aimsweb plus administration and scoring guide: *Curriculum-based Measurement* Mark R. Shinn, 1989-03-17 Developed specifically to overcome problems with traditional standardized instruments, curriculum-based measurement (CBM) has steadily increased in educational use. These

brief assessment probes of reading, spelling, written expression, and mathematics serve to quantify student performance as well as to enhance academic achievement. Their widening use as a means of evaluation and ultimately of instruction, has created a corresponding need to expand the applications of this methodology to diverse populations. This new volume addresses that need by focusing on the broader application of CBM, providing practical new measures, as well as detailing their use with specific student groups.

aimsweb plus administration and scoring guide: *Math Exchanges* Kassia Omohundro Wedekind, 2011 Traditionally, small-group math instruction has been used as a format for reaching children who struggle to understand. Math coach Kassia Omohundro Wedekind uses small-group instruction as the centerpiece of her math workshop approach, engaging all students in rigorous math exchanges. The key characteristics of these mathematical conversations are that they are: 1)

short, focused sessions that bring all mathematical minds together, 2) responsive to the needs of the specific group of mathematicians, and 3) designed for meaningful, guided reflection. As in reading and writing workshop, students in math workshop become self-directed and independent while participating in a classroom community of learners. Through the math exchanges, students focus on number sense and the big ideas of mathematics. Teachers guide the conversations with small groups of students, mediating talk and thinking as students share problem-solving strategies, discuss how math works, and move toward more effective and efficient approaches and greater mathematical understanding. Although grounded in theory and research, *Math Exchanges: Guiding Young Mathematicians in Small Group Meetings* is written for practicing teachers and answers such questions as the following: How can I use a math workshop approach and follow a certain textbook or set of standards? How should I form small groups? How often should I meet with small groups? What should I focus on in small groups? How can I tell if my groups are making progress? What do small-group math exchanges look like, sound like, and feel like?

aimsweb plus administration and scoring guide: Systematic Screening for Behavior Disorders (SSBD) Hill M. Walker, Herbert H. Severson, 1992-01-01 This kit presents the Systematic Screening for Behavior Disorders (SSBD) as a tool to identify behavior disorders in elementary-aged students. The SSBD procedure is a three-stage, multiple-gating mass screening system. In the first stage the teacher systematically ranks all students according to either externalizing or internalizing behavioral profiles. In the second stage, the three highest ranking students from each of the two dimensions are evaluated by the teacher using two rating scales. In the third stage, any students identified by stage 2 criteria are further evaluated by another school professional using structured observation and recording procedures in both the classroom and playground settings. Students who exceed stage 3 cutoff scores are referred to child study teams. The kit contains a user's guide and administration manual, a technical manual reporting psychometric properties of the SSBD, an observer training manual, and multiple copies of the screening instruments. aimsweb plus administration and scoring guide: A Wildlife Collection Kurt L. Krueger, 2011-06-15 A collection of twenty-first-century wildlife and nature photos help illustrate the legacy of Wisconsin's storied conservation ethic, highlighted by the pioneering days of Aldo Leopold and the birth of wildlife ecology in America. This coffee-table book features an incredible collection of more than 150 photographs taken in the first decade of the new century-proof of Wisconsin's rich history of conserving its woods, water, and wildlife. The largest chapters offer photos and history on endangered eagles, loons, and ospreys, but the book goes well beyond, featuring albino deer and squirrels, owls, hawks, herons, cranes, swans, black bears, red fox, and playful otters. Its twelve chapters include upland birds, white-tailed deer, and backyard visitors. The book's story line speaks to Wisconsin's rich outdoor heritage and its history of conservation leadership. It chronicles many areas where the state led the nation, from being the first to ban market hunting of many species to the first to develop wildlife management.
