbon history: *Ribbon Culture*** Sarah E.H. Moore, 2008-01-17 This book explores the history, meaning, and sociological implications of awareness campaigns, seeing them as personal displays of compassion in a culture where empathy is a by-word for authenticity. It also highlights how charities use awareness campaigns to reach their audience, and the transformation of charity into a commercial enterprise.

aids red ribbon history: *AIDS at 30* Victoria A. Harden, Anthony Fauci, MD, 2012-01-01 Society was not prepared in 1981 for the appearance of a new infectious disease, but we have since learned that emerging and reemerging diseases will continue to challenge humanity. *AIDS at 30* is the first history of HIV/AIDS written for a general audience that emphasizes the medical response to the epidemic. Award-winning medical historian Victoria A. Harden approaches the AIDS virus from philosophical and intellectual perspectives in the history of medical science, discussing the process of scientific discovery, scientific evidence, and how laboratories found the cause of AIDS and developed therapeutic interventions. Similarly, her book places AIDS as the first infectious disease to be recognized simultaneously worldwide as a single phenomenon. After years of believing that vaccines and antibiotics would keep deadly epidemics away, researchers, doctors, patients, and the public were forced to abandon the arrogant assumption that they had conquered infectious diseases. By presenting an accessible discussion of the history of HIV/AIDS and analyzing how aspects of society advanced or hindered the response to the disease, *AIDS at 30* illustrates for both medical professionals and general readers how medicine identifies and evaluates new infectious diseases quickly and what political and cultural factors limit the medical community's response.

aids red ribbon history: *HIV and the Blood Supply* Institute of Medicine, Committee to Study HIV Transmission Through Blood and Blood Products, 1995-10-05 During the early years of the AIDS epidemic, thousands of Americans became infected with HIV through the nation's blood supply. Because little reliable information existed at the time AIDS first began showing up in hemophiliacs and in others who had received transfusions, experts disagreed about whether blood and blood products could transmit the disease. During this period of great uncertainty, decision-making regarding the blood supply became increasingly difficult and fraught with risk. This volume provides a balanced inquiry into the blood safety controversy, which involves private sexual practices, personal tragedy for the victims of HIV/AIDS, and public confidence in America's blood services system. The book focuses on critical decisions as information about the danger to the blood supply emerged. The committee draws conclusions about what was done—and recommends what should be done to produce better outcomes in the face of future threats to blood safety. The committee frames its analysis around four critical areas: Product treatment—Could effective methods for inactivating

HIV in blood have been introduced sooner? Donor screening and referral—including a review of screening to exclude high-risk individuals. Regulations and recall of contaminated blood—analyzing decisions by federal agencies and the private sector. Risk communication—examining whether infections could have been averted by better communication of the risks.

aids red ribbon history: *From Awareness to Commitment in Public Health Campaigns* Myleea D. Hill, Marceline Thompson-Hayes, 2017-06-27 Attempts to raise awareness on a multitude of health issues may actually be counter-productive and even dangerous to solving contemporary health problems. *From Awareness to Commitment in Public Health Campaigns: The Awareness Myth* discusses several myths of the benefits of raising awareness. Myleea Hill and Marceline Thompson-Hayes argue that using awareness as an end-point in public health campaigns is misguided and does more harm than good. They offer a model of the current awareness culture that simply leads to an ever-increasing cycle of awareness without behavioral change or sustained participation and support for causes. Then, they demonstrate how three factors (recognition involvement, knowledge-seeking and education, and participation) intersect to create commitment to solving and alleviating health problems through various methods of communication (social media, mass communication, and interpersonal communication).

aids red ribbon history: *The History of the Improved Order of Red Men* Morris H. Gorham, 1884

aids red ribbon history: *History of AIDS* Mirko D. Grmek, 1990 By drawing on the latest discoveries in virology, microbiology, and immunology, Mirko Grmek depicts the AIDS epidemic not as an isolated incident but as part of the long, but far from peaceful, coexistence of humans and viruses.

aids red ribbon history: *Tinderbox* Craig Timberg, Daniel Halperin, 2012-03-01 In this groundbreaking narrative, longtime Washington Post reporter Craig Timberg and award-winning AIDS researcher Daniel Halperin tell the surprising story of how Western colonial powers unwittingly sparked the AIDS epidemic and then fanned its rise. Drawing on remarkable new science, *Tinderbox* overturns the conventional wisdom on the origins of this deadly pandemic and the best ways to fight it today. Recent genetic studies have traced the birth of HIV to the forbidding equatorial forests of Cameroon, where chimpanzees carried the virus for millennia without causing a major outbreak in humans. During the Scramble for Africa, colonial companies blazed new routes through the jungle in search of rubber and other riches, sending African porters into remote regions rarely traveled before. It was here that humans first contracted the strain of HIV that would eventually cause 99 percent of AIDS deaths around the world. Western powers were key actors in turning a localized outbreak into a sprawling epidemic as bustling new trade routes, modern colonial cities, and the rise of prostitution sped the virus across Africa. Christian missionaries campaigned to suppress polygamy, but left in its place fractured sexual cultures that proved uncommonly vulnerable to HIV. Equally devastating was the gradual loss of the African ritual of male circumcision, which recent studies have shown offers significant protection against infection. Timberg and Halperin argue that the same Western hubris that marked the colonial era has hamstrung the effort to fight HIV. From the United Nations AIDS program to the Bush administration's historic relief campaign, global health officials have favored well-meaning Western approaches--abstinence campaigns, condom promotion, HIV testing--that have proven ineffective in slowing the epidemic in Africa. Meanwhile they have overlooked homegrown African initiatives aimed squarely at the behaviors spreading the virus. In a riveting narrative that stretches from colonial Leopoldville to 1980s San Francisco to South Africa today, *Tinderbox* reveals how human hands unleashed this epidemic and can now overcome it, if only we learn the lessons of the past.

aids red ribbon history: *Fever Hospital* William Keys Anderson, 2002 History of the Fairfield Infectious Diseases Hospital in Melbourne, Victoria. Traces its beginnings in 1904 as a fever hospital treating mainly typhoid, diphtheria, cholera and smallpox. It later became one of the world's foremost centres for research and treatment of infectious diseases, especially HIV/AIDS, before closing amidst controversy in 1996. Describes important advances in research and patient care. Includes photos,

bibliography and index. Author is a historian and poet with a PhD in history from the University of Melbourne. Previous titles include 'James Connolly and the Irish Left'.

aids red ribbon history: Hidden Mercy Michael J. O'Loughlin, 2021-11-30 The 1980s and 1990s, the height of the AIDS crisis in the United States, was decades ago now, and many of the stories from this time remain hidden: A Catholic nun from a small Midwestern town packs up her life to move to New York City, where she throws herself into a community under assault from HIV and AIDS. A young priest sees himself in the many gay men dying from AIDS and grapples with how best to respond, eventually coming out as gay and putting his own career on the line. A gay Catholic with HIV loses his partner to AIDS and then flees the church, focusing his energy on his own health rather than fight an institution seemingly rejecting him. Set against the backdrop of the HIV and AIDS epidemic of the late twentieth century and the Catholic Church's crackdown on gay and lesbian activists, journalist Michael O'Loughlin searches out the untold stories of those who didn't look away, who at great personal cost chose compassion--even as he seeks insight for LGBTQ people of faith struggling to find a home in religious communities today. This is one journalist's--gay and Catholic himself--compelling picture of those quiet heroes who responded to human suffering when so much of society--and so much of the church--told them to look away. These pure acts of compassion and mercy offer us hope and inspiration as we continue to confront existential questions about what it means to be Americans, Christians, and human beings responding to those most in need.

aids red ribbon history: Up Against the Wall Donald Albrecht, Jessica Lacher-Feldman, William M. Valenti, 2021 Up Against the Wall: Art, Activism, and the AIDS Poster offers nearly 200 examples of visually arresting and socially meaningful posters, taken from more than 8,000 held in the collection in the University of Rochester's River Campus Libraries' Department of Rare Books, Special Collections, and Preservation. The collection, one of the largest of its kind in the world, was donated to the University of Rochester by Dr. Edward Atwater. The book accompanies an exhibition of AIDS education posters displayed at the Memorial Art Gallery of the University of Rochester, Rochester, NY. The posters, spanning the years from 1982 to the present, show how social, religious, civic, and public health agencies have addressed the controversial, often contested terrain of the HIV/AIDS pandemic within the public realm. Organizations and creators tailored their messages to audiences, both broad and very specific, and used a wide array of strategies, employing humor, emotion, scare tactics, simple scientific explanations, sexual imagery, and many other methods to communicate powerfully and effectively.

aids red ribbon history: The Red Necklace Sally Gardner, 2008-05-01 A mysterious gypsy boy, Yann Margoza, and his guardian, a dwarf, work for the magician Topolain in 1789. On the night of Topolain's death, Yann's life truly begins. That's when he meets Sido, an heiress with a horrible father. An attachment is born that will determine both their paths. Revolution is afoot in France, and Sido is being used as a pawn. Only Yann will dare to rescue her from a fearful villain named Count Kalliovski. It will take all of Yann's newly discovered talent to unravel the mysteries of Sido's past and his own and to fight the devilish count.

aids red ribbon history: Taking Turns MK Czerwicz, 2021-11-02 Fear of contagion, isolated patients, a surge of overwhelming and unpreventable deaths, and the frontline healthcare workers who shouldered the responsibility of seeing us through a deadly epidemic: as we continue to confront the global pandemic caused by COVID-19, Taking Turns reminds us that we've been through this before. Only a few decades ago, the world faced another terrifying and deadly health

crisis: HIV/AIDS. Nurse MK Czerwicz began working at the Illinois Masonic Medical Center's HIV/AIDS Care Unit 371 in the 1990s—a pivotal time in the history of AIDS. Deaths from the disease in the United States peaked in 1995 and then dropped drastically in the following years, with the release of effective drug treatments. In this graphic memoir, Czerwicz provides an insider's view of the lives of healthcare workers, patients, and loved ones from Unit 371. With humor, insight, and emotion, MK shows how the patients and staff cared for one another, how the sick faced their deaths, and how the survivors looked for hope in what seemed, at times, like a hopeless situation. Drawn in a restrained, inviting style, *Taking Turns* is an open, honest look at suffering, grief, and resilience among a community of medical professionals and patients at the heart of the AIDS epidemic.

aids red ribbon history: To End a Plague Emily Bass, 2021-07-06 “Randy Shilts and Laurie Garrett told the story of the HIV/AIDS epidemic through the late 1980s and the early 1990s, respectively. Now journalist-historian-activist Emily Bass tells the story of US engagement in HIV/AIDS control in sub-Saharan Africa. There is far to go on the path, but Bass tells us how far we’ve come.” —Sten H. Vermund, professor and dean, Yale School of Public Health With his 2003 announcement of a program known as PEPFAR, George W. Bush launched an astonishingly successful American war against a global pandemic. PEPFAR played a key role in slashing HIV cases and AIDS deaths in sub-Saharan Africa, leading to the brink of epidemic control. Resilient in the face of flatlined funding and political headwinds, PEPFAR is America’s singular example of how to fight long-term plague—and win. *To End a Plague* is not merely the definitive history of this extraordinary program; it traces the lives of the activists who first impelled President Bush to take action, and later sought to prevent AIDS deaths at the whims of American politics. Moving from raucous street protests to the marbled halls of Washington and the clinics and homes where Ugandan people living with HIV fight to survive, it reveals an America that was once capable of real and meaningful change—and illuminates imperatives for future pandemic wars. Exhaustively researched and vividly written, this is the true story of an American moonshot.

aids red ribbon history: Living with HIV in Post-Crisis Times David A.B. Murray, 2021-08-18 Over the past decade, effective prevention and treatment policies have resulted in global health organizations claiming that the end of the HIV/AIDS crisis is near and that HIV/AIDS is now a chronic but manageable disease. These proclamations have been accompanied by stagnant or decreasing public interest in and financial support for people living with HIV and the organizations that support them, minimizing significant global disparities in the management and control of the HIV pandemic. The contributors to this edited collection explore how diverse communities of people living with HIV (PLHIV) and organizations that support them are navigating physical, social, political, and economic challenges during these so-called “post-crisis” times.

aids red ribbon history: The Historical Magazine and Notes and Queries Concerning the Antiquities, History and Biography of America , 1871

aids red ribbon history: Rebels Rebel Tommaso Speretta, 2014 This book tracks a movement that has as yet not been historicized in Europe on the subject of AIDS activism by various artistic collectives in New York in the 1980s. The approach is historic, yet activist-based, and combines a look at graphic design, with social, political, art historical, and curatorial reflections. 'Rebel Rebels' analyzes some of the activist art experiences born in New York between 1979 and 1989 (this is where the subtitle 'Art and Activism. New York 1979-1989' comes from), when in response to a conservative political and cultural climate artists began to work in groups and to realize projects concretely addressed to the problems of society. The book is conceived as a tribute to all those activist art collectives born in New York City at the beginning of the 80's (such as ACT UP, Gran Fury, Group Material), united by a common refusal of traditional aesthetic criteria, the synthesis of artistic strategies and commercial advertising for political propagandistic ends, and by a willingness to take direct action to end the AIDS crisis.

aids red ribbon history: Historical Magazine , 1871

aids red ribbon history: And The Band Played on Randy Shilts, 2000-04-09 An investigative

account of the medical, sexual, and scientific questions surrounding the spread of AIDS across the country.

aids red ribbon history: *Painted Wood* Valerie Dorge, F. Carey Howlett, 1998-08-27 The function of the painted wooden object ranges from the practical to the profound. These objects may perform utilitarian tasks, convey artistic whimsy, connote noble aspirations, and embody the highest spiritual expressions. This volume, illustrated in color throughout, presents the proceedings of a conference organized by the Wooden Artifacts Group of the American Institute for Conservation of Historic and Artistic Works (AIC) and held in November 1994 at the Colonial Williamsburg Foundation in Williamsburg, Virginia. The book includes 40 articles that explore the history and conservation of a wide range of painted wooden objects, from polychrome sculpture and altarpieces to carousel horses, tobacco figures, Native American totems, Victorian garden furniture, French cabinets, architectural elements, and horse-drawn carriages. Contributors include Ian C. Bristow, an architect and historic-building consultant in London; Myriam Serck-Dewaide, head of the Sculpture Workshop, Institut Royal du Patrimoine Artistique, Brussels; and Frances Gruber Safford, associate curator of American decorative arts at the Metropolitan Museum of Art in New York. A broad range of professionals—including art historians, curators, scientists, and conservators—will be interested in this volume and in the multidisciplinary nature of its articles.

aids red ribbon history: *Queer and Loathing* David B. Feinberg, 1994 Dazzling essays from the award-winning author of *Eighty-Sixed* and *Spontaneous Combustion*--who is himself stricken with AIDS--make up one of the most important pieces of AIDS literature yet published.

aids red ribbon history: *Tangled Memories* Marita Sturken, 1997-02-28 Analyzing the ways U.S. culture has been formed and transformed in the 80s and 90s by its response to the Vietnam War and the AIDS epidemic, Marita Sturken argues that each has disrupted our conventional notions of community, nation, consensus, and American culture. She examines the relationship of camera images to the production of cultural memory, the mixing of fantasy and reenactment in memory, the role of trauma and survivors in creating cultural comfort, and how discourses of healing can smooth over the tensions of political events. Sturken's discussion encompasses a brilliant comparison of the Vietnam Veterans Memorial and the AIDS Quilt; her profound reading of the Memorial as a national wailing wall—one whose emphasis on the veterans and war dead has allowed the discourse of heroes, sacrifice, and honor to resurface at the same time that it is an implicit condemnation of war—is particularly compelling. The book also includes discussions of the Kennedy assassination, the Persian Gulf War, the Challenger explosion, and the Rodney King beating. While debunking the image of the United States as a culture of amnesia, Sturken also shows how remembering itself is a form of forgetting, and how exclusion is a vital part of memory formation.

aids red ribbon history: *The Rise and Fall of Gay Culture* Daniel Harris, 1999 As gay culture is being increasingly assimilated into straight culture, is it losing its subversive edge, its very reason for being? A spirited journey through gay life that delights and enlightens.--San Francisco Chronicle.

aids red ribbon history: *Hearing Happiness* Jaipreet Viridi, 2020-08-31 Weaving together lyrical history and personal memoir, Viridi powerfully examines society's—and her own—perception of life as a deaf person in America. At the age of four, Jaipreet Viridi's world went silent. A severe case of meningitis left her alive but deaf, suddenly treated differently by everyone. Her deafness downplayed by society and doctors, she struggled to "pass" as hearing for most of her life. Countless cures, treatments, and technologies led to dead ends. Never quite deaf enough for the Deaf community or quite hearing enough for the "normal" majority, Viridi was stuck in aural limbo for years. It wasn't until her thirties, exasperated by problems with new digital hearing aids, that she began to actively assert her deafness and reexamine society's—and her own—perception of life as a deaf person in America. Through lyrical history and personal memoir, *Hearing Happiness* raises pivotal questions about deafness in American society and the endless quest for a cure. Taking us from the 1860s up to the present, Viridi combs archives and museums to understand the long history of curious cures: ear trumpets, violet ray apparatuses, vibrating massagers, electrotherapy

machines, airplane diving, bloodletting, skull hammering, and many more. Hundreds of procedures and products have promised grand miracles but always failed to deliver a universal cure—a harmful legacy that is still present in contemporary biomedicine. Blending Viridi's own experiences together with her exploration into the fascinating history of deafness cures, *Hearing Happiness* is a powerful story that America needs to hear. Praise for *Hearing Happiness* "In part a critical memoir of her own life, this archival tour de force centers on d/Deafness, and, specifically, the obsessive search for a "cure". . . . This survey of cure and its politics, framed by disability studies, allows readers—either for the first time or as a stunning example in the field—to think about how notions of remediation are leveraged against the most vulnerable." —Public Books "Engaging. . . . A sweeping chronology of human deafness fortified with the author's personal struggles and triumphs." —Kirkus Reviews "Part memoir, part historical monograph, Viridi's *Hearing Happiness* breaks the mold for academic press publications." —Publishers Weekly "In her insightful book, Viridi probes how society perceives deafness and challenges the idea that a disability is a deficit. . . . [She] powerfully demonstrates how cures for deafness pressure individuals to change, to "be better." —Washington Post

aids red ribbon history: Historical Painting Techniques, Materials, and Studio Practice Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled *Historical Painting Techniques, Materials, and Studio Practice* at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

aids red ribbon history: A Prayer Book for Australia , 1995-01-01 Content: Sunday Services, The Liturgical Psalter, Daily Prayer, The Church's Year, Pastoral Services, The Ordinal, Supplementary Material.

aids red ribbon history: Witness to AIDS Edwin Cameron, 2010 When Edwin Cameron announced to a stunned local and international media that he - one of South Africa's most prominent citizens - was himself living with the virus cutting swathes through the population of the continent, the impact was immediate. In this memoir, he grapples with the meaning of HIV/AIDS: for him as he confronts the possibility of his own lingering death, and for all of us in facing up to one of the most desperate challenges of our time. Cameron blends elements of his destitute childhood with his daily duties as a judge and human rights lawyer, while focusing on the epidemic's central issues: stigma, unjust discrimination, and, most vitally, the life-and-death question of access to treatment. 2005.

aids red ribbon history: Yankee Women Elizabeth D. Leonard, 1994 Tells the stories of three Northern women who radically changed America's central notions about gender during the Civil War.

aids red ribbon history: Global and Local Art Histories Celina Jeffery, Gregory Minissale, 2009-03-26 There are now many books on postcolonial theory, yet relatively few of them gather together sustained, dynamic and insightful analyses of visuality, art and art history outside of hegemonic Euro-American themes and concerns. *Global and Local Art Histories* explores what it means to have a global and local experience of art. The 15 essays published here suggest ways of interpreting works of art from a broad range of cultural perspectives, many of them transcultural. Here are voices contesting concepts of history and culture, evaluating and exploring global and local identities in a changing world. Because of the variety of different approaches and cultural perspectives that *Global and Local Art Histories* brings together, the book presents a unique opportunity to question what we mean by that dangerously globalising category: "the work of art" and "art history" exploring "g-local" approaches that challenge such falsely universalising rubrics.

aids red ribbon history: Fighting for Our Lives Nick Cook, 2020-02 *Fighting For Our Lives* is the inspirational story of communities directly affected by the AIDS crisis. Against a harrowing backdrop of illness and death, fear and anger, hate and discrimination, they bravely took action. During the darkest years of the epidemic, marginalised communities - mostly gay men, sex workers and people who inject drugs - came together to form organisations that gave them a voice in the corridors of power. They built an unprecedented alliance with politicians and medical experts, a three-way partnership that made Australia's response to AIDS one of the most successful in the world. *Fighting For Our Lives* captures the high-stakes drama of this extraordinary period and the stories of the people at the very centre of a life-or-death struggle. It is a gripping read, an important story, and one that must never be forgotten.

aids red ribbon history: Retroviruses John M. Coffin, Stephen H. Hughes, Harold Varmus, 1997 For over 25 years the study of retroviruses has underpinned much of what is known about information transfer in cells and the genetic and biochemical mechanisms that underlie cell growth and cancer induction. Emergent diseases such as AIDS and adult T-cell lymphoma have widened even further the community of investigators directly concerned with retroviruses, a development that has highlighted the need for an integrated understanding of their biology and their unique association with host genomes. This remarkable volume satisfies that need. Written by a group of the field's most distinguished investigators, rigorously edited to provide a seamless narrative, and elegantly designed for clarity and readability, this book is an instant classic that demands attention from scientists and physicians studying retroviruses and the disorders in which they play a role.

aids red ribbon history: HIV/AIDS and the Security Sector in Africa Obijiofor Aginam, Martin Revai Rupiya, 2012 Throughout history, communicable diseases have devastated armies and weakened the capacity of state institutions to perform core security functions. Today, the HIV/AIDS epidemic in Africa has prompted many of the affected countries to initiate policies aimed at addressing its impact on their armed forces, police, and prisons. This volume explores the dynamics of how the security sectors of selected African states have responded to the complex and multifaceted challenges of HIV/AIDS. Current and impending African HIV/AIDS policies address a range of security-related issues: * The role of peacekeepers in the spread or control of HIV * The dilemma of public health (the need to control HIV) versus human rights (protection against mandatory medical testing) needs * The gender dimensions of HIV in the armed forces * The impact of HIV on the police and prisons The chapters in *HIV/AIDS and the Security Sector in Africa* are written by African practitioners, including commissioned officers who are currently serving in the armed forces, medical officers and nurses working in the military, and African policy and academic experts. While the book does not comprehensively address all aspects of the impact of HIV/AIDS on the security sector, the contributors nonetheless highlight the potentials and limits of existing policies.

aids red ribbon history: Imagine Hope Simon Watney, 2002-09-11 Presents a chronological selection of Watney's writings from the 1990s, with new contextualising introductory and concluding

essays and offers a chronicle of the changing and often confusing course of the epidemic.

aids red ribbon history: *AIDS and Social Policy in China* Joan Kaufman, Arthur Kleinman, Anthony Saich, 2020-10-26 This first English language book on China's AIDS epidemic provides a picture of the current state of the epidemic, a social science and interdisciplinary perspective on gaps in the response, and a blueprint for needed actions. The book's editors are leading experts on China's AIDS epidemic, health and political systems. Contributors comprise some of the world's leading Chinese and international researchers, policy-makers, and civil society representatives working on HIV/AIDS in China. The multi-disciplinary work provides a critically needed social science perspective and analysis of the epidemic, offers a framework for thinking about the spread of HIV in China, and includes suggestions for an effective policy response that also addresses social determinants.

aids red ribbon history: *Common Enemies* Rachel Kahn Best, 2019-07-01 For over a hundred years, millions of Americans have joined together to fight a common enemy by campaigning against diseases. In *Common Enemies*, Rachel Kahn Best asks why disease campaigns have dominated a century of American philanthropy and health policy and how the fixation on diseases shapes efforts to improve lives. Combining quantitative and qualitative analyses in an unprecedented history of disease politics, Best shows that to achieve consensus, disease campaigns tend to neglect stigmatized diseases and avoid controversial goals. But despite their limitations, disease campaigns do not crowd out efforts to solve other problems. Instead, they teach Americans to give and volunteer and build up public health infrastructure, bringing us together to solve problems and improve our lives.
